Future, sustainability and **innovation** at the heart of **CARL ROTH.**

Managing Director
André Houdelet

A challenging year lies behind us as we look forward into the new business year 2022 with drive and optimism. The pandemic has challenged us all; we must be ready to adapt to the situation at any moment and to react immediately to any new developments, so that we can serve you as quickly and reliably as ever. The satisfaction of our customers and staff is always our top priority. This is why we continually optimise our range, designing it to suit you.

This year, we will continue to offer you catalogues in both digital and physical formats, as well as special offers. We have divided our catalogue into two sections to help you find the products you need even more quickly and easily: Life Sciences/Chemicals and laboratory equipment. You can choose from an extensive range of laboratory equipment.

As always, you will find a wide variety of existing and new products to make your everyday work easier. If you require suitable life sciences products or chemicals, simply take a look at our corresponding catalogue.

What‘s more, our online shop is always available and well-stocked; here, you can purchase your products efficiently and easily. Our ordering processes are designed with you in mind. It offers a wealth of information, documents, images and videos on many of our products. In addition, we are more than happy to provide you with individual support and are here to help whenever you need us.

We would like to take this opportunity to thank you for your loyalty and ever-successful cooperation. We look forward to remaining your reliable partner in the laboratory equipment and chemicals sector this year.

Kind regards,
André Houdelet

Your partner for high-quality performance

With 5 plus points to your advantage:

Quality

All products in the ROTH product range are subjected to strict in-house checks. This enables us to ensure you receive consistently high product quality.

Logistics

Direct dispatch! Delivery fast, simple and reliable!

Special rates & Discount

Fair and calculable, i. e. a quantity discount of 5 % from 6 packs and 10 % from 24 packs of same items will be granted. Please check with us for special rates on bulk amounts or standing orders.

Customer advice

Customer proximity and competence, i. e. we are here to advise you before and after buying.

Returned & Take-Back Goods

You can take advantage of our 10-day exchange and take-back guarantee. Just send the goods to us in their original packaging together with a copy of the invoice or delivery note and your modified order. We are unfortunately unable to pay the costs for postage and packing. We request you to get in touch with us for any legitimate complaints which require goods to be returned. We shall then authorize our forwarding agent immediately to pick up the goods in question. In the event of goods being returned independently and without prior notice, postage and packing costs can only be refunded for the same amount as agreed upon with our forwarding agent. Further information on returning goods can be found in the terms of sale and delivery at the back of this catalogue.

Discover the **CARL ROTH** webshop.

Comprehensive product information, recommendations, images, videos, certificates of analysis, special offers and the most up-to-date prices are available at www.carlroth.com.

A private enterprise with tradition

Best service for 143 years

1879

CARL ROTH is established as a “material goods, colonial goods and dyes merchant and chemists” in Karlsruhe.

1891

CARL ROTH is appointed as an “official purveyor to the Grand Duke of Baden“.

1899

ROTH publishes its first sales and mailorder catalogue.

1907

CARL ROTH operates the first delivery van in Karlsruhe.

1928

The laboratory chemicals department opens.

Quality, Environment, Safety

We take responsibility

Our QM system celebrated its 25th birthday in 2020. Over this time, we have continuously adapted our QM system to the growing market demands in order to meet quality requirements and to continue to deliver a high standard of quality.

CERTIFICATE

The Certification Body
of TÜV SÜD Management Service GmbH
certifies that

Carl Roth GmbH + Co. KG
Schoemperlenstraße 1-5, 76185 Karlsruhe
Germany
An der Mole 5, 76187 Karlsruhe
Germany

has established and applies
a Quality and Environmental Management System
for the following scope of application:

Development, production and distribution of labware and chemicals.

Performance of audits (Order No. 70001407)
has furnished proof that the requirements under:

ISO 9001:2015
ISO 14001:2015

are fulfilled.

The certificate is valid from 2019-07-06 until 2022-07-05.
Certificate Registration No.: 12 100/104 20247 TMS.

Product Compliance Management
Munich, 2019-06-27

The guiding principle for an environmentally conscious corporate management has always been a fundamental part of our business conduct. In addition to fulfilling our statutory environmental commitments, therefore, we always strive to define environmental protection targets and to optimise our operating procedures taking into account environmental aspects.

Our certified environmental management system helps us to systematically pursue this aim.

By participating in the *Responsible Care*® programme of the chemical industry, we have undertaken a commitment to meet the goals set by the programme.

These goals are to promote sustainability, to show product responsibility, to ensure safety, to improve health protection in the workplace and to better protect the environment.

Innovative use of combined heat and power technology when printing this product reduced CO_2 emissions by up to 52% in comparison to conventional methods in Germany.

minus 52% CO_2

SOLVAGREEN® - Green Solvents
Our brand for alternative solvents

Green Solvents serve as an alternative for environmentally hazardous and harmful reagents, and thus contribute to risk minimisation.

1945

The highly efficient manufacturing and bottling department enters service.

1958

ROTH unveils its proprietary high-pressure laboratory autoclaves at the ACHEMA Fair.

1971

ROTH is awarded a patent on its Mercurisorb-ROTH® high-speed mercury absorber.

1989

The „Association of Independent Businesses“ presents its award to ROTH in recognition of its environmentally friendly business practices.

1990

CARL ROTH publishes its first general product catalogue for its Labware, Life Science and Chemicals product lines.

Plastics – Technical data / Key to symbols

What about the packaging material?

We are making our contribution to the environment:

- By trying to use as little packaging material as possible. Unfortunately we cannot do without packaging completely as it has the important function of not only protecting the product, but also man and environment from any harm.

- By using environmentally friendly and recyclable packaging material as far as possible. As early as the beginning of the 80s, we stopped using polystyrene inserts for packing solvents, acids and alkaline aolution. We now use special boxes for hazardous goods made of 100 % recyclable corrugated cardboard. Paper is used as stuffing material.

Please also help by putting the **packaging in the recycling container after use**. Our boxes are labelled with the recy-symbol; they can be easily stored when cut open and pressed together without taking up much space, prior to being put out for recycling.

Our **plastic containers made of polyethylene (PE)** can also be turned in for recycling after they have been completely emptied and cleaned of all harmful substances.

The same applies to **tin flasks and canisters** once emptied and pollutent-free.

Sterilizing plastics – Autoclaving

Recommended autoclave cycle:
20 minutes at 121 °C, 1 bar

1. Clean autoclave goods thoroughly prior to sterilizing.
2. Rinse off used detergent with distilled water.
3. Unscrew caps to enable pressure compensation.
4. Only autoclave containers with stop-cock when empty, screw off stop-cocks.

   Following plastics can be autoclaved repeatedly: ETFE, PFA, PTFE, FEP, E-CTFE, PMP/TPX®, PP, SI, PVDF; PES, PSU

Note:
Polycarbonate PC and Polysulfone PSU are also autoclavable, however this reduces the mechanical stability. This can result in material failure particularly when under high mechanical strain, e.g. during centrifuging.

Please contact us should you have any further questions regarding packaging.

1993

Construction of a modern high-bay warehouse.

1995

First certification of the quality management system to DIN EN ISO 9001.

2005

The chemicals department moves into modern premises on the Karlsruhe-Rheinhafen industrial estate.

2013

An extension with an automated small parts warehouse is added to the Chemicals and Life Science building, enlarging its area to approx. 8,000 m². CARL ROTH now stocks over 21,000 products in its warehouse.

Abbreviations / temperature resistance of plastics

DIN-Abbrev.	Description	Application temperature (°C)		
		from	to

Temperature in ( ) short-term

All data in this table are approximate data and refer exclusively to raw plastic products; they can therefore only be regarded as indicative recommendations. As the temperature resistance may vary with different conditions of manufacturing or chemical influences, suitability tests by the user are highly recommanded.

No legal claims can be derived from this information; nor do we accept any liability for it.

Key to symbols

NEW / + — News and programme extensions

A 121 °C — Autoclavable products. Please also note any additional instructions when autoclaving.

Temperature resistance:
Safe to freeze (approx. -10/-20 °C)

Suitable for low temperatures (approx. -70/-80 °C)

Suitable for liquid nitrogen (gaseous phase / -196 °C)

See catalogue text for detailed information.

ready-to-use — Ready-to-use products and reagents

S — Sterile products

All products identified as being particularly temperaturesensitive are shipped **in special ice boxes with freezer packs or in dry ice.**

ROTH for Future — Products, with optimised manufacturing process in terms of sustainability.

2014
Succsesfull participation in the ECOfit programme sponsored by the state of Baden-Württemberg.

2014
Participation in the Responsible Care® programme.

2015
Relaunch of the new ROTH Online Shop.

2016
Certification of the corporate environmental management system according to ISO 14001 for the sustainable environmental protection.

2019
140th anniversary of CARL ROTH.

2020
Opening of the third plant with new logistics centre and automatic small parts warehouse and approx. 7,000 m² of additional storage space.

DURAN
WHEATON
KIMBLE

Excellence in your hands

DURAN Group is DWK Life Sciences

Since the 1st June 2017, the companies DURAN Group, WHEATON Industries and KIMBLE Chase united under the new company name DWK Life Sciences. DWK Life Sciences is now a leading international manufacturer of premium laboratory products, packaging and storage solutions for a broad range of scientific and technical applications. The offer of DWK Life Sciences covers more than **25,000 laboratory products, which are manufactured at 12 locations** and marketed under the renowned brands **DURAN®, WHEATON®** and **KIMBLE®**. The leading global and field-tested range of laboratory products is supplemented by an innovative research and Life Science portfolio

The material of glass

General properties

In comparison with other materials such as stainless steel or plastic, glass offers near-universal chemical resistance to water, saline solutions, acids, alkalis and other organic solvents. It is only affected by hydrofluoric acid and at increased temperatures by strong alkalis and concentrated phosphoric acids.
Glass is dimensionally stable and safe even at high temperatures and does not release harmful substances when heated. Glass also exhibits high transparency.
In the laboratory, various types of glass are used depending on application. These are chiefly soda-lime glass (AR®-glass) as well as various types of borosilicate glass.

Soda-lime glass has less chemical and thermal load capacity than borosilicate glass. Due to its high thermal expansion, soda-lime glass has a low thermal shock resistance and can incur stresses and crack when heated or cooled. Soda-lime glass is well suited to applications involving temporary chemical contact at room temperature as well as to disposable articles.

Borosilicate glass is to a large extent chemically inert and suitable for use up to very high temperatures. The various types of borosilicate glass mainly differ from one another in terms of their linear coefficient of expansion and hence their resistance to changes in temperature. The most commonly used types of borosilicate glass are borosilicate glass 3.3 (DURAN®, SIMAX), borosilicate glass 4.9 (Fiolax®) and borosilicate glass 5.1.

The following factors are critical to the quality of laboratory glassware:

- The glassware and glass type
- The shape obtained during the production process
- Even distribution of wall thickness in all areas of the article (particularly in critical areas such as in the neck/shoulder area and at the transitions to the base). This ensures:
  - better mechanical stability
  - higher thermal shock resistance
  - freedom from stresses, which can cause the vessel to burst when heated

These quality characteristics not only increase safety for employees in the laboratory, but also extend the useful life of the laboratory glassware and protect valuable substances.

Comparison of DURAN® and soda-lime glass

Chemical properties:

	DURAN®	Soda-lime glass
Chemical composition	81 % SiO_2 13 % B_2O_3 4 % Na_2O/K_2O 2 % Al_2O_3 No added heavy metals	69 % SiO_2 1 % B_2O_3 3 % K_2O 4 % Al_2O_3 13 % Na_2O 2 % BaO 5 % CaO 3 % MgO
Hydrolytic resistance to DIN ISO 719	Class 1	Class 3
Acid resistance to DIN 12116	Class 1	Class 1
Alkali resistance to ISO 695	Class 2	Class 2

Physical properties:

Transformation temperature [°C]	525	
Coefficient of expansion α (20 to 300 °C) [10^{-6} K^{-1}]	3,3	9,1

Usage instructions:

Max. allowable usage temperatures	500 °C	ca. 100 °C
Maximum negative temperature	-70 °C	ca. 0 °C
Maximum temperature difference ΔT	100 K	30 K
Use in the microwave	Suitable	Unsuitable
Pressure and vacuum operation	Only products indicated as such are suitable for use under pressure/vacuum due to their geometry and wall thickness (e.g. suction bottles, dessicators, DURAN® pressure plus bottles)	Unsuitable
Cleaning in dishwashers	Suitable	Unsuitable

The thermal shock resistance of glass is dependent on the shape, wall thickness, surface characteristics and finish of the glassware used.

Rapid changes in temperature cause high temporary stress in the glass, meaning that rapid cooling processes are very dangerous, since in this case a thin outer layer of the glass is placed under tensile stress over the still hot inner core. Glass is much more susceptible to tensile stress than to compressive stress.

DURAN® is much more resistant to rapid changes in temperature than soda-lime glass due to its lower thermal expansion.

Laboratory glass

The special features of DURAN®

Very high chemical resistance, nearly inert behaviour, a high usage temperature, minimal thermal expansion and the resultant high resistance to thermal shock are its most significant properties. Excellent physical and chemical performance makes DURAN® the ideal material for use in the laboratory and for the manufacture of chemical apparatus used in large-scale industrial plants. It is also widely used on an industrial scale in all other application areas in which extreme heat resistance, thermal shock resistance, mechanical strength and exceptional chemical resistance are required. The properties of DURAN® meet the specifications of DIN ISO 3585. Compared to other types of borosilicate 3.3. glass, DURAN® is noted for its highly constant and technically reproducible quality.

Chemical properties

DURAN® glass is more chemically resistant that all other known materials. DURAN® borosilicate glass is highly resistant to water, acids, saline solutions, organic substances and halogens, such as chlorine or bromine. It also has good resistance to alkaline solutions.
Only hydrofluoric acid, concentrated phosphoric acid and strong alkalis break down the glass surface (glass corrosion) at temperatures >100 °C. Their near-inert behaviour means that there are no interactions (e.g. ion exchange) between the medium and glass and it is thus possible to practically rule out any influence on the experiments.

Physical Properties:

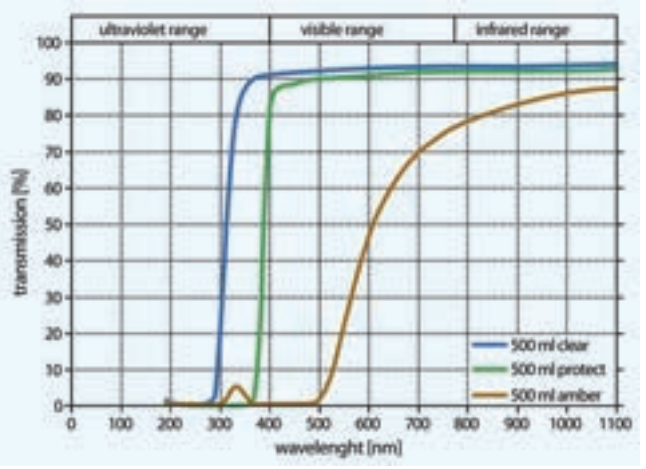
Temperature stability under heating

The maximum permissible operating temperature for DURAN® is 500 °C. As it has a very low coefficient of linear expansion (α = 3.3 x 10^{-6} K^{-1}), a feature of DURAN® is its high thermal shock resistance up to ΔT = 100 K. This is also dependent on the wall thickness and the geometry of the products.

Temperature stability under freezing

DURAN® can be cooled down to the maximum possible negative temperature and is thus suitable for use with liquid nitrogen (approx. -196 °C). When doing so, bear in mind the product geometry and the properties of any additional components used (e.g. screw caps). In general, DURAN® products are recommended for use down to -70 °C.
When cooling down and thawing, care must be taken to ensure that the temperature difference does not exceed 100 K. In practice, therefore, it is recommended that they be cooled and heated gradually.
When freezing substances such as DURAN® bottles, the container should only be filled to max. 3/4 full and frozen at an angle of 45 ° (in order to enlarge the surface area).

Use in the microwave



DURAN® laboratory glassware is suitable for use in microwaves. This also applies to plastic coated DURAN® products.

Conformity with standards and guidelines

DURAN® is a neutral glass with high hydrolytic resistance and therefore belongs to glass type 1 according to the European Pharmacopoeia (EP, Section 3.2.1), the Japanese Pharmacopoeia (JP, Section 7.01), the United States Pharmacopeia (USP, Section: 660) and the National Formulary. In addition to being in conformity with the DIN ISO 3585 international standard, in which the properties of borosilicate glass 3.3 are defined, many items of DURAN® laboratory glassware meet the standards for glass laboratory equipment.

Optical properties

In the spectral range from approx. 310 to 2200 nm the absorption of DURAN® clear glass is negligibly low. In photochemical processes the light transmission of DURAN® in the ultraviolet range is of particular importance. The transmissivity in the UV range indicates the ease with which photochemical reactions, such as chlorinations and sulfochlorinations, can be carried out. The chlorine molecule absorbs in the range from 280 to 400 nm and thus serves as a carrier of the radiation energy.

Amber colouring of DURAN® laboratory glassware

The amber colouring allows the storage of light-sensitive substances in DURAN® products. In the wavelength band between 300 and 500 nm, light transmission compared to DURAN® clear glass is <10 %. Accordingly, the amber DURAN® glass meets USP/EP/JP guidelines. Since the amber diffusion ink is applied to the outside of the clear glass article by means of spray coating, the proven DURAN® properties inside the bottle remain unaffected; there is no contact or interaction between contents and amber coating.
The coating is then stove enamelled, and therefore is resistant to chemicals and cleaning in a dishwasher.

Safety instructions

DURAN® glassware is safe to use. The guidelines applicable for the use of special glass in laboratories in the country in question should always be observed. The following points should, however, always be observed:

- Before using DURAN® laboratory glassware, it should be checked to ensure that it is suitable for the intended purpose and that it will function properly.
- Faulty laboratory glassware can present a hazard (e. g. risk of cuts, burns, infection) which should not be underestimated. If appropriate repairs to any item cannot be carried out or cannot be justified on grounds of cost, it must be disposed of in the proper manner (as household waste or, depending on possible contamination, in accordance with the applicable guidelines; never as waste glass).
- Glassware should only be subjected to sudden changes in temperature taking into account a thermal shock resistance of ΔT=100K. This applies in particular to thick-walled glassware, such as suction bottles or dessicators.
- Make sure that apparatus stands firmly and is not subjected to stress by using appropriate support material.

Glass beakers

Beaker DURAN®

DWK Life Sciences. Material: DURAN® glass. Autoclavable: Yes.

Graduated, with a spout (Art. No. C108.1 and C109.1 not graduated). According to DIN 12331, ISO 3819 (Art. No. C122.1 not according to DIN). With retrace code.

Beaker DURAN® Super Duty

DWK Life Sciences. Material: DURAN® glass. Autoclavable: Yes.

- Proven DURAN® properties
- Glass type I, Neutral glass according to USP, EP and JP
- High mechanical stability
- Reinforced, stable rim
- Regular wall-thickness
- Autoclavable, sterilisable
- With retrace code
- Easily readable scale
- Fired-on highly durable labelling

A 121 °C DURAN WHEATON KIMBLE

Notes for use:
To avoid thermal stresses in the glass, uniform and slow heating of Super Duty products is recommended. When working at very high temperatures, or if rapid temperature changes are expected, standard DURAN® beakers and Erlenmeyer flasks should be used, as these have excellent thermal shock resistance. However, their mechanical sturdiness is limited compared with the Super Duty range.

Silicone covers DURAN®

DWK Life Sciences. Material: Silicone. Autoclavable: Yes.

For covering and closing vessels with different shapes. Thanks to its outstanding elasticity, the DURAN® silicone cover can be used for covering various vessel diameters and shapes. The wide overlapping edge of the silicone cover engages well with the vessel wall.

- Protects against dust entering or the medium spraying out
- Samples can be marked easily using different colours and an additional labelling field on the tab
- Easy to clean, dishwasher-safe and reusable, therefore environmentally friendly and economical

Erlenmeyer flasks DURAN® Super Duty

DWK Life Sciences. Material: DURAN® glass. Autoclavable: Yes.

- Proven DURAN® properties
- Glass type I, neutral glass according to USP, EP and JP
- High mechanical stability
- Reinforced, stable rim
- Regular wall thickness
- Autoclavable, sterilisable
- With retrace code
- Easily readable scale
- Fired-on highly durable labelling

A 121 °C

DURAN WHEATON KIMBLE

Notes for use:
To avoid thermal stresses in the glass, uniform and slow heating of Super Duty products is recommended. When working at very high temperatures, or if rapid temperature changes are expected, standard DURAN® beakers and Erlenmeyer flasks should be used, as these have excellent thermal shock resistance. However, their mechanical sturdiness is limited compared with the Super Duty range.

Erlenmeyer flasks made of fluoroplastics

Saint-Gobain. Material: PFA, highly transparent. Autoclavable: Yes.

Graduated. Microwave-safe.

- Temperature stable from -196 to +250 °C
- Inert to virtually all chemicals, including hydrofluoric and nitric acid
- High purity, low metal ion content, ideal for use in trace analysis and for the storage of highly pure substances
- No memory effect
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning

Measuring cylinders

Saint-Gobain. Material: PFA, Highly transparent. Autoclavable: Yes.

With easy-to-read graduations and wide base.

- Temperature resistant in the range -196 to +250 °C
- Inert to virtually all chemicals, including hydrofluoric and nitric acid
- High purity, low metal ion content, ideal for use in trace analysis and for the storage of highly pure substances
- No memory effect
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning

DURAN WHEATON KIMBLE

Volumetric flasks DURAN® class A, USP<31>

DWK Life Sciences. Material: DURAN® glass, clear.

With blue graduations and white ring marking. Calibrated to IN. Acc. to DIN 12 600. USP<31> compliant, conformity certification and USP individual certificate enclosed. Temperature-stable up to +250 °C without change in volume.

Delivery incl. PE stopper, temperature-stable from -40 to +80 °C.

A 121 °C

Volumetric flasks with screw cap, class A

Vitlab. Material: PFA. Autoclavable: Yes.

With ring marking individually calibrated to “IN”. Tolerance class A acc. to DIN EN ISO 1042. Exposure to temperatures up to 121 °C (autoclaving) will not cause tolerance limits to be permanently exceeded.

Transparent

High temperature and chemical resistance. Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning. High purity, ideal for use in trace analysis and for storage of reference solutions. No memory effect.

Screw top bottle DURAN® brown glass

DWK Life Sciences. Material: DURAN® glass. Autoclavable: Yes.
Amber coloured with unaltered DURAN® characteristics inside the bottle as only the exterior is coated. Long useful life and brown colouring has good chemical resistance. Light protection: Absorption in short wave range up to 500 nm.

- With DIN GL thread and pitch
- Bottles up to 25 ml, with a specially shaped glass edge, so no pouring ring is required
- Bottles from 100 to 2000 ml: Ring-shaped reinforcement in the bottles' shoulder, shows the bottles' nominal content
- With printed retrace code (batch code)
- Acc. to ISO 4796-1

Glass bottles

Screw top bottle DURAN® Protect

DWK Life Sciences. Material: DURAN® glass, PU-coated.
Autoclavable: Yes.

Acc. to 4796-1. The plastic casing protects against mechanical damage (scratch protection), minimises loss of fluid in the event of glass breakage (leak and splash protection), prevents scattering of glass shards and provides light protection up to a wavelength of 380 nm. With retrace code.
Temperature stability -30 to +135 °C. Microwave safe.

A 121 °C

DURAN WHEATON KIMBLE

Note:
Do not expose DURAN® Protect bottles to naked flames or direct heat. Avoid continuous thermal exposure for longer than 30 min. DURAN® Protect bottles can be cleaned in industrial dishwashers (average resistance: 30 cycles at max. 95 °C). Autoclavable at 121 °C and 1.1 bar for 20 minutes (average resistance: 30 cycles).

Glass bottles

121 °C DURAN WHEATON KIMBLE

Screw top bottles DURAN® Premium

DWK Life Sciences. Material: DURAN® glass, transparent. Autoclavable: Yes.

Acc. to 4796-1. Pouring ring and screw cap without colour additives and colour pigments. Temperature stability -196 to +260 °C. Especially suited to demanding sterilisation processes like, for example, hot air or dry sterilisation and depyrogenisation, thanks to the guaranteed temperature change resistance of 160 K.
Corresponds to USP/FDA standards. Scaling accurate up to ±5%. Additional reverse scale allows you to read off the current fill level and the amount removed. With retrace code. Autoclavable.

Delivery incl. pouring ring and screw cap made from TPCh260 with PTFE-coated silicone seal.

Delivery incl. batch certificate

Glass bottles

Screw top bottle DURAN® YOUTILITY

DWK Life Sciences. Material: DURAN® glass. Autoclavable: Yes.

- Specially shaped recessed grips for easier and safer handling
- Slim bottle shape allows more space-saving use
- Scale indicating total volume
- Predefined labelling space
- Ergonomically shaped screw cap with leak-proof sealing system for optimal handling, even by users with small or gloved hands
- Optimised thread (compatible with DIN GL 45 closures) for faster bottle opening and closing
- With retrace code

Delivery incl. optimised screw cap and PP pouring ring.

Labels DURAN® YOUTILITY can be printed on

DWK Life Sciences. Material: Polyester.

High adhesive strength, easy to remove again. Can be printed on with office printers or photocopiers and can be written on with most laboratory pens. High resistance to disinfectants and solvents. Suitable for use in refrigerators, freezers, autoclaves, incubators and water baths. Web-app for individual design, available at: www.duranlabels.com. Dimensions: 36 x 70 mm. Temperature stability -40 to +150 °C. Delivered in resealable packaging on DIN A4 sheets (five sheets of 20 labels).

Wide mouth bottle DURAN® GLS 80 Protect

DWK Life Sciences. Material: DURAN® glass, PU-coated, clear. Autoclavable: Yes.

With labelling space, graduations and retrace code. Large inside neck Ø (65 mm) makes it safe to fill and remove powders, paste-like media, granulate and liquids.
The plastic casing protects against mechanical damage (scratch protection), minimises loss of fluid in the event of glass breakage (leak and splash protection) and prevents scattering of glass shards. Light protection up to a wavelength of 380 nm.
Temperature stability -35 to +135 °C. Microwave safe.

Note: Do not expose DURAN® Protect bottles to naked flames or direct heat. Avoid continuous thermal exposure for longer than 30 min.

Glass bottles

Wide mouth screw top bottle DURAN® PURE GLS 80®

DWK Life Sciences. Material: DURAN® glass (borosilicate glass 3.3, type I). Autoclavable: Yes.

High-quality wide mouth screw top bottle with GLS 80 thread. Developed for the needs of the pharmaceutical and biotech industry. The 80-mm-wide external diameter of the bottle neck opening allows easy filling and emptying of bottles. DWK Life Sciences provides analysis certificates with every delivery, guarantees 100% traceability and change control management. DURAN® PURE bottles are available with the documentation required by the regulatory authorities and fulfil the requirements of international pharmacopoeias.

- Closed with dust cap to avoid contamination
- With labelling area, graduations and retrace code

NEW / +

A 121 °C

DURAN WHEATON KIMBLE

Applications:

- Suitable for the production of pharmaceutical and biotech products, and for the storage and transport of active substances, intermediate products, excipients and media
- Intended for use with DURAN® PURE GLS 80® quick rel. screw-cap closure

Delivery incl. batch certificate. **Delivery without** screw cap and pouring ring, please order separately.

Glass bottles

HPLC reservoir bottle DURAN® GL 45

DWK Life Sciences. Material: DURAN® glass. Autoclavable: Yes.

Outstanding chemical resistance, extremely low profile of extractable inorganic ions; free from organic extractable substances.
Safe and practical alternative to media bottles with a flat bottom. The central cavity in the base of the bottle enables mobile phases and solvents to be dispensed without having to tilt the bottle. The side opening on the base of the bottle prevents the bottle from floating during degassing in an ultrasonic bath and enables water to drain away after cleaning. With retrace code. Autoclavable at 121 °C or 134 °C.

A 121 °C

DURAN WHEATON KIMBLE

Multi-neck HPLC bottle DURAN® GL 45

DWK Life Sciences. Material: DURAN® glass (borosilicate glass 3.3), screw caps made of PP, blue. Autoclavable: Yes.

Ideal for storage and dispensing of mobile phases and solvents suitable for high performance liquid chromatography (HPLC).

- Practical - side neck allows filling of bottles without removing the main connection. The Hydra multi-neck bottle can take up to five HPLC caps, which increases safety when working and reduces the risk of cross-contamination and air intake
- Safe - closed bottles reduce the risk of escape and spillage of volatile organic compounds (VOC)
- Compatible - GL 45 thread appropriate for standard HPLC-connection caps
- Produced from the material of choice for HPLC solvent bottles: Borosilicate glass 3.3 has a very low profile of extractable inorganic ions
- DURAN® is a borosilicate glass type 3.3 according to the specification in international standard ISO 3585, which is classified according to ASTM-E438-1992 as „borosilicate glass type I, class A with low expansion“
- With Retrace Code and certificate for tracing the production batch
- Long-lasting scaling through permanently fired-on print image
- Autoclavable at 121 °C or 134 °C

121 °C ❄❄❄ DURAN WHEATON KIMBLE

Screw caps DURAN® PURE Premium

DWK Life Sciences. Material: TPCh260 (similar to PFA). Autoclavable: Yes.

With no colour additives. Manufactured in ISO Class 7 clean rooms. Temperature stable from -196 to +260 °C, high chemical resistance. For laboratory bottles with DIN standard thread. Characteristics ideal for application in pharmaceutical industry, for storing aggressive media as well as for demanding sterilisation procedures. FDA and USP-compliant. Autoclavable and hot-sterilisable. With retrace code, batch certificates available.

Standard packaging

Thread	Ø ext. (mm)	Height (mm)	Art. No.	Pack Qty.	€
GL 25	32	22	**HNN1.1**	5 unit(s)	38,85
GL 45	51	26	**HNN2.1**	5 unit(s)	75,05

STERICLIN® sterile barrier system packaging

Caps are sealed in packs of 5 and can be sterilised directly in the STERICLIN® packaging. No pre-cleaning necessary. Can be stored for up to 6 months after sterilising. Can be sterilised by STEAM, EO and FORM sterilisation; the corresponding indicators are imprinted on the STERICLIN® packaging. Recommended sterilisation process: Steam sterilisation with pre-vacuum, from 121 °C for 20 minutes up to 134 °C for 20 minutes.

Quick rel. screw-cap DURAN® PURE GLS 80®

DWK Life Sciences. Material: PSU, with PTFE-coated silicone seal. Autoclavable: Yes.

High-quality quick release screw-cap closure made of PSU in thread size GLS 80. Colour: white. Autoclavable and compatible with other common sterilisation methods. Temperature stable from -45 to +180 °C. DWK Life Sciences provides analysis certificates with every delivery and guarantees 100% traceability and change control management. This DURAN® PURE GLS 80® quick release screw-cap closure is available with the documentation required by the regulatory authorities and fulfils the requirements of international pharmacopoeias.

Applications:

- High-quality cap developed for the needs of the pharmaceutical and biotech industry
- Intended for use with DURAN® PURE GLS 80® wide mouth screw top bottles

Delivery incl. batch certificate.

Ventilation screw caps DURAN® with ePTFE membrane

DWK Life Sciences. Material: PP with welded-in PTFE membrane. Autoclavable: Yes.

The membrane, made of expanded PTFE with a pore size of 0.2 µm enables a sterile gas exchange and prevents aqueous liquids with high surface tension from passing through it.
During the autoclaving process, the caps can be securely screwed on to the laboratory glass bottles.
Autoclavable at 121 °C (20 minutes) or 134 °C (3 minutes).

Applications:

- Pressure equalisation during steam sterilisation/autoclaving of media or buffer solutions in bottles up to a volume of 5 litres
- Sterile gas exchange for aerobic micro-organism, shaken and suspended cell cultures
- Short-term storage of sterilised media
- Storage of gas-forming substances

Bottle stopper DURAN®

DWK Life Sciences. Material: Butyl rubber. Autoclavable: Yes.

Made of bromobutyl rubber. Can be used with all DURAN® laboratory glass bottles with a GL 45 thread. Can additionally be secured with a screw cap with hole (recommended only for non-pressurised applications). Low permeability for air, gases and moisture.
Top side has seven numbered semi-circular depressions to be pierced with tubes, good self-sealing characteristics when pierced repeatedly. Temperature stable from -50 to +121 °C.

Applications:

- Storage of oxygen-sensitive materials
- Applications which require gas flushing or samples to be decanted using a syringe
- Cultures with anaerobic micro-organisms (the use of pressure-resistant bottles is recommended)
- Storage of anaerobic culture media (the use of brown glass bottles is recommended)
- Investigation of aerobic methane oxidation (MOx)

HPLC screw cap b.safe GL 45

Bohlender. Material: PPS, PTFE, PFA. Autoclavable: Yes.

Screw cap for GL 45 bottle thread made of PPS with freely rotating distributor body made of PTFE, selectable with two, three or four connections. Connections with UNF ¼″ 28G inner thread for connecting PFA-fittings for hoses (external diameter 3.2 mm), PFA dummy stoppers for the closure of unnecessary connections or a venting valve with change indicator. Temperature resistance: -20 to +200 °C.

- For removing solvents for HPLC
- Freely rotating distributor bodies, prevents the hoses twisting when replacing the bottle
- Using the fittings, hoses can be introduced up to the base of the bottle; conical nipple clamps the hose and seals reliably at the connection
- The venting valve is specially adapted to the flow rates in HPLC; integrated non-return valve prevents the evaporation of solvents and lets ambient air flow into the bottle in the event of a vacuum. The upstream membrane made of porous PTFE effectively keeps out dirt particles and other contaminations from outside
- Venting valve with change indicator after activation at the press of a button and with labelling area

With two connections

Delivery incl. 1 x fitting (PFA) and 1 x venting valve with change-indicator.

Number of connections	For hoses with outer Ø (mm)	Thread	Art. No.	Pack Qty.	€
2	3.2	UNF ¼″ G28	**1HPC.1**	1 unit(s)	68,45

HPLC screw caps starter box b.safe GL 45

Bohlender. Material: PPS, PTFE, PFA. Autoclavable: Yes.

Initial equipment box for HPLC with four HPLC b.safe screw caps made of PPS each, with freely rotating distributor heads made of PTFE, for GL 45 bottle thread. Selectable with two, three or four connections. The items supplied also include PFA fittings for easy connection of transfer hoses (external diameter 3.2 mm), dummy stoppers made of PFA for the closure of unnecessary connections and venting valves with change indicator. Every starter box allows undisturbed HPLC eluent removal from up to four supply bottles with GL 45.
Temperature resistance: -20 to +200 °C.

Starter box 1

Contents:

- 3 x HPLC GL 45 b.safe screw caps with two connections each (UNF ¼″ 28G)
- 1 x HPLC GL 45 b.safe screw caps with three connections (UNF ¼″ 28G)
- 4 x venting valve with change indicator
- 5 x PFA fittings (yellow) for external hose Ø 3.2 mm
- 1 x PFA dummy stopper (white)

Number of connections	For hoses with outer Ø (mm)	Thread	Art. No.	Pack Qty.	€
2/3	3.2	UNF ¼″ G28	**1HPP.1**	1 unit(s)	223,60

Starter box 2

Contents:

- 4 x HPLC GL 45 b.safe screw caps with three connections each (UNF ¼″ 28G)
- 4 x venting valve with change indicator
- 8 x PFA fittings (yellow) for external hose Ø 3.2 mm
- 4 x PFA dummy stoppers (white)

Number of connections	For hoses with outer Ø (mm)	Thread	Art. No.	Pack Qty.	€
3	3.2	UNF ¼″ G28	**1HPX.1**	1 unit(s)	250,50

Starter box 3

Contents:

- 4 x HPLC GL 45 b.safe screw cap with four connections each (UNF ¼″ 28G)
- 4 x venting valve with change indicator
- 12 x PFA fittings (yellow) for external hose Ø 3.2 mm
- 8 x PFA dummy stoppers (white)

Number of connections	For hoses with outer Ø (mm)	Thread	Art. No.	Pack Qty.	€
4	3.2	UNF ¼″ G28	**1HPT.1**	1 unit(s)	267,70

NEW / +

HPLC flushing bottle distributor b.safe

Bohlender. Material: PPS, PP, PFA.

GL 45 flushing bottle distributor made of PPS, GLS 80 flushing bottle distributor made of PP. Each with freely rotating distributor head made of PP with four side connections (GL 45) appropriate for HPLC GL 45 b.safe screw caps. Distributor heads are additionally provided with three central capillary openings each (UNF ¼″ 28G). Temperature resistance: 0 to +110 °C.

Application:
Flushing the HPLC system without contamination or loss of solvents. For this, a distributor head is placed on a flushing bottle, the HPLC b.safe screw caps are removed from the eluent bottles and these are installed on the connections of the flushing bottle distributor. Passage at the distributor neck is sufficiently measured so that the capillary hoses installed on the HPLC screw cap along with filter can be introduced into the flushing bottle. With the GL 45 flushing bottle distributor, the use of intake filters that are as small as possible (max. Ø 14 mm) makes introducing the capillaries through the bottle neck easier. Should a connection of the flushing bottle distributor not be used, this can be closed with a GL 45 screw cap. The escape of solvent vapours that are hazardous to health or a contamination of the flushing solution with ambient air is prevented by the HPLC b.safe screw caps with venting valve. In addition, the flushing bottle distributor can also be used directly for rear flask and needle seat flushing. For this, connect the desired capillaries and a venting valve to the central capillary connections using fittings.

Delivery incl. 3 x PFA dummy stoppers (white).

Version	Number of connections	Thread	Art. No.	Pack Qty.	€
Four flushing head connections (GL 45)	3 (UNF ¼″ 28G)	GL 45	**1HPY.1**	1 unit(s)	193,50

A 121 °C

HPLC screw cap b.safe Waste Cap GL 45

Bohlender. Material: PPS, PTFE, PFA. Autoclavable: Yes.

Screw cap made of PPS for GL 45 threads with freely rotating distributor element made of PTFE. Available with 3, 2 or 4 capillary connections with UNF ¼″ 28G internal thread for connecting PFA fittings for Ø capillary hoses (external Ø 1.6 mm (green)/2.2 mm (purple)/3.2 mm (yellow)). With PFA dummy stopper (white) to seal capillary connections that are not needed. Depending on the version, with 1 x hose connector (NPT ⅛″ thread) for hose internal Ø 5.5-8 mm. 1 x connection (GL 14 thread) to screw in a b.safe exhaust air filter. Temperature resistance: -20 to +200 °C.

- For safe disposal of waste solvents without leaks of harmful solvent vapours
- Freely rotating distributor bodies, prevents the hoses twisting when replacing the collecting bottle
- Using the fittings, hoses can be easily introduced into the collecting container; conical nipple clamps the hose and reliably seals at the connection
- Large quantities of fluid can optionally be disposed of by connecting hoses with internal Ø 5.5-8 mm, via the hose connectors
- Suitable exhaust air filter available as an option; its activated carbon filling binds harmful solvent vapours

Type A: 3 x capillary connection (UNF ¼″ 28G), 1 x exhaust air filter connection (GL 14)

Delivery incl. PFA fittings: 3 x 1.6 mm, 3 x 2.2 mm, 3 x 3.2, 2 x PFA dummy stopper. **Delivery without** exhaust air filter, please order separately.

Version	Number of connec-tions	For hoses with outer Ø (mm)	Thread	Art. No.	Pack Qty.	€

Accessories for b.safe Waste Cap HPLC screw cap b.safe exhaust air filter

Bohlender. Material: PP, PE and activated carbon.

Filter housing made of PP with connection (GL 14 thread) suitable for b.safe Waste Cap HPLC screw caps. Lid with integrated splash-proof ventilation openings and change indicator with labelling area for monitoring service life. The activated carbon filling is protected with two filter membranes made of porous PE. The exhaust air can circulate unobstructed around the activated carbon at the same time, so that the solvent components are reliably absorbed by the activated carbon and only filtered exhaust air escapes into the surrounding area via the ventilation openings. Temperature resistance: 0 to +110 °C.

Small
Service life three months, for up to five litres of capacity

Accessories for b.safe HPLC screw caps b.safe venting valve

Bohlender. Material: PP, PTFE. Autoclavable: Yes.

Valve housing made of PP with threaded connection (UNF ¼″ 28G) suitable for b.safe HPLC screw caps. Lid with ventilation opening and Luer-Lock fitting, integrated non-return valve with upstream membrane made of porous PTFE (1 µm). Includes attachable change indicator.

Application:
The b.safe venting valve is specially adapted to the volume flow in HPLC. The integrated non-return valve prevents evaporation of solvents and allows ambient air to flow into the bottle if there is a vacuum. The upstream membrane made of porous PTFE keeps out dirt particles and other contaminations from outside. The clip-on change indicator enables six-month monitoring of service life: Activate the change indicator by pressing the button and replace the valve when the display is completely red.

Version	Thread	Art. No.	Pack Qty.	€

Accessories for b.safe Waste Cap HPLC screw cap b.safe corrugated hose coupling

Bohlender. Material: PP, FEP. Autoclavable: Yes.

Three-piece coupling comprising coupling, locknut made of PP and clamping ring made of FEP. Corrugated hose coupling to connect hard-walled corrugated hoses to the b.safe Waste Cap HPLC screw cap via the NPT ⅛″ threaded connection. Locknut with ergonomic gripping surfaces, additional recessed grips with SW10 at the coupling. Temperature stable: 0 to +110 °C.
Select the b.safe corrugated hose coupling suitable for the hoses of your HPLC. Corrugated hoses with 6.5 mm internal Ø, for example, are included with devices from Agilent Technologies; corrugated hoses with 8.5 mm internal Ø, for example, with devices from Thermo Scientific.

HPLC cap GL 45

Bohlender. Material: PTFE, Screw cap made of PPS, stopcocks (optional) with cock plug made of FEP.

Connections with UNF ¼″ 28G internal thread on top and bottom for attaching connecting hoses. Freely rotatable distributor element, cap can be screwed on and off without twisting the hoses. Excellent chemical resistance, Temperature stability -50 to +200 °C.

Delivery without connecting hoses, please order separately.

Laboratory screw joint HT (high-temperature)

Bohlender. Material: PPS, FKM, PTFE.

Screw cap (PPS, black) with interior comprising clamping ring (PPS), sealing wedge and sealing plate (both made of PTFE) and additional O-ring (FKM) for screwed connections for hose outer Ø smaller than 3 mm (without coming into contact with flow medium).
High chemical resistance since medium only comes into contact with PTFE. Temperature stable -50 °C up to +250 °C.
Pressure stable up to max. 10 bar, suitable for use in a vacuum.

Application

For connecting apparatus and fittings with GL thread to hard-walled hoses made of glass, plastic or metal. For fixing in place probes, thermometers, immersion tubes and cable feeds that have been inserted in reaction vials.

Delivery incl. screw cap, clamping ring, sealing wedge and sealing plate, as well as additional O-ring for laboratory screw joints for hose outer Ø smaller than 3 mm.

Barrel aeration

Bohlender. Material: PTFE Basic body suitable for R¾″ internal thread, with GL32 cap thread, with PTFE/silicone gasket and replaceable filter membrane (pore size 2.5 µm) made of PTFE, screw cap made of PPS.

High chemical resistance, the medium only comes into contact with PTFE. Membrane outer Ø 29, membrane thickness approx. 0.2 mm. Temperature stability from -20 °C to +230 °C, autoclavable.
Pressure compensation from 0.1 bar differential pressure.

Maximum flow rate:
· At 0.5 bar differential pressure: 80 l/h
· At 1.0 bar differential pressure: 320 l/h

Application

For pressure compensation during liquid removal or when filling containers. The integrated filter membrane prevents contamination of the medium with dust or dirt particles.

Stirrer reactors

A 121 °C

DURAN WHEATON KIMBLE

Stirrer reactor sets

DWK Life Sciences. Material: PP, PTFE, PEEK, Stainless steel, DURAN® glass. Autoclavable: Yes.

Significantly better mixing compared to standard magnetic stir bars. Suitable for mixing solutions, dissolving solids and fermentation processes. Driven by a magnetic stirrer. An additional media bottle or a sterile pressure equaliser can be connected using the DURAN® connector system.

- Materials used: PP/PTFE/PEEK/stainless steel/DURAN® glass
- Parts in direct contact with media are FDA-compliant
- Speed range up to 500 rpm
- System is fully autoclavable
- Temperature-stable up to +140 °C

Thread GL 45

- 2 GL 14 connections
- Variable stirrer shaft, fits 500 ml and 1000 ml DURAN® GL 45 threaded bottles
- Compatible with the DURAN® connector system
- Connection of hoses with Ø 1.6 to 6.0 mm possible

Delivery incl. 500-ml or 1000-ml DURAN® threaded bottle GL 45, 2-port GL 45 screw joint PP with magnetic folding stirrer and 2 x GL 14-screw cap (PBT, red). Matching laboratory screw connections HX86.1-HX89.1, please order separately.

Thread GLS 80

- 4 connections: 2 x GL 18, 2 x GL 14
- Variable stirrer shaft, fits 1000 ml and 2000 ml DURAN® GLS 80 wide-neck threaded bottles
- Interchangeable stirrer element (anchor stirrer is standard, impeller stirrer is optional)
- Compatible with the DURAN® connector system
- Connection of hoses with Ø 1.6 to 12.0 mm possible

Delivery incl. 1000 ml or 2000 ml DURAN ®GLS 80 wide-neck threaded bottle, GLS 80 4-port screw joint made of PP with magnetic anchor stirrer and GL 14 screw joint (PP, blue), 2 x GL 14 and 2 x GL 18 screw cap (PBT, red). Matching laboratory screw connections HX86.1-HX89.1 and KE53.1-KE57.1, please order separately.

Triple neck culture bottles

Bohlender. Material: Borosilicate glass 3.3, Screw cap made of PP/glass fibre (centre neck) and PPS (side necks). With height-adjustable stirrer insert made of PTFE and stainless steel. Autoclavable: Yes.

For gentle mixing of cell cultures. High chemical resistance, fully autoclavable. Hoses, probes or sensor probes can be inserted into the side necks. The drive is produced using commercially available magnetic stirrers (max. speed 1,000 rpm) centre neck thread GL 45, inside-Ø 30 mm.

Desiccator base DURAN®

DWK Life Sciences. Material: DURAN® glass.
With flat flange. Thanks to precise machining, parts such as lids, bases, stopcocks and caps can be interchanged as many times as necessary on DURAN® desiccators of the same type and size. With its combination of various individual parts, the DURAN® system can be varied as necessary for each individual application.
DURAN® desiccators are used in numerous fields, for example the drying or dry preservation of substances, as a growing room for plants, bacteria, cell cultures, as a handling room under vacuum, for storing sensitive substrates, components, high-purity metals, in semiconductor development or production, in material and environmental research, in chip technology, etc.
Designed for use under the maximum possible technical vacuum (0 mbar).

Bohlender. Material: Aluminium, Borosilicate glass 3.3.

Panels made of type 3.3 borosilicate glass, frame made of reinforced aluminium. All-round rubber door seal with magnetic strip. For drying and safe storage of moisture-sensitive products (e.g. reference solutions, retained samples, metallographic samples, tobacco leaves, DNA samples, etc.). Ideal for storing hot materials (max. 300 °C), excellent resistance to chemicals. Integrated digital thermal hygrometer with min./max. function for monitoring current temperature and moisture levels.

Technical specifications:

Art. No.	**NX19.1**
Type	Star Vitrum
Total volume	45 l
Usable volume	42 l
Inner width	260 mm
Inner depth	330 mm
Inner height	480 mm
Temperature stability from	-20 °C
Temperature stability up to	+150 °C
Max. number of shelves	26 unit(s)
Max. all-over load per shelf	10 kg
Total all-over load	30 kg
Weight	14 kg

Delivery incl. four adjustable intermediate shelves made of stainless steel and one bottom pan for desiccants.

Type	Outer width (mm)	Outer depth (mm)	Outer height (mm)	Art. No.	Pack Qty.	€
Star Vitrum	310	375	525	**NX19.1**	1 unit(s)	1.487,80

Inert gas desiccator Super Star

Bohlender. Material: PMMA, Aluminium.

Panels made of transparent PMMA, frame made of reinforced aluminium. All-round rubber door seal with magnetic strip and barrel lock. Nitrogen or noble gases can be introduced through two gassing connections with quick couplings and self-closing valves. This allows the safe storage of air- and moisture-sensitive substances as well as highly reactive or toxic chemicals in an inert gas atmosphere. Large integrated digital thermal hygrometer with min./max. function for monitoring temperature and moisture levels. Additional space requirement for couplings: 150 mm per side.

Technical specifications:

Art. No.	**NX20.1**
Type	Super Star
Total volume	45 l
Usable volume	42 l
Inner width	260 mm
Inner depth	330 mm
Inner height	480 mm
Temperature stability from	-20 °C
Temperature stability up to	+70 °C
Max. number of shelves	26 unit(s)
Max. all-over load per shelf	10 kg
Total all-over load	30 kg
Weight	7.1 kg

Delivery incl. four adjustable intermediate shelves made of PMMA, bottom pan for desiccants and hoses with quick couplings for gassing.

Type	Outer width (mm)	Outer depth (mm)	Outer height (mm)	Art. No.	Pack Qty.	€
Super Star	310	375	525	**NX20.1**	1 unit(s)	1.288,95

Desiccators

Desiccator Auto Star

Bohlender. Material: PMMA, Aluminium.

Panels made of transparent PMMA, frame made of reinforced aluminium. All-round rubber door seal with magnetic strip. For long-term storage of moisture-sensitive substances, reference samples, electronic components, photographic equipment, paper, cultural goods, etc.
The automatic drying guarantees a consistently low humidity and compensates for the frequent opening of the door. In the event of a power failure, the humidity level inside the desiccator does not increase for several hours, thereby giving valuable samples extra protection.
No need for manual regeneration of the silica gel, no need for frequent checks, the space for desiccant dish can also be used. Digital thermal hygrometer with min./max. function for monitoring actual temperature and moisture levels.
Additional space requirement for drying unit: 60 mm to the rear.

Technical specifications:

Art. No.	NP95.1
Type	Auto Star
Total volume	45 l
Usable volume	42 l
Inner width	260 mm
Inner depth	330 mm
Inner height	480 mm
Temperature stability from	-20 °C
Temperature stability up to	+70 °C
Max. number of shelves	26 unit(s)
Max. all-over load per shelf	10 kg
Total all-over load	30 kg
Weight	7.3 kg
Mains connection	230 V, 50 Hz

Delivery incl. four adjustable shelves made of PMMA, drying unit and thermal hygrometer.

Type	Outer width (mm)	Outer depth (mm)	Outer height (mm)	Art. No.	Pack Qty.	€
Auto Star	310	375	525	**NP95.1**	1 unit(s)	1.878,05

Vacuum desiccator

Bohlender. Material: PMMA, transparent.

Wall thickness 25 mm. With all-round silicone door seal and four or five safety hinge locks. For contamination-free storage of air-, moisture- and heat-sensitive products as well as for gentle drying of easily degradable and reactive substances. Display on analogue vacuum meter shows 0.1 to 0.001 MPa = 1000 to 10 mbar. Needle valves with connections for internal hose Ø 9 mm. Additional space requirement for valves and vacuum meter 150 mm.

Technical specifications:

Art. No.	YT39.1	YT40.1
Type	17.5 l	24.5 l
Usable volume	17.5 l	24.5 l
Inner width	260 mm	
Inner depth	260 mm	
Inner height	260 mm	360 mm
Temperature stability from	-20 °C	
Temperature stability up to	+70 °C	
Max. all-over load per shelf	9 kg	
Total all-over load	30 kg	40 kg
Weight	15 kg	18 kg

Delivery incl. two (or three with type 2) intermediate shelves made of PMMA, analogue vacuum meter and needle valves.

Silicone beige / PTFE white, slotted	1.3	45	6	**LC15.1**	100 unit(s)	64,00

Screw caps ROTILABO® ND9 for the LC/GC-MS

ROTH SELECTION.

Inert, non-bleed single-component cap, LC/GC-MS certified.
Transparent, with thinned penetration area, penetrable like a septum.
For ND9 short threaded vials.

Version	Art. No.	Pack Qty.	€
with thinned penetration area	**NN00.1**	100 unit(s)	44,00

Screw-cap closures ROTILABO® ND9 magnetic with borehole

ROTH SELECTION. Material: PP.

Blue colour, with magnetic cap attached, golden colour. For ND9 short threaded vials.

Delivery incl. septum, mounted.

Septum material	Thickness (mm)	Hardness (°)	Ø Hole (mm)	Art. No.	Pack Qty.	€
Silicone white / PTFE red, UltraClean	1.0	55	6	**PT62.1**	100 unit(s)	63,45

Sample vials/autosample vials

Sample vials ROTILABO® with short thread ND9 silanised

ROTH SELECTION. Material: Borosilicate glass from hydrolytic class I, silanised.

The surface of the vials is deactivated by silanisation. This minimises the adsorption of polar compounds (proteins, amines, phenols etc.) by the glass and prevents the loss of valuable specimens.
Wide opening for easy filling. Flat base. CleanPack, vials are packed in a clean room under class 10 000 conditions. Suitable for automatic samplers.

Delivery without micro-inserts and screw caps, please order separately.

Version	Vol. (ml)	Ø (mm)	Height (mm)	Art. No.	Pack Qty.	€
Clear glass, with solid conical base	1.1	11.6	32	**XC48.1**	100 unit(s)	136,55
Clear glass	1.5	11.6	32	**XC47.1**	100 unit(s)	58,05
Brown glass, with labelling space	1.5	11.6	32	**XC49.1**	100 unit(s)	59,15

Micro-inserts ROTILABO® ND9/ND10/ND11 silanised

ROTH SELECTION. Material: Borosilicate glass, silanised, clear.

The surface of the vials is deactivated by silanisation. This minimises the adsorption of polar compounds (proteins, amines, phenols etc.) by the glass and prevents the loss of valuable specimens.
For ND9 short-thread screw top vials, ND10 screw top vials, and ND11 rolled edge vials snap ring vials.

Version	Vol. (ml)	Nominal volume (ml)	Ø (mm)	Height (mm)	Art. No.	Pack Qty.	€
Conical 15 mm tip	0.25	0.1	6	31	**XC50.1**	100 unit(s)	75,15
With plastic spring	0.25	0.1	5.7	29	**XC51.1**	100 unit(s)	112,90

Sample vials with short thread ND9 Vial kit, HPLC-certified

ROTH SELECTION. Material: Borosilicate glass, PP.

HPLC and GC-certified, tested for blank values and impurities.
Kits each with 100 short-thread screw top vials ND9 made of borosilicate glass from hydrolytic class I with UltraClean screw caps made of PP.

Version	Vol. (ml)	Ø (mm)	Height (mm)	Septum material	Thickness (mm)	Hardness (°)	Ø Hole (mm)	Art. No.	Pack Qty.	€

Snap ring caps ROTILABO® ND11 hard version

ROTH SELECTION. Material: PE, transparent.

With borehole. For ND11 snap ring vials. Hard version for optimal leak tightness. No crimping tool is required.

Delivery incl. septum, mounted.

Septum material	Thickness (mm)	Hardness (°)	Art. No.	Pack Qty.	€
Natural rubber orange red / TEF transparent	1.0	60	**TY84.1**	100 unit(s)	22,60
RedRubber / PTFE beige, AGILENT quality	1.0	45	**TY83.1**	100 unit(s)	24,20

Snap ring caps ROTILABO® ND11 soft version

ROTH SELECTION. Material: PE, blue.

With borehole. For ND11 snap ring vials. Soft version for easier push-on or removal. No crimping tool is required.

Delivery incl. septum, mounted.

Septum material	Thickness (mm)	Hardness (°)	Art. No.	Pack Qty.	€
Natural rubber orange red / TEF transparent	1.0	60	**TY86.1**	100 unit(s)	24,20
RedRubber / PTFE beige, AGILENT quality	1.0	45	**TY85.1**	100 unit(s)	26,35

Push-on caps ROTILABO® ND11

ROTH SELECTION. Material: PE.

Blue colour, for pushing on. For ND11 crimp top and snap ring vials. No crimping tool is required. Closed, with thinned puncture area instead of a septum. For non-critical analyses.

Version	Art. No.	Pack Qty.	€
Push-on	**TY78.1**	100 unit(s)	10,65

Sample vials/autosample vials

Sample vials ROTILABO® with thread ND13

ROTH SELECTION. Material: Borosilicate glass from hydrolytic class I.
Flat base. CleanPack, vials are packed in a clean room under class 10 000 conditions. For automatic samplers.

Delivery without micro-inserts, screw caps and septa, please order separately.

Crimping tools for autosample vials

Opening pliers ROTILABO®

ROTH SELECTION.

For removing crimped aluminium caps of 8, 11, 13 or 20 mm. Coloured handle.

Suitable for	Colour	Art. No.	Pack Qty.	€
Crimp caps ND 8	white	**C776.1**	1 unit(s)	78,25
Crimp caps ND 11	red	**C777.1**	1 unit(s)	78,25
Crimp caps ND 13	green	**C778.1**	1 unit(s)	78,25
Crimp caps ND 20	blue	**C779.1**	1 unit(s)	78,25

Crimping pliers ROTILABO®

ROTH SELECTION. Material: Steel tempered, with special, chemical-resistant paint.

For sealing and opening standard aluminium crimp caps with ND 8, 11, 13 or 20 mm.

- Special surface coating for excellent grip
- Effortless working thanks to resetting spring
- Adjusting screws in crimping head and handle for optimal sealing and reproducible crimping results

(1) Closing pliers

Suitable for	Art. No.	Pack Qty.	€
Crimp caps ND 8	**C780.1**	1 unit(s)	251,55
Crimp caps ND 11	**C781.1**	1 unit(s)	251,55

A 121 °C

Crimping pliers Clean-room

ROTH SELECTION. Material: Stainless steel. Autoclavable: Yes.

Made entirely of stainless steel, corrosion and heat resistant. The tool is tolerant to repeated sterilisation for cleanroom use. Free of lubricant and uncoated; no particles are released during use and therefore no increase in particle density occurs in the cleanroom. Crimping pressure and height are adjustable for optimal crimping results, even when using different types of vial.

Test tubes made of fluoroplastic

Saint-Gobain. Material: PFA, Highly transparent. Autoclavable: Yes.

- Temperature-stable from -196 to +250 °C
- Inert to virtually all chemicals, including hydrofluoric and nitric acid
- High purity, low metal ion content, ideal for use in trace analysis and for the storage of highly pure substances
- No memory effect
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning

Cytology funnel CytoSep™

Simport.

Disposable sample chambers for producing thin-layer preparations by means of centrifugation. For sample volumes up to 0.5 ml. Cells are applied directly to a slide. Cell application range approx. Ø 6 mm (area approx. 28 mm²). With white filter cards to absorb excess liquid.

- Suitable for the examination of blood, spinal chord fluid, saliva, urine and gastric fluids
- Disposable material, therefore no time-consuming cleaning necessary
- Prevents cross-contamination and contamination through pathogenic samples

Compatible with the Thermo Cytospin™ 3 and 4, Tharmac Cellspin® cyto centrifuges as well as the Hettich Cyto system.

Delivery incl. press-in plug for sealing the funnel. Please order slides and metal clips separately.

Canisters

Compact canister electrically conductive

Bürkle. Material: HDPE.

Antistatic, colour black. Electrically conductive compact canister with litre scale, specifically for use in explosion-proof areas. High electrical conductivity at a specific surface resistance of $>10^5$ ohm. Correct earthing can prevent the risk of ignition resulting from electrostatic charging. For filling and storing flammable and flammable liquids of explosion groups IIA, IIB and IIC. Particularly space-saving, ideal for use in confined space. Horizontal storage possible.
Note! When working with flammable liquids, the canister must be earthed! Use antistatic set (Art. No. 0213.1)!

Delivery without stop cock. For versions with threaded connections ¾″ please order the stop cock separately.
Delivery incl. sealing cap.

Canisters fluorinated with drain outlet

Nalgene. Material: HDPE transparent, fluorinated, with stop cock made of ETFE and screw cap made of fluorinated PP.

Type DS 2327. For safe storage and dispensing of solvents or distilled water. Space-saving rectangular design.
The fluorinated outside and inside surfaces enhance the barrier properties and reduce solvent absorption and permeation. **Leak-proof**. With graduation and non-corrosive stainless steel handle. 20 l container, additionally with robust handles.

Vol. (l)	Width (mm)	Depth (mm)	Height (mm)	Thread	Art. No.	Pack Qty.	€
9	146	216	343	100 mm	**E189.1**	1 unit(s)	234,35

Canisters

Canisters fluorinated

Nalgene. Material: HDPE fluorinated inside and outside, with screw cap made of fluorinated PP.

Type 2242. Good barrier properties, low solvent diffusion and penetration, ass well as high resistance to chemicals. Very robust, suitable for use under extreme loads when working with acids and aggressive solvents. Stable due to large footprint. Easy pouring through long spout and handle integrated in the canister bottom. graduated in litres and gallons. **Leak-proof**.

Carboy fluorinated

Nalgene. Material: HDPE, fluorinated. Screw top made of PP.

Type 2097. 83 B thread, neck interior Ø of 64 mm. Especially suited to storing and transporting aggressive chemicals. The fluorinated interior and exterior surfaces reduce the diffusion and penetration of solvents and ensure long-term storage with low loss from evaporation. Especially resistant to rips and breaks as well as puncture damage. Suitable for most acids and aggressive organic solvents. **Leak-proof.**

Dual tubing connector assembly sets

Nalgene. Autoclavable: Yes.

Suitable for retrofitting Nalgene® vacuum flasks (PK40.1ff) or carboys with 53 mm or 83 mm screw caps. To do so, two holes (Ø 10 mm for PP13.1 or Ø 16 mm for PP14.1) must be made in the screw cap and the hose connectors fitted inside them. For hoses with inner Ø 6 or 13 mm. 53 mm screw caps can only be fitted with 6 mm hose connectors, 83 mm screw caps with 6 mm and/or 13 mm hose connectors.

A 121 °C

Delivery incl. connectors made of PP, nuts made of acetal, seals made of silicone and caps made of TPE. **Delivery excludes** screw cap.

Version	Art. No.	Pack Qty.	€
For hoses with inner Ø 13 mm	**PP14.1**	2 unit(s)	23,85
For hoses with inner Ø 6 mm	**PP13.1**	2 unit(s)	22,00

Carboys

Carboy with tap

Nalgene.

Graduated. Ideal for storing distilled water, reagents and culture media. **Leak-proof**. For increasing the stability and sealing, the drain tap thread is worked into a piece of the bottle rather than welded on.

Type 2318

Material: LDPE. Thread: 83 B (K655.1: 38-430).

Plastic bottles, LDPE

Wide mouth bottle

Nalgene. Material: LDPE, translucent. Screw-cap closure made of PP.

Type 2103. Universally suitable for laboratory use and taking samples. For storing chemicals and standards and for collecting and storing distilled water. The very low trace element content of LDPE makes these bottles ideal for trace element analysis. Wide neck opening for quick filling and removal of powders, paste-like substances and liquids.

- Flexible, high breaking strength
- Leak-proof

NEW / +

Delivery incl. screw-cap closure.

Plastic bottles, HDPE

Narrow mouth bottle fluorinated

Nalgene. Material: HDPE, fluorinated, PP screw cap.

Type 2097. Particularly suited to storing aggressive chemicals. Fluorinated interior and exterior lower the diffusion and penetration of solvents and ensure long-term storage with low loss by evaporation. Especially resistant to rips and breaks as well as puncture damage. Suitable for most acids and organic solvents. **Leak-proof.**

Wide mouth bottle square

Nalgene. Material: PP, translucent. Autoclavable: Yes.

Type 2122. Space-saving square shape. With integrated handle. Suitable for storing and sterilising contaminated microscope slides and other small laboratory items, and for collecting, storing and transporting dry chemicals and environmental samples. Unscrew the cap and place it on the bottle before autoclaving.

- Wide neck for easy filling
- Not leak-proof

Wide mouth bottle fluoroplastics

Vitlab. Material: PFA, Pure. Autoclavable: Yes.
With fully sealing screw cap. Suitable for trace analysis and long-term storage of highly pure oxidants, acids and bases as well as hydrocarbons, solvents and standards.

- Temperature stable in the range -200 to +250 °C
- Chemically resistant to nearly all chemicals
- Good transparency and shape stability
- Practically no displacement or cross-contamination as the surfaces are extremely hydrophobic, anti-adhesive and flat
- Long durability of low concentrated reference material in PFA vessels
- Easy to clean
- No memory effect

Wash bottle ROTILABO® with overpressure valve

ROTH SELECTION.

Material: LDPE (bottle types Acetone and MEK made of PP), screw cap and spray pipe made of PP.
Overpressure valve in the screw cap extensively prevents leakage, dripping or escape of the liquid from the spray pie, e.g. in the case of temperature fluctuations.
With permanent four-language content imprint (German, English, French, Spanish) and hazard warning acc. to GHS.

Note: The chemical resistance of the spray bottles is limited when aggressive filling media are used. The bottles should therefore be replaced regularly and not used for analytical or critical applications.

Spray lance, length 30 cm	**EP64.1**	1 unit(s)	28,55

Pressurised sprayer Turn'n'Spray

Bürkle. Material: HDPE, PP, FKM, Stainless steel.

With short spray nozzle. A pressure of max. 4 bar is generated in the container by operating the piston rod. Then you can spray the liquid by pressing the button.
The Turn'n'Spray pressurised spray's 360° spraying function also allows users to spray overhead. This means that it can spray in hard-to-reach areas without difficulty.
Applications: Disinfection, cleaning, crop protection, thin-layer chromatography, technical and sanitary requirements.

- Parts in contact with media: HDPE, PP, FKM, V4A
- With overhead spraying function
- Nozzle diameter 0.8 mm, continuously adjustable
- Liquid temperature: 0-30 °C
- Spray lance (length 30 cm) available as an option

Vol. (ml)	Ø ext. (mm)	Height (mm)	Ø Inner neck (mm)	Art. No.	Pack Qty.	€
1,500	140	305	45	**1AA4.1**	1 unit(s)	57,50

Pressurised sprayer Food

Bürkle. Material: PE, PP, Silicone, Stainless steel.

The container of the pressurised sprayer has a transparent viewing window, which makes reading the fill level easy. Rubber-clad standing ring ensures that the sprayer can be put down safely. The integrated safety valve prevents overpressure (max. 3 bar). Adjustable nozzle nut allows users to individually adjust the spray jet, ranging from a fine spray mist to a powerful jet.
Suitable for use in the food sector, for spraying a wide range of media (such as oils, grease and aromatic substances) and for atomising cleaning agents and disinfectants.

- Parts in contact with media: PE, PP, silicone, stainless steel
- **Suitable for use with foodstuffs**

Sample tub fluoroplastics

Saint-Gobain. Material: PFA, highly transparent. Autoclavable: Yes.

With labelling area and seal, leak-proof. Cryo- and microwave-safe.

- Temperature stability -196 to +250 °C
- Inert to virtually all chemicals, including hydrofluoric and nitric acid
- High purity, low metal ion content, ideal for use in trace analysis and for the storage of highly pure substances
- No memory effect
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning

Sample beakers

Sample beakers with screw closure

Greiner Bio-One. Material: PP, transparent, screw cap made of HDPE.

Graduated with writing area, impervious to fluids and shatterproof. With the tamper-evident opening band: Beakers are supplied with a lid fitted, whereby the first time it is unscrewed, the opening ring becomes detached, thus ensuring the intactness or sterility (optional) of the beaker contents.
Temperature stability -50 to +100 °C. Suitable for universal use in the laboratory for non-human and non-medical samples.

Draining board

Kartell. Material: PS.

With 72 slot-in pegs (Ø 15 x L 95 mm) which can be inserted in any desired configuration. The peg slots are sealed at the back and therefore leakproof. With drainage channel and tube (L 300 mm, outer Ø 12 mm). For wall mounting.

Delivery incl. slot-in pegs and fixing hardware.

Width (mm)	Depth (mm)	Height (mm)	Art. No.	Pack Qty.	€
450	110	630	**CT39.1**	1 unit(s)	113,45

Lab sink mat

ROTH SELECTION. Material: PVC.

To prevent glass breakage when cleaning laboratory glassware. Round profiles prevent splash-back from running water. The smooth surface of the profiles prevents the accumulation of dirt particles. The weight of the mat ensures that it remains secure even under flowing water. Additional advantage: Standard sized magnetic rods cannot easily slip into the drain. Profile width 8 mm. Web width 40 mm.

Bowls and tubs

Dish ROTILABO®

ROTH SELECTION. Material: PVC, break-proof.
Temperature stable up to +70 °C.

Not a medical device / Not an IVD product

With grooved base
Suitable as development dishes or for staining electrophoresis gels, the raised grooves in the base stop the gels from sticking to the bottom of the dish.

Sterilisation tray

Nalgene. Material: PP. Autoclavable: Yes.

The flat design of the sterilisation tray allows pipettes and instruments to be fully immersed in the disinfectant solution. The plastic construction reduces damage and breakage of glass pipettes. The tray is stackable, lightweight and quiet to use.

- Suitable for sterilising pipettes, instruments and small laboratory items up to a max. length of 40 cm
- Resistant to aggressive disinfectant solutions
- The lid that can be fitted into the tray groove prevents the spillage of hazardous liquids
- Lid with recessed grip

Round bottom flasks

Vitlab. Material: PFA, Transparent. Autoclavable: Yes.

- High chemical resistance
- Temperature resistant in the range -200 to +260 °C
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning
- High purity, ideal for use in trace analysis and for storage of reference solutions
- No memory effect
- Also suitable for use in rotary evaporator as safety flask
- Autoclavable

Standard ground joint flasks

Round bottom flasks

Bohlender. Material: PFA, highly pure.

Chemically inert. Hydrophobic, anti-adhesive surfaces. Centre neck MS 29/32. Temperature-stable from -200 to +250 °C. Transparent and pore-free, partially suitable for vacuum (e.g. 30 mbar at 50 °C).

Receiving flask with PUR coating

Lenz. Material: DURAN® glass, with coating made of PUR. Autoclavable: Yes.

With spherical joint connection KS 35. Specifically for rotary evaporators. Highly transparent coating provides protection from scratches, impacts and light (absorption up to approx. 380 nm). In the event of glass breakage, the coating helps contain broken glass and leakage. Temperature stability -30 to +140 °C.

Sealing sleeves ROTILABO® for conical ground glass joints

ROTH SELECTION. Material: PTFE. Autoclavable: Yes.

For gas,liquid and vacuum-tight ground glass joints. Sealing rings on the outside of the ground sleeves provide a ensure a high vacuum-tight seal (leak rate <1 x 10^{-1} mbar l s^{-1}) and prevent the ground glass joints from sticking. Easy to remove with thick rim, reusable. Practically resistant to all chemicals, temperature-stable from -200 to +250 °C. No grease necessary. Autoclavable.

For standard ground glass joint	Art. No.	Pack Qty.	€

Sleeves ROTILABO® for spherical ground joints

ROTH SELECTION. Material: PTFE. Autoclavable: Yes.

For gas, liquid and vacuum-sealed spherical joint connections. With sealing grooves for high-vacuum sealing (leak rate: <1 x 10^{-2} mbar l s^{-1}). Easy to release and re-use. No grease necessary. Temperature-stable from -200 to +250 °C. High resistance to chemicals.

For spherical ground glass joint	Art. No.	Pack Qty.	€

Seals ROTILABO® for conical ground glass joints

ROTH SELECTION. Material: PTFE. Autoclavable: Yes.

Extremely thin, suitable for sealing gas, liquid and highly vacuum-tight ground glass joints (leak rate <1 x 10^{-6} Pa l s^{-1}).
Prevent the ground glass joints from sticking, no is grease necessary. Temperature-stable up to +250 °C. Delivery spread on cartridge to protect the seals.

For standard ground glass joint	Art. No.	Pack Qty.	€

Bubble counters

Lenz. Material: DURAN® glass.

For monitoring the gas flow. Ø 32 mm, overall height 120 mm, hose connections Ø 8 mm.

Length (mm)	Art. No.	Pack Qty.	€
100	**KX54.1**	1 unit(s)	35,40

Bubble counters with ground glass joint

Material: Borosilicate glass 3.3.

For monitoring the gas flow in apparatus. Suitable for excess pressure and vacuum. With ground glass joint and GL 32 screw cap with PTFE-coated seal. Overall height without ground glass joint approx. 145 mm, Ø approx. 30 mm. Temperature stable up to +200 °C.

Delivery without GL 14 connectors, please order separately for bubble counters with GL connection.

Fermentation tube ROTILABO®

ROTH SELECTION. Material: Borosilicate glass 3.3. Autoclavable: Yes.

With NS 29/32 ground joint. Height 200 mm.

Standard ground glass joint core	Height (mm)	Art. No.	Pack Qty.	€
29/32	200	**ACL2.1**	1 unit(s)	132,70

Melting point determination

Melting point determination apparatus acc. to Thiele

Lenz. Material: DURAN® glass.

Application:
Fill apparatus with silicone oil. Insert a melting point capillary (outside-Ø max. 2 mm) into one of the side tubes so that the molten end touches the ball of the thermometer. The other side tube serves for venting. In the case of apparatus without side tubes, a long capillary is inserted from above; venting must also take place from above in this case. Heat at the tube elbow to ensure a uniform temperature increase.

Version	Length (mm)	Ø Internal (mm)	Art. No.	Pack Qty.	€
without side tubes	200	16	**TH23.1**	1 unit(s)	52,60
with side tubes	200	16	**TH24.1**	1 unit(s)	71,95

Melting point capillary ROTILABO®

ROTH SELECTION. Material: Soda-lime glass.
Thin-walled, open at one end.

Evaporating dishes with snap-on lid

Vitlab. Material: PFA Transparent, cap made from PE.
Autoclavable: Yes.

For contamination-free sample preparation and for transporting samples.

- Temperature stable in the range -200 to +250 °C
- Chemically inert to nearly all chemicals
- Hydrophobic and anti-adhesive
- High purity, ideal for use in trace analysis and for storage of reference solutions
- With conical recess in base, to hold small quantities of solvent for absorption of evaporated samples
- Extremely smooth surfaces allow easy cleaning, no memory effects

Measuring spoons

Bürkle. Material: PS.

The measuring and dosing spoons can be used for precisely measuring and dosing small quantities of powders, granulates and liquids. Any excess medium is wiped off at the top edge of the spoon to allow precise measuring.
The flat front edge of the measuring spoon is perfect for collecting medium from the base of the container or reaching into the corners of the container to efficiently remove any residue. Its flat base means that the measuring spoon can be put down without spilling its contents.

- With wiping edge
- The volumes are engraved on the handle
- Manufactured in a clean room (clean room class 7)
- Compliant with the EU food directives and FDA guidelines

Non-sterile

Test tube stands slant rack

Nalgene. Material: PC. Autoclavable: Yes.

For simple and safe production of slant agar with two different inclination angles, for incubating liquid tissue cultures and for use in a water bath (not floating). Tubes containing culture media can be autoclaved in the rack in an upright position.

- Slanted rack enables tilting at an inclination angle of 5° or 20° so that culture media can harden at an angle
- 5° inclination angle: Larger surface, e.g. for aerobic cultures
- 20° inclination angle: Smaller surface, e.g. for anaerobic cultures; reduces the risk of culture media drying out during long-term storage

For glass Ø 16 mm

Sample stands ROTILABO® combined (4-in-1)

ROTH SELECTION. Material: PP. Autoclavable: Yes.

For round, flat and conical blood collection and culture tubes from 3.5 to 10 ml, and for 15 ml centrifuge tubes.
Suitable for: Vessel Ø 13–16 mm.
Recommended tube size:
13 x 75/100 mm, 16 x 100/125 mm, 17 x 120 mm.

- Can be combined individually by fitting them together
- Alphanumerically coded
- Suitable for use in a water bath

With four sides which can be equipped as required:

- Side A: 12 x hole Ø 13 mm
- Side B: 18 x hole Ø 13 mm
- Side C: 12 x hole Ø 17 mm
- Side D: 18 x hole Ø 17 mm

Cryogenic box ROTILABO® cardboard maxi

ROTH SELECTION. Material: Cardboard (plastic-coated), waterproof and resistant to low temperatures.

For storing samples in reaction vials and centrifuge tubes. Also suitable for larger containers without grid dividers.
Temperature stability up to -80 °C

Delivery incl. divider inserts.

For 5 ml reaction vials

Cryo-freezing container FreezeCell

ROTH SELECTION. Material: Plastic EVAC (ethylene-vinyl acetate copolymer), core made of aluminium alloy.

Container for the controlled freezing of samples in cryogenic tubes or reaction vials at -80 °C for later cryogenic long-term storage.

- Heat-conducting alloy and optimised insulation for uniform cryo-preservation
- Controlled, reproducible gradual cooling rates for high cell survival rate
- Cooling rate (-1 °C/min) independent of filling quantity
- No alcohol or other coolant required
- Can be used directly without pre-cooling

NEW / +

❄❄

Directions for use

Place the samples in the freezing container and close the lid. Incubate the freezing container at -80 °C for at least three hours and do not open it during this time. At the end of the incubation period, the samples can be removed and transferred, e.g. to a tank with liquid nitrogen, for long-term storage.

Cooling racks

Cooling system FreezeBox

ROTH SELECTION.

Simple system for cooling samples or for rapid freezing, defrosting and heating. Cooling box, cooling block or cryoblock and cooling module are the perfect combination.

NEW / +

Directions for use

Pre-cool the cooling or cryo block at -20/-80 °C and keep samples cool in the cooling box for several hours on the laboratory bench. Alternatively, the cooling box can be filled with approx. 200 g of dry ice. The cooling module itself does not require any pre-cooling.
Do not keep the cooling box in the freezer.

Standard

Pre-cool the cooling block for at least four hours at –20 °C or at least two hours at –80 °C. Duration of use: Four hours (open lid) or six hours (closed lid).

Operating temperature approx. +0.5 to +4 °C.

Delivery incl. cooling box, cooling block and cooling module.

Suitable for	No. of slots	Ø Hole (mm)	Length (mm)	Width (mm)	Height (mm)	Art. No.	Pack Qty.	€

Cryogenic

Pre-cool the cryoblock for at least six hours at –20 °C or at least three hours at –80 °C. Duration of use: Three hours (open lid) or five hours (closed lid).

Operating temperature approx. –18 to +4 °C.

Delivery incl. cooling box, cryoblock and cooling module.

Cryo-freezing container Mr. Frosty

Nalgene. Material: PC, lid and tube holder made of HDPE. With foam rubber insert.

Easy to use: Only 100% isopropyl alcohol and a freezer are required.
For reproducible, repeated cooling of samples at approx. -1 °C/min.
Optimum cellular yield after storage at low temperatures.
The tube holder prevents direct contact between the tubes and the alcohol; any marking on the tubes remains readable. The tube holder can be used as a floating stand for thawing samples in the water bath.

Cooling box PCR

ROTH SELECTION. Material: PP, PC lid.

Ice-free cooling system for preparing and storing PCR single vessels, strips and plates. For heat-sensitive applications, PCR or cell-based assays, as well as for gentle thawing of samples and stopping reactions. After two hours of pre-cooling at -20 °C, a sample temperature of 0 °C is maintained for over one hour or below 5 °C for up to three hours. Colour change if the temperature limit of 6 °C is exceeded.

- Constant and reliable
- Modern design cools down more quickly in freezers and remains colder for longer
- Temperature-stable up to -80 °C
- Vented lid for faster cooling of samples in a freezer compartment
- Lid can be removed completely and can be used as a stand by rotating by 180°
- Alphanumerically coded

Cooling racks

Cooling rack

ROTH SELECTION. Material: Metal (thermally conductive), anodised. Autoclavable: Yes.

Suitable for cooling samples on ice, dry ice or in the vapour phase of liquid nitrogen as well as for heating samples in water baths and incubators.

- Slots are labelled alphanumerically
- Temperature stable up to -150 °C

A 121 °C ❄❄

For reaction vials

For 1.5/2 ml reaction vials and 0.5 to 2 ml screw cap vials.

400 x 400 x 220	**EET6.1**	1 unit(s)	48,15

Ice container True North™

ROTH SELECTION. Material: PU.

Excellent insulation properties for deep-freeze applications using ice, ice-salt mixtures or other cooling media. Tight-fitting lid for minimum evaporation loss (can be stored below ice container when not in use). Pouring spout for easy pouring out of melted ice.
Conical shape and recessed lid for space-saving stacking.

Delivery incl. lid.

Cooling box thermoelectric

ROTH SELECTION.

Can be operated via 230 V mains supply (optional) or via the car's 12 V connector.

- Strong PU insulation
- Secure lid
- Integrated storage compartment for the cable
- Integrated fan (39 dB) accelerates the cooling process
- Cooling capacity up to 20 °C below outside temperature
- Weight 3.6 kg

Technical specifications:

Art. No.	P272.1
Inner length	328 mm
Inner width	243 mm
Inner height	310 mm

Delivery incl. 12 V plug, please order 230 V transformer separately.

169	75	19	**E447.2**	50 unit(s)	79,30

Cooling collar ROTILABO®

ROTH SELECTION. Material: Microfibre.

Insulating cooling pack in flexible sleeve. For the cooling and keeping cool of bottles with Ø approx. 70–100 mm. Adapts well to the shape of the bottle. Also suitable for angled containers. Can be reused any number of times. Foldable for space-saving storage.
Dimensions when folded approx. L 200 x W 150 mm.

Outer length (mm)	Outer width (mm)	Art. No.	Pack Qty.	€
450	200	**CY97.1**	1 unit(s)	34,70

Temperature control vessel

KGW. Material: Stainless steel.

For keeping samples warm or cold.

- Double-wall
- Quick response to temperature changes
- With connections for hoses with a 6 mm inner Ø

The hot or cold tempering medium is pumped around the double-walled casing with the aid of a thermostat.

Technical specifications:

Art. No.	A628.1	A629.1	A630.1	A631.1

Dewar containers

Dewar vessel dish-shaped

KGW. Material: Aluminium, Borosilicate glass 3.3 insert, fully silver-plated.

For liquid and solid media and solids (LN_2 or CO_2). Anti-magnetic.

Application:

- Tempering of round-bottom flasks
- Cooling of small samples
- Hot or cold bath
- Suitable for use on magnetic stirrers

Dewar vessel

Nalgene. Material: HDPE, double walls filled with polyurethane foam.

Suitable for safe short-term handling and storage of liquid nitrogen, dry ice, freezing mixtures and iced water. Shatter-proof. Temperature stability: -196 to +100 °C.

- Vented, insulating lid
- Metal clips to secure the lid
- With moulded-in ribs
- Pour spout and bottom grip area
- Container with carrying handle (except for 10 l)

Dewar containers

Dry ice machine SnowPack®

Bürkle.

Various possible applications, such as lowering the temperature in cooling baths or cold traps, pre-cooling tissue samples, transport lock or embedding biological substances, freezing blood and tissue samples, or studies in chemistry and physics.
Suitable for use with any commercial CO_2 steel bottle with a standpipe valve (W 21.80 x 1/14″ in according to DIN 477 no. 6).

Handling:
Connect to a CO_2 bottle, open valve, allow CO_2 to flow through, close valve, open the lock and remove the block.

Series 250
Dry ice machine for 250 g block

- Yield from 22 kg gas bottle: Approx. 16 blocks
- To make a -79 °C block of dry ice weighing 250 g within ~1 min

Sample bags

Mailing bags docuCARE® med

ROTH SELECTION. Material: LDPE.

Liquid-tight sample bags for safe and secure transport of medical samples, laboratory samples or cytostatic agents. Blue security seal with hidden "ILLEGAL ENTRY" lettering in multiple languages (certified by "ISEGA"), width 45 mm. Straightforward handling thanks to tamper-proof self-adhesive seal. Suitable as secondary packaging for transporting biological substances of Category B (UN 3373) according to ADR and packaging instruction P650.

- Liquid-tight (confirmed by BAM)
- Highly tearproof film, recyclable, transparent
- Durable duplex seam, with microprint
- Printed with the UN 3373 number / Biological materials, category B
- Serial numbering and barcodes

Suitable absorbent nonwoven sheet for use as an absorption material available as an option.

S ❄❄❄

Liquid sample bags Whirl-Pak®

Nasco Sampling. Material: LDPE. **Sterile**.

For the storage of liquid and solid samples.
Wire ties allow leak-proof, water-tight and air-tight closure of the bags.

Application:

- 1. Easy to open by tearing the foil along the perforation. The inside of the bags remains sterile as long they are not opened
- 2. The bags can be opened using the lifting straps, without touching the inside of the bag
- 3. The wide neck opening of the bags simplifies filling. Hold the bag as shown and fill to approx. 2/3 full
- 4. Close the bags by pulling on the outer straps.
- 5. Hold the bag away from you and swirl it around at least 3 times. (Fold bags with volumes upwards of 2500 ml 4–5 times)
- 6. Fold the straps over to close the bags with a watertight seal

Temperature stability: -196 to +80 °C.

Liquid sample bags Whirl-Pak® with sponge Speci-Sponge®

Nasco Sampling. Material: LDPE. **Sterile**.

For sampling of laboratory benches, furniture, devices and other areas where testing for pathogens such as listeria, salmonella and *E. coli* is required. The sponge is sterile and not growth-inhibiting. After the sample has been collected, return the sponge to the bag. Add medium and, if necessary, incubate directly in the bag.

- With wire ties and large labelling area
- Sponge dimensions when wet: L 76 x W 38 x H 16 mm

Foils, foil dispenser and holders

Sealing film PARAFILM® M

ROTH SELECTION.

Ideal for sealing vessels, petri dishes, cells etc. High flexible (stretches up to 200%). Clings even around irregular shapes.

- The sealing film is free of plasticisers, and consists largely of polyolefins and paraffin waxes
- Meets the requirements of the FDA when used at temperatures below 55 °C, as well as when GMP (Good Manufacturing Practice) is followed
- PARAFILM® M is resistant to many polar substances for up to 48 hours, such as saline solutions, inorganic acids and bases; brittleness may occur after this time
- Temperature stability: -45 to +50 °C (Melting point: 60 °C)
- Elasticity: 200 %

Gas permeability in 24 hours at 23 °C and 50% RH for:

- Oxygen: 350 cm^3/m^2
- Nitrogen: 105 cm^3/m^2
- Carbon dioxide: 1100 cm^3/m^2

Water vapour permeability in 24 hours at 37 °C and 90% RH for:

- 0.8 g/m^2

Sealing film Seal-R-Film™

BRAND.

For temporarily sealing beakers, flasks and other vessels.

- Material thickness: 0.14 ±0.02 mm
- Elasticity (25 °C): 300%
- Tear strength (25 °C): 1.5 MPa
- Melting temperature: >65 °C (151 °F)
- Boiling point: >288 °C (550 °F)
- Continuous service temperature: -20 °C to +46 °C
- Toxicity: Non-toxic

The sealing film can be stretched to three times its original length. Therefore, Seal-R-film™ always fits, even with irregular shapes. Traceability through batch identification per roll.

Gas permeability:

- CO_2 (carbon dioxide) <1000 cm^3/m^2
- O_2 (oxygen) <350 cm^3/m
- Water vapour permeability <0.8 g/m^2

(in 24 hours at room temperature and a pressure of 0.1 MPa)

Chemical resistance: Ammonia (NH_3) 28%; ethanol; isopropanol; iodine solution 0.1 mol/l (brown colouring); potassium permanganate ($KMnO_4$) 5% (brown colouring); methanol; sodium chloride (NaCl) 20%; sodium hydroxide (NaOH) 22%; nitric acid (HNO_3) 95% (brown colouring); hydrochloric acid (HCl) 36.5%; sulphuric acid (H_2SO_4) 98%; hydrogen peroxide (H_2O_2) 30%

Clear cling film Barriofilm

ROTH SELECTION. Material: Vinylidene chloride.

Very good barrier properties. Foil does not stick and is easy to roll.

- Non-flammable, self-extinguishing
- High water vapour and oxygen barrier
- Suitable for foodstuffs
- Microwave-safe
- Temperature stability: -60 to +140 °C

Delivery incl. foil cutter, in box.

Sterile indicator labels Comply™

3M. Autoclavable: Yes.

Simple identification labels for steam sterilisation, with treatment indicator, lead-free. Can be labelled with an indelible pen, easily removable without residues, especially from metal containers.

L x W (mm)	Art. No.	Pack Qty.	€
100 x 25	**ANX6.1**	500 unit(s)	182,75

Bowie-Dick single use test pack Comply™

3M.

Indicator for autoclave monitoring

Free from heavy metals, for daily air removal and steam permeability test according to DIN EN 17665. Meets the requirements of EN 867-1 1997, EN 867-4:2000, ISO 11140-1:1995 and ISO 11140-4:2001. Simple interpretation and error detection thanks to colour change from blue to pink and non-reflective surface. No subsequent colour change, ensuring safe storage and traceability of results. Reproducible.

Type	Art. No.	Pack Qty.	€
1301	**ANX4.1**	20 unit(s)	225,75

Bowie-Dick single use test pack stericlin®

ROTH SELECTION.

Indicator for autoclave monitoring

Steam penetration test for daily function monitoring and quality assurance of the steam steriliser according to DIN EN ISO 11140-4. Free from heavy metals and toxic substances.

Application:

- Place the test pack in the steriliser
- Carry out the Bowie-Dick test procedure
- Remove the test sheet
- Review the result: In the event of complete steam penetration, the indicator will evenly change colour from blue to pink. In the event of a malfunction, however, no even colour conversion will occur. Following a successful colour conversion, the colour hue of the indicator will no longer change. This ensures complete reliability of documentation.

L x W (mm)	Art. No.	Pack Qty.	€

A 121 °C

Indicator strips Comply™ SteriGage™

3M. Autoclavable: Yes.

Integrating class 5 indicators (integrators)

Individually packaged chemical indicators for monitoring the sterilisation process.

Clear results thanks to „Moving Front“ technology: As the sterilisation process progresses, a dark strip appears, which either moves to the „Accept“ area (passed) or remains in the „Reject“ area (not passed). This can be read from the indicator directly without the need for interpretation.

- Suitable for steam sterilisation at +121 °C and +134 °C
- High performance: The reaction is the same as that of a bio indicator strip during the sterilisation process

Type	Art. No.	Pack Qty.	€
1243	**ANX5.1**	100 unit(s)	83,80

A 121 °C

Indicator strips stericlin® type 5 (STEAM)

ROTH SELECTION. Autoclavable: Yes.

Absorptive indicators for package monitoring according to DIN EN ISO 11140-1.

Review of the sterilisation process for sufficient influence from the vapour (vapour and temperature) in the interior of packaging or in other selected areas. Free from heavy metals and toxic substances.

Application:

- Place in the desired areas of the load (in transparent packaging, wrapping materials, containers, etc.)
- Carry out the sterilisation program (121 °C/134 °C)
- Remove the indicator strips
- Review the result: In the event of sufficient influence from vapour, the indicator will change colour from blue to pink. An incomplete colour change indicates a malfunction of the steriliser. Following a successful colour conversion, the colour hue of the indicator will no longer change. This ensures complete reliability of documentation.

Sterilisation bags stericlin®

ROTH SELECTION. Material: Paper, Plastic (Film). Autoclavable: Yes.

Pre-sealed on three sides, for sealing with heat sealing units (sealing temperature: 175–200 °C). The sterilisation-resilient kraft paper with a strength of 70 g/m² constitutes an effective barrier against germs, yet is also permeable to air, vapour and sterilising gases. With three imprinted indicators outside the filling area: STEAM, EO and FORM. According to DIN EN ISO 11607 and DIN 868-5.

Packaging material for disposable medical products and reusable medical products.

Medical device class I MDD

Sterilisation containers polysteribox®

Ritter. Material: Plastic. Autoclavable: Yes.

For sterilising and storing instruments. Acc. to DIN 58952, 58953, EN 868-1/868-8/554, ISO 11607 and DIN EN ISO 17664 and 11137-1.

- Suitable for steam, gas and plasma sterilisation
- Germ and bacteria-proof thanks to hydrophobic PTFE filter
- A sterilisation seal and protective seal can be used to monitor the sterility of the contents
- Safety tilt seal for safe transportation
- Stackable
- Dishwasher-safe
- Autoclavable up to 134 °C

Technical specifications:

Art. No.	X616.1	KP96.1	TA78.1
Type	polysteribox® SH	polysteribox® M	polysteribox® XL
Inner length	177 mm	156 mm	465 mm
Inner width	76 mm	124 mm	90 mm
Inner height	44 mm	48 mm	54 mm

Delivery incl. PTFE filters.

Medical device class I MDD

Cell culture bottles

Cell culture bottles CELLMASTER™ roller bottles

Greiner Bio-One. Material: PS (TC-treated), HDPE screw cap. **Sterile**.

- Improved cell adherence through physical surface treatment
- Free of DNase, RNase and human DNA, non-pyrogenic
- Graduated

S

Standard screw cap

Growth surface (cm²)	Ø ext. (mm)	Art. No.	Pack Qty.	€
850	122	**CE58.1**	24 unit(s)	157,95

Filter screw cap

Cap with hydrophobic membrane (PET/PTFE) for optimal gas exchange.

Growth surface (cm²)	Ø ext. (mm)	Art. No.	Pack Qty.	€
850	122	**CE59.1**	24 unit(s)	197,80

Suspension culture bottles CELLSTAR®

Greiner Bio-One. Material: PS. **Sterile**.

With white screw cap. High, angled bottle neck protects the inside of the screw cap from contamination by medium.

- Graduations and labelling area on the side
- Hydrophobic surface, ideal for suspension cultures and hybridoma cells
- **Free of DNase, RNase and human DNA**
- Endotoxin-free, free of cytotoxic substances

S

Pack.	Art. No.	Pack Qty.	€
20 x 10	**CE51.1**	200 unit(s)	168,80
24 x 5	**CE52.1**	120 unit(s)	169,85
10 x 4	**CE53.1**	40 unit(s)	115,60

Suspension culture bottles CELLSTAR® filter screw cap

Greiner Bio-One. Material: PS. **Sterile**.

Hydrophobic membrane (pore size 0.2 µm) for minimal risk of contamination and optimal gas exchange. High, angled bottle neck reduces the risk of media contact with the inside of the screw cap and therefore provides an additional layer of protection against contamination.

- Hydrophobic surface
- Ideal for suspension cultures, hybridoma cells and embryonic stem cells
- Optimal access with pipette
- Graduations and labelling area on the side
- Optimal gas exchange thanks to high air flow rate of membrane
- **Free of DNase, RNase and human DNA**
- Endotoxin-free, free of cytotoxic substances

S

Delivery incl. standard screw-cap closures (without filter, in addition to the fitted filter screw-cap closures).

Pack.	Art. No.	Pack Qty.	€
20 x 10	**CNA6.1**	200 unit(s)	167,70
24 x 5	**CNA7.1**	120 unit(s)	136,70

Microtitration plates CELLSTAR® FourWell Plate™

Greiner Bio-One. Material: PS. **Sterile**.

Four-well plate for microscopic applications, for cultivation and processing of cells on microscope slides. Also for use as incubation tray for blotting membranes. Plate layout corresponds to ANSI Standard.

- 4 individual chambers, each with a max. volume of 18.6 ml per well
- Numbered wells for secure sample identification
- Bevelled edges on the left-hand side of the plates serve as a guide
- Vents
- With cover panel
- **Free of DNase, RNase and human DNA**
- Endotoxin-free, free of cytotoxic substances

Microtitration plates cellGrade™ sterile

BRAND. Material: PS. **Sterile**.

Standard plate for cultivating adherent cell cultures.
Manufactured according to ANSI/SBS standards 1 to 4-2004 to ensure compatibility when carrying out manual processes and, in particular, automatic processes.

S

Properties of BRAND*plates*® microtiter plates:

- 96 well standard format
- Alphanumerically coded
- **Free of endotoxins, DNase, DNA, RNase, non-cytotoxic**

Properties of cellGrade™ microtiter plates:

- Colour code: orange for the cell culture
- PS surface with various freely accessible chemical groups, e.g. carboxyl and hydroxyl groups
- Surface is hydrophilic (untreated PS is non-hydrophilic)
- Serum constituents are bound to the free chemical groups which allow indirect adhesion of cells

Delivery incl. lid.

Microtitration plates inertGrade™ sterile

S

BRAND. Material: PS. **Sterile**.

Suitable for cultivating suspension cell cultures.
Manufactured according to ANSI/SBS standards 1 to 4-2004 to ensure compatibility when carrying out manual processes and, in particular, automatic processes.

Properties of BRAND*plates*® microtiter plates:

- 96 well standard format
- Alphanumerically coded
- **Free of endotoxins, DNase, DNA, RNase, non-cytotoxic**

Properties of inertGrade microtiter plates™:

- Colour code: orange for the cell culture.
- Ideal for cell cultures if cell adhesion is to be avoided
- Optimised surface properties minimise cell binding, protein absorption, enzyme activation and cellular activation
- This allows, for example, premature differentiation of stem cells to be inhibited

Delivery incl. lid.

F-bottom, transparent

F-profile (flat bottom shape) for precise optical measurements.

Cell culture inserts BRAND Insert 2in1

BRAND. **Sterile**.

Suitable for producing skin models, 3D epithelial cell cultures, study of chemotaxis, transmigration assays or, e.g., in transport and polarity studies. For general cell culture work or swapping from the standing to the hanging position, already validated cell culture plates can be reused. Thanks to their feet and hooks, BRAND Inserts 2in1 can be positioned both ways. With its protein-like structure, the cellGrade™ plus surface optimally promotes the growth of primary keratinocytes and many other cell types.

- Can be used as a hanging or standing insert
- Compatible with all good multiwell plates
- Suitable for 2D and 3D cell cultures
- Surface: cellGrade™ plus
- Sterility Assurance Level (SAL) of 10^{-6}

Cell culture plates, pans, vials

Cell culture plates sterile

ROTH SELECTION. Material: PS. **Sterile**.

Hydrophilic, negatively-charged surface through plasma treatment for uniform cell adhesion and cell growth.

- F-profile (flat-shaped base)
- Optically clear for good cell visualisation
- Increased well edge reduces evaporation
- Condensation rings in the lid reduce cross-contamination
- Alphanumeric numbering
- Gamma-sterilised
- Non-pyrogenic

S

Cell strainer EASYstrainer™

Greiner Bio-One. Material: PP, filter membrane made of PET. **Sterile**.

For the filtration of cell suspensions and primary cell isolates, e.g. after organ digestion, for use in primary cell extraction or cell preparation for flow cytometry.

- Fits all standard 50 ml tubes
- With handle and mantle surface for improved aseptic handling
- Venting slot for rapid filtration, no overflowing of the cell strainer
- Individually packed in blister pack

Aids aseptic work: The mantle surface and handle protect against unintentional contact with the sterile filter material. The single blister pack allows for convenient and aseptic removal of the strainer. Venting slot between fitted cell strainer and tube allows the air in the tube to escape quickly during filtration and ensures that liquid does not accumulate between the strainer and the tube or that the strainer cannot overflow.

Mesh size (µm)	Colour	Pack.	Art. No.	Pack Qty.	€

S

Cell strainer Flowmi™

ROTH SELECTION. **Sterile**.

For direct filtration of up to 1000 µl cell suspensions through pipette tips before FLOW or FACS analysis. Compatible with most conventional 1000 µl pipette tips.

- Filters small quantities of cell liquids without losing any volume
- Removes cell clumping, resulting in homogeneous individual cell suspensions
- Filters cell fragments in order to reduce the blockage potential for FLOW or FACS devices

Application:

- Take up a sample in the pipette tip
- Insert it into the Flowmi™ cell strainer
- Filter the sample through the cell strainer into a reaction vial
- Discard the cell strainer along with the pipette tip

Note: The Flowmi™ cell strainer should be used with cell suspensions of up to two million cells/ml (40 µl) or four million cells/ml (70 µl).

S

Cell culture tubes CELLSTAR® CELLreactor™ tube

Greiner Bio-One. Material: PP, Filter screw closure with PTFE-coated membrane, pore size 0.2 µm. **Sterile**.

Tube temperature stable from -196 to +121 °C, screw closure from -80 to +100 °C. Autoclavable tube (without screw closure).

- Conical tube design facilitates direct cell harvesting
- With graduations and labelling area
- Excellent gas exchange
- **Free of DNase, RNase and human DNA**
- Pyrogen free, non-cytotoxic

Applications:

- Miniaturisation of large-scale test setups
- Maximises the number of parallel experiments
- Bioreactors for the cultivation of suspension cells and spheroid cells
- Expansion of aerobic bacteria, yeasts and micro-organisms
- Storage of substances which require gas exchange

S

Medium bottles

Nalgene. Material: PETG, HDPE screw cap. **Sterile**.

Low permeation of CO_2 and O_2 allows storage of culture media for up to six months. The cap and neck are sealed with a heat-shrink band: Vessel remains sterile as long as the band is intact.

- Transparent
- Square
- Breakproof and robust
- Leak-proof
- Bottle and cap are non-pyrogenic

2000 ml volume with integrated handles for easy handling.

Culture bottles

Cell culture media bottle DURAN® *TILT*

DWK Life Sciences. Material: DURAN® glass, PP screw cap. Autoclavable: Yes.

Can be used in two positions: Upright for storage, tilted at 45° for ergonomic pipetting.

- Compact shape, ideal for low sliding windows in sterile work-benches
- Stackable and space-saving
- Wide opening for easy pipetting
- Ergonomic screw thread for easy opening and closing
- Double volume marking for added convenience

DURAN WHEATON KIMBLE

Baffled flasks DURAN® with screw closure

DWK Life Sciences. Material: DURAN® glass, PP screw closure with PTFE membrane. Autoclavable: Yes.

Four baffles on the base create a turbulent flow, enlarge the gas exchange surface area and therefore increase oxygen intake. Automated production ensures a reproducible flask geometry and consistent results.

- Double-thickness walls for exceptional mechanical stability
- With Retrace Code (batch identification)
- Temperature stable up to +140 °C

Technical specifications:

Petri dish stands DishRack

Sarstedt. Material: PC.

For storage, transport and incubation of up to 52 Petri dishes with Ø 92 mm. with 4 compartments, Petri dishes easy to remove at every point, with no need for restacking. Two flexible silicone retaining lips provide a secure hold for the plates in the stands, even during transport. Height: 240 mm.

Note: Autoclaving of the rack is possible as a rule; however, if carried out several times (more than 3x) stress cracks can occur at the riveted eyelets of the rack, which can adversely affect the stability of the rack.

Delivery incl. paper marking strips.

Petri dish revolving table

schuett biotec.

For uniform plating of liquids on agar surfaces in Petri dishes.

Technical specifications:

Art. No.	N962.1	HT52.1
Ø x H	160 x 45 mm	160 x 70 mm
Weight	2,3 kg	1,0 kg
Mains connection		12 V

Petriturn-M

- Manual operation
- The high mass of the revolving table produces high vibrations and ensures a long operating time
- Usable on both sides
- For Petri dishes up to Ø 100 mm, or up to Ø 150 mm when turned

Pic.	Type	Art. No.	Pack Qty.	€
(1)	Petriturn-M	**N962.1**	1 unit(s)	273,05

Petriturn-E

- Electric drive
- Operation of the revolving table contactlessly using a sensor with automatic shutdown (3 seconds to 2 minutes)
- Operation using a footswitch is possible (please order separately)
- Continuous operation is possible
- for Petri dishes up to Ø 100 mm
  (with attachment up to Ø 150 mm, please order separately)
- Speed regulation from 10 to 100 rpm,continuous

Pic.	Type	Art. No.	Pack Qty.	€

Colony counter SC6 PLUS

Stuart.

For fast and exact counting of bacterial colonies in Petri dishes.

- Counting is initiated by pressing down on the Petri dish with any pen
- Pressure sensitivity is individually adjustable
- Confirmation of count by audible signal (optional)
- With average counter, max. 99 Petri dishes can be analysed
- Three-digit LED display (0–999)
- Anti-glare LED lighting
- Optional light or dark background (dark background aids counting translucent colonies)
- Can be connected to a PC
- Antimicrobial BioCote® surface coating

Technical specifications:

Art. No.	EN38.1
Operating temperature	+5 to +40 °C
L x W x H	300 x 310 x 140 mm
Weight	1,5 kg
Mains connection	230 V, 50 Hz

Delivery incl. 2 Wolffhügel grids and 2 reducer rings (centring aids) for Petri dishes with Ø 50–90 mm, USB cable (1 m long).
Please order magnifying glasses for counting microscopic colonies separately.

Type	Art. No.	Pack Qty.	€
SC6 PLUS	**EN38.1**	1 unit(s)	983,00

Colony counter

ROTH SELECTION.

Battery-powered device for counting and marking colonies.

- Acoustic or visual signal for registering the counting process
- Count-up and count-down
- Lock button to deactivate the counting function
- Counts up to 32 trays
- With totalling function

Delivery incl. pen, stand and battery (3 V, type: CR 1220).

Type	Art. No.	Pack Qty.	€
eCount	**KN08.1**	1 unit(s)	366,60

Electroporation cuvettes

ROTH SELECTION. Material: PC, Aluminium electrodes.

For transforming DNA and siRNA into various cell types. Compatible with most electroporation systems (e.g. Bio-Rad®, BTX®, Invitrogen®, Eppendorf and Kodak®/IBI®).

- Manufactured under clean-room conditions
- Available in three gap widths: 1, 2 and 4 mm
- Colour-coded lid according to gap width

100 µl
Application: Highly efficient transformation (*E. coli*)

4	black	individual	**PP40.1**	10 unit(s)	46,80

S

Clone cylinder

ROTH SELECTION. Material: PS. **Sterile**.

For isolating clones or for singling out cells or cell groups. Conical cylinder flared at lower edge for good contact with dish surface.

Directions for use

To isolate a clone, the base of the cylinder is coated with a thin grease film (e.g. sterile silicone oil) in order to ensure better sealing. The silicone side cylinder is placed over the selected clone. After adding a small quantity of Trypsin/EDTA and a short incubation period at 37 °C, the cells separate and can be transferred to other vessels.

Homogeniser ROTILABO® for 15 ml centrifuge tubes

ROTH SELECTION. Material: Stainless steel 1.4301. Autoclavable: Yes.

For the homogenisation of cells, tissue, foodstuffs samples and much more, manually or using laboratory stirrers.

- Made from one piece and polished for a perfect fit
- Transitions are optimally designed for easy disinfection
- Tapered shank for minimal homogenate displacement
- Handle length 100 mm
- Shank Ø 8 mm (tapers to 4.5 mm)
- Cone Ø 12 mm (tapers to 4 mm)
- Weight 60 g

Total length (mm)	Suitable for	Art. No.	Pack Qty.	€
185	15 ml centrifuge tubes	**NH32.1**	1 unit(s)	67,75

Homogeniser

ROTH SELECTION. Material: Borosilicate glass.

Distance between mortar and pestle: 0.15 to 0.25 mm.

Technical specifications:

Homogenisers and pestles

DURAN WHEATON KIMBLE

Micro-homogeniser WHEATON®

DWK Life Sciences. Material: Borosilicate glass WHEATON® 33.

High product yield due to smaller friction area. For single use, prevents cross-contamination, e.g. when handling radioactive samples.

Technical specifications:

Art. No.	HLC0.1
Pestle length	88 mm
Mortar length	44 mm
Ø Internal	8 mm

Delivery incl. pestle.

Vol. (ml)	Art. No.	Pack Qty.	€
0.75	**HLC0.1**	25 unit(s)	334,35

A 121 °C DURAN WHEATON KIMBLE

Micro-homogeniser WHEATON® Potter-Elvehjem

DWK Life Sciences. Material: Borosilicate glass WHEATON® 33. Autoclavable: Yes.

Micro size for extremely precise work, reservoir and pouring lip to make it easier to pour out the sample.

- Mortar dimensions: L 65 x Ø 4 mm
- Gap between pestle and mortar: 0.1–0.15 mm

Technical specifications:

Art. No.	HLC1.1
Pestle length	110 mm
Mortar length	65 mm
Ø Mortars	4 mm

Delivery incl. pestle.

Vol. (ml)	Art. No.	Pack Qty.	€
0.1	**HLC1.1**	1 unit(s)	107,35

A 121 °C

Micro-homogeniser

ROTH SELECTION. Material: Borosilicate glass. Autoclavable: Yes.

For grinding and homogenising even the smallest quantities, e.g. histology.

Technical specifications:

Art. No.	0296.1	0297.1	0298.1
Mortar length	30 mm	40 mm	50 mm
Ø Internal	4 mm	6 mm	8 mm

Delivery incl. pestle.

Vol. (ml)	Art. No.	Pack Qty.	€
0.025	**0296.1**	1 unit(s)	141,45
0.1	**0297.1**	1 unit(s)	155,25
1	**0298.1**	1 unit(s)	141,45

A 121 °C

Homogenisers Dounce

ROTH SELECTION. Material: Glass. Autoclavable: Yes.

For grinding of cellular material while preserving the cell nucleus.

Delivery incl. two pestles: Pestle A for coarse grinding, pestle B for subsequent fine grinding.

Vol. (ml)	Length (mm)	Art. No.	Pack Qty.	€
0.5	37	**CXC8.1**	1 unit(s)	204,25

Homogenisers and pestles

Homogeniser Dual

ROTH SELECTION. Material: Glass.

With tapered and cylindrical areas, for effective grinding and consistent homogenisation of tissue. Ideal for cellular tissue such as muscle, heart and lungs. Distance between mortar and pestle: 0.1 to 0.15 mm.

Technical specifications:

Art. No.	CXE5.1	CXE6.1	CXE7.1	CXE8.1	CXE9.1	CXH0.1
Pestle length	155 mm	210 mm	228 mm	268 mm	305 mm	330 mm

Cuvettes

Glass cuvette ROTILABO®

ROTH SELECTION.

- Two polished sides
- Spectrally calibrated
- Transmission ≥80 %
- Layer thickness 10 mm, tolerance ±0.01 mm

Optical glass seamed lid

Material: Glass special optical glass, PTFE closure.

- Permeability range: 320–2500 nm
- With seamed lid, loosely attached
- Dimensions: L 12.5 x W 12.5 x H 45 mm

Type	Volume (ml)	Inner width (mm)	Art. No.	Pack Qty.	€
Micro	0.7	2	**X855.1**	1 unit(s)	93,90
Semi-micro	1.4	4	**X853.1**	1 unit(s)	89,20
Macro	3.5	10	**X851.1**	1 unit(s)	55,30

Optical glass plugs

Material: Glass special optical glass, PTFE closure.

- Permeability range: 320–2500 nm
- With plugs, fluid-tight
- Dimensions: L 12.5 x W 12.5 x H 48 mm

Type	Volume (ml)	Inner width (mm)	Art. No.	Pack Qty.	€
Semi-micro	1.4	4	**Y032.1**	1 unit(s)	145,10
Macro	3.5	10	**Y030.1**	1 unit(s)	105,15

Quartz glass seamed lid

Material: Quartz glass Spectrosil®, PTFE closure.

- UV-permeable
- Permeability range: 170–2700 nm
- With seamed lid, loosely attached
- Dimensions: L 12.5 x W 12.5 x H 45 mm

Type	Volume (ml)	Inner width (mm)	Art. No.	Pack Qty.	€
Micro	0.7	2	**X856.1**	1 unit(s)	155,15

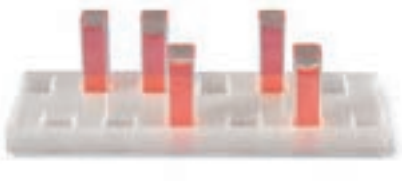
Glass cuvette ROTILABO® fluorescence

ROTH SELECTION. Material: Quartz glass Spectrosil®, PTFE closure.

- With seamed lid, loosely attached
- Four polished sides and polished base
- UV-permeable, for fluorimetry
- Permeability range: 170–2700 nm
- Spectrally calibrated
- Transmission ≥80 %
- Layer thickness 10 mm, tolerance ±0.01 mm
- Dimensions: L 12.5 x W 12.5 x H 45 mm

Type	Volume (ml)	Art. No.	Pack Qty.	€
Macro	3.5	**AHC0.1**	1 unit(s)	203,20



Glass cuvette ROTILABO® L 50 mm

ROTH SELECTION. Material: Glass (special optical glass), PTFE closure.

- Two polished sides
- Permeability range: 320–2500 nm
- Spectrally calibrated
- Transmission ≥80 %
- Layer thickness 50 mm, tolerance ±0.02 mm
- With seamed lid, loosely attached
- Dimensions: L 52.5 x W 12.5 x H 45 mm

Type	Volume (ml)	Inner width (mm)	Art. No.	Pack Qty.	€
Macro	17.5	9.5	**AHA7.1**	1 unit(s)	153,30

Cuvette stand ROTILABO®

Kartell. Material: PE.

For cuvettes of 10 mm thick. With staggered holder arrangement. Shallow stand for better visibility of the cuvette contents.

No. of slots	Length (mm)	Width (mm)	Height (mm)	Art. No.	Pack Qty.	€
12	170	50	15	**9663.2**	5 unit(s)	29,55

Cuvettes

Glass cuvette ROTILABO® black

ROTH SELECTION. Material: Quartz glass Spectrosil®, PTFE closure.

- With self-shielding sides made from black glass
- Two polished sides
- UV-permeable
- Permeability range: 170–2700 nm
- Spectrally calibrated
- Transmission ≥80 %
- Layer thickness 10 mm, tolerance ±0.01 mm
- With seamed lid, loosely attached
- Dimensions: L 12.5 x W 12.5 x H 45 mm

Type	Volume (ml)	Inner width (mm)	Art. No.	Pack Qty.	€
Micro	0.7	2	**AHA6.1**	1 unit(s)	299,95
Semi-micro	1.4	4	**AHA5.1**	1 unit(s)	268,75

Single-use cuvettes fluorescence

Sarstedt.

- With four optical sides
- Cavity-sorted production
- Layer thickness 10 mm
- Dimensions: L 12.5 x W 12.5 x H 45 mm

Polystyrene
Material: PS.

- For measuring from 340 nm

Volume (ml)	Art. No.	Pack Qty.	€
4	**NK49.1**	100 unit(s)	18,55

Single-use cuvettes ROTILABO®

ROTH SELECTION.

- Two optical windows
- Extremely low deviation in absorbance coefficients
- Outstanding optical transmission values
- Cavity-sorted production
- Layer thickness 10 mm
- Dimensions: L 12.5 x W 12.5 x H 45 mm

Polystyrene

A 121 °C

Cuvette stand ROTILABO®

ROTH SELECTION. Material: PP. Autoclavable: Yes.

For cuvettes of 10 mm thick. The holders' special shape ensures they do not scratch the cuvette surface. Stackable.
Temperature stable up to 130 °C.

No. of slots	Length (mm)	Width (mm)	Height (mm)	Art. No.	Pack Qty.	€
12	115	110	105	**9664.1**	1 unit(s)	51,10

Single-use cuvettes UV

BRAND. Material: Plastic.

Permeability range: 230–900 nm. Specially designed for the photometric determination of proteins, ssDNA, dsDNA, RNA und oligonucleotides in the UV range.

- Single-use cuvettes, no risk of contamination through cleaning
- High chemical resistance
- Two optical windows
- Optically flawless transparency
- Recessed windows to protect against scratching
- Arrow mark to indicate direction of transmission
- Standard layer thickness 10 mm
- Standard deviation:
  240 nm ≤ ± 0.007 absorbance coefficients
  300 nm ≤ ± 0.005 absorbance coefficients
- Dimensions: 12.5 x 12.5 x 45 mm

Sorted by manufacturing mould cavity number to ensure the lowest variation in absorbance coefficients.

Cuvettes

Single-use cuvettes fluorescence

BRAND.

With four optical windows.

- Ideal for fluorescence spectroscopy
- Optically flawless radiographic area
- Four optical windows for precise measurements
- Matt handle, can be labelled
- Manufactured under controlled room conditions
- Fully automatic packaging
- Layer thickness: 10 mm
- Dimensions: L 12.5 x W 12.5 x H 45 mm, window: W 10 x H 35 mm

Sorted by manufacturing mould cavity number to ensure the lowest possible variation in absorbance coefficients.

Polystyrene
Material: PS.

- Application range: 340–900 nm
- Standard deviation (absorbance coefficients): 360 nm ≤ ±0.005 nm
- Chemical resistance (short-term resistance, 30 min): Ammoniac/hydrofluoric acid, 10 %/isopropanol/sodium hydroxide/hydrochloric acid, 36 %
- Not resistant to: Chloroform/hexane

Type	Volume (ml)	Art. No.	Pack Qty.	€
Macro	2.5 to 4	**EXP1.1**	100 unit(s)	23,55
Macro	2.5 to 4	**EXP2.1**	500 unit(s)	96,40

UV-transparent
Material: Plastic UV-transparent.

- Minimal inherent fluorescence
- Application range: 230–900 nm
- Standard deviation (absorbance coefficients):
  320 nm ≤ ±0.007
  300 nm ≤ ±0.005 nm
- Chemical resistance (short-term resistance, 30 min): Acetone/ammoniac/benzaldehyde/butanone/dioxane/DMF/DMSO/acetic acid (10 %)/ethyl acetate/hydrofluoric acid (10 %)/isopropanol/sodium hydroxide/nitric acid (65 %)/hydrochloric acid (36 %)
- Not resistant to: Chloroform/hexane

No. of slots	Length (mm)	Width (mm)	Height (mm)	Art. No.	Pack Qty.	€
16	210	70	38	**CNP5.1**	1 unit(s)	18,55

Cuvette rack

ROTH SELECTION. Material: PMMA.

12-slot cuvette rack, suitable for Thermo Scientific analysers: Arena 20, Arena 20XT, Arena 30 and Arena 60.

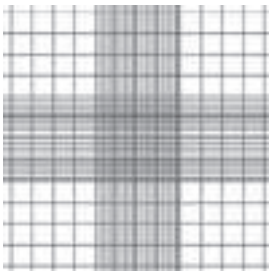
Applications:

- Foodstuffs (milk, meat, honey)
- Beverages (wine, beer, juice)
- Customer-specific applications

Type	Pack.	Art. No.	Pack Qty.	€
Cuvette rack	40 x 25	**HNX9.1**	1,000 unit(s)	1.185,45

Counting chambers

Counting chamber C-Chip Neubauer improved



ROTH SELECTION. Material: Plastic.

Precise quantification, high reproducibility. Same chamber configuration as Neubauer improved glass counting chambers. Coverslips are not required.

- Double counting grid
- Chamber capacity 10 µl
- Dimensions: L 75 x W 25 x H 1.6 mm

Not a medical device / Not an IVD product

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
Disposable counting chamber	0.1	**PK36.1**	50 unit(s)	201,05

Counting chamber Neubauer

Marienfeld. Material: Glass.

Double counting grid. Counting grid with nine large squares. The smallest square in the centre is split into 16 group squares and these in turn are split into 16 small squares.

- Large square: 1 mm²
- Group square: 0.04 mm²
- Small square: 0.0025 mm²

Delivery incl. two haemocytometer coverslips (20 x 26 mm).

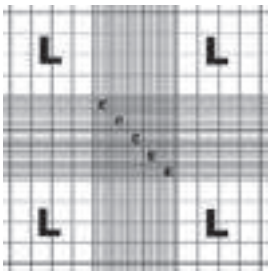
In vitro diagnostic medical device according to IVDD

Dark lines
The counting grid appears under the microscope as a grid of dark lines.

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
without spring clamps	0.1	**T728.1**	1 unit(s)	56,80

Dark lines, 2 spring clamps
The counting grid appears under the microscope as a grid of dark lines. Spring clips securely fix the coverslip to the counting chamber.

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
with 2 spring clamps	0.1	**PC74.1**	1 unit(s)	78,05



Bright lines
The grid structure is incorporated in a very thin, transparent metal layer. The bright lines contrast well with the darker, metallic background, which simplifies the evaluation of cell suspensions.

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
without spring clamps	0.1	**T734.1**	1 unit(s)	93,65

Bright lines, 2 spring clamps
The grid structure is incorporated in a very thin, transparent metal layer. The bright lines contrast well with the darker, metallic background, which simplifies the evaluation of cell suspensions.

Spring clips securely fix the coverslip to the counting chamber.

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
with 2 spring clamps	0.1	**KHY4.1**	1 unit(s)	105,90

Counting chamber Neubauer improved

Marienfeld. Material: Glass.

For leucocyte, thrombocyte and erythrocyte counting.
Double counting grid. Counting grid with nine large squares. The four corner squares are used for leucocyte counting. The smallest square in the centre is split into 25 group squares and these in turn are split into 16 small squares. Five of the group squares are used for erythrocyte counting.

- Large square: 1 mm²
- Group square: 0.04 mm²
- Small square: 0.0025 mm²

Delivery incl. two haemocytometer coverslips (20 x 26 mm).

In vitro diagnostic medical device according to IVDD

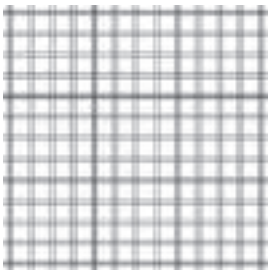
Counting chamber Thoma new

Marienfeld. Material: Glass.

Double counting grid. Counting grid with five large squares (corner fields not implemented). The large square in the centre is split into 16 group squares and these, in turn, are split into 16 small squares. No lines in the intermediate areas.



- Small square: 0.0025 mm²

Delivery incl. two haemocytometer coverslips (20 x 26 mm).

In vitro diagnostic medical device according to IVDD

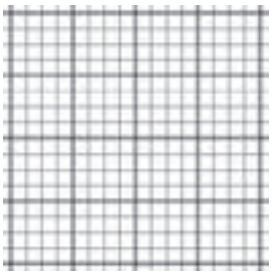
Dark lines
The counting grid appears under the microscope as a grid of dark lines.

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
without spring clamps	0.1	**T733.1**	1 unit(s)	56,80

Counting chamber Bürker

Marienfeld. Material: Glass.

For leucocyte and erythrocyte counting.
Double counting grid. Counting grid with nine large squares for leucocyte counting. Each large square is divided into 16 group squares for erythrocyte counting. The group squares are not subdivided further.



- Large square: 1 mm²
- Group square: 0.04 mm²

Delivery incl. two haemocytometer coverslips (20 x 26 mm).

In vitro diagnostic medical device according to IVDD

Dark lines
The counting grid appears under the microscope as a grid of dark lines.

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
without spring clamps	0.1	**T730.1**	1 unit(s)	53,00

Counting chamber Fuchs-Rosenthal

Marienfeld. Material: Glass.

For counting cells in fluid.
Double counting grid. Total area: 16 mm², counting grid with 16 large squares. The total area is counted.

Delivery incl. two haemocytometer coverslips (24 x 24 mm).

In vitro diagnostic medical device according to IVDD

Dark lines
The counting grid appears under the microscope as a grid of dark lines.

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
without spring clamps	0.2	**T731.1**	1 unit(s)	53,00

Counting chambers

Counting chamber Malassez

Marienfeld. Material: Glass.

Double net ruling. **For counting cells in liquor or for counting nematodes.**
The counting grid covers an area of 2 mm x 2.5 mm. The large rectangles measure 0.25 x 0.20 mm = 0.05 mm² and are divided into 20 small squares each measuring 0.05 x 0.05 mm = 0.0025 mm².

Delivery incl. two haemocytometer coverslips (20 x 26 mm).

In vitro diagnostic medical device according to IVDD

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
without spring clamps	0.2	**KHY1.1**	1 unit(s)	56,80

Counting chamber Nageotte

Marienfeld. Material: Glass.

Double net ruling. **For counting cells in liquor or for counting nematodes**. The square base area of 100 mm² is divided into 40 rectangular areas each measuring 0.25 x 10 mm.

Delivery incl. two haemocytometer coverslips (30 x 30, thickness 0.4 mm).

In vitro diagnostic medical device according to IVDD

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
without spring clamps	0.5	**KHY3.1**	1 unit(s)	119,35

Counting chamber McMaster

Marienfeld. Material: Glass.

For counting worm eggs. Suitable for solid media.
With two fields and affixed coverslip with two counting grids measuring 10 x 10 mm (divided into 10 parts). The coverslip is affixed on three supports. Distance between base plate and coverslip: 1.5 mm. Dimensions: Length 75 mm x Width 32 mm.

Not a medical device / Not an IVD product

Version	Art. No.	Pack Qty.	€
Counting chamber, complete	**KHY2.1**	1 unit(s)	235,45

Haemacytometre coverslips 0.4 mm

Marienfeld. Material: Borosilicate glass.

For use with counting chambers and haemacytometers. Edges ground and polished. Ready for use, individually packed.

In vitro diagnostic medical device according to IVDD

Cover slips

Coverslips thickness 1

Menzel. Material: Borosilicate glass from hydrolytic class I.

- Thickness no. 1 (0.13–0.16 mm)
- Colourless, absorption-free within the visible spectrum
- Optically pure, free from streaks, bubbles, striations
- Excellent chemical resistance
- Without disruptive autofluorescence even when stimulated in the near UV spectrum (e.g. 365 nm)
- Refractive index 1.5230
- Acc. to ISO 8255-1

Coverslips thickness 1

Marienfeld. Material: Borosilicate glass from hydrolytic class I.

Applications: Examinations using light and fluorescence microscopy, especially in medicine and biology.

- Thickness 1 (0,13–0,16 mm)
- Absolutely colourless, completely clear, suitable for fluorescence microscopy
- High light transmission
- Refractive index tailored to microscopes
- Low inherent fluorescence
- Low flatness deviation, exact compliance with thicknesses
- Good wettability on both glass surfaces
- Low alkali content encourages cell growth
- Ready-to-use
- Suitable for use in coverslippers
- Meets the requirements of DIN ISO 8255

Coverslips thickness 1.5H

Marienfeld. Material: Borosilicate glass from hydrolytic class I.

- With defined thickness of 0.17 ±0.005 mm, specially for high-resolution precision instruments
- Absolutely colourless, completely clear, suitable for fluorescence microscopy
- Refractive index 1.524 to 1.527 at 546.07 nm

Ideal for lenses with a high numeric aperture and high resolving power, e.g.:

- Dry lenses (air immersion): N.A. > 0.7
- Water immersion lenses: N.A. > 1.0
- Glycerine immersion lenses: N.A. > 1.2
- Oil immersion lenses: N.A. > 1.3

Adhesion slides

Adhesion slides Superfrost® Plus

Menzel. Material: Soda-lime glass.

With special adhesives for affixing cells and tissues. Complex and expensive application of adhesives or protein layers is not necessary. Unwanted background colours do not occur. Freshly frozen tissue sections and cytology preparations are attracted electrostatically to the microscope slides.
Dimensions: L 75 x W 25 mm, thickness 1 mm. Edges ground 90°.

Suitable for:

- Fixed tissue sections, embedded in paraffin (2-5 µm)
- Cell adhesions for cyto-centrifugal preparations in standard Papanicolaou smears
- Immuno-peroxidase hybridisation
- In-situ DNA hybridisation

In vitro diagnostic medical device according to IVDD

Version	Art. No.	Pack Qty.	€
With frosted edge	**H867.1**	72 unit(s)	25,80

Adhesion slides Histobond®

Marienfeld. Material: Soda-lime glass.

The silanised glass surface has a permanent positive charge which ensures that all types of section attach securely to the glass. Coloured labelling spaces enable use in routine histology.
Dimensions: L 76 x W 26 mm, thickness 1 mm.

Suitable for:

- In-situ hybridisation
- Problematic tissue samples, such as brain or bone marrow
- Multiple washing cycles, sections adhere firmly to the glass
- Microwave irradiation

In vitro diagnostic medical device according to IVDD

Adhesion slides Superfrost® Plus Gold

Menzel. Material: Soda-lime glass.

With special adhesives for affixing cells and tissues. Complex and expensive application of adhesives or protein layers is not necessary. Unwanted background colours do not occur. Fresh frozen sections or frozen section fixed in formalin are attracted to the slide and then chemically fixed onto the glass surface.
Dimensions: L 75 x W 25 mm, thickness 1 mm. Edges ground 90°.

Suitable for:

- Special staining methods (toluidine blue staining, hematoxylin staining and quick-freeze eosin section staining)
- Tissue sections up to 20 µm
- Bone, frozen heart, brain, skin and other tissue sections that are normally difficult to bind
- Immunocytochemical and in-situ DNA-hybridisation of frozen tissue sections
- Selection counting for immunofluorescence analysis in the event of low tissue quantities

In vitro diagnostic medical device according to IVDD

With frosted edge	**ET09.2**	72 unit(s)	76,85

Adhesion slides Polysine®

Menzel. Material: Soda-lime glass.

With special adhesives for the fixation of cells and tissue. Complex and expensive application of adhesives or protein coatings is not necessary. Preparations are first electrostatically attracted and then biochemically bound. The permanent adhesive gives the slide excellent cell and tissue adhesion. Polysine® slides are insensitive to enzyme effects or heating.
Dimensions: L 75 x W 25 mm, thickness 1 mm. Ground edges 90°.

Ideally suitable for:

- Fresh frozen sections
- Paraffin-embedded (2-5 µm, fixed with alcohol, formalin, bouins or non-crosslinking sections)
- Extended staining process
- Extended in-situ DNA hybridisation and immunocytochemical methods
- Cytocentrifuge preparations

Staining racks and chambers

Staining dish

Kartell. Material: PMP.

For microscope slides with dimensions of 76 x 26 mm. Microwave-safe.

Delivery incl. lid.

Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
8 microscope slides	58 x 54 x 86	**2292.2**	4 unit(s)	64,95

Staining trough acc. to Schiefferdecker

Kartell. Material: PMP.

For microscope slides 76 x 26 mm. Microwave safe.

Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
20 microscope slides	89 x 70 x 50	**XC73.1**	4 unit(s)	60,15

A 121 °C

Staining trough acc. to Coplin

ROTH SELECTION. Material: PP. Autoclavable: Yes.

For microscope slides with dimensions of 76 x 26 mm.
Opening Ø of 53 mm for simple placement.

Delivery incl. screw-on lid.

Suitable for	Ø x H (mm)	Art. No.	Pack Qty.	€
10 microscope slides	53 x 114	**YC09.1**	1 unit(s)	12,80

DURAN
WHEATON
KIMBLE

Staining trough acc. to Coplin

DWK Life Sciences. Material: Soda-lime glass.

For microscope slides 76 x 26 mm.

Suitable for	Ø x H (mm)	Art. No.	Pack Qty.	€
10 microscope slides	66 x 108	**H548.1**	1 unit(s)	21,45

Staining dish acc. to Coplin with screw cap

Marienfeld. Material: Soda-lime glass, screw cap made of plastic (urea 131.5), with PE foam insert.

For microscope slides 76 x 26 mm.

Delivery incl. screw cap.

Suitable for	Height without closure (mm)	Art. No.	Pack Qty.	€
10 microscope slides	108	**ETE2.1**	6 unit(s)	163,40
10 microscope slides	85	**ETE3.1**	6 unit(s)	163,40

Staining racks and chambers

DURAN WHEATON KIMBLE

Staining dish acc. to Coplin

DWK Life Sciences. Material: Soda-lime glass, screw top made of PP.

For microscope slides 76 x 26 mm. Dimensions: L 26 x W 26 x D 90 mm.

Delivery incl. screw top.

Suitable for	Vol. (ml)	L x W x H (mm)	Art. No.	Pack Qty.	€
10 microscope slides	60	26 x 26 x 90	**HLA7.1**	1 unit(s)	43,65

A 121 °C

Microscope slide holder Wash-N-Dry™

ROTH SELECTION. Material: PP. Autoclavable: Yes.

For staining, washing and drying microscope slides with dimensions of 76 x 26 mm. Ideal for tall 150 ml beakers. Distance to floor, 10 mm below the microscope slide for the use of magnetic stir bars.

Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
12 microscope slides	31.5 x 38.4 x 110	**AXC6.1**	1 unit(s)	57,75

DURAN WHEATON KIMBLE

Staining dish acc. to Columbia

DWK Life Sciences. Material: Soda-lime glass, screw top made of PP, with PTFE-coated PE insert.

For coverslips, W 17–23 mm, H 30 mm Longer coverslips can be inserted with the screw top removed.

Delivery incl. screw top.

Suitable for	Art. No.	Pack Qty.	€
4 coverslips	**HLA6.1**	1 unit(s)	56,10

A 121 °C

Coverslip rack Wash-N-Dry™

ROTH SELECTION. Material: PP. Autoclavable: Yes.

For square or round coverslips with dimensions of 18 to 25 mm. With notches on the underside for fixing the coverslips, e.g. with elastic bands.

Colour	Slots	L x W x H (mm)	Art. No.	Pack Qty.	€
white	10	39 x 31 x 24	**TH51.1**	1 unit(s)	52,15

Staining racks and chambers

Staining trough acc. to Hellendahl

ROTH SELECTION. Material: Soda-lime glass.

For microscope slides 76 x 26 mm.

Without expansion

Pic.	Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
(1)	8 microscope slides	93 x 43 x 97	**H549.1**	1 unit(s)	41,60

With expansion
Autoclavable: Yes.

Pic.	Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
(2)	8 microscope slides	63 x 58 x 98	**H550.1**	1 unit(s)	31,90

A 121 °C

Staining trough porcelain

ROTH SELECTION. Material: Porcelain, glazed. Autoclavable: Yes.

For the protection of light-sensitive staining solutions.

- For microscope slides with dimensions of 76 x 26 mm
- Lid dimensions: L 75 x W 48 x H 5 mm
- Temperature stability: to +1000 °C
- Microwave-safe

Delivery incl. lid.

Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
6 microscope slides	70 x 40 x 86	**XX63.1**	2 unit(s)	83,30

Staining trough acc. to Schiefferdecker

ROTH SELECTION. Material: Soda-lime glass.

For microscope slides 76 x 26 mm.

Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
20 microscope slides	89 x 71 x 46	**H551.1**	1 unit(s)	30,00

Staining trough

ROTH SELECTION.

Material: Soda-lime glass.

Delivery incl. lid.

L x W x H (mm)	Art. No.	Pack Qty.	€
105 x 85 x 70	**H554.1**	1 unit(s)	33,35

Accessories glass insert for staining trough

ROTH SELECTION. Material: Soda-lime glass.

For microscope slides with dimensions of 76 x 26 mm or any width up to 52 mm.

Delivery without wire hanger.

Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
10 microscope slides	85 x 60 x 45	**H552.1**	1 unit(s)	28,60

Accessories wire hanger for glass staining rack

ROTH SELECTION. Material: Stainless steel.

Version	Art. No.	Pack Qty.	€
Stainless steel	**H553.1**	1 unit(s)	3,90

Accessories metal insert for staining trough

Marienfeld. Material: Stainless steel.

For microscope slides with dimensions of 76 x 26 mm or any width up to 52 mm.

Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
10 microscope slides	80 x 55 x 53	**CET8.1**	1 unit(s)	28,65

Staining racks and chambers

DURAN WHEATON KIMBLE

Staining trough

DWK Life Sciences. Material: Soda-lime glass, stainless steel rack.

Staining system for microscope slides with dimensions of 76 x 26 mm, 76 x 38 mm and 76 x 52 mm.
Rack with folding handle for closing the dish and inserting and removing the microscope slides.
Inner dimensions at base: L 185 x W 88 x D 78 mm.

Delivery incl. lid and rack.

Suitable for	Art. No.	Pack Qty.	€
50 microscope slides	**HLA2.1**	1 set	295,65

Staining trough acc. to Hausser/Gedigk

ROTH SELECTION. Material: Soda-lime glass.

Delivery without lid and staining insert.

L x W x H (mm)	Art. No.	Pack Qty.	€
130 x 93 x 121	**T725.1**	1 unit(s)	46,40

Accessories for Hausser/Gedigk staining trough

ROTH SELECTION.

For microscope slides 76 x 26 mm.

Lid

Designation	L x W x H (mm)	Art. No.	Pack Qty.	€
Lid, L 130 x W 93 x H 3 mm	130 x 93 x 3	**T726.1**	1 unit(s)	8,60

Staining insert

Designation	Suitable for	L x W x H (mm)	Art. No.	Pack Qty.	€
Staining insert made of stainless steel, for microscope slides with dimensions of 76 x 26 mm, L 110 x W 75 x H 95 mm	60 microscope slides	110 x 75 x 95	**T727.1**	1 unit(s)	112,45

DURAN WHEATON KIMBLE

Preparation box

DWK Life Sciences. Material: DURAN® glass.

With ground glass plate. Versatile for use as a slide storage box, TLC separation chamber, etc.

Vol. (ml)	L x W x H (mm)	Art. No.	Pack Qty.	€

Biopsy embedding cassettes

Simport. Material: POM.

Suitable as a holder for tissue specimens during embedding or storage. To seal the cassettes, the lid is broken off and locked in the lower section. The cassettes can be opened and securely sealed again multiple times.

- Solvent-resistant
- Large labelling areas on the front and sides
- With lid attached
- Surface perforated with holes

Delivery incl. lid.

Biopsy embedding cassettes Swingsette™

Simport. Material: POM.

Cassette and lid with small square compartments for processing, embedding and storage of tissue specimens.

- With convenient hinged lid
- Lid can be opened and closed any number of times
- Textured labelling area on the front
- 45° angle for automated labelling systems
- Resistant to standard histological solvents

Delivery incl. lid.

In vitro diagnostic medical device according to IVDD

Embedding cassettes, accessories

Biopsy embedding cassettes Micromesh™

Simport. Material: POM.

Surface with 1676 square openings each offset by 0.38 mm, for improved fluid exchange and complete drainage. Compartment size 27 mm.

- With convenient hinged lid
- Lid can be opened and closed any number of times
- Textured labelling area on the front
- 45° angle for automated labelling systems
- Resistant to standard histological solvents

Delivery incl. lid.

Precision tweezers with plastic tips special shape

Dumont. Material: Steel (C, Cr, Ni, Mo) anti-magnetic, satin finish, TPE-ESD tips, conductive.

- For gentle handling of delicate materials
- Handle cast from a single piece, curved
- Easy to clean and sterilise
- Ergonomic shape for fatigue-free use
- Enhanced grip thanks to notched outside

Tweezer set ROTILABO® PTFE-coated

ROTH SELECTION. Material: Stainless steel 18/10 (material 1.4301) PTFE-coated, case made of plastic.

Red PTFE coating with good anti-adhesive properties forms a separating layer between the tweezers material and the sample. Dull colour of the coating enables glare-free working under the bright lighting in microscopy. The chemical-resistant coating also protects against contact with the nickel contained in the stainless steel.

Contents:
1 tweezers with fine tip, L 120 mm
1 pointed tweezers with guide pin, L 130 mm
1 pointed tweezers, curved, L 130 mm
1 blunt tweezers, L 145 mm

Scalpel handles BAYHA®

Bayha. Material: Stainless steel.

Suitable for scalpel blades from BAYHA® (Art. No. EX68.1ff).

- With locking mechanism
- Replaceable blades
- Risk-free insertion without the blade contact
- EX66.1 length ideal for sterile working
- XP08.1 with ergonomic handle made of PA (not sterilisable)

Intended use: Non-sterile scalpels are cutting instruments for non-invasive applications in the medical field. Sterile (treated) scalpels are intended for skin incisions (cuts to the skin surface) on the human body.

Suture material

B. Braun. Material: Stainless steel (needles made of 300 stainless steel quality). **Sterile**.

Individually packed.

Atraumatic needle-suture combination: Stepless transition between needle and suture, thereby minimum wound trauma.

Needle type:

- 3/8 circle, cutting
- DS16: arc length 16 mm
- DS19: arch length 19 mm

Arc length: Distance between needle tip and end of needle, measured along the outer curve of the needle.

Dafilon® needle-suture combination

Material: Polyamide. Soft and smooth, excellent knot security. Minimum fabric trauma, low memory effect.

- Suture structure: monofilament
- non-absorbable

Medical device class IIa MDD

ID: 0123

Chemist set

ROTH SELECTION. Material: Stainless steel Remanit® 4301 (instruments), case made of plastic.

Instruments autoclavable, case not autoclavable.

Contents:
1 pair of precision scissors, pointed-blunt, L 130 mm
1 tweezers pointed, L 130 mm
1 micro double spatula, L 130 mm, blade width 4 mm
1 chemist double spatula, L 150 mm, blade width 9 mm

Not a medical device / Not an IVD product

150	90	**1863.1**	1 unit(s)	29,20

Chemist set large

Hammacher. Material: Stainless steel (corrosion-free), scissors made of steel (nickel-plated), Box made of plastic.

Instruments made of stainless steel, autoclavable, Scissors and box not autoclavable.

Contents:
1 micro double spatula, 130 mm
1 micro spoon spatula, spoon 5 x 7 mm
1 micro powder spatula, flexible, 185 mm
1 double spatula, rigid, 185 mm
1 tweezers, straight, sharp, 160 mm
1 pair of scissors, straight, serrated, 170 mm
1 Poly spoon, 180 mm
1 weighing spoon
1 double spatula, wide, round on both sides, 150 mm

Not a medical device / Not an IVD product

Sampling, Pumps & Liquid Handling

Gas Handling and Sampling
- Control seals 510
- Disposable sampling systems 363
- Gas handling 506
- Liquid sampling 512
- Sampling for pasty / viscous substances 511
- Sampling for powders / granulates 508

Pumps and Tubes
- Centrifugal pumps 558
- Membrane liquid pumps 560
- Membrane vaccuum pumps 567
- Peristaltic pumps 563
- Rotary vane pumps 573
- Stopcocks 603
- Suction systems 581
- Tubes 584
- Tubing accessories 593
- Tubing connectors 596
- Vacuum meters 575
- Vacuum systems 579
- Water-jet pumps 583

Hand Pumps and Dosing
- Barrel pumps 523
- Barrel pumps, electric 526
- Burettes 542
- Canister pumps 520
- Digital burettes 545
- Digital dispensers 530
- Dispensers 528
- Microlitre syringes HAMILTON 552
- Mikrolitre syringes, standard 555
- Solvent pumps 524
- Syringes / needles 548
- Titrator 547

Pipettors
- Capillary pipettes 604
- Microlitre pipettors 640
- Mikrolitre pipettors-accessories 653
- Pasteur pipettes 606
- Pipetting aids 624
- Pipettor-accessories 631
- Pipettor tips 655
- Piston pipettors 633
- Positive displacement pipettors 638
- Reagent reservoirs 670
- Volumetric / Graduated pipettes 615

Sample Storage and Microcentrifuge Tubes
- Cryo- and screw cap tubes 698
- Microcentrifuge tubes 690
- Microtiter plates 674
- PCR-plates and containers 684
- Sample storage 674
- Sealing films 681

Gas bags ROTILABO®

ROTH SELECTION.

(1) Standard
Material: Natural rubber. Egg-shaped for mixing or short-term storage of gases. Maximum size approx. 85 cm. Sorted by colour.

Version	Art. No.	Pack Qty.	€
Standard	**0933.1**	100 unit(s)	14,55

(2) Maxi
Material: Latex. For testing the air or gas entry to or exit from apparatus as well as for short-term storage of gases.

Empty: 22 cm long. Sorted by colour.

Version	Art. No.	Pack Qty.	€
Maxi	**TA08.1**	10 unit(s)	21,45

Gas syringe

Poulten & Graf. Material: Glass from hydrolytic class I.

For carrying out gas volumetric experiments. Brown graduation, resistant to acids and alkalis.

Areas of application:
Analysis of air and breathing air, determination of breathing quotients, indirect water analysis, qualitative gas burning, illuminating gas analysis, etc.

(1) With capillary attachment
Without stopcock, inside Ø approx. 2.5 mm, outside Ø approx. 6.5 mm

Vol. (ml)	Graduations (ml)	Art. No.	Pack Qty.	€

Gas leak detector testo 316-1

Testo.

For detecting leaks in piping, flanges, screw connections, in gas pipes, etc. For methane.

- Visual and audible alarm signals.
- Flexible measuring probe for hard-to-reach areas
- Sensor has very short reaction times.
- Battery life: >5 h

Technical specifications:

Art. No.	P757.1
Measuring range	0 to 10,000 ppm CH4
Alarm threshold	>200 ppm LED yellow / >10000 ppm LED red
Operating temperature	+4 to +45 °C
L x W x H	190 x 57 x 42 mm
Weight	300 g
Power supply	E-block, 9 V

Delivery incl. battery (9 V).

Type	Art. No.	Pack Qty.	€
testo 316-1	**P757.1**	1 unit(s)	242,95

Bags PLASTIGAS®

Linde.

Made from multi-layer laminated foil, thermoplastically welded, with polyethylene coating inside. For storing small amounts of gas at low pressure.

(1) Volume: 2.5 l
With connection nozzle for inflation hose, and stuck-on septum for removal by syringe.

Delivery without inflation hose, please order separately.

(2) Volume: 27 l
With screw valve and metallic hose nozzle, as well as a septum for removal by syringe.

Vol. (l)	Art. No.	Pack Qty.	€
27	**0847.1**	1 unit(s)	92,60

Accessories inflation hose for 2.5 l PLASTIGAS® bags

Linde.

Version	Art. No.	Pack Qty.	€
Inflation hose, 80 cm long	**H547.1**	1 unit(s)	18,80

Gas test tube

ROTH SELECTION. Material: DURAN® glass.

According to DIN 12473-1, with two single-way stopcocks NS 14.5 and sampling nozzles (GL 14 thread). Capillary tube (inside Ø 2.7 mm, outside Ø 8 mm) on one side and hose connector (outside Ø 8 mm) on the other. With labelling area.

Vol. (ml)	Art. No.	Pack Qty.	€

Gas pressure regulator single stage

Kayser. Material: Brass.

For safe removal of gas from steel bottles up to 200 bar, while simultaneously reducing the required working pressure to 10 bar.

- Manufactured according to EN ISO 2503.
- With safety valve (triggers at 12 bar).

With standard connection

Technical specifications:

Upstream pressure, max.	200 bar
Back pressure	0–10 bar
Readability	0.5 bar
Operating temperature	-20 to +60 °C
L x W x H	180 x 65 x 170 mm
Weight	1,7 kg

Sampler for powder/granules

A 121 °C

Samplers Tubus

Bürkle. Material: Stainless steel 1.4404. Autoclavable: Yes.

For pourable bulk goods up to Ø approx. 10 mm, such as hazelnuts, grains, granulates, crystalline solids (e.g. sugar). Suitable for use with foodstuffs.

Application:

- Insert the tube into the bag to the desired sampling depth
- The sample flows directly through the open tube into the sampling bag

Length (mm)	Ø ext. (mm)	Art. No.	Pack Qty.	€
400	40	**EP04.1**	1 unit(s)	180,60
800	40	**EP05.1**	1 unit(s)	226,85

A 121 °C

Samplers QuickPicker

Bürkle. Autoclavable: Yes.

For removal of bulk goods from bags and direct transfer into original sampling bottles. Suitable for use with foodstuffs. Sampler (without bottle) is autoclavable.

Delivery incl. 2 x 250 ml LDPE sample bottles and cleaning brush.

Polypropylene
Material: PP. Colour translucent

Samplers SiloPicker

Bürkle. Material: Stainless steel 1.4404. Autoclavable: Yes.

For sampling bulk materials from silos, tanks, BigBags and other large-sized containers. Suitable for use with foodstuffs.

Application:

- Insert SiloPicker into bulk goods
- The closure sleeve automatically closes the collection container
- When the sampling depth has been reached, briefly pull back the SiloPicker
- The bulk goods flow into the collection container
- Pull out the SiloPicker
- Empty the sampler

Vol. (ml)	Length (mm)	Ø ext. (mm)	Art. No.	Pack Qty.	€
100	1,300	50	**YX85.1**	1 unit(s)	496,65

Sampler for powder/granules

Zone samplers

Bürkle. Autoclavable: Yes.

For sampling bulk goods, e.g. from bags, barrels, bins, BigBags and silos. Suitable for use with foodstuffs.

Application:

- Close the chambers by turning the handle
- Insert the sampler to the desired depth
- Open the chambers to allow the bulk goods to flow into the collector
- Close the chambers
- Withdraw the sampler
- Reseal the puncture using an adhesive seal

A 121 °C

Delivery without emptying device and cleaning brush, please order separately.

All layers

Open inner tube for large sample volumes. Meets ISTA standard for seed lengths of 10 mm (wheat, oats) and 5 mm (flax, vetch).

(2) Liqui
For liquid mediums. DIN EN ISO 15 528 certified. Practical one-handed operation at the push of a button.

Application:
- For all-layer sampling, slowly plunge the LiquiSampler into the liquid with the button pressed (valve open). Release the button, the valve closes. Withdraw the sampler and remove the sample.
- For target-point/soil sampling: Dip the LiquiSampler in the target-point/soil with the valve closed. Press the button, the valve opens and liquid flows in. Release the button, the valve closes. Withdraw the sampler and remove the sample.

Pipette

Bürkle. Material: PP.

For taking liquid samples easily. Stopcock at upper end, ball valve at lower end. Transparent tubes allow for good visibility. Suitable for use with foodstuffs. Colour translucent.

Application:

- For all-layer sampling: with the valve open, slowly insert the pipette into the liquid. Close the valve. Withdraw the pipette and empty the sample into a container
- For target point samples: With the valve closed, insert the pipette as far as the target point. Open the valve and the liquid will flow in. Close the valve. Withdraw the pipette and empty the sample into a container

Samplers Mini Visco

Bürkle. Material: PTFE, Stainless steel 1.4404. Autoclavable: Yes.

For sampling viscous substances such as pastes, muds, creams and oils. Suction point with 2 mm suction hole. Ideal for the pharmaceutical and cosmetics industry. Suitable for use with foodstuffs. **Application:** Samples are drawn in and ejected via a piston rod.

Suction points available with a larger diameter for more viscous mediums, please order separately.

Sampler for liquids

Liquid samplers UniSampler

Bürkle.

Simple operation: The sample is poured directly into the sample container using a vacuum, with no risk of contamination.

(1) With telescopic rod
For sampling fluids from a defined depth.
Telescopic suction tube can be extended continuously from 52 cm to 100 cm. Suction tube made of PP, tubing made of PVC.

Application:
- Adjust the required sampling depth by moving the suction lance
- Fit the sample bottle onto the adapter
- Lower the suction lance into the medium
- Generate a vacuum using the hand pump and collect the sample
- Remove the filled sample bottle and then close and label it

Delivery incl. 5 x 250 ml and 5 x 500 ml PP bottles and adapter for bottle sizes of 100–1000 ml.

Version	Art. No.	Pack Qty.	€
UniSampler with telescopic lance	**AH45.1**	1 unit(s)	309,60

(2) With tubing
Sampler for low, angled positions. The tubing is pulled down over the heavy stainless steel tube. Tubing made of PVC, 2.50 m length.

Application:
- Lower the suction hose to the required depth
- Fit the sample bottle onto the adapter
- Generate a vacuum using the hand pump and collect the sample
- Remove the filled sample bottle and then close and label it

Delivery incl. 1 x 1000 ml PP bottle, adapter bottle sizes of 100–1000 ml and carrying case.

Version	Art. No.	Pack Qty.	€
UniSampler with tube	**AH46.1**	1 unit(s)	225,75

(3) Ex
For sampling flammable liquids of hazard class A I (e.g. gasoline). Sample bottle (glass, 1000 ml) and tubing (NBR, 4 m length) connected in an electrically conducting manner and earthed via an earth cable. PTB approval D-333-009 618/00.

Application:
- Earth the implement
- Lower the suction hose to the required depth
- Fit the sample bottle onto the adapter
- Generate a vacuum using the hand pump and collect the sample
- Remove the filled sample bottle and then close and label it

Delivery incl. 4 m tubing, 1 x 1000 ml glass bottle and carrying case.

Version	Art. No.	Pack Qty.	€
UniSampler Ex	**AH47.1**	1 unit(s)	427,85

Liquid samplers

ROTH SELECTION.

For extracting liquid samples even from places that are difficult to access. The liquid only comes into contact with the PE tubing and the PE bottle. Also suitable for more viscous liquids (e.g. oils).
The PE bottle is screwed into the pump and can be tightly sealed after the sample has been taken. The tubing can be changed quickly and easily.

Application:
- A vacuum is generated by pulling up the pump.
- The liquid is drawn in and collected in the PE bottle.

Hand pump with connector 22

Delivery without PE tubing and PE bottle, please order separately.

A 121 °C

Dipping bottle glass

Bürkle. Autoclavable: Yes.

Made from non-sparking materials. Nickel-plated brass dipping frame, closure made of electrically conductive polyamide, clear glass bottle. For taking sludge and water samples as well as samples of group A petroleum products, explosion hazard groups IIA and IIB.
Tested for use in Ex protection area 0.

- Secure closure to allow for quick bottle change
- High weight (3.3 kg) for rapid lowering
- Dimensions: External Ø 89 mm, height 330 mm

Delivery without manual cable reel and lowering rope, please order separately.

Vol. (ml)	Art. No.	Pack Qty.	€
1,000	**T266.1**	1 unit(s)	563,30

Dipping bottle Ex

Bürkle.

Made from non-sparking brass, nickel-plated. For sampling of group A petroleum products, explosion groups IIA, IIB and IIC. Tested for use in Ex protection area 0.

- Removable bottle head for easy cleaning
- High weight (3.2 kg) for rapid lowering
- Dimensions: External Ø 89 mm, height 443 mm

Delivery without manual cable reel and lowering rope, please order separately.

Canister/barrel pumps

Dosing pump with locking device

ROTH SELECTION. Material: HDPE.

Technical specifications:

Art. No.	HL77.1	P241.1	P242.1
Delivery rate	25 ml	30 ml	100 ml
Immersion depth	230 mm	175 mm	398 mm
Conductive	No		
Drum	up to 5 l	up to 30 l	

Note: The delivery rate refers to one stroke.

Pic.	Thread	Art. No.	Pack Qty.	€
(1)	DIN 55	**HL77.1**	1 unit(s)	10,55
(2)	DIN 50	**P241.1**	1 unit(s)	16,20
(2)	DIN 60	**P242.1**	1 unit(s)	67,55

Siphon with ball valve

Bürkle. Material: LDPE, PVC, PP.

For rapid filling of aqueous fluids. With robust ball valve made of PP. Works according to the siphoning principle: The fluid is only drawn in once. It is therefore particularly suitable for the complete emptying of barrels. Tubing internal Ø: 15 mm.

Technical specifications:

Art. No.	YC59.1
Delivery rate	9 l/min
Immersion depth	1000 mm
Conductive	No

Delivery incl. hose with kink protection and lifting device.

Version	Art. No.	Pack Qty.	€
with ball valve	**YC59.1**	1 unit(s)	61,35

Canister pump Pump-it®

Bürkle. Material: PP, PE, FKM.

For quick and clean emptying of canisters and small barrels. Operate according to the excess pressure principle: Excess pressure is produced using the hand piston. This pushes the fluid out of the canister.

- Exact dosing, no trailing.
- Good residue emptying. Telescopic suction tube adjusts to different container heights.
- For liquids with a viscosity of up to 500 mPas at 20 °C.

Technical specifications:

Art. No.	1601.1
Delivery rate	6 l/min
Immersion depth	1000 mm
Ø Immersion tube	15 mm
Conductive	No
Drum	up to 60 l

Please order a suitable thread adapter separately.

Thread	Art. No.	Pack Qty.	€
64 mm (BSI)	**1601.1**	1 unit(s)	188,15

Canister/barrel pumps

Dispensing pump OTAL® Disposable PE

Bürkle. Material: PE, PVC.

Single-use feed tube is quick and easy to replace. No contamination of the solution due to contaminated reusable pumps. Time-consuming and cost-intensive cleaning is no longer required. The feed tube is the only part which comes into contact with the medium.

- PE feed tube, made of one piece and which can be cut to the required container height
- The drainage elbow from the feed pipe can also be cut
- Max. flexibility and good residue emptying
- With universal adapter made of soft PVC for container openings of Ø 30-70 mm

Technical specifications:

Art. No.	1AL2.1	1AL0.1
Delivery rate	14 l/min	
Immersion depth	900 mm	
Conductive	No	
Drum	up to 120 l	up to 60 l

Delivery incl. 10 disposable feed tubes and separators.

Foot pump

Version	Art. No.	Pack Qty.	€
with PE drainage elbow Feed tubes Ø 12 mm	**1AL2.1**	1 unit(s)	103,80

Hand pump

Version	Art. No.	Pack Qty.	€
with PE drainage elbow Feed tubes Ø 12 mm	**1AL0.1**	1 unit(s)	83,65

Dispensing pump OTAL® PP

Bürkle. Material: PP, PVC.

Works according to the excess pressure principle.

- With feed tubes made of PP. Resistant to weak acids, alkalis and cleaning agents.
- Good residue emptying. Telescopic suction tube adjusts to different container heights.
- With universal adapter made of soft PVC for container openings of Ø 30–70 mm.

Technical specifications:

Art. No.	1720.1	AN75.1	1847.1	AN74.1
Delivery rate	26 l/min	12 l/min	26 l/min	12 l/min
Immersion depth	700 mm			
Conductive	No			
Drum	up to 60 l		up to 120 l	

Delivery incl. universal adapter.

Hand pump

- Designed to be extremely compact and to save space

Pic.	Version	Art. No.	Pack Qty.	€
(1)	with PP drainage elbow Feed tubes Ø 18 mm	**1720.1**	1 unit(s)	83,00
(2)	with PVC tubing and PP/PE stopcock Feed tubes Ø 12 mm	**AN75.1**	1 unit(s)	90,75

Foot pump

- Simple operation: Both hands remain free while filling
- Excellent delivery rate thanks to large-volume foot bellow

Pic.	Version	Art. No.	Pack Qty.	€
(3)	with PP drainage elbow Feed tubes Ø 18 mm	**1847.1**	1 unit(s)	109,70
(4)	with PVC tubing and PP/PE stopcock Feed tubes Ø 12 mm	**AN74.1**	1 unit(s)	107,10

Canister/barrel pumps

Dispensing pump OTAL® PVDF

Bürkle. Material: PVDF, PVC.

Works according to the excess pressure principle.

- With feed tubes made of PVDF for improved chemical resistance. For non-strongly oxidising acids and alkalis. Resistant to chlorine bleach
- Good residue emptying. Telescopic suction tube adjusts to different container heights
- With universal adapter made of soft PVC for container openings of Ø 30–70 mm

Technical specifications:

Art. No.	HT03.1	HT04.1
Delivery rate	16 l/min	20 l/min
Immersion depth	700 mm	
Conductive	No	
Drum	up to 120 l	up to 60 l

Delivery incl. universal adapter.

(1) Hand pump

- Designed to be extremely compact and to save space.

Version	Art. No.	Pack Qty.	€
with discharge elbow feed tubes Ø 16 mm	**HT04.1**	1 unit(s)	151,00

(2) Foot pump

- Simple operation: Both hands remain free while filling
- Excellent delivery rate thanks to large-volume foot bellow

Version	Art. No.	Pack Qty.	€
with discharge elbow feed tubes Ø 16 mm	**HT03.1**	1 unit(s)	162,35

Canister pump Mini

Bürkle. Material: PP, PVC.

Works according to the excess pressure principle.

- Ideal for filling smaller volumes
- Conveyor tubes made of PP
- With universal adapter made of soft PVC for container openings of Ø 20–36 mm

Technical specifications:

Art. No.	E335.1
Delivery rate	4 l/min
Immersion depth	450 mm
Ø Immersion tube	10 mm
Conductive	No
Drum	up to 10 l

Delivery incl. universal adapter.

Version	Art. No.	Pack Qty.	€
Mini	**E335.1**	1 unit(s)	61,85

Barrel pump gas-tight

Bürkle. Material: PP, PVC.

Vented gases produced when pumping are fed back to the original container by a gas displacement line. This prevents pungent and foul-smelling gases from leaking out. Also attach a stopcock to the gas and liquid line.

- Works according to the piston stroke principle
- Conveyor tubes made of PP, tubing made of PVC (120 m length)
- With universal adapter made of soft PVC for container openings of Ø 34–70 mm
- Good residue emptying. Telescopic suction tube adjusts to different container heights

Technical specifications:

Art. No.	E013.1
Delivery rate	200 ml
Immersion depth	400–700 mm
Ø Immersion tube	22 mm
Conductive	No

Note: The delivery rate refers to one stroke.

Delivery incl. universal adapter, two adapters for container to be filled.

Version	Art. No.	Pack Qty.	€
gas-tight	**E013.1**	1 unit(s)	323,60

Barrel pumps

Barrel pump PTFE

Bürkle. Material: PTFE, FEP.

Excellent chemical resistance for safe filling of ultrapure and aggressive liquids.

- Works according to the piston stroke principle
- Stopcock stops liquids from dripping and prevents hazardous vapours from escaping
- Good residue emptying by a low-mounted non-return valve and barrel screw joint that can be continuously adjusted with respect to height
- Barrel screw joint attaches the barrel pump securely in the barrel

Technical specifications:

Art. No.	1AHX.1	1AK0.1	AH27.1	NH33.1	LY53.1	NH34.1
Delivery rate	180 ml		400 ml	270 ml		400 ml
Immersion depth	400 mm		950 mm	600 mm		950 mm
Ø Immersion tube	32 mm					
Conductive	No					

Note: The delivery rate refers to one stroke.

Delivery without barrel screw joint, please order separately.

Solvent pumps

Solvent pump Mini

Bürkle. Material: PTFE, Stainless steel.

For ultra-pure fluids and highly flammable media.

- Works according to the excess pressure principle, pressure relief valve protects against excessive build-up of pressure
- Connection apparatus for earthing cable to discharge electrostatic charges
- Medium is filled at the press of a button
- Integrated outlet spout (external Ø 7 mm) prevents dripping and allows tubing to be attached

Technical specifications:

Art. No.	APE4.1
Delivery rate	1,8 l/min
Immersion depth	400 mm
Ø Immersion tube	8 mm
Conductive	Yes
Drum	up to 5 l

Delivery incl. earthing cable and PTFE riser (internal Ø 6 mm, 1 mm wall thickness, 400 mm length).

Thread	Art. No.	Pack Qty.	€
GL 45	**APE4.1**	1 unit(s)	533,20

Anti-static set ROTH

ROTH SELECTION.

Protects against fire and explosion due to electrostatic charge when filling from solvent barrels. Consists of two isolated cables (each L 3 m, Ø 3 mm) with clamping tongs on both sides and a blank copper wire (L 3 m, Ø 2 mm) with a clamping tong on one side.

Version	Art. No.	Pack Qty.	€
ROTH anti-static set	**0213.1**	1 unit(s)	57,15

Solvent pump hand pump

ROTH SELECTION. Material: PTFE, Stainless steel 1.4301.

For ultra-pure fluids and highly flammable media.

- Works according to the excess pressure principle
- Fixed drainage elbow with stopcock
- Pump can be shut off hermetically by two ball valves

Technical specifications:

Art. No.	N103.1
Immersion depth	275 / 410 mm
Ø Immersion tube	16 mm
Conductive	Yes
Drum	10 l and 25 l
Weight	1,2 kg

Note:

Note: The container and the pump must be earthed using the ROTH anti-static set (Art. No. 0213.1) during filling of flammable liquids.

In addition, no thread adapters can be mounted on the barrel screw joint supplied.

Delivery incl. barrel screw joint and immersion tubes for 10 l (length incl. pump ball: 450 mm) and 25 l (length incl. pump ball: 575 mm) containers.

Thread	Art. No.	Pack Qty.	€
2″ steel fine thread	**N103.1**	1 unit(s)	504,20

Solvent pumps

Solvent pump SEKUROKA®

Carl ROTH. Material: PTFE, Stainless steel 1.4301 and 1.4305.

For filling of flammable liquids.

- Works according to the piston stroke principle.
- Immersion tube is continuously adjustable to barrel depth.
- Near-complete emptying of the barrels.
- Removable drainage elbow for connecting a drainage hose with stopcock, please order separately.

Technical specifications:

Art. No.	N502.1	N503.1
Delivery rate	140 ml	200 ml
Immersion depth	570 mm	910 mm
Ø Immersion tube	32 mm	
Conductive	Yes	
Drum	up to 50 l	up to 200 l
Weight	1.2 kg	1.8 kg

Note:

The delivery rate refers to one stroke.

The container and the pump must be earthed using the ROTH anti-static set (Art. No. 0213.1) during filling of flammable liquids.

Delivery incl. barrel screw joint.

Thread	Length (mm)	Art. No.	Pack Qty.	€
2″ steel fine thread	680	**N502.1**	1 unit(s)	284,90
2″ steel fine thread	1,020	**N503.1**	1 unit(s)	313,90

Solvent pump foot pump

Bürkle. Material: PTFE, Stainless steel 1.4301.

For ultra-pure fluids and highly flammable media.

- Works according to the excess pressure principle
- A barrel screw joint and stopcock allow the container and pump to be hermetically sealed
- Immersion tube can be continuously adjusted to barrel depth

Technical specifications:

Art. No.	CPT5.1	CPT6.1
Delivery rate	20 l/min	
Immersion depth	950 mm	
Ø Immersion tube	21.3 mm	
Conductive	Yes	
Drum	up to 220 l	
Weight	3.5 kg	4.4 kg

Note: The container and the pump must be earthed using the ROTH anti-static set (Art. No. 0213.1) during filling of flammable liquids.

Delivery incl. barrel screw joint.

Barrel pumps, electric

Barrel pump

Bürkle. Material: Hastelloy, PP, PVDF, PTFE (in contact with media).

- Unique hybrid system makes filling liquids fast and versatile, i.e. by changing the supply units to use either with battery or mains adapter
- The drive can be disconnected easily via a clip lock. This makes it possible to use one drive for filling at several stationary pump stations
- continuously variable control of flow rate from 0.4 l/min to 12 l/min via TouchPanel
- barrel screw joint can be continuously adjusted with respect to height and this secures the barrel pump in the barrel

Available as an option:

- Flexible drain hose with nozzle.
  Drain hose connection ¾″

Technical specifications:

Art. No.	PL80.1	PL81.1	PL82.1	PL83.1	PL84.1	PL85.1
Motor Ex-protected	no					
Delivery rate	12 l/min					
Immersion depth	500 mm	700 mm	1000 mm	500 mm	700 mm	1000 mm
Ø Immersion tube	25 mm					
Weight	750 kg			580 kg		
Power supply	Lithium-Ion rechargeable battery/14.4 V/1.5 Ah					

AccuOne

- Battery-operated barrel pump (offers versatility and independence from the power supply)
- Up to 600 litres of delivery volume per battery charge

Delivery incl. fixed drainage elbow, battery and charger.

Barrel screw joint not included, please order separately.

Length (mm)	Art. No.	Pack Qty.	€

Cable length	3 m		5 m			
Mains connection	230 V, 50 Hz					

Set

For aqueous fluids, diluted acids and alkalis, hydrogen peroxide, etc.

Material:

- Nozzle made of PP
- Immersion tube made of PP

Delivery incl. 1.5 m PVC tubes ¾″, single-handed tap valve, suspension apparatus.

Version	Art. No.	Pack Qty.	€
1	**KH51.1**	1 unit(s)	719,20
2	**KH52.1**	1 unit(s)	751,45

Set 3

For thin alkalis, sodium hydroxide, potassium hydroxide, ammonia water, formic acid, acetic acid, etc.

Material:

- Nozzle made of PP/FEP
- Immersion tube made of PP

Delivery incl. 2.0 m PVC spiral hose ¾″ (DN 19), nozzle, barrel adapter (PP).

Version	Art. No.	Pack Qty.	€
3	**KA12.1**	1 unit(s)	1.159,95

Set 4

For most concentrated acids and alkalis, such as hydrochloric acid, sulphuric acid, hydrofluoric acid, etc.

Material:

- Nozzle made of PVDF
- Immersion tube made of PVDF

Delivery incl. 2.0 m specialised chemical hose ¾″ (DN 19), nozzle, barrel adapter (PP).

Version	Art. No.	Pack Qty.	€
4	**X352.1**	1 unit(s)	2.310,20

Barrel pumps, electric

Set 5 Ex
For highly flammable hydrocarbons, such as ethanol, gasoline, isopropanol, kerosene, methanol, petroleum, etc.

Material:
- Nozzle made of brass/PTFE
- Immersion tube made of stainless steel

Delivery incl. 2.0 m coolant hose ¾″ (DN 19), conductive hose connections, nozzle, equipotential bonding, PP barrel adapter, safety plug not protected against explosions. Universal motor protected against explosions according to ignition protection category II 2 G EEx de IIC T6 (ATEX), stainless steel pump system protected against explosions according to ignition protection category Ex II 1/2 G IIB T4 (ATEX).

Version	Art. No.	Pack Qty.	€
5 Ex	**KA13.1**	1 unit(s)	2.557,45

Set 6 Ex
For potentially explosive liquids, such as acetone, conc. formic acid, ethyl acetate, butyl acetate, conc. acetic acid, nicotine, toluene, styrene, etc.

Material:
- Nozzle made of Niro/FEP
- Immersion tube made of stainless steel

Delivery incl. 2.0 m chemical hose ¾″ (DN 19), conductive hose connections, nozzle, equipotential bonding, PP barrel adapter, safety plug not protected against explosions. Universal motor protected against explosions according to ignition protection category II 2 G EEx de IIC T6 (ATEX), stainless steel pump system protected against explosions according to ignition protection category Ex II 1/2 G IIB T4 (ATEX).

Version	Art. No.	Pack Qty.	€
6 Ex	**KA14.1**	1 unit(s)	3.277,70

Canister pump battery-operated

Bohlender. Material: PP, PTFE, Hastelloy.

Suitable for low-risk filling and transferring of liquids that are similar to water (e.g. alkalis, acids, etc.). Can be universally used and easy to operate. Powerful and light (500 g incl. batteries). Two batteries (Mono 1.5 V) are required for operation.

Technical specifications:

Art. No.	E490.1	E491.1
Motor Ex-protected	no	
Delivery rate	6 l/min	
Immersion depth	400 mm	600 mm
Ø Immersion tube	25 mm	

Delivery without batteries, please order separately.

Length (mm)	Art. No.	Pack Qty.	€
630	**E490.1**	1 unit(s)	481,60
830	**E491.1**	1 unit(s)	499,90

Dispensers Piccolo

Vitlab.

With two fixed volumes. Ideally suited to dispensing long series. Manual push-button delivery, automatic refilling. Good chemical resistance thanks to high-quality materials, but not suitable for vapourous media.

- Precise media delivery
- Freely rotatable discharge tube on the bottle
- Choice of 2 fixed volumes
- Valve block with GL 28 thread

Parts in contact with media:
PTFE, FEP, ETFE, PFA, borosilicate glass, platinum-iridium

Technical specifications:

A 121 °C

Carl ROTH. Autoclavable: Yes.

- Direct displacing piston with wiping PFA lip seal reduces crystallisation of liquids
- Improved volume adjustment due to internal toothed rack, volumes can be set quickly and precisely
- Valve block rotatable by 360° on the bottle, with GL 45 thread
- Swivelling cap does not obstruct dispensing
- Vent valve with safety bulb closes dosing channel if discharge tube is not fitted
- Screwable ventilation stoppers for quick assembly of a drying tube
- Telescopic intake tube, infinitely adjustable to different bottle heights
- Suitable for calibration in conjunction with measuring instrument inspection acc. to ISO 9001 and GLP; change to factory calibration is displayed
- Autoclavable at 121 °C (2 bar), acc. to DIN EN 285, with no need to disassemble

Materials in contact with media: Borosilicate glass, Al_2O_3 ceramic, ETFE, FEP, PFA, PTFE, platinum-iridium, PP (cap).

Limits of use:
Temperature from +15 °C to +40 °C, steam pressure up to max. 500 mbar, kinematic viscosity up to 500 mm^2/s, density up to 2.2 g/cm^3.

Technical specifications:

Dispenser

Dispensers Dispensette® S

BRAND. Autoclavable: Yes.

Range of applications:
Colour code: red. For dispensing aggressive reagents directly from the supply bottle, e.g. concentrated bases and acids such as H_3PO_4, H_2SO_4 (excluding, e.g., HCl, HNO_3 and HF), saline solutions and a wide range of organic solvents.

Properties:

- The "floating piston" design makes dispensing easy
- Rapid ventilation through improved fluid mechanics
- Valves without additional seals for easier cleaning
- Rotates through 360°, valve block with GL 45 thread
- Discharge tube with swivel-mounted screw cap for protection against media contact
- Telescopic suction tube adjustable to different bottle sizes
- DE-M approved
- Suitable for calibration in conjunction with measuring instrument inspection according to ISO 9011 and GLP
- Change to factory calibration is shown
- Easy to disassemble for cleaning
- Fully autoclavable at 121 °C
- Microfilter can be connected to the ventilation opening for sterile dispensing

NEW / +

A 121 °C

Materials in contact with media:
Borosilicate glass, Al_2O_3 ceramic, platinum-iridium, ETFE, FEP, PFA, PTFE and PP.

Limits of use:
Max. vapour pressure 600 mbar; max. viscosity 500 mm^2/s; max. temperature +40 °C; max. density 2.2 g/cm^3.

Analogue without recirculation valve
Quickly adjustable dispensing volume, safe and reliable volume adjustment via the internal toothed rack.

Discharge tube without recirculation valve, prevents contamination of the bottle contents.

Dispensers Dispensette® *S Organic*

NEW / +

A 121 °C

BRAND. Autoclavable: Yes.

Range of applications:
Colour code: Yellow. Ideal for accurately dispensing organic solvents, e.g. chlorinated and fluorinated hydrocarbons such as trichlorofluoroethane and dichloromethane, acids such as concentrated HCl and HNO_3 (excluding HF) as well as for trifluoroacetic acid (TFA), tetrahydrofuran (THF) and peroxides.

Properties:

- The "floating piston" design makes dispensing easy
- Rapid ventilation through improved fluid mechanics
- Valves without additional seals for easier cleaning
- Rotates through 360°, valve block with GL 45 thread
- Discharge tube with swivel-mounted screw cap for protection against media contact
- Telescopic suction tube adjustable to different bottle sizes
- DE-M approved
- Suitable for calibration in conjunction with measuring instrument inspection according to ISO 9011 and GLP
- Change to factory calibration is shown
- Easy to disassemble for cleaning
- Fully autoclavable at 121 °C
- Microfilter can be connected to the ventilation opening for sterile dispensing

Materials in contact with media:
Borosilicate glass, Al_2O_3 ceramic, tantalum, ETFE, FEP, PFA, PTFE and PP.

Limits of use:
Max. vapour pressure 600 mbar; max. viscosity 500 mm^2/s; max. temperature +40 °C; max. density 2.2 g/cm^3.

Analogue without recirculation valve

Quickly adjustable dispensing volume, safe and reliable volume adjustment via the internal toothed rack.

Dispensers seripettor®

BRAND.

Properties:

- Dispensing: Push plunger down, fills automatically
- Dispensing sterile media: Screw the valve block with filling tube onto the filled bottle, seal the valve block with the cap, attach the autoclavable sterile filter (0.2 µm) at the side and autoclave at 121 °C. Remove the cap from the valve block under clean bench conditions, screw in the sterile dispensing unit and attach the actuating unit
- Suitable for serial dispensing by means of flexible PTFE dispensing hose with a safety handle, length approx. 800 mm, please order separately
- If the snug fitting plunger seal is worn, the dispensing unit can be changed
- Screws directly onto bottle with thread GL 45

Limits of use:
15 to 40 °C, max. vapour pressure 500 mbar, max. density 2.2 g/cm^3, viscosity 300 mm^2/s (2-ml device), 150 mm^2/s (10-ml device) or 75 mm^2/s (25-ml device)

Technical specifications:

Dispenser

Dispensers Dispensette® S Trace Analysis analogue

BRAND.

Range of application: For accurate dispensing of high purity media in trace analysis. Dispensing of metal traces, usually in the low ppb range, or even in the ppt range, depending on the application. The established cleaning process for use in trace analysis is explained in the operating instructions. Can be used as a dispenser for hydrofluoric acid with a platinum-iridium valve spring.

Properties:

- Depending on requirements, the spring material is made of platinum-iridium or tantalum
- Valves without additional ring seals for easier cleaning
- Dispensing plunger with snug fitting seal
- Complete dispensing unit easily replaceable when worn
- Reliable volume control via internal toothed rack
- Rotates through 360°, valve block with GL 45 thread
- Discharge tube with swivel-mounted screw cap for protection against media contact
- Telescopic suction tube adjustable to different bottle sizes
- DE-M approved
- Suitable for calibration in conjunction with measuring instrument inspection according to ISO 9011 and GLP
- Change to factory calibration is shown
- Microfilter can be connected for sterile dispensing

Materials in contact with media:
High-purity plastics (PTFE, ETFE, PCTFE, FEP and PFA), sapphire valves, platinum-iridium or tantalum spring material.

Limits of use:
Max. vapour pressure 600 mbar; max. viscosity 500 mm²/s; max. temperature +40 °C; max. density 3.8 g/cm³.

Suction tube length	240 mm			

With recirculation valve
Discharge tube with recirculation valve prevents reagent loss and allows quick, bubble-free ventilation

Delivery incl. quality certificate, recirculation tune, telescopic filling tube, valve mounting tool and thread adapter

Version	Volume (ml)	Graduation (ml)	Art. No.	Pack Qty.	€
Tantalum, with RDV	1–10	0,2	**ECX4.1**	1 unit(s)	911,60
Platinum-iridium, with RDV	1–10	0,2	**ECX2.1**	1 unit(s)	911,60

Without recirculation valve
Discharge tube without recirculation valve, prevents contamination of the bottle contents

Delivery incl. quality certificate, telescopic filling tube, valve mounting tool and thread adapter

Version	Volume (ml)	Graduation (ml)	Art. No.	Pack Qty.	€
Platinum-iridium, without RDV	1–10	0,2	**ECX1.1**	1 unit(s)	862,15
Tantalum, without RDV	1–10	0,2	**ECX3.1**	1 unit(s)	862,15

Bottle holders for dispensers

BRAND. Material: PP.

For secure attachment of bottle top dispensers or digital burettes during work with small storage bottles. Made entirely from plastic and therefore ideal for trace analysis and use in aggressive environments (e.g. acid vapours in extraction).

- Base plate: L 220 x W 160 mm
- Stand rod length: 325 mm
- Weight approx. 1.1 kg

Version	Art. No.	Pack Qty.	€
Bottle holders	**CNN2.1**	1 unit(s)	212,85

Dispensers FORTUNA® POLYFIX®

Poulten & Graf. Autoclavable: Yes.

- Conformity-certified
- Precision dispensing plunger
- Quick adjustment with easy action
- Rotatable fine adjustment
- Screws directly onto bottle with thread GL 32

A 121 °C

Technical specifications:

Art. No.	P312.1	PK97.1	PK99.1	P313.1	PK98.1	PL00.1
Nominal volume	10 ml			50 ml		
Correctness	±60 µl			±300 µl		
Variation coefficient	±20 µl			±100 µl		
Operating temperature	+15 – +50 °C					
Adapter	GL 40, GL 45					
Suction tube length	350 mm					

Delivery incl. discharge tube set, PTFE intake hose, two PP thread adapters.

With glass piston and clear glass cylinder
For dispensing aqueous media.

Volume (ml)	Graduation (ml)	Art. No.	Pack Qty.	€
2–10	0,2	**P312.1**	1 unit(s)	179,55
10–50	1,0	**P313.1**	1 unit(s)	203,20

With PTFE-coated piston and clear glass cylinder
For dispensing weak acids and bases.

Volume (ml)	Graduation (ml)	Art. No.	Pack Qty.	€
2–10	0,2	**PK97.1**	1 unit(s)	237,60
10–50	1,0	**PK98.1**	1 unit(s)	278,45

With glass piston and brown glass cylinder
For dispensing light-sensitive media.

Volume (ml)	Graduation (ml)	Art. No.	Pack Qty.	€
2–10	0,2	**PK99.1**	1 unit(s)	237,60
10–50	1,0	**PL00.1**	1 unit(s)	278,45

Dispenser

Dispensers FORTUNA® OPTIFIX®

Poulten & Graf. Autoclavable: Yes.

Properties:

- Ergonomic design with colour-code system
- Resistant to abrasion, UV radiation, acids and acid vapours
- Valve block without metal springs; no contamination of the dispensed liquid
- Quick volume adjustment with easy action and additional rotatable fine adjustment
- Visually recognisable dosing direction
- Screws directly onto bottle with thread GL 32
- Easy to dismantle and clean
- Conformity testing acc. to DIN EN ISO 8655-5

A 121 °C

BASIC

For dosing aqueous media, crystallizing substances and diluted acids and alkalis.

Plastic-coated, glass dispensing cylinder. Dosing cylinder made of glass, PTFE-coated.

Technical specifications:

Nominal volume	2 ml	5 ml	10 ml	30 ml	50 ml	100 ml	200 ml	300 ml	500 ml
Correctness	±12 µl	±30 µl	±60 µl	±180 µl	±300 µl	±600 µl	±1200 µl	±1800 µl	±3000 µl
Variation coefficient	±4 µl	±10 µl	±20 µl	±60 µl	±100 µl	±200 µl	±400 µl	±600 µl	±1000 µl
Operating temperature	+15 – +35 °C								
Adapter	GL 40, GL 45								
Suction tube length	350 mm						510 mm		

Delivery incl. PTFE intake hose and two PP thread adapters.

Dispenser

121 °C

Dispensers ceramus® classic

Hirschmann. Autoclavable: Yes.

Properties:

- Ceramic flasks: No abrasion, no swelling, no thermal problems and high chemical resistance
- Variable volume setting
- Intake hose firmly screwed on, creating a tight seal
- Complete reproducibility of work
- Quick and safe volume adjustment
- Components are easy to change
- Rotates through 360°, valve block with GL 32 thread
- Can be steam sterilised at 121 °C/2 bar without needing to be dismantled
- Conformity certified

Materials in contact with media:
Borosilicate glass, Al_2O_3 ceramic, ECTFE, Hastelloy

Technical specifications:

A 121 °C

Dispensers ceramus®

Hirschmann. Autoclavable: Yes.

Properties:

- Media return system
- Ceramic flasks: No abrasion, no swelling, no thermal problems and high chemical resistance
- Intake hose firmly screwed on, creating a tight seal
- Freely rotatable dispenser on the bottle
- Luer lock connection at the back
- Ergonomic grip
- Quick and safe volume adjustment
- Complete reproducibility of work
- Components are easy to change
- Rotates through 360°, valve block with GL 45 thread
- Can be steam sterilised at 121 °C/2 bar without needing to be dismantled
- Conformity certified

Delivery incl. three thread adapters, one assembly key, quality certificate.

2–10	0,25	**T306.1**	1 unit(s)	1.139,50

Dispenser

Dispenser Ultra / Ultra HF

ROTH SELECTION.

For dispensing highly pure acids and alkalis.
Suitable for use in ultra trace analysis.

General features of all models:

- **Free of metals**
- Made of high quality and highly pure plastics (PTFE, TFM and PFA)
- Calibrated and mechanically tested for precision and accuracy
- 38-430 thread (fits ROTIPURAN® Ultra products)

When using bottles with a GL45 thread, please order fastening for dispenser KK11.1 separately.

Ultra

Properties:

- Acid cleansed
- Manufactured in cleanroom (class 100)

Volume (ml)	Graduation (ml)	Tolerance (ml)	Art. No.	Pack Qty.	€
0,5–5	0,5	±0,02	**KK97.1**	1 unit(s)	3.601,25

Ultra HF

Properties:

- Specially for dispensing hydrofluoric acids
- Also suitable for analytical acids

Volume (ml)	Graduation (ml)	Tolerance (ml)	Art. No.	Pack Qty.	€
0,5–5	0,5	±0,02	**KK98.1**	1 unit(s)	2.843,40

Accessories for Ultra/Ultra HF dispensers

ROTH SELECTION.

Bottle holder for Ultra/Ultra HF dispensers
Stabilises bottles when using a dispenser. The four-screw system is suitable for both square bottles and round bottles. The bottle holder is designed for ROTIPURAN® Supra and Ultra bottles with capacities from 250 ml to 2 litres. Also suitable for bottles with a diameter from approx. 7.0 cm to 11.5 cm.

Version	Art. No.	Pack Qty.	€
Bottle holder	**KK99.1**	1 unit(s)	147,85

Adapter to GL 45
Material: PTFE. For bottles with GL45 thread, specially for the use of ROTIPURAN® Supra products with Ultra and Ultra HF dispensers.

Version	Art. No.	Pack Qty.	€
Adapter	**KK11.1**	1 unit(s)	418,20

Digital dispensers opus® Dispensers

Hirschmann.

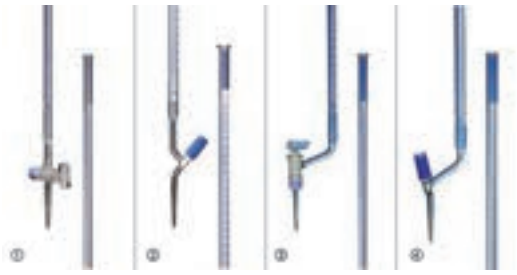
For motor-driven dosing directly from the lab bottle. Microprocessor-controlled piston stroke system guarantees maximum accuracy and precise, reproducible results.

Properties:

- Safe and easy handling via external touchscreen with clearly arranged menu keys; with quick-cal function for simple calibration of other temperatures or other media
- High media flexibility thanks to the highly-resistant, inert materials
- Media carrying parts are steam sterilisable (121 °C)
- Valve block with GL 45 thread
- Time-controlled serial dosing up to 9999 reruns, enables integration in automated process runs
- Methods memory for 9 different procedures
- Media feedback system for ventilation without loss of reagent
- Universal Luer connection for dry pipes, filters etc.
- Can be battery- or mains-operated (battery not included in the delivery; please order separately)
- Stepper function for delivery of up to 10 different partial quantities
- Intake and draining speeds can be set
- 4 languages (G, E, F, S) integrated by default
- Optional system platform for stability, please order separately

Materials in contact with media:
Borosilicate glass, PTFE, FEP, ECTFE, Hastelloy

Control panel:



- Touchscreen: 3.5″ with 320 x 240 pixel
- PC port: USB or RS 232
- Dimensions: W 110 x D 130 x H 55 mm
- Weight without battery: 230 g

Technical specifications:

Art. No.	PA71.1	LK06.1	LK07.1
Max. piston stroke	10 ml	20 ml	50 ml
Volume range	0,010–99,999 ml	0,10–200 ml	1,00–500 ml
Resolution	<1 µl		<2 µl
Correctness	0,6 %		
Variation coefficient	0,2 %		
Operating temperature	+4 – +40 °C		
Weight	660 g		
Adapter	GL 32, GL 38, S 40		
Mains connection	230 V, 50 Hz		

Delivery incl. thread adapter, intake hose, return hose, output unit dispenser, valve assembly spanner, touchscreen control, power supply unit, data power cable, quality certificate according to DIN EN ISO 8655.

Rubber blower for titration apparatus

ROTH SELECTION. Material: PVC, soft.

Hose length: 25 cm. Total length: 34 cm.

Version	Art. No.	Pack Qty.	€
Rubber blower	**ET98.1**	1 unit(s)	14,50

Titrating burettes according to Dr Schilling

Bürkle.

With Schellbach stripe. The burette is a universal aid in laboratories, electroplating, water treatment stations, sewage treatment plants, field studies, etc.
Precise dosing system with push-button, fine titration with micro screw and exact outlet tip, ultrapure drop formation.

- EX-calibrated
- With blue ring-barking
- Automatic zero-point extraction
- Feet on bottle for enhanced stability
- Graduation corresponds to Class B (tolerances according to DIN ISO 385)

Materials in contact with media:
PE, PP, natural rubber and borosilicate glass 3.3.

Double bulb insufflator with net

ROTH SELECTION. Material: Natural rubber, PVC.

For generating a consistent overpressure. As one bulb is pumped, the second fills with air. The net prevents the second bulb from bursting with increasing air pressure. Tube length 25 cm, hardness 40 Shore A, black.

Version	Art. No.	Pack Qty.	€
Double bulb insufflators	**1CCE.1**	1 unit(s)	69,40

Digital burette

Vitlab.

Pulse-free dispensing. Continuous delivery of desired volume without creating a reserve. Easy and fatigue-free operation of the control elements. Volume dispensed per turn of the handwheels: 2.5 ml (continuous E) or 5.0 ml (continuous RS).

Properties:

- Specially developed return dosing system for ventilation without loss of reagent
- Power supply with longlife, easy-to-change 1.5 V AAA batteries and charge indicator
- Electronics removable as a unit, maintenance friendly modular design
- Dispensing range 0.01 ml to 999.9 ml
- Discharge tube rotatable through 360°
- Vertically and horizontally adjustable discharge tube
- Digital burette with safety valve and standard GL 45 thread
- Telescopic suction tube for different bottle sizes from 200 to 350 mm
- Simple calibration program
- Connection for drying tube
- The defined margins of error according to DIN EN ISO 8655-3 are not exceeded even when dispensing partial volumes
- Not suitable for crystallising media

Parts in contact with media:
Borosilicate glass 3.3., FEP, ETFE, PFA, PTFE, platinum-iridium

Permissible conditions of use:
Temperature +15 to +40 °C, vapour pressure up to max. 500 mbar, density 2.2 g/cm³

Technical specifications:

Art. No.	AA89.1	AA90.1
Nominal volume	25 ml	50 ml
Correctness	±50 µl	±100 µl
Variation coefficient	±25 µl	±50 µl
Operating temperature	+15 – +40 °C	
Adapter	GL 32, GL 38, S 40	
Suction tube length	200 – 350 mm	
Power supply	2 x AAA 1.5 V batteries	

Delivery incl. Three PP thread adapters, quality certificate with test values, one telescopic filling tube, one discharge tube and batteries.

Type	Volume (ml)	Art. No.	Pack Qty.	€
Continuous E	2,5	**AA89.1**	1 unit(s)	928,80
Continuous RS	5,0	**AA90.1**	1 unit(s)	928,80

Digital burettes

Digital burette Titrette®

BRAND.

Bottle-top burette for quick and reliable titration. High accuracy provides results within Class A error margins according to DIN EN ISO 385.

Properties:

- Smooth-acting gear for accurate trickle titration
- Lightweight and stable thanks to compact design
- Freely rotatable valve block, GL 45 thread
- Titrating tube is horizontally and vertically adjustable for flexible positioning
- Easy to use, no switching over between filling and titrating
- Can be removed for cleaning
- Can be calibrated without tools
- The next calibration due date can be stored
- The current displayed value can be stored with automatic stop
- Adjustable up to 20 ml to three decimal places
- DE-M approved

Parts in contact with the media:
Borosilicate glass, Al_2O_3, ETFE, PFA, FEP, PTFE, platinum-iridium, PP.

Permissible conditions of use:
Temperature +15 to +40 °C, vapour pressure up to max. 500 mbar, viscosity up to 500 mm^2/s.

Technical specifications:

Art. No.	NN43.1	PP87.1	PP88.1	NN44.1	PP89.1	PP90.1
Nominal volume	10 ml	25 ml	50 ml	10 ml	25 ml	50 ml
Correctness	±10 µl	±18 µl	±30 µl	±10 µl	±18 µl	±30 µl
Variation coefficient	±5 µl	±6 µl	±10 µl	±5 µl	±6 µl	±10 µl
Operating temperature	+15 – +40 °C					
Adapter	GL 32, S 40, NS 29/32					
Suction tube length	170–330 mm					
Power supply	2 x AAA 1.5 V batteries					

Delivery incl. three PP thread adapters, quality certificate, telescopic filling tube made from FED, recirculation tube, two coloured light-protection windows, batteries.

Digital burette opus® titration

Hirschmann.

For motor-driven titration directly from the lab bottle. Microprocessor-controlled piston stroke system guarantees maximum accuracy and precise, reproducible results.

- Safe and easy handling via external touchscreen with clearly arranged menu keys; with quick-cal function for simple calibration of other temperatures or other media
- High media flexibility thanks to the highly-resistant, inert materials (see below)
- Media carrying parts are steam sterilisable (121 °C)
- Serial dispensing function allows integration in automated processes
- Method memory for nine different titration procedures
- Media feedback system for ventilation without loss of reagent
- Universal Luer connection for dry pipes, filters etc.
- GL 45 internal thread
- Can be battery- or mains-operated (battery not included in the delivery; please order separately)
- Volume pre-selection, fast titration and drop titration options available
- Intake and draining speeds can be set
- 4 languages (G, E, F, S) integrated by default

Materials in contact with media:
Borosilicate glass, ECTFE, FEP, PTFE, Hastelloy

Control panel:

- Touchscreen: 3.5″ with 320 x 240 pixel
- PC port: USB or RS 232
- Dimensions: W 110 x D 130 x H 55 mm
- Weight without battery: 230 g

Technical specifications:

Art. No.	PA73.1	LK08.1	LK09.1
Max. piston stroke	10 ml	20 ml	50 ml
Volume range	0,010 – 99,999 ml	0,10 – 200 ml	1,00 – 500 ml
Resolution	<1 µl		<2 µl
Correctness	±20 µl	±40 µl	±100 µl
Variation coefficient	±7 µl	±14 µl	±35 µl
Operating temperature	+4 – +40 °C		
Weight	660 g		
W x D x H	63 x 80 x 320 mm		
Adapter	GL 32, GL 38, S 40		
Mains connection	230 V, 50 Hz		

Delivery incl. three thread adapters, intake hose, return hose, titration output unit, valve assembly spanner, touchscreen control, power supply unit, data power cable, quality certificate according to DIN EN ISO 8655.

Version	Art. No.	Pack Qty.	€
10 ml	**PA73.1**	1 unit(s)	2.009,20

Digital burettes

Digital burette solarus®

Hirschmann.

Properties:

- Power supply via solar cell, i.e. no batteries, no charging
- Large display, display from 0.01 to 99.99 ml
- 2-button operator guidance
- "Quick-Cal" function for individual calibration
- Basic unit with A45 screw thread
- Bidirectional RS 232 interface
- Handwheels with soft-touch surface
- No reagent loss through return system
- Media-transporting parts including the output unit steam-sterilisable at 121 °C / 2 bar

Materials in contact with media:
Borosilicate glass, Al_2O_3 ceramic, ECTFE, FEP, PTFE and Hastelloy

Technical specifications:

Art. No.	HLY7.1	Y063.1	Y064.1
Nominal volume	10 ml	20 ml	50 ml
Correctness	±30 µl	±40 µl	±100 µl
Variation coefficient	±10 µl	±20 µl	±50 µl
Adapter	GL 32, GL 38, S 40		
Suction tube length	310 mm		

Delivery incl. three thread adapters, output unit, intake hose, return hose and quality certificate according to DIN EN ISO 8655.

Titrator TitroLine® 5000

SI Analytics.

Very easy to use automatic titrator for pH and mV titration: Select saved standard method, connect electrodes and press Start. In just a few minutes, the sample is titrated and the result is displayed on the screen. Result can also be output as a PDF file on USB.

Technical specifications:

Art. No.	HAN4.1	HAN5.1	HAN6.1
Type	TitroLine® 5000		
Max. piston stroke	20 ml		
Volume range	0,000 – 9999.999 ml		
Display resolution	0,005 – 0,025 ml		
Dosing speed	40 ml/min		
Dosing accuracy	systematically 0.15%, incidentally 0.05%		
pH measuring range	-3 to +17		
Voltage measuring range	-1900 to +1900 mV		
Temperature measuring range	-30 to +115 °C		
pH resolution	0,01		
Voltage resolution	1 mV		
Temperature resolution	1 °C		
pH accuracy	±0.05		
Voltage accuracy	±1 mV		
Temperature accuracy	±0.5 °C		
Connection	pH: DIN 19262, °C: 2 x 4 mm banana plugs (NTC 30 kΩ, PT 1000)		
Calibration points	pH 1/2/3		
Port	2 x RS 232-C, 1 x USB A, 1 x USB B		
W x D x H	135 x 205 x 310 mm		
Mains connection	100–240 V, 50/60 Hz		

Set 1
Range of applications: Current redox titrations, such as iodine and peroxide value, permanganate index, COD and other applications (Set 1 + metal combination electrode Pt 62 RG)

Delivery incl. support rod, electrode/burette tip holder, hose kit and titration syringe, test tubes, magnetic stirrer, magnetic stirring rod, screw cap with GL 45 thread, NS 14.5/M8x1 adapter, drying tube, USB data cable and mains adapter.

Electrode not included, please order separately.

Version	Art. No.	Pack Qty.	€
Set 1	**HAN4.1**	1 unit(s)	3.293,80

Set 2
Range of applications: Current acid-alkali titrations such as acid capacity, nitrogen according to the Kjeldahl method and total acid in wine and beverages

Delivery incl. pH combination electrode A7780, buffer solution (pH 4.00 and 7.00), support rod, electrode/burette tip holder, hose kit and titration syringe, test tubes, magnetic stirrer, magnetic stirring rod, screw cap with GL 45 thread, NS 14.5/M8x1 adapter, drying tube, USB data cable and mains adapter.

Version	Art. No.	Pack Qty.	€
Set 2	**HAN5.1**	1 unit(s)	3.776,50

Titrator

Set 3
Range of applications: Titration of chloride and sodium chloride (salt) in foods such as mustard, cheese, milk, water and other samples

Delivery incl. metal combination electrode AgCl 62 RG with connecting cable, support rod, electrode/burette tip holder, hose kit and titration syringe, test tubes, magnetic stirrer, magnetic stirring rod, screw cap with GL 45 thread, NS 14.5/M8x1 adapter, drying tube, USB data cable and mains adapter.

Glass syringe Dosys™

Socorex. Material: Borosilicate glass. Autoclavable: Yes.

Fused brown scale, permanent and easy to read. Precision piston and cylinder can be exchanged. Impervious to fluids. Sterilisable up to 160 °C.
Suitable for: dilutions, sampling, viscous liquids, corrosive reagents, colourants, etc.

Centrifugal pump NDP 14/2

Harton.

With magnetic coupling. Ideal for circulating and recirculating chemicals and liquefied gases. Magnetic "break resistance" protects the motor from external forces. Minimal power consumption and long service life thanks to low friction.

- Output is non-adjustable
- Suitable for continuous operation
- Not self-priming. Not suitable for dry operation.

Technical specifications:

Art. No.	**A902.1**
Type	NDP 14/2
Delivery rate	13,8 l/min
Delivery height	2.3 m
Media temperature	-20 – +85 °C
Connection	External thread ¼″
Power consumption	51 W
Materials in contact with media	PP, EPDM, Ceramic
L x W x H	150 x 112 x 100 mm
Weight	1,7 kg
Mains connection	230 V, 50/60 Hz

Type	Art. No.	Pack Qty.	€
NDP 14/2	**A902.1**	1 unit(s)	292,35

Centrifugal pump NEMP 50/7

Harton.

With magnetic coupling. Suitable for pumping aggressive chemicals, acids, alkalis and liquefied gases. No shaft seal, ensuring reduced wear and long service life.

- Output is non-adjustable
- Suitable for continuous operation
- Not self-priming. Not suitable for dry operation.

Technical specifications:

Art. No.	**A903.1**
Type	NEMP 50/7
Delivery rate	52 l/min
Delivery height	6.0 m
Media temperature	-20 – +85 °C
Connection	External thread ½″
Power consumption	95 W
Materials in contact with media	PP, EPDM, Ceramic
L x W x H	214 x 102 x 143 mm
Weight	3 kg
Mains connection	230 V, 50 Hz

Type	Art. No.	Pack Qty.	€

Centrifugal pumps

Centrifugal pump eco series

Eheim.

With magnetic coupling for conveying and recirculating water. Complete with 1.5 m cable and connector.

- Can also be used within the pumped medium
- Output is non-adjustable
- Suitable for continuous operation
- Not self-priming. Not suitable for dry operation

Technical specifications:

Diaphragm liquid pump LIQUIPORT®

KNF.

Suitable for pumping neutral and aggressive liquids (please take the chemical resistance of the pump head into account).

- The delivery rate can be adjusted within the 10–100% range via the rotary knob with LED display
- Standby mode
- Maximum pressure limit
- Self-priming
- Safe to run dry
- Long service life

Diaphragm liquid pumps

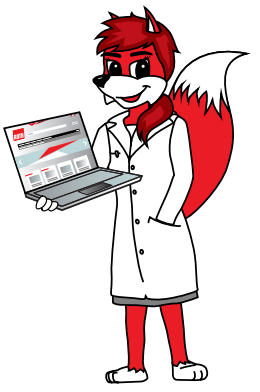
Diaphragm metering pump SIMDOS® 10

KNF.

Suitable for pumping and metering neutral and aggressive liquids (please take the chemical resistance of the pump head into account).

- Optimised pump head with safety feature prevents the medium from leaking into the drive chamber in the event of leaks.
- Operating modes: Continuous pumping (unlimited time), continuous pumping with timed switch-off, volumetric metering and series metering
- With calibration function for better accuracy
- Adjustable pump characteristics (e. g. for vaporous, viscous liquids)
- Pause function without loss of data
- Safe to run dry, self-priming and maintenance-free

Technical specifications:



Art. No.	PA27.1	PA28.1	PA29.1
Type	FEM 1.10 KT.18 S2	FEM 1.10 TT.18 S2	FEM 1.10 FT.18 S2

Diaphragm liquid pumps

Diaphragm metering pump DDE series

Grundfos.

Powerful, speed-controlled stepper motor. Constant, continuous dosing performance. Adjustment range up to 1:1000. Pump status can be recognised via the traffic light principle. PTFE diaphragm with universal chemical resistance.

Technical specifications:

Art. No.	PE71.1	PE72.1
Type	DDE 6-10	DDE 15-4
Delivery rate	6 l/h	15 l/h
Suction lift	6 nWC

DDE 15-4	**PE72.1**	1 unit(s)	1.116,95

Peristaltic pump ROTH Cyclo II

ROTH SELECTION.

For all applications in the laboratory and analytics and biotechnology applications.

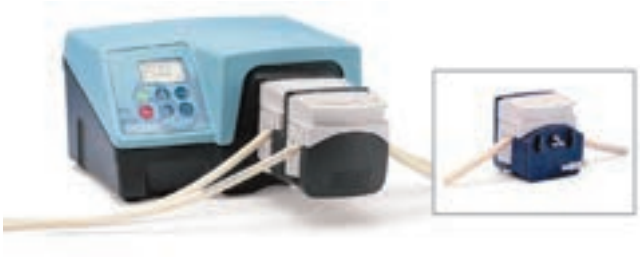
- Pump head (Ø 62 mm) can be rotated 90°
- Easy cleaning thanks to easily removable pump head
- Simple to use with two rotary knobs:
  Continuous speed adjustment from 0–100 %
  Reversible direction of rotation (clockwise/counterclockwise)
- Hose with a wall thickness of 1.6 mm can be used
- Variable hose contact pressure
- Easy hose replacement in seconds
- Temperature and current limiting for maximum reliability
- Stackable

Technical specifications:

Art. No.	Y374.1	EP75.1	EP74.1	EP76.1
Pump type	1-channel	2-channel	1-channel	2-channel
Pump head	3 rollers		6 rollers	
Delivery rate	12–240 ml/min		9,6–192 ml/min	
Max. pressure	1 bar			
Motor power	10 W			
L x W x H	131 x 134 x 190 mm			
Weight	1,6 kg			
Mains connection	100–230 V			

Optional accessory (please order separately): Hose cassettes for different hose Ø.

Delivery incl. hose cassette for hose with inner Ø of 4.8 mm and wall thickness of 1.6 mm. Without pump hoses, please order separately.



With 3-roller pump head

Version	Art. No.	Pack Qty.	€
1-channel	**Y374.1**	1 unit(s)	1.730,75
2-channel	**EP75.1**	1 unit(s)	1.929,65

With 6-roller pump head
For lower pulsation.

Version	Art. No.	Pack Qty.	€
1-channel	**EP74.1**	1 unit(s)	1.772,70
2-channel	**EP76.1**	1 unit(s)	2.127,45

Peristaltic pumps

Peristaltic pump Sci-Q 323

Watson-Marlow.

Particularly suitable for general applications in laboratory and research applications.

- Quick and easy hose laying thanks to flip-top pump head
- Digital speed control
- Manual control
- Easy-to-read display and washable membrane keyboard
- Chemical-resistant housing
- Maintenance-free, quiet motor
- Usable with hoses with a wall thickness of 1.6 mm
- Can be expanded with additional pump heads to a maximum of six parallel channels

Technical specifications:

Art. No.	**Y545.1**
Pump type	Sci-Q 323
Delivery rate	0,45–2000 ml/min
Speed	15–400 rpm
Operating temperature	+5 – +40 °C
Display	digital
Noise level	< 70 db
L x W x H	225 x 230 x 132 mm
Weight	4,7 kg
Mains connection	120/230 V, 50/60 Hz

Delivery rate depending on the hose size and the number of rollers in the pump head:

Inner Ø (mm)	**Delivery rate (ml/min)**		**Max. pump heads**
	3-roller	**4-roller**	
0.5	0.45–12	0.45–12	6
0.8	1.1–28	0.90–24	6
1.6	4.1–110	3.8–100	4
3.2	15–400	13–340	2
4.8	33–880	29–760	2
6.4	54–1400	45–1200	1
8	75–2000	60–1600	1

Optional accessory (please order separately): Additional pump heads for multichannel operation and pump heads with four rollers for lower pulsation.

Delivery incl. one 3-roller end pump head. Without pump hoses, please order separately.

Type	Art. No.	Pack Qty.	€
Sci-Q 323	**Y545.1**	1 unit(s)	4.833,20

Peristaltic pump set Hei-FLOW

Heidolph.

For conveying liquids with precision. Delivery rates depending on the hose size.

Properties of the pump drive:

- Analogue speed adjustment
- Constant speed even under varying load
- Reversible direction of rotation (clockwise/counterclockwise)
- Stackable housing (max. two pump drives)

Characteristics of pump head:

- For hose wall thickness of 1.6 mm
- Outer hose Ø freely selectable between 4 mm and 9.5 mm
- Low pulsation is ensured by five rollers
- Easy and quick hose replacement
- Stainless steel rollers and roller mounts

Technical specifications:

Four-channel pump head C4 for Hei-FLOW Precision 01

Heidolph.

With automatic hose anchoring.

- For use with up to four hose cassettes, with snap lock for easy insertion even during operation
- Low pulsation is ensured by eight rollers
- For two stopper hoses with a wall thickness of 0.9 mm
- Hose outer diameters of between 0.2 mm and 2.8 mm are freely selectable
- To feed and convey different volumes, hoses of different diameters can be inserted into the hose cassette
- Roller pressure can be adjusted using an adjustment screw

Delivery rate depending on the hose size:

Inner Ø (mm)	Delivery rate (ml/min)
	Precision 01
0.2	0.02–0.49
0.5	0.08–2
0.9	0.24–6
1.4	0.60–14
6.3	2–36

Delivery without adapter and hose cassettes (max. 4), please order separately.

four-channel pump head	C4	**CYC8.1**	1 unit(s)	889,00

Pump drive rotarus®

Hirschmann.

Efficient, precise peristaltic pump that enables a flexible range of applications by using various pump heads and hoses. Particularly suitable for use in the pharmaceutical and food production sectors thanks to its stainless steel housing.

- Control panel directly on the pump housing for quick and easy input of basic functions
- Quick-change pump heads
- Reversible direction of rotation (clockwise/counterclockwise)
- Load-based speed control
- Suitable for continuous operation
- Stackable

50i series
For low flow rates or high-viscosity media

Version	Type	Art. No.	Pack Qty.	€
flow	rotarus® 50i	**AXN7.1**	1 unit(s)	4.329,05
volume	rotarus® 50i	**AXN9.1**	1 unit(s)	5.165,40
standard	rotarus® 50i	**AXN5.1**	1 unit(s)	3.320,70

100i series
For high flow rates

Version	Type	Art. No.	Pack Qty.	€
flow	rotarus® 100i	**AXN8.1**	1 unit(s)	4.830,00
volume	rotarus® 100i	**AXP0.1**	1 unit(s)	5.499,70
standard	rotarus® 100i	**AXN6.1**	1 unit(s)	4.159,20

Peristaltic pumps

Single-channel pump head rotarus® PK 10-16

Hirschmann.

- With automatic hose anchoring
- RFID head and hose data recognition

Alternatively, up to three single-channel pump heads can be connected in series for multichannel operation.
• Three stainless steel rollers
• Housing made of anodised aluminium
• For hoses with an inner Ø of 1.6–11.1 mm and a wall thickness of 1.6 mm
• Cascadable

Delivery rate depending on the hose size:

Inner Ø (mm)	Delivery rate (ml/min)	
	50i series	100i series
1.6	0.08–40	1.9–200
3.2	0.32–160	0.8–850
8	1.7–840	42–3900
11	2.8–1500	69–5400

Type	Art. No.	Pack Qty.	€
PK 10-16	**AXP1.1**	1 unit(s)	1.743,65

Four-channel pump head rotarus® MKF 4-8

Hirschmann.

- With automatic hose anchoring
- RFID head and hose data recognition
- 8 rollers made of Rulon®
- Housing made of polysulfone (PSU)
- For hoses with an inner Ø of 0.19–2.79 mm, variable wall thickness
- Adjustable contact pressure

Delivery rate depending on the hose size:

Inner Ø (mm)	Delivery rate (ml/min)	
	50i series	100i series
0.19	0.001–0.40	0.021–0.90
0.25	0.0017–0.85	0.043–2.1
1.42	0.026–13.0	0.66–32.0
2.79	0.048–22.7	1.7–82.1

Delivery incl. four hose cassettes.

Type	Art. No.	Pack Qty.	€
MKF 4-8	**AXP2.1**	1 unit(s)	2.253,20

Piston vacuum pump ROTILABO® CR-KP292

ROTH SELECTION.

Compact pump for vacuum and pressure applications. Suitable for pumping air and neutral gases.

Application:
Pressure filtration of aqueous solutions, use in vacuum ovens, vacuum drying and gas sampling.

Technical specifications:

Art. No.	CYA9.1
Type	CR-KP292
Delivery rate	9,2 l/min
End vacuum (abs.)	292 mbar
Overpressure	3,3 bar
Media temperature	+10 – +60 °C
Connection	for hose inner Ø 6 mm
Motor power	25 W
Ambient temperature	+10 – +40 °C
W x D x H	114 x 194 x 191 mm
Weight	2 kg
Mains connection	230 V, 50 Hz

Type	Art. No.	Pack Qty.	€
CR-KP292	**CYA9.1**	1 unit(s)	342,95

Diaphragm vacuum pumps

Diaphragm vacuum pump ROTILABO® CR-MV100

ROTH SELECTION.

Chemical-resistant, for conveying and compressing neutral and aggressive gases and vapours in accordance with the resistance of the given materials. Vacuum is continuously variable via manual vacuum controller (needle valve).

Application:
Suitable for vacuum filtration, vacuum drying and solid phase extraction.

Technical specifications:

Art. No.	ECK4.1
Type	CR-MV100
Delivery rate	10 l/min
End vacuum (abs.)	100 mbar
Measuring range	1000–1 mbar
Graduation	50 mbar
Overpressure	2,5 bar
Media temperature	+10 – +60 °C
Connection	for hose inner Ø 6 mm
Motor power	48 W
Ambient temperature	+10 – +40 °C
Materials in contact with media	Seal: EPDM, Hose nozzle: PP, Valve: FKM, Diaphragm: PTFE-coated, Hose/separator: PVC, Pump head: Ryton
W x D x H	144 x 198 x 244 mm
Weight	2,7 kg
Mains connection	90–260 V, 50/60 Hz

Delivery incl. vacuum metering block with pressure gauge and exhaust silencer.

Type	Art. No.	Pack Qty.	€
CR-MV100	**ECK4.1**	1 unit(s)	849,25

Diaphragm vacuum pump LABOPORT® Mini

KNF.

Ideal for pumping and evacuating slightly aggressive or corrosive gases and vapours.

- Suitable for continuous operation
- Very quiet and low vibration
- Thermal switch and mains fuse

Technical specifications:

Art. No.	Y372.1	Y373.1
Type	N 816.3 KT.18	N 816.1.2 KT.18
Delivery rate	16,0 l/min	30,0 l/min
End vacuum (abs.)	20 mbar	160 mbar
Overpressure	0,5 bar	
Media temperature	+5 – +40 °C	
Connection	Hose inner Ø 6 mm	
Motor power	100 W	
Ambient temperature	+5 – +40 °C	
IP rating	20	
Materials in contact with media	Pump head: PPS, Diaphragm: PTFE-coated, Valves: FFPM	
W x D x H	90 x 361 x 141 mm	102 x 361 x 141 mm
Weight	3,95 kg	
Mains connection	230 V, 50 Hz	

Type	Art. No.	Pack Qty.	€
N 816.3 KT.18	**Y372.1**	1 unit(s)	875,05
N 816.1.2 KT.18	**Y373.1**	1 unit(s)	893,35

Diaphragm vacuum pumps

Diaphragm vacuum pump LABOPORT® speed-controlled

KNF.

Chemically resistant diaphragm pump, compact in design, with small footprint. Can be easily adapted to the respective application by means of integrated, manual speed control via a rotary knob. Very energy efficient and quiet. Surface is very easy to clean.

Technical specifications:

Art. No.	1EK3.1	1EK1.1	1EK2.1
Type	N 96	N 820 G	N 840 G
Delivery rate	7 l/min	20 l/min	34 l/min
End vacuum (abs.)	≤130 mbar	6 mbar	
Overpressure	2,5 bar	0,1 bar	
Media temperature	+5 – +40 °C		
Connection	for hose inner Ø 6 mm	for hose inner Ø 8–9,5 mm	
Motor power	19 W	66 W	100 W
Ambient temperature	+5 – +40 °C		
IP rating	40	30	
Materials in contact with media	Pump head: PPS, Diaphragm: PTFE-coated, Valves: FKM	Pump head: TFM™ PTFE, Diaphragm: PTFE-coated, Valves: FFPM	
W x D x H	156 x 75 x 119 mm	163 x 259 x 220 mm	177 x 289 x 240 mm
Weight	1,3 kg	8,8 kg	11,3 kg
Mains connection	100–240 V, 50/60 Hz		

N 96

Application: Filtration, liquid suction

Pic.	Type	Art. No.	Pack Qty.	€
(1)	N 96	**1EK3.1**	1 unit(s)	474,10

N 800 G series

Ideal for very aggressive/corrosive gases and vapours.

Application: Centrifugal concentration, rotary evaporation, distillation, degassing, desiccation, solid phase extraction.

- High steam and condensate resistance through integrated gas ballast valve
- Inner, media-contact area ATEX-compliant according to "(EX) II 2/-G IIB+H2 T3 internal atmosphere only"

Pic.	Type	Art. No.	Pack Qty.	€
(2)	N 820 G	**1EK1.1**	1 unit(s)	2.016,70

Diaphragm vacuum pump LABOPORT® N 938.50.KT

KNF.

Chemical-resistant diaphragm vacuum pumps for a wide range of applications in the laboratory. The two pump heads' parallel and series connections ensure that evacuation is very fast.

- Corrosion-resistant
- Suitable for continuous operation
- Compact, quiet and reliable
- Small footprint

Application

Degassing, desiccation, liquid suction, solid phase extraction

Optional accessories (please order separately): fine adjustment head with manual vacuum control via leakage air.

Technical specifications:

Art. No.	1EA9.1
Type	N 938.50.KT
Delivery rate	30 l/min, 1,8 m³/h
End vacuum (abs.)	15 mbar
Overpressure	0,5 bar
Media temperature	+5 – +40 °C
Connection	for hose inner Ø 10 mm
Motor power	110 W
Ambient temperature	+5 – +40 °C
IP rating	20
Materials in contact with media	Pump head: PPS, Diaphragms: PTFE-coated, Valves: FFPM
W x D x H	212 x 317 x 110 mm
Weight	6,8 kg
Mains connection	230 V, 50 Hz

Type	Art. No.	Pack Qty.	€
N 938.50.KT	**1EA9.1**	1 unit(s)	1.472,75

Diaphragm vacuum pumps

Diaphragm vacuum pump LABOPORT® chemical-resistant

KNF.

Ideal for pumping and evacuating aggressive gases and vapours.
Application:
For vacuum filtration, drying and distillation, gel drying, SPE, rotary evaporators, vacuum ovens.

- Inner media-contact area ATEX-compliant according to "ATEX II 2GB IIB+H2 T3X internal atmosphere only"
- High gas-tightness
- Suitable for continuous operation

Technical specifications:

Art. No.	C563.1	C564.1
Type	N 820.3 FT.18	N 840.3 FT.18
Delivery rate	20 l/min	34 l/min
End vacuum (abs.)	8 mbar	
Overpressure	1 bar	
Media temperature	+5 – +40 °C	
Connection	for hose inner Ø 10 mm	
Motor power	120 W	245 W
Ambient temperature	+5 – +40 °C	
IP rating	44	
Materials in contact with media	Pump head: TFM™ PTFE, Diaphragms: PTFE-coated, Valves: FFPM	
W x D x H	144 x 312 x 207 mm	166 x 341 x 226 mm
Weight	9.3 kg	12,6 kg
Mains connection	230 V, 50 Hz	

Type	Art. No.	Pack Qty.	€
N 820.3 FT.18	**C563.1**	1 unit(s)	1.936,10
N 840.3 FT.18	**C564.1**	1 unit(s)	2.118,85

Diaphragm vacuum pump LABOPORT® SD series

KNF.

Chemical-resistant, **suitable for highly aggressive and corrosive gases and vapours.**
Self-drying, **for moist gases:** During the evacuation process, the pump blows condensate liquid out of the pump heads at high speed. The vacuum remains constant during this application.
Application:
For applications such as steam sterilisers or vacuum drying in vacuum drying ovens, to significantly speed up the evacuation time.

- High steam and condensate resistance
- Gas-tight, leak rate approx. 6 x 10^{-3} mbar x l/s
- With thermal switch and mains fuse

Technical specifications:

Art. No.	Y369.1	1EK0.1	Y370.1
Type	N 820.3 FT.40.18	N 860.3 FT.40.18	N 840.3 FT.40.18
Delivery rate	20 l/min, 1,2 m^3/h	60 l/min, 3,6 m^3/h	34 l/min, 2,04 m^3/h
End vacuum (abs.)	10 mbar	4 mbar	10 mbar
Overpressure	1 bar		
Media temperature	+5 – + 40 °C		
Connection	for hose inner Ø 10 mm	for hose inner Ø 12 mm	for hose inner Ø 10 mm
Motor power	120 W	220 W	245 W
Ambient temperature	+5 – + 40 °C

Diaphragm vacuum pumps

Diaphragm vacuum pump N 920 KT.29.18G

KNF.

For all applications that still require a **large suction capacity** at **low pressure**.
For pumping and extracting air, gases and vapours, for sampling and evacuating containers or systems.

- **The delivery rate can be adjusted by changing the speed** using the potentiometer.
- Ideal for aggressive and corrosive gases and vapours.
- Very quiet and low vibration.
- Diaphragm stabilisation system for high suction capacity in the lower vacuum range.
- With integrated gas ballast valve for reducing condensate formation within the pump head.

Application:
For various processes and procedures, e.g. in laboratories, which need to be performed under vacuum conditions. Also usable in the semi-conductor and pharmaceutical industries and in chemical and analysis technology.

Technical specifications:

Art. No.	EP19.1
Type	N 920 KT.29.18G
Delivery rate	21 l/min
End vacuum (abs.)	2 mbar
End vacuum abs. with gas ballast	<5 mbar
Overpressure	0,5 bar
Media temperature	+5 – +40 °C
Connection	for hose inner Ø 10 mm
Motor power	135 W
Ambient temperature	+10 – +40 °C
IP rating	20
Materials in contact with media	Pump head: PPS, Diaphragms: PTFE-coated, Valves: FFPM, Gas ballast valve: PVDF
W x D x H	158 x 324 x 226 mm
Weight	8,5 kg
Mains connection	100–240 V, 50/60 Hz

Type	Art. No.	Pack Qty.	€
N 920 KT.29.18G	**EP19.1**	1 unit(s)	2.773,50

Diaphragm vacuum pump ME 1 series

Vacuubrand.

Ideal for pumping and evacuating gases and vapours.
Application:
Uses such as vacuum filtration for sample preparation in chemical, microbiology, wastewater and other analytical processes.

- Simple to use with central power button mounted on pump housing
- Extremely quiet and low vibration
- Requires minimal benchtop space
- Long diaphragm service life

Technical specifications:

Art. No.	NA17.1	NA18.1
Type	ME 1	ME 1C
Cylinder	1	
Steps	1	
Delivery rate	11,7 l/min, 0,7 m³/h	
End vacuum (abs.)	100 mbar	
Media temperature	+10 – +40 °C (>100 mbar), 0 – +60°C (<100 mbar)	
Inlet connection	for hose inner Ø 6–10 mm	for hose inner Ø 8–10 mm
Outlet connection	Silencer/G ⅛″	for hose inner Ø 8–10 mm
Motor power	40 W	
Ambient temperature	+10 – +40 °C	
IP rating	40	
Materials in contact with media	Aluminium, ETFE	ETFE, PTFE
W x D x H	121 x 247 x 145 mm	
Weight	5 kg	
Mains connection	230 V, 50/60 Hz	

Optional accessories (please order separately): fine adjustment head with manual vacuum control via leakage air, rotatable in different directions for optimal visibility.

ME 1
Wide range of applications for neutral gases and vapours.

Type	Art. No.	Pack Qty.	€
ME 1	**NA17.1**	1 unit(s)	795,50

ME 1C
Specially designed for aggressive gases and vapours.

Type	Art. No.	Pack Qty.	€
ME 1C	**NA18.1**	1 unit(s)	1.058,90

Diaphragm vacuum pumps

Diaphragm vacuum pump MD 1 series

Vacuubrand.

For evacuating and conveying gases down to an extremely low end vacuum.

- **Three-stage, for a high suction capacity even at low pressures**
- Very quiet and low vibration
- Long service life
- Easy diaphragm and valve replacements

Technical specifications:

Art. No.	ETY5.1	HC95.1
Type	MD 1	MD 1C
Cylinder	4	
Steps	3	
Delivery rate	20 l/min, 1,2 m³/h	21,7 l/min, 1,3 m³/h
End vacuum (abs.)	1,5 mbar	2 mbar
End vacuum abs. with gas ballast		4 mbar
Media temperature	+10 – +40 °C (>100 mbar), 0 – +60°C (<100 mbar)	
Inlet connection	for hose inner Ø 6 mm	for hose inner Ø 8–10 mm
Outlet connection	G⅛″ silencer	for hose inner Ø 8 mm
Motor power	80 W	
Ambient temperature	+10 – +40 °C	
IP rating	42	
Materials in contact with media	Pump head: Aluminium, Diaphragms: PTFE, Valves: FPM	Pump head: PTFE/ETFE, Diaphragms: PTFE, Valves: FFPM
W x D x H	143 x 303 x 163 mm	143 x 316 x 175 mm
Weight	6,5 kg	6,9 kg
Mains connection	200–230 V, 50/60 Hz	

MD 1
Wide range of applications for neutral gases and vapours.

Type	Art. No.	Pack Qty.	€
MD 1	**ETY5.1**	1 unit(s)	1.827,50

MD 1C
Specially designed for aggressive gases through the use of chemical-resistant fluoroplastics, as well as excellent condensate resistance due to built-in gas ballast valve.

Type	Art. No.	Pack Qty.	€
MD 1C	**HC95.1**	1 unit(s)	3.106,75

Diaphragm vacuum pump ME 4 series

Vacuubrand.

Ideal for analytic applications in the laboratory and industrial operations.

- Continuous, oil-free evacuation and conveying of gases
- Very low leak rate thanks to particularly tightly sealed connection technology. Reliable output data
- Long diaphragm service life
- Particularly quiet and smooth running thanks to compact drive
- Long service life
- Easy diaphragm and valve replacements

Technical specifications:

Art. No.	KH50.1	1EA7.1
Type	ME 4 NT	ME 4C NT
Cylinder	2	
Steps	1	
Delivery rate	67 l/min, 4,0 m³/h	65 l/min, 3,9 m³/h
End vacuum (abs.)	70 mbar	
Overpressure	1 bar	0,1 bar
Media temperature	+10 – +40 °C	
Inlet connection	for hose inner Ø 8–10 mm	
Outlet connection	2 x silencer / G¼″	
Motor power	180 W	
Ambient temperature	+10 – +40 °C	
IP rating	40	
Noise level	45 db	
Materials in contact with media	Pump head: Aluminium, Diaphragms: FPM, Valves: FPM	ETFE pump head, carbon fibre-reinforced, Diaphragms: PTFE, Valves: PTFE
W x D x H	239 x 243 x 198 mm	243 x 254 x 198 mm
Weight	11 kg	
Mains connection	200–230 V, 50/60 Hz	

ME 4NT
Wide range of applications for neutral gases and vapours.

Extremely high diaphragm durability thanks to highly flexible FKM double diaphragms with fabric reinforcement.

Type	Art. No.	Pack Qty.	€
ME 4 NT	**KH50.1**	1 unit(s)	1.682,40

ME 4C NT
Specially designed for aggressive gases and vapours.

Long diaphragm service life thanks to the diaphragms' PTFE sandwich design.

Type	Art. No.	Pack Qty.	€
ME 4C NT	**1EA7.1**	1 unit(s)	2.279,00

Diaphragm vacuum pumps

Diaphragm vacuum pump MPC series

WELCH Vacuum.

Ideal for pumping and compressing **neutral and aggressive gases and vapours.**
With integrated gas ballast valve for reducing condensate formation within the pump head.

Application:
In physical and chemical laboratories for vacuum filtration, distillation, drying, etc.

Technical specifications:

Art. No.	1AA3.1	CE38.1	CE39.1	CE40.1
Type	MPC 201 E	MPC 101 Z	MPC 301 Z	MPC 601 T

Rotary vane pump package ROTILABO® CR-DS40

ROTH SELECTION.

Robust, two-stage vacuum pump primarily for vacuum ovens, freeze dryers and the Schlenkline technique. Its innovative technology means that it has a long service life and is highly reliable and low-maintenance.

- Lower operating temperature thanks to optimised cooling, which reduces the chemical activity in the pump and the oil consumption
- Extended oil change intervals thanks to the large oil storage tank
- Larger oil capacity results in increased dilution of chemical vapours, minimisation of oil degradation rates and reduction in chemical damage in the pump
- Decelerated metal corrosion thanks to the additional coating of pump module and oil storage tank which, in conjunction with cold traps, extend the maintenance intervals

Technical specifications:

Art. No.	1A9E.1
Type	CR-DS40
Delivery rate	38 l/min, 2,3 m³/h
End vacuum (abs.)	3 x 10^{-3} mbar
End vacuum abs. with gas ballast	9 x 10^{-2} mbar
Media temperature	+10 – +40 °C
Connection	KF DN 16 small flange
Oil filling	0,45 l
Motor power	290 W
Ambient temperature	+10 – +40 °C
IP rating	54
Noise level	50 db
W x D x H	384 x 138 x 211 mm
Weight	15 kg
Mains connection	115–230 V, 50/60 Hz

Delivery incl. oil mist filter, adapter (DN 16 small flange to DN 10/8 mm hose nozzle), 1 l pump oil, funnel, clamping and centring rings.

Type	Art. No.	Pack Qty.	€
CR-DS40	**1A9E.1**	1 unit(s)	1.993,05

Rotary vane pumps

Rotary vane pump package CRVpro series

WELCH Vacuum.

Complete packages with two-stage rotary vane pumps.

- Low operating temperature due to enhanced cooling geometry
- Coating of the pump body and the oil container as protection against chemical vapours
- Low oil consumption and corrosion inhibition due to low heat development during operation
- Large oil reservoir reduces the concentration of chemicals, thereby increasing the oil change intervals

Application:

- Freeze dryer (CRVpro 4/6/8)
- Vacuum centrifuge (CRVpro 6)
- Vacuum ovens (CRVpro 8)
- Schlenk technology (CRVpro 4)
- Glove box (CRVpro 8)

Technical specifications:

Art. No.	**HKE0.1**	**HKE1.1**	**HKE2.1**
Type	CRVpro 4	CRVpro 6	CRVpro 8
Delivery rate	63 l/min, 3,8 m^3/h	85 l/min, 5,1 m^3/h	122 l/min, 7,3 m^3/h
End vacuum (abs.)	2 x 10^{-3} mbar		
End vacuum abs. with gas ballast	7 x 10^{-2} mbar		
Media temperature	+10 – +40 °C		
Connection	KF DN 16 small flange	DN 16 KF small flange	
Oil filling	1,15 l		1,0 l
Motor power	370 W		
Ambient temperature	+10 – +40 °C		
IP rating	54

Rotary vane pumps

Rotary vane pump XS series

Vacuubrand.

For pressure ranges up to 10^{-3} mbar.

Advantages:

- High suction capacity, even at low ultimate pressure
- High water vapour resistance (with 40 mbar gas ballast)
- Active corrosion protection against ingress of corrosive gases and oil components at a standstill through vacuum-tight closed oil circuit
- New circulation lubrication system
- Compact design and low weight
- Starts reliably even at low temperatures
- Long oil change intervals thanks to high usable oil volume
- Easy maintenance thanks to telescopic design

Delivery rate	38 l/min, 2,3 m³/h			95 l/min, 5,7 m³/h			143 l/min, 8,9 m³/h
End vacuum (abs.)	3 x 10^{-1} mbar	2 x 10^{-3} mbar					
End vacuum abs. with gas ballast	8 x 10^{-1} mbar	1 x 10^{-2} mbar					
Water vapour tolerance	40 mbar						
Media temperature	+10 – +40 °C (>100 mbar), 0 – +60°C (<100 mbar)						
Inlet connection	DN 16 small flange						DN 25 small flange
Outlet connection	for hose inner Ø 10 mm						DN 25 small flange
Oil filling	0,18–0,51 l	0,1–0,28 l		0,34–0,73 l			0,2–0,8 l
Motor power	180 W			300 W			370 W
Ambient temperature	+12 – +40 °C						
IP rating	40						
W x D x H	125 x 308 x 190 mm			142 x 370 x 207 mm			232 x 460 x 232 mm
Weight	10,2 kg	11,4 kg		16,4 kg			24,2 kg
Mains connection	200–230 V, 50/60 Hz						

Single-stage

Delivery incl. oil filling, thermal motor circuit breaker, power cord (length: 2 m), clamping and centring ring for suction piece.

Type	Art. No.	Pack Qty.	€
RE 2.5	**CE14.1**	1 unit(s)	1.854,40

Two-stage

Delivery incl. oil filling, thermal motor circuit breaker, power cord (length: 2 m), clamping and centring ring for suction piece – can also be used for exhaust port with RZ 9.

Type	Art. No.	Pack Qty.	€
RZ 2.5	**CE15.1**	1 unit(s)	2.542,40
RZ 6	**HC94.1**	1 unit(s)	3.257,25
RZ 9	**CTL2.1**	1 unit(s)	4.246,25

Basic package

Delivery incl. oil filling, thermal motor circuit breaker, power cord (length: 2 m), FO exhaust filter, VS 16 butterfly valve, PP adapter (DN 16 small flange to DN 10 hose nozzle), clamping and centring rings.

Type	Version	Art. No.	Pack Qty.	€
RZ 2.5 package	with FO + VS 16 + SW DN 10	**NA10.1**	1 unit(s)	2.902,50
RZ 6 package	with FO + VS 16 + SW DN 10	**NA11.1**	1 unit(s)	3.488,40

Package with vacuum meter

Delivery incl. oil filling, thermal motor circuit breaker, power cord (length: 2 m), FO exhaust filter, VS 16 butterfly valve, PP adapter (DN 16 small flange to DN 10 hose nozzle), clamping and centring rings, DCP 3000 vacuum meter with VSP 3000 pressure sensor.

Type	Version	Art. No.	Pack Qty.	€
RZ 6 package with DCP	with FO + VS 16 + SW DN 10 + set comprising DCP 3000 and VSP 3000	**CTL3.1**	1 unit(s)	4.730,00

Vacuum measuring devices and systems

Vacuum meter

ROTH SELECTION.

The devices are connected to a vacuum pump in series on the suction side. Stand mounting possible (using spring clamps on the back of the device).

Technical specifications:

Art. No.	NA03.1	Y457.1
Type	VAC	VAR
Version	meter	controller
Measuring range	1020–0 mbar	
Resolution	10 mbar	
Connection	for hose inner Ø 8 mm	
W x D x H	80 x 80 x 150 mm	

(1) VAR with manual regulator
For controlling the vacuum and keeping it constant via a control button. Continuously adjustable for a variable vacuum level.

Type	Version	Art. No.	Pack Qty.	€
VAR	controller	**Y457.1**	1 unit(s)	246,20

(2) VAC
For displaying the current vacuum level.

Type	Version	Art. No.	Pack Qty.	€
VAC	meter	**NA03.1**	1 unit(s)	170,95

Vacuum meter DVR 2pro

Vacuubrand.

Chemical-resistant materials in area in contact with media for excellent long-term stability and accuracy.

- Integrated ceramic diaphragm pressure transducer (aluminium oxide)
- Digital pressure display, with additional analogue representation
- Automatic switch-off after 1 to 600 min or continuous operation
- Adjustable measuring cycle: Automatic, 1x per 3 s, 1x per 1 s or 3x per 1 s
- Switchable pressure display (mbar, torr, hPa)

Technical specifications:

Art. No.	HTE7.1
Type	DVR 2pro
Measuring range	1060–1 mbar
Resolution	0.1 mbar
Measuring principle	capacitive absolute pressure transducer, regardless of the gas type
Accuracy	< ±1 mbar/±1 digit
Connection	KF DN 16 small flange DN 6/10 mm stepped hose nozzle Hose connection for PTFE hoses (inner Ø 8 mm, outer Ø 10 mm)
Ambient temperature	+10 – +40 °C
L x W x H	115 x 115 x 56 mm
Weight	400 g
Power supply	E-Block 9 V battery

Delivery incl. vacuum connecting parts, stand rod and battery.

Type	Art. No.	Pack Qty.	€
DVR 2pro	**HTE7.1**	1 unit(s)	810,55

NEW / +

Vacuum meter VMpro 2

WELCH Vacuum.

Robust, durable and reliable. Digital multi-range vacuum meter for measuring the vacuum in the coarse and fine vacuum ranges. Chemically resistant and therefore ideal for corrosive and aggressive gases and vapours. Combined sensor unites PIRANI technology with the benefits of a ceramic capacitive membrane sensor. In the measuring range between 10 mbar and the atmosphere, capacitive membrane technology delivers highly accurate values for reliable pressure measurement, regardless of the type of gas.

- With backlit LCD display for easy readability and for simple monitoring of the vacuum; the current measuring principle is also displayed
- High accuracy and excellent resolution in the atmospheric pressure range to $5x10^{-4}$ mbar
- Both pressure sensors are active at all times: With a low vacuum (<1 mbar), the signal from the PIRANI sensor is used exclusively for pressure measurement, and for a weaker vacuum (>10 mbar), only the signal from the capacitive membrane sensor is used. In the mixing area (1-10 mbar), both signals are weighted in proportion to the pressure and the output signal is thus determined
- Can be connected to practically any vacuum pump and any vacuum system
- LED status display

Technical specifications:

Art. No.	**1LLE.1**
Type	VMpro 2
Measuring range	1500–5x 10^{-4} mbar
Resolution	1 mbar (1050–100 mbar), 0.5 mbar (99–1 mbar), 0.1 mbar (0.9–0.1 mbar), 0.01 mbar (0.09–0.01 mbar), 0.001 mbar (0.009–0.001 mbar)
Measuring principle	capacitive and acc. to PIRANI
Accuracy	±2.5 % of the measured value (950–1050 mbar) ±5 % of the measured value (100–950 mbar) ±15 % of the measured value ($1x10^{-3}$–100 mbar) ±50 % of the measured value ($5x10^{-4}$–$1x10^{-3}$ mbar)
Connection	KF DN 16 small flange, Nozzle for internal hose Ø 8–10 mm
Ambient temperature	+10 – +50 °C
W x D x H	45 x 28 x 94 mm
Weight	120 g
Mains connection	100–240 V, 50/60 Hz

Delivery incl. DN 8-10 hose nozzle, T-piece, clamping and centring ring, plug-in power supply.

Type	Art. No.	Pack Qty.	€
VMpro 2	**1LLE.1**	1 unit(s)	1.192,20

Vacuum meter DCP 3000

Vacuubrand.

- LCD graphic display with digital pressure indicator and bar graph
- Separate pressure transducer for flexible positioning of the measuring device (cable length 2 m)
- Sensor material for contact with media: Aluminium oxide ceramic.
- Switchable pressure display (mbar, torr, hPa)
- Can be used as a tabletop device or with a stand

Technical specifications:

Art. No.	**LY74.1**	**LY75.1**
Type	DCP 3000 with VSK 3000 pressure transducer	DCP 3000 with VSP 3000 pressure transducer
Measuring range	1060–0.1 mbar	1000–0.001 mbar
Resolution	0.1 mbar	10% of displayed decade
Measuring principle	capacitive absolute pressure transducer, regardless of the gas type	Heat conduction according to PIRANI, depending on the gas type
Accuracy	< ±1 mbar/± 1 digit	±15% of the measured value (10–0.01 mbar)
Connection	for hose inner Ø 6, 8 or 10 mm	
Ambient temperature	+10 – +40 °C	
L x W x H	124 x 124 x 114 mm	
Weight	440 g	
Mains connection	100–230 V, 50/60 Hz	

Delivery incl. DCP 3000 vacuum meter with required pressure transducer, measuring cable and support.

Pic.	Type	Art. No.	Pack Qty.	€
(1)	DCP 3000 with VSK 3000 pressure transducer	**LY74.1**	1 unit(s)	1.456,65

Vacuum meter VACUU VIEW

Vacuubrand.

For monitoring vacuum processes with particularly high precision.

- Lit pressure display makes it easy to read the measured values
- Display with menu navigation, simple adjustment of display options, e.g. pressure unit
- Compact design with integrated sensors; is practical to position for lab and process set-ups
- Sensor chemical-resistant for increased service life, even for aggressive applications
- Stable plastic housing with good chemical resistance
- Switchable pressure display (mbar, torr, hPa)

Technical specifications:

Art. No.	1E9H.1	1E9E.1
Type	VACUU VIEW Extended	VACUU VIEW Standard
Measuring range	1100–0.001 mbar	1100–1 mbar
Resolution	1 mbar (1100–10 mbar), 0.1 mbar (10–1 mbar), 0.01 mbar (1–0.1 mbar), 0.001 mbar (0.1–0.001 mbar)	1 mbar (1100–100 mbar), 0.1 mbar (100–1 mbar)
Measuring principle	Capacitive and acc. to PIRANI	capacitive
Accuracy	±3 mbar (1100–5 mbar) ±15% from the measured value (5–0.01 mbar)	< ±1 mbar/±1 digit
Connection	KF DN 16 small flange, DN 6/10 mm stepped hose nozzle	
Ambient temperature	+10 – +40 °C	
L x W x H	50 x 62 x 103 mm	
Weight	190 g	
Mains connection	100–230 V, 50/60 Hz	

Delivery incl. DN 6/10 mm hose nozzle and plug-in power supply.

(1) Standard
With chemical-resistant ceramic membrane sensor for measurements in the coarse vacuum range. Detection of the applied absolute pressure, regardless of the gas type, according to the capacitive measuring principle.

Type	Art. No.	Pack Qty.	€
VACUU VIEW Standard	**1E9E.1**	1 unit(s)	951,40

(2) Extended
A chemical-resistant combination comprising a ceramic membrane sensor and ceramic jacketed Pirani sensor for measurements in the coarse and fine vacuum ranges.

Type	Art. No.	Pack Qty.	€
VACUU VIEW Extended	**1E9H.1**	1 unit(s)	1.085,75

Vacuum controllers VCpro 601

WELCH Vacuum.

Two-point controller for regulating a rough vacuum, for universal use. Robust vacuum sensor, chemically resistant and very precisely adjustable to ±1 mbar.

- With large, multilingual colour display and light/dark screen mode for optimum visibility
- Measured values can be presented digitally as a curve progression or in an analogue manner as individual values
- Integrated solvents library with stored distillation-specific parameters or freely adjustable boiling points; storage of individual pressure histories for innovative processes possible
- With communication port for remote control/monitoring, for downloading logged process data and for software updates
- Various safety levels can be accessed for self-defined user approvals
- Selectable pressure unit (mbar/Torr/psi)
- Integrated ventilation valve for inert gas/room air and solenoid control valve for vacuum
- Connection for cooling water valve available

Technical specifications:

Art. No.	1ATL.1
Type	VCpro 601
Measuring range	1100–1 mbar
Resolution	1 mbar
Measuring principle	Capacitive absolute pressure transducer, regardless of the gas type
Accuracy	Sensor: 0.3% full scale Control: 1 mbar
Connection	For hose inner Ø 8 mm
Venting valve connection	For hose inner Ø 4 mm
Ambient temperature	+15 – +30 °C
L x W x H	195 x 178 x 105 mm
Weight	1500 g
Mains connection	115–240 V, 50/60 Hz

Delivery incl. VCpro 601 vacuum controller with vacuum valve, venting valve and holder for stand removal.

Type	Art. No.	Pack Qty.	€
VCpro 601	**1ATL.1**	1 unit(s)	2.439,20

Vacuum controller VACUU·SELECT compact

Vacuubrand.

For controlling a vacuum in the coarse vacuum range. Measures and displays the absolute pressure. Compact unit, simple installation, for increased process efficiency.

- Operation via glass touchscreen, even when wearing thick laboratory gloves
- Highly intuitive, application-oriented operator guidance with integrated help function and contextual tips for application
- Saves time thanks to preset vacuum processes for all common laboratory applications
- Independently detects the boiling point during solvent evaporation, e.g. using the rotary evaporator
- Storage of individual vacuum processes using an application editor for reproducible results
- Ceramic membrane vacuum sensor integrated in the device, measurement connection at the valve block. Easy to connect the controller between the pump and vacuum application
- Chemical vacuum power valve: Electromagnetic flip-flop valve for controlling the vacuum you require in the application, with graduated hose nozzles
- Integrated venting valve: Simple pressure compensation or ventilation with inert gas at the end of the process
- Integrated non-return valve: No interference with adjacent applications using a shared vacuum source
- Switchable pressure display (mbar, torr, hPa)

Technical specifications:

Art. No.	1E97.1	1E98.1
Type	VACUU·SELECT compact	
Version	Tabletop device	Stand-mounted device
Measuring range	1080–0.1 mbar	
Resolution	0.1 mbar	
Measuring principle	capacitive absolute pressure transducer, regardless of the gas type	
Accuracy	< ±1 mbar	
Connection	for hose inner Ø 6/10 mm	
Venting valve connection	for hose inner Ø 4–5 mm	
Ambient temperature	+10 – +40 °C	
L x W x H	191 x 127 x 187 mm	152 x 127 x 189 mm
Weight	2000 g	
Mains connection	100–230 V, 50/60 Hz	

Tabletop device

Delivery incl. VACUU·SELECT compact controller in a tabletop version, with suction line valve, non-return valve, integrated ceramic membrane vacuum sensor, venting valve and mains adapter.

Type	Version	Art. No.	Pack Qty.	€
VACUU·SELECT compact	Tabletop device	**1E97.1**	1 unit(s)	2.601,50

Stand-mounted device

Delivery incl. VACUU·SELECT compact controller for stand mounting, with suction line valve, non-return valve, integrated ceramic membrane vacuum sensor, venting valve and mains adapter.

Type	Version	Art. No.	Pack Qty.	€
VACUU·SELECT compact	Stand-mounted device	**1E98.1**	1 unit(s)	2.601,50

Vacuum system SC 920 G

KNF.

Chemical-resistant, suitable for aggressive and corrosive gases and vapours.

- Control optionally via operating unit or PC
- LCD screen displays actual and target values
- Automatic boiling point detection and boiling point tracking using integrated ramp function
- High recovery rates even with solvents that have very low boiling points
- Delivery rate (in %) can be adjusted via speed
- Integrated gas ballast valve reduces condensate formation within the pump head
- Quiet operation

Control panel:

- Display: LCD
- Operation: Touchscreen/rotary pushbutton
- Dimensions (W x H x D): 90 x 205 x 55 mm

Technical specifications:

Art. No.	EHP1.1
System	SC 920 G
Delivery rate	21 l/min
End vacuum (abs.)	2 mbar
End vacuum abs. with gas ballast	5 mbar
Connection	for hose inner Ø 10 mm
Ambient temperature	+5 – +40 °C
Materials in contact with media	Pump head: PPS, Diaphragms: PTFE-coated, Valves: FFPM, Seals: FPM, Hose nozzles: PVDF
Port	Mini USB
W x D x H	366 x 294 x 423 mm
Weight	15.2 kg
Mains connection	100–240 V, 50/60 Hz

Delivery incl. 2x collecting flasks (each 500 ml, made of glass, coated), 2x flask clamps, USB cable for connecting to a PC and software (compatible with Windows).

Type	Art. No.	Pack Qty.	€
SC 920 G	**EHP1.1**	1 unit(s)	5.205,15

Vacuum systems

Vacuum system LABOXACT® SEM series

KNF.

With fine adjustment valve. Chemical resistant. Specially designed for use on rotary evaporators.

Features:

- **Digital vacuum gauge**, displays the current pressure in the system
- **Fine adjustment valve** for continuously variable vacuum regulation
- **Safety venting valve** enables the piston to be ventilated in order to interrupt the evaporation process
- **Separate on/off switch** for the pump
- **Inert gas connection**
- Delivered fully assembled

Advantages:

- Safe evaporation control
- High recovery rates even with solvents that have very low boiling points
- Gentle distillation thanks to closed system layout
- Continuously variable regulation of the vacuum via fine adjustment valve
- Once the required vacuum has been achieved, the fine adjustment valve can be closed and the pump can be switched off
- Maintenance-free and quiet

Technical specifications:

Art. No.	AY12.1	AY13.1	AY14.1
System	SEM 820	SEM 840	SEM 842
Pump type	N 820.3 FT.18	N 840.3 FT.18	N 842.3 FT.18
Delivery rate	20 l/min	34 l/min	
End vacuum (abs.)	8 mbar		2 mbar
Connection	for hose inner Ø 10 mm		
Materials in contact with media	Pump head: TFM™ PTFE, Diaphragms: PTFE-coated, Valves: FFPM		
L x W x H	442 x 305 x 481 mm		
Weight	14.5 kg	17.8 kg	18.6 kg
Mains connection	230 V, 50 Hz		

Delivery incl. base plate, separator, condenser, fine adjustment valve, vacuum gauge (digital), safety venting valve, wiring and hoses.

Type	Art. No.	Pack Qty.	€
SEM 820	**AY12.1**	1 unit(s)	3.378,75
SEM 840	**AY13.1**	1 unit(s)	3.789,40
SEM 842	**AY14.1**	1 unit(s)	4.854,70

Vacuum system LABOPORT® SC series

KNF.

With vacuum controller. Chemical resistant. For laboratories that require a clean and controlled vacuum.

Applications:

- Vacuum distillation and filtration
- Rotary evaporators
- Vacuum drying
- Vacuum impregnation
- Gel drying, etc.

Features:

- **Vacuum controllers** for controlled vacuum processes
- The control unit switches the pump off or on again if the required vacuums are achieved or exceeded
- Delivered fully assembled

Advantages:

- Automatic vacuum control
- Controlled solvent recovery via high-performance condenser (pressure-side)
- Collects particles in the system (suction-side)
- Maintenance-free and quiet

Technical specifications:

Art. No.	AY16.1	AY17.1	AY18.1
System	SC 820	SC 840	SC 842
Pump type	N 820.3 FT.18	N 840.3 FT.18	N 842.3 FT.18
Delivery rate	20 l/min	34 l/min	
End vacuum (abs.)	8 mbar		2 mbar
Overpressure	1 bar		
Connection	for hose inner Ø 10 mm		
Materials in contact with media	Pump head: TFM™ PTFE, Diaphragms: PTFE-coated, Valves: FFPM		
L x W x H	397 x 289 x 506 mm	417 x 289 x 506 mm	
Weight	16.0 kg	19.3 kg	20.1 kg
Mains connection	230 V, 50 Hz		

Delivery incl. base plate, separator, condenser, vacuum controller with control unit, wiring and hoses.

Vacuum system LVS 105 T-10 ef+

WELCH Vacuum.

Specially designed for rotary evaporators, distillation, filtration, vacuum ovens and vacuum drying. With chemical-resistant diaphragm vacuum pump and vacuum controller VCpro600. To ensure a freely selectable vacuum of ±1 mbar, the pump speed is continuously adapted to the gas load.

Advantages:

- Faster process results are ensured by constant evaporation and degassing
- Automatic vacuum adjustment and control
- Controller with large, multilingual colour display and light/dark screen mode for optimum visibility
- Integrated solvent library with stored distillation-specific parameters and freely adjustable boiling points; storage of individual pressure curves for novel processes possible
- With communication interface for remote control/monitoring, for downloading logged process data and for software updates
- Low-noise operation through speed reduction

Technical specifications:

Art. No.	NH35.1
System	LVS 105 T-10 ef+
Delivery rate	18 l/min
End vacuum (abs.)	< 2,0 mbar
Connection	for hose inner Ø 8 mm
Materials in contact with media	Pump head: PTFE with carbon fibre reinforcement, Diaphragms: Elastomer with PTFE coating, Valves: PEEK, Seals: EPDM, Screw fittings/connecting elements: PP, PVDF, Vacuum hose: PTFE
Port	RS 232, LAN
W x D x H	250 x 260 x 435 mm
Weight	9,5 kg
Mains connection	115–240 V, 50/60 Hz

Delivery incl. chemical-resistant diaphragm pump, built-in controller, ecoflex control unit, suction-side separator with 500 ml round bottom flask, pressure-side intensive cooler with 500 ml round bottom flask and safety valve.

Type	Art. No.	Pack Qty.	€
LVS 105 T-10 ef+	**NH35.1**	1 unit(s)	3.799,05

Vacuum system PC 3000 VARIO select series

Vacuubrand.

Optimal solution for chemical processes requiring a precise vacuum, such as rotary evaporation, vacuum drying or vacuum concentration, by combining the speed-controlled VARIO chemical diaphragm pump and VACUU·SELECT vacuum controller.

- Uncompromising chemical version: Excellent chemical resistance throughout from the suction side to the pressure side
- Precise and efficient vacuum control via the pump speed (VARIO technology).
- Vacuum controller with graphical user interface and predefined vacuum processes for all standard laboratory applications.
- Automatic boiling point detection and vacuum adaptation for short process times.
- Application, required vacuum and other parameters can also be individually configured and controlled.
- Very quiet and low vibration operation.
- Excellent environmental compatibility through low energy consumption, extended maintenance intervals and efficient solvent recovery.
- Suction-side separator made of glass with protective coating retains particles and droplets, very compact pressure-side emission condenser enables almost 100% solvent recovery.
- Interfaces for remote monitoring, remote control, data transfer (export/import), software updating

Technical specifications:

Art. No.	1EN0.1	1EN1.1
System	PC 3001 VARIO select	PC 3003 VARIO select
Delivery rate	33 l/min, 2,0 m³/h	46 l/min, 2,8 m³/h
End vacuum (abs.)	2 mbar	0,6 mbar
End vacuum abs. with gas ballast	4 mbar	1,5 mbar
Overpressure	0,1 bar	
Ambient temperature	+10 – +40 °C	
Materials in contact with media	ETFE pump head, carbon fibre-reinforced, Diaphragms: PTFE sandwich, Valves: Perfluoroelastomer (FFKM), Cylinder wiring/hose nozzles: PTFE, ETFE, ECTFE	
Port	USB type A, LAN	
Motor power	160 W	530 W
L x W x H	303 x 306 x 400 mm	419 x 243 x 457 mm
Weight	8,2 kg	21,1 kg
Mains connection	230 V, 50/60 Hz	

Delivery incl. chemical-resistant diaphragm pump, vacuum controller, emission condenser, separator, round flask and hose connections.

PC 3001 VARIO select
Extremely compact and powerful, very good end vacuum even with the opened gas ballast valve.

Type	Art. No.	Pack Qty.	€
PC 3001 VARIO select	**1EN0.1**	1 unit(s)	7.212,20

PC 3003 VARIO select
Ideal for high boilers and low evaporation temperatures due to the particularly low end vacuum.

Type	Art. No.	Pack Qty.	€
PC 3003 VARIO select	**1EN1.1**	1 unit(s)	10.023,30

Extraction system biovac 106

WELCH Vacuum.

For safe and precise extraction of liquid, non-explosive residues from slides, Petri dishes and other containers.

- Incl. chemical-resistant diaphragm pump with long service life
- Connections to the diaphragm pump and to the handpiece via quick couplings with double-sided shut-off valve
- The pipette holder enables a variety of pipette tips or glass tips to be used. Delivery incl. eight-channel suction rake
- Integrated collection container (autoclavable) with integrated float valve, closes automatically once the max. fill level has been reached
- Integrated filter mount for diaphragm filter between the collection container and the diaphragm pump. Diaphragm filters up to max. pore size of 0.22 µm, Ø 55 mm can be used. Factory-integrated: 0.22 µm PTFE filter, Ø 55 mm
- If necessary, the pump can be switched on via a footswitch which can be purchased as an option

Technical specifications:

Art. No.	KH49.1
Type	biovac 106
Bottle volume	2,000 ml
Delivery rate	12 l/min, 0,72 m³/h
End vacuum (abs.)	100 mbar
Overpressure	1 bar
Ambient temperature	+10 – +40 °C
W x D x H	357 x 145 x 277 mm
Weight	8 kg
Mains connection	115–230 V, 50/60 Hz

Note: When the quick couplings are fitted, unscrew the cap before autoclaving and place it on the bottle.

Delivery incl. mains adapter.

Type	Art. No.	Pack Qty.	€
biovac 106	**KH49.1**	1 unit(s)	2.139,25

Extraction system

Hettich Benelux.

For safe vacuum extraction of liquid residues.

Basic equipment:

- Vacuum pump
- Collecting bottle made of PP, vacuum-resistant, autoclavable
- Screw cap with two quick-release couplings for tight sealing of the collecting bottle after the hoses are disconnected
- Ventilation insert for pressure compensation during autoclaving of collecting bottle
- Safety filter to protect the vacuum pump and surrounding area
- Silicone hose (3 m) for placing the extraction system away from the workbench

Technical specifications:

AA model

- Lacquered aluminium housing
- Compact design, safety bottle holder mounted on high-performance vacuum pump
- Suitable for up to four sampling points (optional)
- Handle with AH 01 trumpet valve for attaching various suction instruments and a mechanical flow rate control system; incl. adapter for Pasteur pipettes, adapter for 1 ml pipette tips and angle adapter
- Vacuum pump with automatic cut-out. The pump cuts out automatically when extraction is completed using the handle and the final vacuum is reached

Extraction system BioChemVacuuCenter BVC

Vacuubrand.

Safe, precise and effective extraction of liquids in all areas of laboratory work (chemistry, biochemistry and biology).

- Ergonomic VHC^{pro} extraction handle with continuous tube; mechanism does not come into contact with fluids
- With swivelling pipette holder, for left- and right-handed users
- Lockable button for continuous extraction, µl precision extraction using thumbwheel
- Simultaneous extraction at two workstations is possible by connecting an optional second extraction handle
- Hydrophobic protective filter with 0.2 µm pore size for protection of the pump unit and the surrounding area

NEW / +

(1) Basic model

- Without vacuum pump, for connecting to external vacuum sources
- With mechanical vacuum controller for optimal working volume

Delivery incl. housing, collecting bottle (vacuum-resistant, autoclavable), sterilisable protective filter (0.2 µm pore size), VHC^{pro} extraction handle (autoclavable), three adapters for mounting different pipettes and tips, silicone hose (length: 2 m).

Type	Version	Art. No.	Pack Qty.	€
BVC Basic G	2 l glass collecting bottle, with hose nozzles	**1EP8.1**	1 unit(s)	1.069,65
BVC Basic	4 l PP collecting bottle, with hose nozzles	**XE35.1**	1 unit(s)	962,15

(2) Control model

- With powerful, chemical-resistant ME 1C diaphragm pump (switch-off vacuum of 150 mbar abs., delivery rate of 11.7 l/min)
- Continuous precision adjustment of vacuum/suction power electronically via touch panel
- Continuous vacuum with minimised pumping times thanks to automatic pump activation/deactivation
- Very low noise level for a pleasant working environment

Delivery incl. diaphragm pump and control unit, housing, collecting bottle (vacuum-resistant, autoclavable), sterilisable protective filter (0.2 µm pore size), VHC^{pro} extraction handle (autoclavable), three adapters for mounting different pipettes and tips, silicone hose (length: 2 m).

Water jet pumps

Water jet pump

ROTH SELECTION. Material: PP.

For extraction of liquids and vapours as well as generating vacuum. With built-in non-return valve. Can be disassembled, making cleaning easy.

Connection for the tap:

- Union nut R¾″ or
- Reducer R½″ or
- Hose connection (connector) with outer Ø 10–12 mm
- Optional accessory (please order separately):
  Adapter from R¾″ to M22 x 1 (Perlator thread), with seal

Vacuum connection:

- Connector with outer Ø 6–9 mm

Technical specifications:

- Water consumption: Approx. 220 l/h at a flow pressure of 3.5 bar
- Delivery rate: Approx. 450 l of air/h at a flow pressure of 3.5 bar
- Abs. end vacuum at a water pressure of 3.5 bar:
  Approx. 16 mbar at +12 °C
  Approx. 24 mbar at +20 °C
- Length of the water jet pump with R¾″ connection: Approx. 210 mm

Version	Art. No.	Pack Qty.	€

Adapter with Perlator thread	**N876.1**	1 unit(s)	15,60

Low-pressure water jet pump

Thermo. Material: Brass nickel-plated with plastic sleeve.

With built-in non-return valve.

Technical specifications:

- Water consumption: 4–12 l/min
- Delivery rate: 2.5 l/min (at a water pressure of 5 bar)
- Abs. end vacuum: 16 mbar (at 0.5 bar and +14 °C)
- Dimensions: H 185 x W 80 mm
- Weight approx. 250 g
- Suction piece connection, 9–14 mm

Version	Art. No.	Pack Qty.	€
with tubing connection and 2 hose clips	**9660.1**	1 unit(s)	186,00

Tube for peristaltic pumps

ROTH SELECTION. Material: Silicone treated silicone.
Autoclavable: Yes.

Ultra-smooth surface to prevent adhesions, deposits and bacterial growth. Compliant with USP Class VI, Eur. Ph. 6.5: 3.1.9 and FDA regulations 21 CFR 177.2600.

Technical specifications:

Temperature stability	-20 to +80 °C
Colour	translucent
Hardness	60 Shore A

Tube external Ø of 17–22 mm	**0784.1**	10 unit(s)	30,85
Tube external Ø of 22–27 mm	**N045.1**	10 unit(s)	30,85
Tube external Ø of 25–30 mm	**0785.1**	10 unit(s)	30,85

NEW / +

Hose clamp ROTILABO® metal

ROTH SELECTION. Material: Steel (galvanised), aluminium nut.

Continuously variable flow control for various hoses. Very heat-resistant and stable.

Suitable for	Art. No.	Pack Qty.	€
Hose external dimensions Ø of up to 10 mm	**1L7K.1**	5 unit(s)	18,25
Hose external dimensions Ø of up to 15 mm	**1L7L.1**	5 unit(s)	28,70
Hose external dimensions Ø of up to 20 mm	**1L7N.1**	5 unit(s)	31,25
Hose external dimensions Ø of up to 30 mm	**1L7P.1**	5 unit(s)	47,85

Accessories for hoses

Pinchcock ROTILABO®

ROTH SELECTION. Material: Stainless steel.

With clamping springs. Variable mounting bracket allows the clamp to be permanently opened. Tubing is securely attached to the pinchcock using clips. Single-handed operation possible.

Delivery incl. 20 cm silicone tubing.

Suitable for	Art. No.	Pack Qty.	€
Tube external Ø of 10–15 mm	**H452.1**	1 unit(s)	14,35

Pinchcock according to Mohr

ROTH SELECTION. Material: Brass nickel-plated.

For shutting off flexible tubing.
Single-handed operation possible.

Length (mm)	Suitable for	Art. No.	Pack Qty.	€
50	Tube external Ø of up to 20 mm	**KY01.1**	5 unit(s)	34,90
60	Tube external Ø of up to 25 mm	**KY02.1**	5 unit(s)	36,85

Hose connectors

Hose connections ROTILABO® system Keck

ROTH SELECTION. Material: PBT, aeals made of EPDM.

For quickly establishing secure and leak-tight connections between hoses and glass nozzles/glass threads. Excellent chemical and temperature resistance up to +130 °C.

Not a medical device / Not an IVD product

For glass threads

Delivery incl. screw cap, hose part and seals.

Ø ext. (mm)	Suitable for	Art. No.	Pack Qty.	€
9,0	GL 14 (Schott), yellow	**H075.1**	10 unit(s)	87,10

For glass nozzles

Delivery incl. clamping ring, screw cap, hose part and seals.

Ø ext. (mm)	Suitable for	Art. No.	Pack Qty.	€
9,0	GL 14 (Schott), yellow	**H072.1**	10 unit(s)	109,65

A 121 °C

Hose couplings ROTILABO® system Keck

ROTH SELECTION. Autoclavable: Yes.

Not a medical device / Not an IVD product

Hose nozzles

Made of PBT, seal made of EPDM. Outer Ø 9 mm, length 43 mm. Light blue colour.

Delivery without connecting pieces, please order separately.

Version	Art. No.	Pack Qty.	€
Hose nozzles	**0354.1**	10 unit(s)	41,95

Connecting pieces

White colour, 8 mm outlet.

Delivery without hose nozzles, please order separately.

Version	Art. No.	Pack Qty.	€
Connecting pieces	**0343.1**	5 unit(s)	24,55

Draincock red/natural

ROTH SELECTION. Material: PE.

With separate ventilation channel. Continuously variable regulation of the discharge speed.

Not suitable for glass threads.

Thread	Art. No.	Pack Qty.	€
DIN 45	**X530.1**	3 unit(s)	27,70
DIN 50	**X531.1**	3 unit(s)	33,70

Draincock FLUXX®

ROTH SELECTION. Material: PE.

The patented ventilation system allows easy, clean and fast filling and transfer of liquids without gurgling.

Not suitable for glass threads.

Thread	Art. No.	Pack Qty.	€
DIN 51 / DIN 40	**T358.1**	3 unit(s)	12,50
DIN 61 / DIN 40	**T359.1**	3 unit(s)	13,75

Spout

ROTH SELECTION. Material: PE, Alkozell seal.

Flexible spout tube with snap-on lid, screwed into a screw cap. With riser for smooth pouring.

Not suitable for glass threads

Thread	Art. No.	Pack Qty.	€
DIN 45	**TE90.1**	2 unit(s)	17,90
DIN 51	**TE91.1**	2 unit(s)	17,90
DIN 61	**TE92.1**	2 unit(s)	18,60

Cocks

Draincock Compact

Bürkle. Material: PP, seals made of PE/PTFE.

Closes tight. Easy to open and close. Can be operated single-handed. Space-saving design: The tap does not protrude beyond the base of the container and can remain on the container in storage.
Optimised drainage spout for an even, splash-free flow.

Thread	Art. No.	Pack Qty.	€
G¾″ (internal thread)	**PE42.1**	1 unit(s)	17,70

Draincock

Bürkle.

Closes tight. Easy to open and close. Can be operated single-handed. With rotating non-drip nozzle and metering scale. With reducing outlet spout (outside Ø 6–8 mm) for narrow bottle openings.

Non-self-ventilating draincock.

Stopcock
Material: PP Seal made of PE/PTFE.

Delivery incl. reducing outlet spout.

Thread	Conductive	Art. No.	Pack Qty.	€
G¾″ (internal thread)	No	**2683.1**	1 unit(s)	27,95

PA stopcock
Material: PA electrically conductive, Seal made of PTFE.
Note: The drum and the tap must be grounded using the Roth antistatic set (Art. No. 0213.1) during filling with flammable liquids.

Delivery incl. reducing outlet spout and electrically conductive PA adapter for drum with G¾″ internal thread.

Thread	Conductive	Art. No.	Pack Qty.	€
G¾″ (internal thread)	Yes	**LP75.1**	1 unit(s)	33,45

Draincock Air

Bürkle. Material: PE, seal made of natural rubber.
Self-ventilating.

Thread	Art. No.	Pack Qty.	€
G¾″ external thread	**Y496.1**	3 unit(s)	19,80

Draincock PP

Bürkle. Material: PP.
Ball valve suitable for crystallising media. Pressure max. 4 bar at 20 °C.

Delivery without hose connector, please order separately.

Thread	Art. No.	Pack Qty.	€
G¾″ external thread	**P943.1**	1 unit(s)	63,80

Accessories hose connector for PP draincock

Bürkle.

Version	Art. No.	Pack Qty.	€

Pasteur/disposable pipettes

Pasteur pipettes

DWK Life Sciences. Material: Borosilicate glass 5.1. Autoclavable: Yes.

For single use in microbiological and serological laboratories. Ideal for distributing aliquot quantities of liquid.

- In accordance with ISO 7712
- Practically inert borosilicate glass (USP type I neutral glass)
- With neck for cotton stoppers
- Good resistance to temperature variation, suitable for transferring hot liquids
- Excellent chemical resistance to acid and alkaline solutions

Pasteur/disposable pipettes

Pasteur pipettes graduated

ROTH SELECTION. Material: LDPE.

Single-use pipettes with integrated suction ball for straightforward transfer of liquids. With graduation for approximation of dispensed volume. Suitable for media aliquoting thanks to reproducible droplet size.

- Clear graduation
- No slipping with latex gloves
- Precise, fine tip for reproducible results

Not a medical device / Not an IVD product

0.3 ml

For drawing and dispensing small volumes, for transferring into and out of multiwell plates, and for pH measuring instruments (drawing and redispensing of filling solutions for electrodes).

Vol. (ml)	Filling capacity (ml)	Total volume (ml)	Graduation range (ml)	Total length (mm)	Ø ext. (mm)	Drop size (µl)	Drops per ml	Sterility	Pack.	Art. No.	Pack Qty.	€

Pasteur/disposable pipettes

Serological pipettes CELLSTAR®

Greiner Bio-One. Material: PS, Polyester plugs. **Sterile**.

- Maximum accuracy
- High visual transparency
- Easy-to-read graduation
- Pipette tip design guarantees pipetting without droplets
- Increased volume capacity thanks to the extended negative graduation
- Fitted with a synthetic filter to prevent liquids from being drawn into the pipette
- Pipette colour code according to international standards for easy identification
- Expiration date and lot number printed on each individual piece of packaging
- Individually packed in plastic/plastic packaging with a peel-off function
- **Free of detectable DNase, RNase and human DNA**
- **Free of detectable endotoxins, free of cytotoxic substances**

Manual pipetting aids

Pipetting ball ROTILABO®

ROTH SELECTION. Material: Natural rubber.

Glass ball valve is opened by pressing marked point.

Standard model

Length: 125 mm, Weight: 50 g.

Version	Suitable for	Art. No.	Pack Qty.	€
manually	Graduated/volumetric pipettes up to 10 ml	**0251.1**	1 unit(s)	9,20

Universal model

Matches pipettes Ø up to 9 mm. Length: 152 mm, Weight: 58 g.

Version	Suitable for	Art. No.	Pack Qty.	€
manually	Graduated/volumetric pipettes up to 100 ml	**PC78.1**	1 unit(s)	8,30

Accessories adapter for pipetting bulbs

NEW/+

ROTH SELECTION. Material: Natural rubber.

For securely holding pipettes with a small diameter in pipetting bulbs.
Suitable, e.g. for small bulb pipettes.

Colour	Art. No.	Pack Qty.	€
red	**1L10.1**	15 unit(s)	32,85

Pipetting ball ROTILABO® Flip

ROTH SELECTION. Material: Natural rubber.

Suitable for pipettes Ø 6–8 mm.

- With removal safety valve
- Evacuation via automatic valve
- Aspiration and draining using two working points
- Interior cleaning possible

Version	Suitable for	Colour	Art. No.	Pack Qty.	€
manually	Graduated/volumetric pipettes 10-100 ml	red	**C261.1**	1 unit(s)	12,60

manually	Graduated/volumetric pipettes 10-100 ml	assorted colours	**ETY6.1**	4 unit(s)	47,25

Manual pipetting aids

Pipetting bulb Howorka

ROTH SELECTION. Material: Natural rubber.

Manual pipette controller for Pasteur, graduated and volumetric pipettes for all common pipe diameters. Resistant to the effects of acids, bases, oils and solvents in the short term.

- Easy to operate with a special opening for an immediate sealing effect
- No additional valves or disruptive air cushions
- Almost no limit to the suction volume with multiple repetitions of the suction process
- After suction via the meniscus, the bulb is lifted and the pointer indicates the calibration mark
- Easy to clean
- Individual parts are autoclavable

Applications:

- Pipetting aqueous media, organic solvents and viscous substances
- Filling narrow-necked burettes
- Filling, emptying and cleaning separating columns
- Filling and emptying capillaries
- Filtering through filter tubes

Manual pipetting aids

A 121 °C

Pipetting aid macro

BRAND. Autoclavable: Yes.

- Suction of up to 50 ml in 11 seconds following one-time ventilation
- Single-level operation for sucking and delivering liquid
- Spring-loaded control lever for delicate pipetting
- Blow-Out function
- Drip stop via hydrophobic membrane filter (3 µm)
- Fully autoclavable at 121 °C (2 bar) according to DIN EN 285
- Replaceable valve system

Effortless pipetting: The further up the pipette lever is operated, the faster the pipette is filled. To deliver the liquid, move the pipette lever fully downward. Even when flowing freely, the pipette's volume accuracy is not affected.

Delivery incl. replacement filter.

ROTH SELECTION.

Manual pipette controller for precise and convenient pipetting with one hand.

- Ergonomic grip
- With operating lever for liquid intake and delivery
- Blow-Out function for blowing out the pipette
- Pipette holder (made of PP) and silicone adapter, autoclavable
- Dimensions: length 180 mm, width 45 mm, height 120 mm

Delivery incl. membrane filter to protect against liquid penetration.

Version	Suitable for	Art. No.	Pack Qty.	€
manually	Graduated/volumetric pipettes 1 to 50 ml, serological pipettes	**HYT1.1**	1 unit(s)	72,30

Pipetting aids

Pipetting aid pipetus® junior

Hirschmann.

Manual pipetting aid with ergonomic shape. Defined intake of the pipetting medium possible, approx. 2 ml per complete stroke.

- Silicone adapter ensure tight fit of the pipette
- Fine dosing valves
- Weight 115 g

Delivery incl. round filter (PTFE, pore width 0.2 µm, hydrophob).

Version	Suitable for	Art. No.	Pack Qty.	€
manually	Graduated/volumetric pipettes 0.5–100 ml	**L468.1**	1 unit(s)	166,65

Pipetting aid pipetus® standard

Hirschmann.

Electric pipetting aid. Additional safety for special environments through separation of electric pump and handheld unit. Ideally suited for working in explosion-proof areas, with toxic reactants or in clean-room technology.

- Light handheld unit with external pump
- Select the pipetting speed directly at the pump part
- Ergonomic shape for fatigue-free working
- Suitable for EX and blow-out pipettes
- Exact meniscus setting with fine precision-dosing valves, valve pins made of ceramic compound
- Integrated safety check valve

Hose length 150 cm. cable length 140 cm.
Mains connection: 230 V, 50 Hz.

Delivery incl. round filter (PTFE, pore width 0.2 µm, hydrophob), hand part, dual hose and pump with power supply.

Version	Suitable for	Art. No.	Pack Qty.	€
with electric pump	Graduated/volumetric pipettes 0.1-100 ml	**1534.1**	1 unit(s)	326,80

With large-volume filter
With additional large capacity filter on the pump section for sterile work.

Version	Suitable for	Art. No.	Pack Qty.	€
with electric pump	Graduated/volumetric pipettes 0.1-100 ml	**B010.1**	1 unit(s)	367,65

Battery-powered pipette controller pipetus®

Hirschmann.

- Press a button to take up and discharge the medium
- Integrated colour display for visual checking of all functions
- Display of set pipetting speed (5 levels are selectable)
- Pre-selected pipetting mode (EX or Blow-Out)
- Exact meniscus setting with fine precision-dosing valves, valve pins made of ceramic compound
- Continuous pipetting for up to 1 week
- Permanent battery capacity display
- Charge via charging station or charger, overcharge protection
- Silicone adapter ensures absolute tight fit for all pipettes
- Integrated safety check valve
- Hydrophobic PTFE membrane filter, pore width 0,2 µm
- Pipette holder, sterilisable (excl. PTFE filter) at 121 °C
- Weight 200 g

Delivery incl. 2 round filters (PTFE, pore width 0.2 µm, hydrophob), 1 safety valve, socket charger and inductive charging station.

Version	Suitable for	Art. No.	Pack Qty.	€
battery-operated	Graduated/volumetric pipettes 0.1–200 ml	**N472.1**	1 unit(s)	542,90

Battery-powered pipette controller ROTILABO®

ROTH SELECTION.

Pipette holder made of PP, autoclavable. Replaceable PTFE membrane filter prevents contaminations.

- Ergonomically shaped housing for fatigue-free working
- UV-resistant housing material
- 2 pipetting speeds (High or Low Speed)
- Gravity mode, for non-motorised fluid drainage
- 20 h continuous duty, can be used while charging is in progress
- LED-based low battery indicator
- User friendly thanks to concave shaped finger pads
- With labelling space on the side
- Five coloured pipette holders for distinguishing between apparatus
- Additional pipette adapter for low pipetting volumes
- Weight approx. 200 g
- 5 years warranty

Delivery incl. power supply (100–240 V, 50/60 Hz), Li-Ion battery, 1 replacement membrane filters (PTFE 0.45 µm), 5 pipette holder, silicon adapter, stand, wall holder.

Version	Suitable for	Art. No.	Pack Qty.	€
Battery operated	Graduated/volumetric pipettes 1–100 ml	**TC16.1**	1 unit(s)	284,90

Battery-powered pipette controller accu-jet® S

NEW / +

BRAND.

Easy and precise pipetting of large and small volumes: With just one hand you have sensitive control of the pipetting speed, from fast, powerful absorption with exact meniscus configuration to precise discharge of even small volumes. Thanks to precise control, the exact volume required will always be achieved, even when using graduated and volumetric pipettes made of glass/plastic. Without having to move your hand, the motor speed can be regulated between particularly powerful and particularly sensitive operation and to switch between free flow (with "EX"-calibrated pipettes) or rapid blowing of the liquid with motor power.

- Precise volume adjustment thanks to accurate control
- Integrated parking position for rear storage with attached pipette
- Continuously-adjustable control of the pipetting speed
- Fast: 25 ml pipette filled in 3 s at max. motor speed
- 8 hours of continuous pipetting without recharging (with 10 ml pipette)
- Pipetting is possible during the loading cycle
- Two-tone battery charge indicator, intelligent battery charging electronics
- Ergonomic handle and balanced weight distribution
- Robust design, straightforward maintenance and repair
- Protection against ingress of liquid through the membrane filter and additional safety valve
- Valve system directs liquid vapour straight out of the device, reduces risk of corrosion

Note about sustainability:

The packaging is made from more than 90% recycled material. Production uses electricity from renewable sources.

With mains adapter

Delivery incl. universal mains adapter (100-240 V/50-60 Hz), nickel-metal hydride battery, wall bracket and 2 replacement membrane filters 0.2 µm, sterile.

Pipette accessories

Pipette rinsing system ROTILABO®

Kartell. Material: HDPE.

For gentle cleaning of pipettes according to the siphon principle. A complete rinsing system consist of a rinser unit and/or cleaning container as well as the pipette basket in each case.

Please order all individual elements separately.

(1) Rinser
With drain siphon for an automatic water exchange. Suitable for use with pipette baskets.

Delivery without hose.

Suitable for	Ø (mm)	Height (mm)	Art. No.	Pack Qty.	€
Pipette length 460 mm	170	735	**Y810.1**	1 unit(s)	186,00
Pipette length 600 mm	170	990	**Y809.1**	1 unit(s)	192,45

(2) Cleaning container
For pre-cleaning the pipettes or burettes with cleaning agent.

Suitable for	Ø (mm)	Height (mm)	Art. No.	Pack Qty.	€
Pipette length 460 mm	162	505	**Y812.1**	1 unit(s)	88,15
Pipette length 600 mm	162	650	**Y811.1**	1 unit(s)	92,25

(3) Pipette basket
For immersing the pipettes into the cleaning container and/or rinser and for transporting the pipettes. Basket height 300 mm.
Optionally available: extension piece to extend the pipette basket Y813.1 from 650 to 870 mm.

Suitable for	Ø (mm)	Height (mm)	Art. No.	Pack Qty.	€
Pipette length 460 mm	145	500	**Y814.1**	1 unit(s)	43,45

Dispenser pipettes

Dispenser pipette HandyStep®

BRAND.

Electronic multi-dispenser with touch operation.

- Touch operation with intuitive menu navigation and integrated assistance
- Variable volume adjustment between 1.0 µl and 50 ml
- Automatic size recognition for BRAND PD-Tips//
- Button for automatic tip ejection to avoid contamination
- Compatible with dispenser tips from other manufacturers
- Inductive charging, quick charging via a USB-C port
- One fully charged battery provides many hours of continuous operation
- Long service life thanks to high-quality materials
- Smooth surfaces make cleaning/disinfecting easy
- Languages: German, English, Spanish, French and Chinese

Standard modes: Multi-dispensing, auto dispensing, pipetting and favourites.

Not a medical device / Not an IVD product

(1) Touch

Delivery incl. Li-battery, universal mains adapter (for Europe, UK, USA, Japan, Australia, New Zealand), USB type C cable, wall/shelf holder, standard PD-Tips // (each PD-Tip in sizes 0.5 ml, 1.25 ml, 2.5 ml, 5 ml and 12.5 ml), instructions for use and quality certificate.

Dispenser pipette HandyStep® S

BRAND.

Manual multi-dispenser for fast, repetitive dispensing of liquids. PD-Tips allow volumes of between 2 µl and 5 ml to be dispensed in up to 49 increments in a single filling without refilling. HandyStep® S and PD-Tips work according to the positive displacement principle. High viscosity, high density and high vapour pressure liquid media can be dispensed with extremely high precision. Direct displacement allows contamination-free operation since no aerosols are formed.

- Ergonomic design
- Stroke length setting wheel with nine positions
- Easy tip attachment - the PD-Tips are inserted straight from below
- Safe tip removal at the touch of a button - no need to touch the dispenser tips
- Easy-to-read display, no battery required
- Innovative plastics provide increased resistance to chemicals
- For use with PD-Tips, Combitips®, Combitips® plus, Ritips®, Repet-Tips, Encode™-Tips and other compatible tips
- Operating temperature range: 15 to 40 °C
- Maintenance-free, factory-calibrated
- Includes a quality certificate
- DE-M approved

HandyStep S precision table® in combination with PD-Tips. Error limits refer to the set dispensing volume according to PD-Tip size, with the device, tip, environment and distilled water at a uniform temperature (20 °C) and with smooth operation. This test is performed according to DIN EN ISO 8655-5. The nominal volume is the maximum volume printed on the PD-Tip.

Delivery incl. shelf/rack mount and three PD-Tips: 0.1, 1 and 10 ml.

Dispenser pipette Stepper™ 416

Socorex.

Compact and reliable repeater pipette for precise serial dispensing in the volume range from 10 µl to 5 ml.

- Four-finger activation function eliminates thumb fatigue
- Dose range: 53 volumes from 10 to 5000 µl
- 3 different tip sizes, colour-coded
- Up to 73 doses per filling
- Enables fast work rates, up to 2 doses per second
- Stop mechanism: Self-locking mechanism prevents false delivery
- Individually calibrated with test certificate

A separate adjustable head of matching colour is available for each tip size; it displays the dosing volume and number for a filled tip. An automatic locking mechanism prevents dosing errors once the remaining liquid in the dispenser tip is no longer sufficient for complete dosing.

Single-channel microlitre pipette Acura® *manual* 810 for dilutions

Socorex. Autoclavable: Yes.

Stem pipette for 1:10 dilutions
Air displacement pipette with two pre-calibrated fixed volumes in one piston stroke allows sequential delivery of 1 and 0.1 ml of the same liquid. For more flexibility, the volumes can be used either individually or in combination for dilutions.
The metal cone provides a perfect seat for long PP stem tips, ideal for taking samples from narrow vessels Stomacher®- bags and other blending bags. The Acura® manual 810 is an ideal alternative to conventional graduated pipettes for serial 1:10 dilutions in bacteriology.

Properties:

- Two pre-calibrated fixed volumes – no adjustment necessary
- The two volumes 1 and 0.1 ml can be calibrated separately
- Easy performance of all functions
- Excellent ergonomics, lightweight
- Metal shaft allows the use of long stem tips
- Justip™ system to adjust the height of the tip ejector
- Simple, efficient ejection of stem tips
- Replaceable PE protective filter

Technical specifications:

Volume: 100 µl:

- Inaccuracy (E %): <±2,0
- Imprecision (CV %): <±2,5

Volume: 1000 µl:

- Inaccuracy (E %): <±0,5
- Imprecision (CV %): <±0,4

The values were achieved with distilled water at a constant (±0.5 °C) ambient temperature between 20 and 25 °C, in accordance with. EN ISO 8655.

Protection filter made of PE for protection against penetration of liquid	**HK02.1**	100 unit(s)	69,45

Direct displacement pipettes

Positive displacement pipette digital Transferpettor

BRAND.

Piston pipettes for difficult media
For foaming media (e.g. tenside solutions), high-vapour-pressure media (e.g. alcohols, ether, hydrocarbons), viscous media and high-density media (e.g. concentrated protein solutions, oils, resins, fats, glycerine, mercury, sulphuric acid).

Unlike air displacement pipettes, the piston of the positive displacement pipette is in direct contact with the liquid to be pipetted. This principle always provides precise reproducible results, regardless of the pipetting speed and the ambient conditions. Capillaries and tips can be reused, since the minimal residual wetting is negligible for most applications. Where carry-over is not permitted, such as with infectious or radioactive media, air displacement pipettes with disposable tips should be used. With DE-M marking and quality certificate.

Applications:

- Media with densities up to 13.6 g/cm³
- Viscosity up to 140,000 mm²/s (depending on size of apparatus)
- Vapour pressure up to 500 mbar
- Working temperature range 15 to 40 °C

Direct displacement pipettes

Positive displacement pipette MICROMAN® E

Gilson.

Positive displacement system without air cushion between sample and piston prevents contamination as well as aerosol formation and produces precise and reproducible pipetting results. Caps fit straight out of the box, pistons and capillaries lock into place automatically ("QuickSnap system").
Conformity certified to DIN EN ISO 8655 with test protocol.
CE/IVD marking.

For problematic media, e.g.:

- Viscous media, e.g. oils, glycerol, gel loading buffer
- Media with a high vapour pressure (acetone, hexane or other solvents)
- Sterile media
- PCR/qPCR preparations
- Radioactive media
- Cold/warm solutions

Advantages:

- QuickSnap system for easy handling
- Volume lock for safe pipetting
- Ergonomically designed and comfortable handle
- Lightweight and narrow CP tips for narrow vessels

Microlitre pipettes, ROTH

Single-channel microlitre pipette ROTILABO®

ROTH SELECTION. Autoclavable: Yes.

Robust quality pipettes with variable volume for routine work and demanding applications.

- Ergonomic finger support for comfortable handling and single-hand operation
- Separate tip eject button
- Central, large pipettor button for even plunger movement
- Separate volume adjustment, for left- and right-handed users
- Easy-to-read display
- Integrated calibration function for easy adjustment without tools
- Corrosion-resistant plunger and ejector
- Slim shaft
- Fully autoclavable at 121 °C (2 bar) according to DIN EN 285
- A filter for protection of the pipettes is optional with volumes of 5 ml and higher. Please order separately

A 121 °C

Calibrated to ‚Ex'. Margins of error refer to the nominal volume (= max. volume) printed on the device, assuming that the device, ambient air and distilled water are at the same temperature (20 °C), and that the instrument is operated evenly and smoothly. Margins of error are within the limits specified in DIN EN ISO 8655-2.

Microlitre pipettes, BRAND

Single-channel microlitre pipette Transferpette® S

BRAND. Autoclavable: Yes.

Manual plunger pipettes for demanding applications.

- In any position: Comfortable one-handed operation
- For every hand: Ergonomic design
- Short lifting distance and low operational forces
- Universal tip attachment cone
- Thinner shaft for drawing liquids from narrow vessels
- Fully autoclavable at 121 °C
- DE-M approved

A 121 °C

Delivery incl. quality certificate and shelf-holder, labelling foils and silicone grease.

In vitro diagnostic medical device according to IVDD

Variable

- Secure: Volume lock prevents any accidental adjustments
- Colour code on the volume adjustment wheel, shaft and volume lock
- Can be easily adjusted without the need for tools thanks to Easy Calibration technology

Microlitre pipettes, BRAND

Single-channel microlitre pipette Transferpette® electronic

BRAND.

Microprocessor-controlled plunger pipette.

- Ergonomic design makes working easier
- Height-adjustable finger support to optimise the positioning of your hand for the function keys
- Five functions:
  Pipetting, mixing, reverse pipetting, dispensing, gel electrophoresis mode
- High pipetting speed
- Eight hours' continuous pipetting possible
- Ready for use during charging cycle
- Refresh mode to increase the battery life
- Slim pipette shaft allows pipetting into even the narrowest vessels
- Easy Calibration function for adjustment without tools
- Fully autoclavable pipette shaft
- DE-M approved
- Includes a quality certificate

In vitro diagnostic medical device according to IVDD

With mains adapter

Microlitre pipettes, BRAND

Multi-channel microlitre pipette Transferpette® electronic

BRAND.

Microprocessor-controlled plunger pipette.

- Ergonomic design makes working easier
- Height-adjustable finger support to optimise the positioning of your hand for the function keys
- Five functions:
  Pipetting, mixing, reverse pipetting, dispensing, gel electrophoresis mode
- High pipetting speed
- Eight hours' continuous pipetting possible
- Ready for use during charging cycle
- Refresh mode to increase the battery life
- Easy Calibration function for adjustment without tools
- Fully autoclavable pipette shaft
- DE-M approved
- Includes a quality certificate

Delivery incl. mains adapter (110–240 V/50–60 Hz).

Microlitre pipettes, Gilson

Single-channel microlitre pipette Pipetman® G

Gilson.

Adjustable air-cushion plunger pipette offering one of the lowest pipetting forces on the market. Low effort for ejecting tips thanks to the metal clip ejector. (TP74.1 and TP75.1 without chip ejector.)
These pipette models are noted for their robustness, accuracy, ease of maintenance and long service life.

- Easy dismantling and maintenance
- Despite the low pipetting force, the initial pressure point is easy to feel during pipetting
- P5000G and P10 ml G pipettes come with a protective filter which protects the plunger and prevents contamination
- Conformity certified according to DIN EN ISO 8655 with test protocol

Microlitre pipettes, Gilson

Single-channel microlitre pipette Pipetman® L

Gilson. Autoclavable: Yes.

Lightweight and safe yet robust quality pipette.
Pipette with improved pipetting strength, increases the performance without sacrificing on comfort.

- Patented Lock/Unlock System for safe pipetting
- The set volume is locked during the first pipetting operation
- Easy release of the volume adjustment lock
- Ergonomic handle
- Adjustable tip ejector for left- and right-handed users
- Plastic tip ejectors (TT03.1 and TT04.1 without tip ejector)
- 2D identification code
- Fully autoclavable

Microlitre pipettes, Socorex

Single-channel microlitre pipette Acura® *manual* XS 826

A 121 °C

Socorex. Autoclavable: Yes.

- Outstanding ergonomic profile
- Easy to operate function keys
- Extremely gentle pipetting action, easier on the hands
- Separate, large tip eject button, easy tip ejection
- Narrow pipette shaft
- Reduced shaft length allows optimised instrument guidance
- Conical shaft end for easy access to reaction vials
- Justip™ tip adjustment system allows exact calibration of the shaft height
- Reduced weight (to 83 from 88 g)
- Innovative calibration system (Swift-Set)
- Tamper-proof seal label for protection of the calibrator
- Individual serial number and inspection certificate
- Fully autoclavable

Microlitre pipettes, Sartorius

Single-channel microlitre pipette Proline® Plus variable

Sartorius. Autoclavable: Yes.

For all types of routine laboratory work.
The ergonomic design enables effortless operation and minimises the effort required.

- Robust, yet light and easy to use
- Graduated volume setting, easy-to-read display
- Thermal insulation of internal components for improved accuracy
- Highly resistant to chemicals and UV light
- Compatible with numerous tips
- Long shaft for narrow laboratory vessels
- Easy to clean; no tools required for opening
- Supplied with tools for easy self-calibration
- Suitable for both left-handed and right-handed users
- High level of accuracy and precision according to ISO 8655
- Individual quality certificate
- Replaceable Safe-Cone filters to prevent contamination of the pipette and the sample material (for pipettes from 10 µl). Please order separately.
- Fully autoclavable when Safe-Cone filters are removed

Single-channel microlitre pipette mLINE® variable

Sartorius. Autoclavable: Yes.

mLINE® single-channel pipettes are extremely light, requiring very little effort for pipetting and tip ejection.

- Ergonomic design allows fatigue-free operation
- Thermal insulation of internal components for improved accuracy
- Easy-to-read display
- Opti-Load tip loading mechanism for easy tip ejection
- Start button enables automatic Safe-Cone filter ejection
- Ergonomic finger support with ID window for individual labelling
- Five different coloured button covers for colour coding
- Conformity certified with test protocol
- Safe-Cone filter to prevent contamination of the pipette and the sample material (for pipettes from 10 µl). Please order separately.
- Fully autoclavable when Safe-Cone filters are removed

5	280	80	165	**A804.1**	1 unit(s)	104,15

Pipette carousel

ROTH SELECTION. Material: ABS.

Suitable for all standard models. Holds up to 8 single-channel pipettes or 4 multi-channel pipettes vertically in order to prevent contamination. Customised colour scheme thanks to interchangeable upper sections. Inserts can be removed from the upper level to make space for larger pipettes. Can be cleaned with soap/water and standard laboratory disinfectants.

Delivery incl. white frame, eight single-coloured bases, as well as 2 x 8 coloured tops and a handle. Delivered unassembled.

Colour	Slots	Art. No.	Pack Qty.	€
blue/green	8	**HYP7.1**	1 unit(s)	131,15

Pipette tips large opening

ROTH SELECTION. Material: PP. Autoclavable: Yes.

- With extra large opening for the protection of cells
- Suitable for pipetting of suspensions or for viscous liquids
- RNase/DNase/human DNA and pyrogen free

A 121 °C

Not a medical device / Not an IVD product

1-200 µl
Suitable for BRAND, Eppendorf, Gilson, ROTH.

Volume (µl)	Version	Colour	Sterility	Packaging type	Pack.	Art. No.	Pack Qty.	€
1 to 200	Cell-Saver	colourless	Non-sterile	Bag	loose	**AEA9.1**	1,000 unit(s)	55,65

100-1000 µl, with filter, sterile
With aerosol filter. Suitable for Eppendorf, Finnpipette®, Gilson, Rainin®, Sartorius.

Volume (µl)	Version	Colour	Sterility	Packaging type	Pack.	Art. No.	Pack Qty.	€
100 to 1000	Cell-Saver	colourless	**Sterile**	Box (slip lid)	6 x 96	**CHC6.1**	576 unit(s)	141,75

Pipette tips and refill systems

Pipette tips ROTILABO®

ROTH SELECTION. Material: PP. Autoclavable: Yes.

- Made of non-cytotoxic, biologically inert and highly transparent polypropylene
- Production under strictly controlled clean room conditions
- Extra smooth inner surface
- Graduation for quick and convenient visual volume testing
- Universal fit to many popular pipette brands, simple and effortless ejection
- Special design prevents DNA denaturation
- **Free from RNase/DNase and human DNA**
- **Pyrogen and PCR-inhibitor free**
- **Non-metallic**

Filter tips ROTILABO®

NEW / +

ROTH SELECTION. Material: PP, Filter made of PE. Autoclavable: No.

Filter tips eliminate harmful aerosol transfer during pipetting and protect pipette shafts from contamination and cross-contamination. In this way, reproducible and reliable results are guaranteed. The efficient barrier against aerosols and vapours also protects against radioactive, environmentally harmful or corrosive substances penetration the pipette body.

- Made of non-cytotoxic, biologically inert and highly transparent polypropylene
- Hydrophobic filters made of pure polyethylene
- Free of chemical additives, no risk of cross-contamination in case the liquid comes into contact with the filter
- Filter pore size of 10-40 µm for extremely high filter density
- Production under strictly controlled clean room conditions
- Extra smooth inner surface
- Graduation for quick and convenient visual volume testing
- Universal fit to many popular pipette brands, simple and effortless ejection
- Special design prevents DNA denaturation
- **Free from RNase/DNase and human DNA**
- **Pyrogen and PCR-inhibitor free**
- **Non-metallic**

In vitro diagnostic medical device according to IVDD

Pipette tips and refill systems

Pipette tip refill system MµIti® Platinum Reload

Sorenson. Autoclavable: Yes.

Pipette tips in pre-assembled inserts.
Easy to use: Transfer the inserts with tips into the empty rack, tips are ready for use immediately.

- Reusable boxes with hinged lid
- Stackable
- Free of human DNA and PCR inhibitors
- RNase-/DNase-free, pyrogen-free

A 121 °C

Pipette tips and refill systems

Pipette tip station MµltiⓇ TipStation

Sorenson. Material: PP (100% recycled plastic).

5-layer pipette tip station.
Ideal for loading multichannel pipettes.

- 960 pipette tips in a MµltiⓇ TipStation
- 2 x 96 (=192) pipette tips in each layer
- The lid can be positioned over one half of the layer (96 tips) to minimise the risk of contamination
- Space-saving

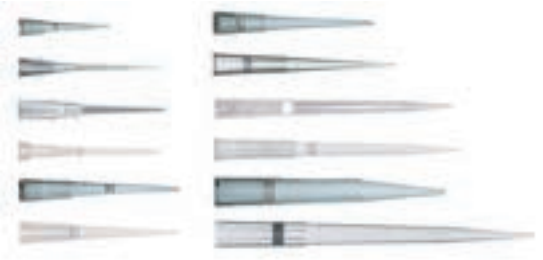
Not a medical device / Not an IVD product

0.1–10 µl Long Reach

Suitable for: Socorex, Sartorius, ROTH, Gilson, Finnpipette®, Eppendorf, BRAND.

Tip length (mm)	Colour	Sterility	Pack.	Art. No.	Pack Qty.	€
45.3	colourless	**Sterile**	5 x 960	**EL29.1**	4,800 unit(s)	258,00
45.3	colourless	Non-sterile	5 x 960	**EL30.1**	4,800 unit(s)	234,35

1-200 µl



Suitable for: Socorex, Sartorius, ROTH, Gilson, Finnpipette®, Oxford, Eppendorf, BRAND.

Tip length (mm)	Colour	Sterility	Pack.	Art. No.	Pack Qty.	€
51.44	yellow	**Sterile**	5 x 960	**EL33.1**	4,800 unit(s)	224,70
51.44	yellow	Non-sterile	5 x 960	**EL34.1**	4,800 unit(s)	225,75

Filter tips MµltiGuard® sterile

Sorenson. Material: PP. **Sterile**. Autoclavable: Yes.

- With aerosol filter
- Specially developed hydrophobic membranes for protection against contamination from bio-hazardous, toxic or radioactive substances
- Made of fully inert material – to eliminate "false signals" during PCR experiments
- RNase/DNase, human DNA, PCR-inhibitor and pyrogen free

Microtiter plates and accessories

Deepwell plates Riplate®

Ritter. Material: PP. Autoclavable: Yes.

Suitable for all common automation systems, plate size 1 and 2 ml suitable for multi-channel pipettes.

- Alphanumeric well identification
- Includes angled corner for proper orientation
- Stackable
- SBS dimensions
- Optimised base structure minimises specimen losses
- Temperature-stable up to -85 °C
- Centrifugable to 3000 x g
- Sterile article, individually packed

Microtiter plates and accessories

Deepwell plates Riplate® magnetic

Ritter. Material: PP.

For cleaning, mixing, centrifuging samples. For storing and preparing substances. For cleaning proteins as well as for DNA extraction via automatic magnet separation. Corresponds to the SBS standard (Society for Biomolecular Screening).

- Resistant to common chemicals. solvents and alcohols
- High stability also when centrifuging
- Cylindrical wells for optimum sample mixing
- Slightly raised rim of the well prevents cross-contamination
- Alphanumeric marking for registering and identifying the samples
- Production under clean-room conditions Class 8

Application:
Specially developed for robots for magnetic separation:
Automated magnetic separation is often used for cleaning proteins as well as for DNA extraction. This technology that is based on magnetic particles enables fast and efficient preparation of samples with high throughput. In order to perform this separation process reproducibly in the long-term, precise plastic plates made of ultrapure polypropylene were developed, the Riplate® magnetic. Production under Class 8 clean-room conditions ensures the sustainability of these products as well as reliable analysis results.
Suitable for:
KingFisher™ 96 Flex Magnetic Particle Processors.

Reaction vial system BioTube™

ROTH SELECTION. Material: PP. Autoclavable: Yes.

Ideal for storing, transporting and freezing samples as well as for use in many biological tests, e.g. PCR, radio immunoassays (RIA), enzyme immunoassays (EIA) or cell growth studies. Racks can be removed from their base, e.g. for homogeneous heating of vials in a water bath.

- Rack with snap-on lid, filled with 96 vials
- Vials arranged in microtritation plate format 8 x 12
- Suitable for working with multichannel pipettors
- With alphanumeric marking on outside of rack
- Label inside rack
- Temperature-stable up to -90 °C

8 x 12 sealing mats	Non-sterile	**XK19.1**	100 unit(s)	264,45

Microtiter plates and accessories

Microtitration plates 6 well

Boettger. Material: PS. Non-sterile.

For all bacteriological work that requires multiple partitioning of the culture tray. Simple, space-saving alternative to six conventional 35 mm Petri dishes.

- Manufactured under aseptic conditions
- Recesses, alphanumerically marked, well Ø 35 mm
- Max. volume 15 ml per well
- Centrifuges up to 4500 x g
- Temperature stable from -20 to approx. +60 °C

Delivery incl. lid.

Wells	Volume per well (ml)	Colour	Sterility	Pack.	Art. No.	Pack Qty.	€
6	2-5	translucent	Non-sterile	50 x 2	**ATC0.1**	100 unit(s)	125,80

Microtitration plates ROTILABO®

Boettger. Material: PS. Non-sterile.

- With 96 alphanumerically marked recesses
- Manufactured under aseptic conditions
- Stackable

Delivery without lid.

F-profile

With transparent F-bottom, for good sample visibility.

Pic.	Wells	Volume per well (ml)	Colour	Sterility	Art. No.	Pack Qty.	€
(3)	96	0,405	translucent	Non-sterile	**9293.1**	100 unit(s)	95,65

U-profil

With round bottom, for mixing and washing samples.

Microtiter plates and accessories

Microtitration plates

Greiner Bio-One. Material: PS.

- Solid base
- Free of detectable endotoxins
- Free of detectable DNase, RNase and human DNA

F-profile

Ideal for extremely precise optical measurements. The cell geometry does not deflect the measurement light beam.

- Cell geometry: F-base/standard (flat base)
- For microscopic applications (bottom reading)
- Excellent optical properties thanks to the flat base of the cells

Wells	Volume per well (µl)	Colour	Sterility	Pack.	Art. No.	Pack Qty.	€
96	25-340	translucent	Non-sterile	10 x 10	**1A70.1**	100 unit(s)	125,80
96	25-340	translucent	**Sterile**	50 x 2	**1A71.1**	100 unit(s)	153,30

V-profile

Particularly well suited to applications where the entire sample volume must be removed by pipette. For precise pipetting because the sample is collected at the base. Ideal for storing samples.

- Cell geometry: V-base (conical base)
- Suitable for +/- analyses

Wells	Volume per well (µl)	Colour	Sterility	Pack.	Art. No.	Pack Qty.	€
96	40-200	translucent	Non-sterile	10 x 10	**1A72.1**	100 unit(s)	127,45

Microtiter plates and accessories

Microtitration plates pureGrade™

BRAND.

Untreated surface.
Manufactured according to ANSI/SBS standards 1 to 4-2004 to ensure compatibility when carrying out manual processes and, in particular, automatic processes.

Properties of BRAND*plates*® microtiter plates:

- 96 well standard format
- Alphanumerically coded
- **Free of endotoxins, DNase, DNA, RNase, non-cytotoxic**

Properties of the pureGrade™ microtiter plates:

- Chimney-shaped cavities
- Colour code: grey for standard plates
- F-profile (flat bottom shape) for precision optical measurements

F-bottom, transparent
Material: PS. Transparent bottom in F-profile (flat bottom shape) for precise optical measurements.

Delivery without lid.

Wells	Volume per well (ml)	Colour	Sterility	Pack.	Art. No.	Pack Qty.	€
96	0,35	translucent	Non-sterile	20 x 5	**CNP7.1**	100 unit(s)	124,50

F-bottom, transparent, sterile
Material: PS. Transparent bottom in F-profile (flat bottom shape) for precise optical measurements. Sterilised through β-irradiation. Ideal for bacteriological assays.

Delivery incl. lid.

Wells	Volume per well (µl)	Colour	Sterility	Pack.	Art. No.	Pack Qty.	€
96	350	translucent	**Sterile**	individual	**XT64.1**	50 unit(s)	150,55

UV
Material: Polymer (UV polymer, slightly hydrophilic), rack PS.

- Suitable for the determination of nucleic acid and protein concentrations (at 260 and 280 nm respectively)
- Transmission at 240 nm is 80 %
- Bottom: UV-transparent film, wall thickness 25 µm

Delivery without lid.

Microtitration plates ROTILABO®

ROTH SELECTION. Material: PS. Non-sterile.

Black plates for low background and reduced light scatter during applications in fluorescence microscopy.

- Alphanumerically marked cavities with flat bottom
- „Chimney top“ well design reduces the risk of contamination
- SBS dimensions
- **Free of RNase, DNase and human-DNAi**

Delivery without lid.

Wells	Volume per well (ml)	Colour	Sterility	Art. No.	Pack Qty.	€

Microtiter plates and accessories

Microtitration plates ROTILABO® Polypropylene

ROTH SELECTION. Material: PP. Non-sterile. Autoclavable: Yes.

- Good chemical stability e.g. against DMSO, phenol and chloroform
- SBS dimensions, suitable for robot systems
- Wells in round U-profile for maximum sample recovery with reduced capillary effect
- **Free of DNase, RNase and human DNA**

A 121 °C

Delivery without cap mats.

Wells	Volume per well (ml)	Colour	Sterility	Art. No.	Pack Qty.	€
96	0,35	colourless	Non-sterile	**CEL3.1**	100 unit(s)	224,70

Microtitration plates immunoGrade™

BRAND. Material: PS.

For optimal binding of IgG.
Manufactured according to ANSI/SBS standards 1 to 4-2004 to ensure compatibility when carrying out manual processes and, in particular, automatic processes.

Properties of BRAND*plates*® microtiter plates:

- 96 well standard format
- Alphanumerically coded
- **Free of endotoxins, DNase, DNA, RNase, non-cytotoxic**

Properties of immunoGrade™ microtiter plates:

- Colour code: blue for immunology
- Highest binding capacity for molecules with hydrophilic and hydrophobic regions
- Ideal surface for most standard ELISA assays
- Suitable for solid phase immunoassays
- Equivalent to high-binding products from other manufacturers

Delivery without lid.

F-bottom (transparent)
Transparent bottom in F-profile (flat bottom shape) for precise optical measurements.

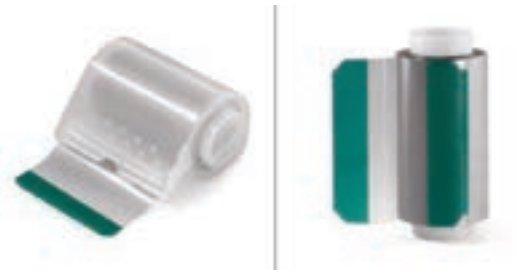
Sealing films

Sealing film ROTILABO® for microtest plates

ROTH SELECTION.

Minimises cross-contaminations of the samples when handling and during transport. With perforated ends for simple and fast adhesion.

Technical specifications:



Art. No.	EN76.1	EN77.1	H769.1	H770.1	X172.1
Gas-permeable	No				
Puncturable	No		Yes		No
Temperature stability	-40 to +120 °C				-20 to +80 °C

Polyester
Material: Polyester self-adhesive. Also suitable for ELISA plates. Minimises evaporation. Films with thickness 25 µm can be penetrated using a single-channel pipette.

L x W (mm)	Thickn. (µm)	Sterility	Art. No.	Pack Qty.	€
141 x 79.4	25	Non-sterile	**H769.1**	100 unit(s)	90,15

146 x 79.4	50	**Sterile**	**EN77.1**	100 unit(s)	90,55

Aluminium
Material: Aluminium (aluminium-coated paper), self-adhesive, acrylic-based adhesive. Good diffusion barrier.

L x W (mm)	Thickn. (µm)	Sterility	Art. No.	Pack Qty.	€
130 x 78	65	Non-sterile	**X172.1**	100 unit(s)	42,25

Sealing film (Roll) for microtitration plates

ROTH SELECTION. Material: Polyester (self-adhesive).

For closing microtest plates. Minimises cross-contaminations of the samples during incubation, transport and brief storage. Also suitable for ELISA plates. Without intermedia layer of paper, for fast handling.

Technical specifications:

Art. No.	APT6.1
Gas-permeable	No
Puncturable	No
Temperature stability	-40 to +120 °C

L x W (mm)	Thickn. (µm)	Sterility	Pack.	Art. No.	Pack Qty.	€
122 x 79	38	Non-sterile	100 single films on the roll	**APT6.1**	2 unit(s)	163,95

Accessories dispenser for rolls of sealing film

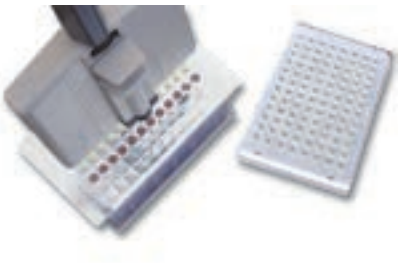
ROTH SELECTION. Material: PP. Non-sterile.

Handy dispenser for quick unrolling and adhesion of covering films from rolls.

Delivery incl. 2 roll of covering film (APT6.1)

L x W (mm)	Sterility	Art. No.	Pack Qty.	€
80 x 105	Non-sterile	**APT7.1**	1 unit(s)	175,25

Seal roller ROTILABO®



ROTH SELECTION. Material: Rubber (Roller), Metal (frame).

For more effective sealing of microtest, PCR and Deep-Well plates with sealing foil or sealing mats as the roller presses them on more evenly. Roller width: 100 mm, roller Ø: 30 mm.

Colour	Art. No.	Pack Qty.	€
white	**HE23.1**	1 unit(s)	47,15

Sealing films

S ❄❄

Sealing film gas-permeable sterile

ROTH SELECTION. Material: PU (polyurethane-based film, self-adhesive). **Sterile**.

- For closing microtitration plates
- Prevents well-to-well contamination
- Allows exchange of oxygen, CO_2 and water vapour
- Ideal for aerobe cell cultures, for biological and immunological cell bases, cell selection, screening
- Gamma-sterilised, not cytotoxic

Technical specifications:

Art. No.	T093.1
Gas-permeable	Yes
Puncturable	Yes
Temperature stability	-80 to +110 °C

❄

Sealing film ROTILABO® for cell cultures

ROTH SELECTION. Material: Cellulose (plastic), self-adhesive.

Hydrophobic sealing film for cell culture and deep-well plates.

- Gas-permeable, for even air and CO_2 exchange
- Minimises evaporation and cross-contaminations
- Perforated ends for simple and fast adhesion
- Not cytotoxic

Technical specifications:

Art. No.	EN84.1	EN85.1
Gas-permeable	Yes	
Puncturable	Yes

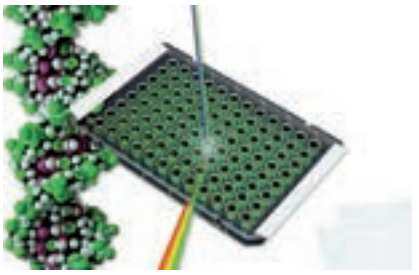
Sealing film for RT-PCR



ROTH SELECTION. Material: Polyester (visually transparent), with strong, non-absorbant and non-fluorescent adhesive.

Suitable for ELISA, real-time qPCR applications as well as for protein crystallisation. On plastic carrier film, easy to remove.
Length between perforations 121.9 mm.
Free of DNase, RNase and nuclein acid.

Technical specifications:

Art. No.	APT8.1
Gas-permeable	No
Puncturable	No
Temperature stability	-40 to +120 °C

L x W (mm)	Thickn. (µm)	Sterility	Art. No.	Pack Qty.	€
142.9 x 79.4	50	Non-sterile	**APT8.1**	100 unit(s)	156,65

Sealing film PCR with special adhesive

ROTH SELECTION. Material: Polyolefin (visually transparent), with integrated, encapsulated silicone adhesive.

The initially non-sticking adhesive is activated by applying pressure to the PCR plate for optimum sealing, while the area directly above the well remains unchanged. The high visual clarity at these points ensures reproducible results.
Suitable for ELISA, real-time qPCR applications, quantitative DNA amplifications, as well as protein crystallisation.

- Low autofluorescence
- Resistant to DMSO
- **Free of DNase, RNase and DNA**

Technical specifications:

Art. No.	APT9.1
Gas-permeable	No
Puncturable	No
Temperature stability	-70 to +100 °C

Length between perforations 113 mm.

L x W (mm)	Thickn. (µm)	Sterility	Art. No.	Pack Qty.	€
139.7 x 78.6	50	Non-sterile	**APT9.1**	100 unit(s)	303,15

PCR plates and vessels

PCR trays

BRAND. Material: PP. Autoclavable: Yes.

- Extra-thin, even wall thickness, for optimal heat transfer and short cycle times
- Thin-walled PCR trays for constant, fast and precise heat transfer
- Tubes have smooth and inert inner surfaces to minimise binding of enzymes and nucleic acids
- Wells have raised rims for protection against cross-contamination and reliable sealing with suitable sealing mats
- Suitable for all standard quantitative real-time thermocyclers
- **DNase-, DNA- and RNase-free**

A 121 °C

PCR strips ROTILABO® 8 with single lids

ROTH SELECTION. Material: PP. Autoclavable: Yes.

- Single lid attached, flat
- Volume 0.2 ml (max. working volume 250 µl, max. filling volume 300 µl)
- Thin-walled for optimal heat transfer between thermocycler and sample
- Suitable for most standard thermocyclers
- Suitable for real-time PCR
- **DNase-, RNase- and human DNA-free**

A 121 °C

Version	Volume per well (µl)	Colour	Art. No.	Pack Qty.	€
Flat caps	200	colourless	**CEN5.1**	120 unit(s)	118,75

PCR plates and vessels

PCR strips ROTILABO® 8

ROTH SELECTION. Material: PP. Autoclavable: Yes.

- Volume 0.2 ml (max. working volume 250 µl, max. filling volume 300 µl)
- Numbering 1 to 8 for sample differentiation
- Thin-walled for optimal heat transfer between thermocycler and sample
- Suitable for most standard thermocyclers
- Containers with flat lids, suitable for real-time PCR
- **DNase-, RNase- and human DNA-free**

A 121 °C

Delivery incl. cap strips.

Version	Volume per well (µl)	Colour	Art. No.	Pack Qty.	€
Cover strips flat	200	colourless	**CEN4.1**	125 unit(s)	120,95
Cover strips convex	200	colourless	**CEN3.1**	125 unit(s)	120,95

PCR strips 8

ROTH SELECTION. Material: PP. Autoclavable: Yes.

- PCR reaction strips, each with 8 reaction vials
- Attached cap strips allow easy opening and closing
- Convex cap
- Thin-walled PCR vials guarantee optimum temperature exchange when heating and cooling during the PCR cycles
- **DNase-, RNase- and DNA-free**

A 121 °C

Cryogenic vials Cryo.s™ sterile

S ❄❄❄

Greiner Bio-One. Material: PP, transparent. **Sterile**.

For storage of tissue, cells, fungi, bacteria, spores, cellular extractions or bodily fluids at ultra-low temperatures for research and development as well as diagnostic purposes. Cryo.s™ cryogenic tubes must not be stored in the liquid phase of liquid nitrogen, but rather only in the superjacent gas phase. Not intended for an application in the area of reproduction.

- For sample storage at -20/-80 °C and in the gas phase above LN_2
- Suitable for shipping via air freight
- White labelling space, scratch resistant
- Colour of screw cap: natural
- Free of heavy metals, USP class VI-certified
- Temperature-stable from -196 to +121 °C
- **Free of detectable RNase, DNase, and human DNA, detectable endotoxins and cytotoxic substances**

Delivery incl. 150 (volume 1-2 ml) and/or 100 (volume 5 ml) cap inserts for additional identification of the caps.

In vitro diagnostic medical device according to IVDD

0,45	Non-sterile	30	**KY64.1**	100 unit(s)	170,95

PES

With hydrophilic membrane made of polyethersulfone (PES) for separation of extremely fine particles in aqueous solutions.

Technical specifications:

Art. No.	P821.1
Ø Membrane	30 mm
Ø Housing	33 mm
Housing material	PP
Sample volume	~100 ml
Dead volume	<80 µl
Filtration area	4.52 cm²
Max. application temperature	45 °C
Max. operating pressure	8.6 bar
Inlet connection	Luer lock connector
Outlet connection	Luer connector

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,22	Non-sterile	30	**P821.1**	100 unit(s)	344,00

PTFE

With hydrophobic membrane made of polytetrafluoroethylene (PTFE) for filtration of organic solutions and for air filtration.

Technical specifications:

Art. No.	CCY2.1	P815.1	CCY3.1	P816.1	P817.1
Ø Membrane	13 mm	25 mm	13 mm	25 mm	
Ø Housing	19 mm	29 mm	19 mm	29 mm	
Housing material	PP	PE	PP	PE	
Sample volume	~10 ml	~100 ml	~10 ml	~100 ml	
Dead volume	<15 µl	<100 µl	<15 µl	<100 µl	
Filtration area	0.8 cm²	3.9 cm²	0.8 cm²	3.9 cm²	
Max. application temperature	45 °C

0,45	Non-sterile	30	**KY63.1**	100 unit(s)	170,95

Syringe filters

S

Syringe filters ROTILABO®

ROTH SELECTION. **Sterile**.

Individually packed. With Luer lock inlet and Luer outlet.

Not a medical device / Not an IVD product

MCE

With hydrophilic membrane made of mixed cellulose ester (MCE) for filtering additives, tissue culture media and antibiotics.

Technical specifications:

Art. No.	KH54.1	KH55.1
Ø Membrane	30 mm	
Ø Housing	33 mm	
Housing material	PMMA polymer	
Sample volume	~100 ml	
Dead volume	<80 µl	
Filtration area	4.52 cm²	
Max. application temperature	45 °C	
Max. operating pressure	8.6 bar	
Inlet connection	Luer lock connector	
Outlet connection	Luer connector	

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,22	**Sterile**	30	**KH54.1**	50 unit(s)	88,70
0,45	**Sterile**	30	**KH55.1**	50 unit(s)	88,70

PES

With hydrophilic membrane made of polyethersulfone (PES) for ultra-fast filtration of tissue culture media, additives and other aqueous solutions.

Technical specifications:

Art. No.	P668.1
Ø Membrane	30 mm
Ø Housing	33 mm
Housing material	PMMA polymer
Sample volume	~100 ml
Dead volume	<80 µl
Filtration area	4.52 cm²
Max. application temperature	45 °C
Max. operating pressure	8.6 bar
Inlet connection	Luer lock connector
Outlet connection	Luer connector

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,22	**Sterile**	30	**P668.1**	50 unit(s)	91,40

PVDF

With hydrophilic membrane made of polyvinylidene fluoride (PVDF) for filtration of protein solutions, tissue culture media, additives, antibiotics and alcoholic solutions.

Technical specifications:

Art. No.	P666.1	P667.1
Ø Membrane	30 mm	
Ø Housing	33 mm	
Housing material	PMMA polymer	
Sample volume	~100 ml	
Dead volume	<80 µl	
Filtration area	4.52 cm²	
Max. application temperature	45 °C	
Max. operating pressure	8.6 bar	
Inlet connection	Luer lock connector	
Outlet connection	Luer connector	

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,22	**Sterile**	30	**P666.1**	50 unit(s)	91,40
0,45	**Sterile**	30	**P667.1**	50 unit(s)	91,40

Syringe filters ROTILABO® glass fibre

ROTH SELECTION.

For prefiltration of samples with high particle loads. Retention range 1–2 µm, binder-free.
Housing made of PP, ultrasonically welded, housing made of PC, injection-moulded.

Technical specifications:

Art. No.	KC98.1	KC99.1	KE00.1
Ø Membrane	15 mm	25 mm	30 mm
Ø Housing	20 mm	30 mm	34 mm
Housing material	PP		PC
Sample volume	1–10 ml	10–100 ml	>100 ml
Dead volume	<25 µl	<65 µl	<170 µl
Total filter volume	0.335 ml	0.6 ml	0.864 ml
Filtration area	1.77 cm²	4.90 cm²	7.07 cm²
Max. operating pressure	7 bar		6 bar
Inlet connection	Luer lock connector		
Outlet connection	Luer connector		

Not a medical device / Not an IVD product

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
1-2	Non-sterile	15	**KC98.1**	100 unit(s)	77,80
1-2	Non-sterile	25	**KC99.1**	100 unit(s)	129,55
1-2	Non-sterile	30	**KE00.1**	100 unit(s)	230,05

Syringe filters

Syringe filters

With housing made of PP, ultrasonically welded (filter with membrane Ø 13 mm) or injection-moulded (filter with membrane Ø 25 mm). Sterile version (individually packed) available as an option.

Not a medical device / Not an IVD product

Cellulose acetate (CA)

Hydrophilic membrane for filtration of aqueous solutions.

Technical specifications:

Art. No.	1AN9.1	1ANA.1	1ANC.1	1ANE.1
Ø Membrane	13 mm	25 mm		
Ø Housing	17 mm	30 mm		
Housing material	PP			
Sample volume	< 10 ml	< 100 ml		
Inlet connection	Luer lock connector			
Outlet connection	Luer fitting			

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,22	Non-sterile	13	**1AN9.1**	100 unit(s)	67,95
0,22	**Sterile**	25	**1ANA.1**	100 unit(s)	152,55
0,45	Non-sterile	25	**1ANC.1**	100 unit(s)	122,45
0,45	**Sterile**	25	**1ANE.1**	100 unit(s)	152,55

Polyethersulfone (PES)

Hydrophilic membrane with low protein binding and high flow rate.

Technical specifications:

Art. No.	1ANH.1	1ANK.1
Ø Membrane	25 mm	
Ø Housing	30 mm	
Housing material	PP	
Sample volume	< 100 ml	
Inlet connection	Luer lock connector	
Outlet connection	Luer fitting	

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,22	Non-sterile	25	**1ANH.1**	100 unit(s)	118,40
0,22	**Sterile**	25	**1ANK.1**	100 unit(s)	152,55

Polyvinylidene fluoride (PVDF)

Hydrophilic membrane with low protein binding.

Technical specifications:

Art. No.	1ANL.1	1ANN.1	1ANP.1	1ANT.1
Ø Membrane	25 mm			
Ø Housing	30 mm			
Housing material	PP			
Sample volume	< 100 ml			
Inlet connection	Luer lock connector			
Outlet connection	Luer fitting			

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,22	Non-sterile	25	**1ANL.1**	100 unit(s)	132,20
0,22	**Sterile**	25	**1ANN.1**	100 unit(s)	166,65
0,45	Non-sterile	25	**1ANP.1**	100 unit(s)	132,20
0,45	**Sterile**	25	**1ANT.1**	100 unit(s)	166,65

Syringe filters

Nylon
Hydrophilic membrane which is highly resistant to many organic solvents.

Technical specifications:

Art. No.	1ANX.1	1ANY.1	1AP0.1	1AP1.1
Ø Membrane	13 mm	25 mm	13 mm	25 mm
Ø Housing	17 mm	30 mm	17 mm	30 mm
Housing material	PP			
Sample volume	< 10 ml	< 100 ml	< 10 ml	< 100 ml
Inlet connection	Luer lock connector			
Outlet connection	Luer fitting			

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,22	Non-sterile	13	**1ANX.1**	100 unit(s)	72,10
0,22	Non-sterile	25	**1ANY.1**	100 unit(s)	98,85

0,45	Non-sterile	25	**1APE.1**	100 unit(s)	111,80

Glass fibre
Glass fibre filters for clear filtration of liquids with high particle content.

Technical specifications:

Art. No.	1APH.1	1APK.1
Ø Membrane	13 mm	25 mm
Ø Housing	17 mm	30 mm
Housing material	PP	
Sample volume	< 10 ml	< 100 ml
Inlet connection	Luer lock connector	
Outlet connection	Luer fitting	

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,7	Non-sterile	13	**1APH.1**	100 unit(s)	67,95
0,7	Non-sterile	25	**1APK.1**	100 unit(s)	106,05

Syringe filters

Syringe filters ROTILABO®

ROTH SELECTION.

With pressure- and chemical-resistant housing made of PP, housing ultrasonically welded (filter with membrane Ø 15 mm) or injection-moulded (filter with membrane Ø 25 and 30 mm). Sterile version (individually packed) available as an option.

Not a medical device / Not an IVD product

Cellulose acetate (CA)

Hydrophilic membrane with very low protein adsorption (3.8 µg/cm²) for biological samples (e.g. enzyme solutions, biological macromolecules) and for clarification and sterile filtration of aqueous solutions.

Technical specifications:

Art. No.	KC60.1	KC70.1	KC80.1	KC61.1	KC71.1	KC81.1
Ø Membrane	25 mm		30 mm	25 mm		30 mm
Ø Housing	30 mm		34 mm	30 mm		34 mm
Housing material	PP					
Sample volume	10–100 ml		>100 ml	10–100 ml		>100 ml
Dead volume	<65 µl		<170 µl	<65 µl		<170 µl
Total filter volume	0.6 ml		0.864 ml	0.6 ml		0.864 ml
Filtration area	4.90 cm²		7.07 cm²	4.90 cm²		7.07 cm²
Max. operating pressure	7 bar		6 bar	7 bar		6 bar
Inlet connection	Luer lock connector					
Outlet connection	Luer connector

Mixed cellulose ester (MCE)

Hydrophilic membrane with high non-specific adsorption capacity for sample preparation for aqueous media and for separating microbiological material (bacteria, yeast, etc.).

Technical specifications:

Art. No.	PA63.1	PA64.1
Ø Membrane	15 mm	
Ø Housing	20 mm	
Housing material	PP	
Sample volume	1–10 ml	
Dead volume	<25 µl	
Total filter volume	0.335 ml	
Filtration area	1.77 cm²	
Max. operating pressure	7 bar	
Inlet connection	Luer lock connector	
Outlet connection	Luer connector

Polypropylene (PP)

Weakly hydrophobic all-round membrane for aqueous and organic media.

Technical specifications:

Art. No.	PA57.1
Ø Membrane	15 mm
Ø Housing	20 mm
Housing material	PP
Sample volume	1–10 ml
Dead volume	<25 µl
Total filter volume	0.335 ml
Filtration area	1.77 cm²
Max. operating pressure	7 bar
Inlet connection	Luer lock connector
Outlet connection	Luer connector

Syringe filters

Polytetrafluoroethylene (PTFE)

Hydrophobic membrane for the filtration of aggressive chemicals, acids and non-polar solvents. Low flow resistance to gases, can therefore also be used for air and gas filtration (e.g. for aeration and ventilation work and for sterile gas exchange).

Technical specifications:

Art. No.	KC94.1	PA53.1	KC66.1	KC76.1	KC86.1	KC95.1	PA54.1	KC67.1	KC77.1	KC87.1

Syringe filters

Syringe filters ROTILABO® Mini-Tip

ROTH SELECTION.

With housing made of PP, ultrasonically welded, colourless. Ideally suitable for HPLC samples. The Mini-Tip opening is ideal for filtering in very small sample containers or vials.

Not a medical device / Not an IVD product

Cellulose acetate (CA)

Hydrophilic membrane with very low protein adsorption (3.8 µg/cm²) for biological samples (e.g. enzyme solutions, biological macromolecules) and for clarification and sterile filtration of aqueous solutions.

Technical specifications:

Art. No.	PP52.1	PP53.1
Ø Membrane	15 mm	
Ø Housing	20 mm	
Housing material	PP	
Sample volume	1–10 ml	
Dead volume	<25 µl	
Total filter volume	0.335 ml	
Filtration area	1.77 cm²	
Max. operating pressure	7 bar	
Inlet connection	Luer lock connector	
Outlet connection	Mini-Tip	

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,2	Non-sterile	15	**PP52.1**	100 unit(s)	85,20
0,45	Non-sterile	15	**PP53.1**	100 unit(s)	85,20

Nylon

For the filtration of HPLC and GC solvents and for purification and sterile filtration of aqueous, alkaline and organic solutions. Hydrophilic, resistant to many solvents. High mechanical stability.

Technical specifications:

Art. No.	PP43.1	PP44.1
Ø Membrane	15 mm	
Ø Housing	20 mm	
Housing material	PP	
Sample volume	1–10 ml	
Dead volume	<25 µl	
Total filter volume	0.335 ml	
Filtration area	1.77 cm²	
Max. operating pressure	7 bar	
Inlet connection	Luer lock connector	
Outlet connection	Mini-Tip	

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,2	Non-sterile	15	**PP43.1**	100 unit(s)	86,90
0,45	Non-sterile	15	**PP44.1**	100 unit(s)	86,90

Polytetrafluoroethylene (PTFE)

Hydrophobic membrane for the filtration of aggressive chemicals, acids and non-polar solvents. Low flow resistance to gases, can therefore also be used for air and gas filtration (e.g. for aeration and ventilation work and for sterile gas exchange).

Technical specifications:

Art. No.	PP45.1	PP46.1
Ø Membrane	15 mm	
Ø Housing	20 mm	
Housing material	PP	
Sample volume	1–10 ml	
Dead volume	<25 µl	
Total filter volume	0.335 ml	
Filtration area	1.77 cm²	
Max. operating pressure	7 bar	
Inlet connection	Luer lock connector	
Outlet connection	Mini-Tip	

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,2	Non-sterile	15	**PP45.1**	100 unit(s)	86,90
0,45	Non-sterile	15	**PP46.1**	100 unit(s)	86,90

Polyvinylidene fluoride (PVDF)

Slightly hydrophobic membrane for clarification and sterile filtration of organic and partially organic solutions. Protein adsorption 125 µg/cm².

Technical specifications:

Art. No.	PP47.1	PP48.1
Ø Membrane	15 mm	
Ø Housing	20 mm	
Housing material	PP	
Sample volume	1–10 ml	
Dead volume	<25 µl	
Total filter volume	0.335 ml	
Filtration area	1.77 cm²	
Max. operating pressure	7 bar	
Inlet connection	Luer lock connector	
Outlet connection	Mini-Tip	

Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
0,2	Non-sterile	15	**PP47.1**	100 unit(s)	116,45
0,45	Non-sterile	15	**PP48.1**	100 unit(s)	116,45

Regenerated cellulose (RC)

Hydrophilic membrane with low non-specific adsorption performance for proteins (<10 µg/cm²). For filtering biological solutions and for preparing samples and degassing eluents for HPLC. Good resistance to aqueous and organic solutions.

Technical specifications:

Art. No.	PP41.1	PP42.1
Ø Membrane	15 mm	
Ø Housing	20 mm	
Housing material	PP	
Sample volume	1–10 ml	
Dead volume	<25 µl	
Total filter volume	0.335 ml	
Filtration area	1.77 cm²	
Max. operating pressure	7 bar	
Inlet connection	Luer lock connector	
Outlet connection	Mini-Tip

Syringe filters

A 121 °C

Syringe filters CAMEO™

GVS. Autoclavable: Yes.

Not a medical device / Not an IVD product

Cellulose acetate (CA)
Hydrophilic. Very low protein binding (approx. 3.8 µg/cm²). For sterile filtration of biological media (proteins, enzymes, buffer, cell culture, etc.), as well as for particle extraction from aqueous and alcohol-based solutions.

Technical specifications:

Art. No.	AH54.1	AH52.1	AH53.1
Ø Membrane	30 mm		
Ø Housing	34 mm		
Housing material	PP		
Sample volume	10-120 ml		
Dead volume	<60 µl		
Filtration area	4.8 cm²		
Max. application temperature	80 °C		
Max. operating pressure	8 bar		
Inlet connection	Luer lock connector		
Outlet connection	Luer connector

Outlet connection	Luer connector							

Medical device class IIa MDD

ID: 0459

Mixed cellulose ester (MCE)
Hydrophilic membrane.

Intended use: Outside of the U.S. and Japan, Millex®-GS/HA/AA filter units may also be used for direct patient care and pharmacy admixture applications. In the hospital pharmacy, Millex® filter units can be used to sterile filter or clarify small volumes of protein pharmaceuticals, diagnostic imaging agents, chemotherapeutics, aqueous solutions, or water during admixture preparation. Direct patient care applications include sterilization and/or particulate removal from epidural and other liquid anesthetics as well as from irrigation solutions used in ophthalmic, otic, and other surgical procedures.

- Application: 0.2 µm filter units for the sterilisation of aqueous solutions, large pore sizes for prefiltration and clear filtration
- Colour code: blue
- Work volume: approx. 100 ml

Syringe filters

Type	Pore size (µm)	Sterility	Ø Membrane (mm)	Colour coding	Art. No.	Pack Qty.	€

Polyethersulfone (PES)
Hydrophilic Millipore Express® membrane.

Intended use: Outside the U.S. and Japan, Millex®-GP/HP filter units are intended for use as a syringe filter to sterilize and/or clarify low volume solutions in direct patient care and pharmacy admixture applications.

- Application: Sterilisation of tissue culture media and additives, buffers, protein solutions, virus suspensions, DNA and other aqueous solutions
- Colour code: green
- Work volume: approx. 200 ml

Type	Pore size (µm)	Sterility	Ø Membrane (mm)	Colour coding	Art. No.	Pack Qty.	€

Polyvinylidene fluoride (PVDF)
Hydrophilic Durapore® membrane.

Intended use: Outside the U.S. and Japan, Millex®-VV/GV/HV filter units are intended for use as a syringe filter to sterilize and/or clarify low volume solutions in direct patient care and pharmacy admixture applications.

- Application: Sterilisation of aqueous and protein solutions, syringe filter with lowest protein binding ratio
- Colour code: yellow
- Work volume: approx. 100 ml

Syringe filters CHROMAFIL®

Macherey-Nagel. Autoclavable: Yes.

For clarification or sterile filtration of liquids or gases, as well as for sample preparation for use in HPLC, GC, ICP, AAS, TOC, DOC, IR, NMR, photometry, spectroscopy, etc.
Compacted PP housing with very low extractable substances content and good chemical resistance.
Autoclavable at 121 °C and 1.1 bar for 30 min.

A 121 °C

Not a medical device / Not an IVD product

CA non-sterile
Non-sterile. Hydrophilic cellulose acetate membrane for filtration of aqueous solutions. Ideal for use with biological macromolecules, water-soluble oligomers and polymers.

Extremely low protein binding capacity (21 µg per 25 mm filter).

Technical specifications:

Art. No.	XH38.1	XH38.2	XH39.1	XH39.2
Ø Membrane	25 mm			
Ø Housing	30 mm			
Housing material	PP			
Sample volume	5–100 ml

GF/PET

Non-sterile. Hydrophilic PET all-round membrane with glass fibre prefilter for polar and nonpolar solutions. Especially suited to filtering eluent mixtures of water and organic solvents. Recommended for solutions with high proportions of suspended matter or highly viscous solutions; the glass fibre membrane removes large particles and prevents the membrane from being blocked. This improves filtration efficiency, increases filtrate yield and aids clarification of solutions with a high particulate matter load.

Technical specifications:

Art. No.	EE78.1	EE79.1
Ø Membrane	25 mm	
Ø Housing	30 mm	
Housing material	PP	
Sample volume	5–100 ml

Syringe filters

A 121 °C

Syringe filters CHROMAFIL® Xtra

Macherey-Nagel. Non-sterile. Autoclavable: Yes.

For clarification or sterile filtration of liquids or gases, as well as for sample preparation for use in HPLC, GC, ICP, AAS, TOC, DOC, IR, NMR, photometry, spectroscopy, method validation and certification. Non-coloured, pure compacted PP housing with good chemical resistance, very low extractable substances content and low bleeding. With imprint for quick and easy identification of membrane type, diameter and pore size.
Autoclavable at 121 °C and 1.1 bar for 30 min.

Not a medical device / Not an IVD product

CA

Hydrophilic cellulose acetate membrane for filtration of aqueous solutions. Ideal for use with biological macromolecules, water-soluble oligomers and polymers.

Extremely low protein binding capacity (21 µg per 25 mm filter).

Technical specifications:

Syringe filters

Syringe filters SPARTAN®

Cytiva.

With hydrophilic membrane made of regenerated cellulose (RC). Specially developed for cleaning HPLC samples and for filtration of aqueous and organic solvents.

Technical specifications:

Art. No.	5989.2	5824.2	5992.2	0062.2
Ø Membrane	13 mm	30 mm	13 mm	30 mm
Ø Housing	17 mm	34 mm	17 mm	34 mm
Housing material	PP			
Sample volume	~5 ml	~100 ml	~5 ml	~100 ml
Dead volume	10 µl	50 µl	10 µl	50 µl
Filtration area	0.75 cm²	5.7 cm²	0.75 cm²	5.7 cm²
Max. application temperature	80 °C			
Max. operating pressure	7 bar			
Inlet connection	Luer-Lock connector			
Outlet connection	Luer connector

Syringe filters

Syringe filters Minisart® High Flow

Sartorius.

Hydrophilic polyethersulphone membrane with low non-specific binding for aqueous media with a pH range of 3 to 12.
High flow rates due to asymmetrical membrane structure.
Free of PVC and phthalates, but limited compatibility with alcohols.
Minimum extractables and leachables.

Not a medical device / Not an IVD product

Non-sterile

Technical specifications:

Art. No.	1CNL.1	1CNN.1	1CNP.1	1CNT.1
Ø Membrane	28 mm

Syringe filters

Syringe filters Minisart® NML with CE marking

Sartorius.

Hydrophilic SFCA membrane (surfactant-free cellulose acetate) with low non-specific binding for aqueous solutions and oils with a pH range of 4 to 8.
Free of surfactants, PVC and phthalates, but limited compatibility with alcohols. Minimum extractables and leachables.
Intended use: sterile filtration and/or clarification of low volume aqueous solutions. For pharmacy admixture applications in a laboratory environment before use for patient care.

Medical device class IIa MDD

ID: 0123

Syringe filters

Syringe filters Minisart® SRP

Sartorius. Autoclavable: Yes.

Hydrophobic PTFE membrane for the filtration of solvents, for use as breather filter or for aggressive media with a pH range of 1 to 14. Minimum extractables and leachables.
For hydrophilic solutions, priming with solvent is necessary to make the membrane permeable to aqueous liquids.

A 121 °C

Inline filter Millex® PTFE

MERCK MILLIPORE. Autoclavable: Yes.

For the sterile filtration of gases, the sterile aeration of containers and for the sterilisation and clear filtration of organic solutions. Also suitable for preventing the ingress of liquids in downstream pumps and other devices.

Technical specifications:

Art. No.	CY08.1	CY06.1	CY07.1
Ø Membrane	50 mm		
Housing material	PP		
Filtration area	19.6 cm²		
Max. operating pressure	4 bar		
Max. application temperature	121 °C		
Inlet connection	stepped tube connection (Ø 6–13 mm) with internal Luer Cone		
Outlet connection	stepped tube connection (Ø 6–13 mm) with internal Luer Cone

Filter units

Filter units Millex® glass fibre

MERCK MILLIPORE.

For pre-filtration of solutions and liquids with a high particle load that are difficult to filter. Protects downstream membranes against blocking quickly. Retention range approx. 2.0 µm.

Technical specifications:

Art. No.	CY09.1	CY10.1
Ø Membrane	25 mm	50 mm
Housing material	PVC	
Sample volume	100 ml	4000 ml
Dead volume	<100 µl	<1000 µl
Filtration area	3.9 cm²	19.6 cm²
Max. operating pressure	5 bar	4.1 bar
Max. application temperature	45 °C	
Inlet connection	female Luer Lock, internal	stepped tube connection (Ø 6–13 mm) with internal Luer Cone
Outlet connection	male Luer Cone, external	stepped tube connection (Ø 6–13 mm) with internal Luer Cone

Syringe filters Millex® HPF

MERCK MILLIPORE. Non-sterile.

For clear filtration of solutions with a high particle load prior to instrument based assay.
With graduated glass fibre prefilter (10.0 to 0.7 µm), enabling two to four times higher throughput than syringe filters without prefilter. Housing made of HDPE with low extractable substances content.

Technical specifications:

Art. No.	XE30.1	XE33.1	XE31.1	XE34.1	XE32.1
Ø Membrane	25 mm				
Housing material	HDPE				
Sample volume	~100 ml				
Dead volume	<250 µl				
Filtration area	3.9 cm²				
Max. application temperature	45 °C				
Max. operating pressure	7 bar				
Inlet connection	Luer lock connector				
Outlet connection	Luer connector				

Not a medical device / Not an IVD product

Nylon
Hydrophilic membrane with glass fibre prefilter for clear filtration of aqueous and slightly organic solutions with a high particle load.

Polyvinylidene fluoride (PVDF)
Hydrophilic Durapore® membrane with glass fibre prefilter. Very low protein binding, for clear filtration of protein solutions with a high particle load.

Type	Pore size (µm)	Sterility	Ø Membrane (mm)	Art. No.	Pack Qty.	€
Millex®-HV	0,45	Non-sterile	25	**XE32.1**	50 unit(s)	252,65

S

Filter units Millex® PES

MERCK MILLIPORE. **Sterile**.

Express® PES membrane with low protein binding and high flow speed. For sterile filtration of cell culture media and other aqueous solutions. With optional filling bell for reducing the risk of contamination.

The dead volume given refers to the volume left in the filter after purging the filter with air.

Technical specifications:

Art. No.	CY11.1	CY12.1
Ø Membrane	50 mm	
Housing material	MBS	
Sample volume	~4000 ml	
Dead volume	<1000 µl	
Filtration area	19.6 cm²	
Max. operating pressure	3.4 bar	
Max. application temperature	45 °C	
Inlet connection	stepped tube connection (Ø 6–13 mm) with internal Luer Cone	
Outlet connection	stepped tube connection (Ø 6–13 mm) with internal Luer Cone

S

Filter units Sterivex™

MERCK MILLIPORE. **Sterile**.

For the sterile filtration of aqueous liquids. Filter units can be operated with syringe pumps or hose pumps. With optional filling bell for reducing the risk of contamination.

The dead volume given refers to the volume left in the filter after purging the filter with air.

Technical specifications:

Art. No.	CT79.1	CT80.1	CT81.1	CT82.1	CT83.1	CT84.1
Housing material	Eastar®					
Sample volume	1000 ml				2000 ml	
Dead volume	<200 µl					
Filtration area	10 cm²					
Max. operating pressure	3 bar					
Max. application temperature	45 °C					
Inlet connection	female Luer Lock					
Outlet connection	male Luer Lock					

Durapore® (PVDF) membrane
With extremely low protein binding. Filtration volume approx. 1 litre.

Type	Pore size (µm)	Membrane material	Sterility	Art. No.	Pack Qty.	€
With filling bell	0,22	PVDF	**Sterile**	**CT79.1**	10 unit(s)	192,45

Without filling bell	0,45	PVDF	**Sterile**	**CT82.1**	15 unit(s)	231,15

Millipore Express® (PES) membrane
With low protein binding and high flow speed.
Filtration volume approx. 2 litres.

Type	Pore size (µm)	Membrane material	Sterility	Art. No.	Pack Qty.	€
With filling bell	0,22	PES	**Sterile**	**CT83.1**	10 unit(s)	177,40
Without filling bell	0,22	PES	**Sterile**	**CT84.1**	15 unit(s)	231,15

Filter units

S

Filter units Steripak™

MERCK MILLIPORE. **Sterile**.

Disposable filter units for sterile filtration of large volumes up to 20 l.
With Millipore Express® (PES) membranes with high flow rate and low protein binding. Packaged ready to use, for operation with hose pumps or pressurised containers.

- Filling bell on the outlet side of the unit increases the safety of the sterilisation process
- Manual ventilation opening prevents air blocking the membrane
- For sterile filtration of tissue culture media, buffers and other aqueous solutions

The dead volume given refers to the volume left in the filter after purging the filter with air.

Technical specifications:

Art. No.	CT85.1	CT86.1
Ø ext.	76 mm	
Housing material	SAN	
Sample volume	10000 ml	20000 ml
Dead volume	<2700 µl	
Filtration area	100 cm²	200 cm²
Max. operating pressure	5.2 bar	
Max. application temperature	45 °C	
Inlet connection	stepped tube connection (Ø 6–8 mm)	
Outlet connection	stepped tube connection and filling bell

GP 20	0,22	PES	**Sterile**	**CT86.1**	3 unit(s)	284,90

Centrifuge filter unit Ultrafree

MERCK MILLIPORE.

Centrifuge filter units for sample volumes of no more than 0.5 or 2.0 ml. For use in fixed-angle rotors for 1.5 or 15 ml sample tubes. Filter unit and collector tube are made of PP.

- **Hydrophilic Durapore® PVDF-membrane:** Extremely low protein binding. Suitable for removal of particulate matter and precipitate from aqueous samples, and for protein and nucleic acid applications
- **Hydrophilic PTFE membrane:** for removal of precipitate from solvent-based samples

Procedure:

- Open the attached lid of the filter unit
- Fill the insert with the volume of sample
- Close the filtration unit and insert it in the centrifuge
- On completion of centrifuging, remove the filtration unit, open the lid and remove the insert
- The insert contains the residue and the sealable housing contains the filtrate

Ultrafree-MC: PVDF membrane, sample volume up to 0.5 ml
Filter insert volume max. 0.5 ml, collector tube volume 1.5 ml.

Technical specifications:

Art. No.	T341.1	T342.1	XH78.1	T343.1	XH80.1	T344.1	XH79.1

S

Vacuum filter unit Steriflip®

MERCK MILLIPORE. Material: PP, modified acrylic (MBS). **Sterile**.

For filtration of sample volumes up to 50 ml.

- **Millipore Express® PES membrane** with high flow rate and low protein binding: For routine sterile filtration of tissue culture media, sera, buffers and other aqueous solutions
- **Durapore® PVDF membrane** with very low protein binding: For sterile and clear filtration of aqueous solutions
- **Hydrophilic nylon mesh filter:** For removing coarse particulate matter, e.g. for applications with stem, heart muscle and nerve cells, or skeletal tissue

Procedure:
Connect the filter unit to the centrifuge tube containing the sample. Rotate the filter unit through 180° and apply vacuum.
Optional: Screw the funnel attachment onto the sterile filter unit, fill with the sample and apply vacuum, Steriflip® filter unit filters directly into a sterile 50 ml centrifuge tube.

Technical specifications:

Art. No.	XH01.1	X348.1	XE99.1	XH02.1	XH00.1	XH03.1	XH04.1
Sample volume	50 ml						
Filtration area	7 cm²						
Dead volume	600 µl						
Max. application temperature	45 °C						

Delivery incl. fitted 50 ml centrifuge tube and lid (each packaged separately) and a single tube holder (blue).
Delivery without funnel attachment or second 50 ml centrifuge tube (e.g. Art. No. N462.1), please order separately.

Bottle-top filters

S

Bottle-top filters Steritop™

MERCK MILLIPORE. **Sterile**.

For sterile filtration of tissue culture media, sera, additives, buffers and other aqueous solutions. Compatible with 45 mm or GL 45 screw top bottles suitable for vacuum.

- Low protein binding
- High flow speeds, short filtration times
- 40 cm^2 filtration surface
- Housing made of PS
- Max. application temperature 45 °C
- Vacuum connection for hoses with inner Ø of 6.5 to 12 mm

S

Filtration unit with cellulose nitrate membrane

Nalgene. **Sterile**.

Triton-free cellulose nitrate membrane **(CN)** with excellent wetting properties and high flow rates for aqueous solutions. For cold sterilisation, clear filtration, prefiltration and ultrafiltration of buffers, microbiological culture media and other aqueous solutions.

Type:

- Green colour coding
- white membrane colour
- Filtration units made of PS
- Graduated filter upper sections and filter bottles
- With quick connector tube adapter and cotton stopper
- Leakproof screw cap
- Filtration units are non-pyrogenic and non-cytotoxic

Filtration units with volumes of 500 and 1000 ml are delivered with 12 glass fibre prefilters included.

Bottle-top filters

S

Receiver bottle for bottle-top filters

Nalgene. Material: PS, PE screw cap. **Sterile**.

Thread 45 mm. Screw cap can be closed with 1½ turns. Non-pyrogenic, non-cytotoxic. γ-sterilised.
Suitable for all bottle-top filters and filtration units with Art. No. AC08.1 to AC59.1.

Bottle volume (ml)	Thread	Art. No.	Pack Qty.	€

S

Filtration unit with SFCA membrane

Nalgene. **Sterile**.

Membranes made of surfactant-free cellulose acetate (SF**CA**) with extremely low protein binding and high flow rate. SFCA is ideal for applications in tissue culture and for filtration of sera containing protein, as the membranes do not contain any surfactants that could have a toxic effect on cells.
Type:

- Yellow colour coding
- Filtration units made of PS
- Graduated filter upper sections and filter bottles
- With quick connector tube adapter and cotton stopper
- Leakproof screw cap
- Filtration units are non-pyrogenic and non-cytotoxic

Filtration units Art. No. AC27.1 and AC28.1 are delivered with 12 glass fibre prefilters included.

S

Bottle-top filters with SFCA membrane

Nalgene. **Sterile**.

Filter with SF**CA** membrane for screwing onto bottles with thread 45 mm or GL 45. The leakproof screw cap enables vacuum filtration directly into a sterile bottle.
Type:

- Yellow colour coding
- Graduated filter upper section
- Quick connector tube adapter for tubes with internal Ø 6–8 mm
- Leakproof screwed connection for vacuum filtration
- Filtration units are non-pyrogenic and non-cytotoxic

Bottle-top filters

NEW / +

S

Filtration unit Rapid-Flow™ with PES membrane

Nalgene. **Sterile**.

Disposable filtration unit with hydrophilic polyethersulfone diaphragm **(PES).** The innovative Rapid-Flow™ design of the filter membrane carrier plate provides faster flow rates and higher flow volumes. The PES membrane with minimal protein binding and a minimal proportion of extractable substances is ideally suited to biological sterile filtration of cell culture media, sera, additives and buffers.

Type:

- Blue colour coding
- Filtration units made of PS
- Graduated filter upper sections and filter bottles
- With quick connector tube adapter and cotton stopper
- Leak-proof screw cap closure
- Gamma sterilised and individually packed
- Filtration units are **non-pyrogenic** and **non-cytotoxic**

Not a medical device / Not an IVD product

Pore size 0.1 µm

Bottle-top filters

S

Filtration unit with nylon membrane

Nalgene. **Sterile**.

Ideal for sterile filtration of culture media and sensitive cell and tissue cultures. Alcohol-resistant **nylon** membranes with extremely low content (<0.5 percent by weight) of extractable substances and high flow rates with short filtration times. Hydrophilic and free of surfactants.

Type:

- Red colour coding
- Filtration units made of PS
- Graduated filter upper sections and filter bottles
- With quick connector tube adapter and cotton stopper
- Leakproof screw cap
- Filtration units are non-pyrogenic and non-cytotoxic

Filtration units with a membrane Ø of 75 mm are delivered with 12 glass fibre prefilters included.

Bottle-top filters Steritop™ E

MERCK MILLIPORE. Housing: PS, membrane: PES, hydrophilic. **Sterile**.

Funnelless bottle-top filter. This bottle-top filter enables direct filtration from a media bottle or tissue culture reagents/buffer bottle with a neck thread size of 38 mm or 45 mm into a vacuum-compatible, sterile screw top bottle with a neck thread of 45 mm or GL 45. The Steritop™ E funnelless bottle-top filter offers a more sustainable option for sterile filtration thanks to a considerable reduction in plastic and packaging material. For routine sterile filtration of tissue culture media, buffers, reagents and other aqueous liquids.

- Membrane material: Express® PLUS (PES) membrane, hydrophilic
- Low protein binding, high flow speed and short filtration time
- Housing: PS
- For sample volume: 150 to max. 1000 ml
- Membrane-Ø: 73 mm
- Filtration surface: 40 cm^2
- Pore size: 0.22 µm
- Max. usage temperature: 50 °C
- Vacuum connection: for tubes with inner Ø of 6.5 to 12 mm

S

Filtration unit Stericup® E

MERCK MILLIPORE. Housing: PS, membrane: PES, hydrophilic. **Sterile**.

A combination of funnelless bottle-top filter and collecting bottle. The bottle-top filter enables direct filtration into the sterile collecting bottle from a media bottle or tissue culture reagents/buffer bottle with a neck thread size of 38 mm or 45 mm. The Stericup® E funnelless sterile vacuum system offers a more sustainable option for sterile filtration thanks to a considerable reduction in plastic and packaging material. For routine sterile filtration of tissue culture media, buffers and reagents. Ideal for use under laminar flow conditions thanks to its compact form. Stackable bottles.

- Membrane material: Express® PLUS (PES) membrane, hydrophilic
- Low protein binding, high flow speed and short filtration time
- Housing: PS
- Sample volume: 150 to max. 500/1000 ml
- Membrane-Ø: 73 mm
- Filtration surface: 40 cm^2
- Pore size: 0.22 µm
- Max. usage temperature: 50 °C
- Vacuum connection: for tubes with inner Ø of 6.5 to 12 mm
- Inlet connection: for screw top bottles 38 mm or 45 mm

DURAN WHEATON KIMBLE

Vacuum filtration unit DURAN® 47 mm with ground joint

DWK Life Sciences. Material: Borosilicate glass, PTFE. Autoclavable: Yes.

For coarse and membrane filtration, retention analysis, particle tests and microbiology, as well as for filtration of alkali and aggressive media. For use with filter papers, membrane filters or glass filters with Ø of 47 mm or 50 mm. Temperature stable up to +180 °C.

- Parts in contact with media are made of glass and PTFE, therefore are suitable for universal use, biologically inert and corrosion resistant
- Scaled reservoir for easier metering and evaluation
- Plates are optionally available in porosity grades of 1-4, which means they are also suitable for analytical filtration
- Fast and easy to clean
- Connection hose suitable for hoses with an inside Ø of 5–8 mm

Delivery incl. slit-sieve plate as a filter holder, glass filter disc, porosity 2 and vaccum bottle.

Type	Funnel volume (ml)	Bottle volume (ml)	Suitable for	Art. No.	Pack Qty.	€

Multiple vacuum filtration units AS series

Cytiva. Material: Stainless steel. Autoclavable: Yes.

For **filters** of Ø **47/50 mm** and pre-filters of Ø 40 mm. Stainless steel holder for 3 or 6 filtration inserts complete with 500 ml stainless steel inserts. Each insert can be operated with a separate tap. With quick-close system. Temperature-resistant up to 180 °C. Suction manifold with hose connectors for tubes with inside Ø of 8–10 mm.

Applications: Microbiological quality controls, retention analyses and serial filtration.

Delivery incl. perforated sieves for filter support.

Version	Suitable for	Art. No.	Pack Qty.	€

Filter holder for syringes

Cytiva. Autoclavable: Yes.

Made from polysulfone or stainless steel. With silicone O-ring. Suitable for multiple uses with membrane, paper or round glass fibre filters. Maximum pressure loading: 7 bar. Connections: Luer or hose connectors (external Ø 11 mm), can be unscrewed.

Applications:
For clear and sterile filtration of biological media, reagents and buffer solutions, as well as aqueous solutions and gases.

Technical specifications:

Art. No.	CC19.1	CC23.1	CC20.1	CC21.1

Flow-through filter unit

Bohlender. Material: PTFE. Autoclavable: Yes.

Suitable for vacuum operation and overpressure operation up to approx. 5 bar. Does not discharge trace elements to the medium being filtered. Filter membrane is easy to change, by simply unscrewing the sample filter. Cutting rings can be used to connect plastic hoses. Includes suitable adapter for each of the two hose sizes. Anti-adhesive surface makes cleaning easy.

Technical specifications:

Membrane filters cellulose mixed ester

Cytiva. Material: CME, hydrophilic. Autoclavable: Yes.

Versatile membrane made of cellulose acetate and cellulose nitrate mixed ester.
Application examples: sterile and clear filtration, particle separation and analysis, microbiological analyses, counting of germs, yeasts, fungi and particle, food biology, air pollutant measurements, etc.
Max. usage temperature 130 °C.
Gridded membranes **(line spacing 3.1 mm)** make it easier to count particles and micro-organisms; the dyes used are non-toxic and free of antibacterial substances.

- High dirt absorbing capacity prevents rapid clogging of the membrane
- Uniform membrane structure ensures high flow rates
- Very smooth and even surface aids microscopic evaluation
- Biologically inert and free of surfactants

Sterile membranes are individually packed.

Membrane filters

A 121 °C

Membrane filters Express® PLUS PES

MERCK MILLIPORE. Material: PES, surface-modified, hydrophilic. Autoclavable: Yes.

Application examples: Ultrafast filtration of tissue media, buffers and other aqueous solutions.

- High flow rates and higher throughput
- Low protein binding
- Membrane strength: ≥ 150 µm and ≤ 200 µm
- Colour: white
- Surface: smooth

Pore size (µm)	Ø (mm)	Art. No.	Pack Qty.	€

Membrane filters Nylon

MERCK MILLIPORE. Material: Nylon, hydrophilic.

Highly compatible with solvents.
Applications: sterile filtration, bioassays, filtration of solvents, clear filtration of aqueous solutions, as well as particle separation and analysis.

- Membrane thickness: 170 µm
- Colour: white
- Surface: smooth
- Sterilisation: compatible with gamma or EO sterilisation
- Max. working temperature: 75 °C

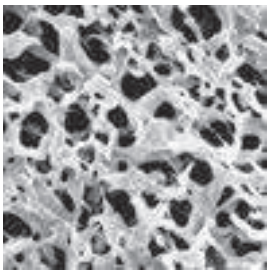
A 121 °C

Membrane filters Isopore™ Polycarbonate



MERCK MILLIPORE. Material: PC, hydrophilic, not-hygroscopic. Autoclavable: Yes.

Smooth surface, suitable for microscopic evaluations.
Application examples: Chemotaxis studies, drink analyses, sterility tests, cell culture/cell biology, bioassays, cytology, environment/air analyses, epifluorescence measurements (black membranes).

- Membrane strength: 9-10 µm
- Max. working temperature: 140 °C
- Colour: white or black

Membrane filters

A 121 °C

Membrane filters Durapore® PVDF hydrophilic

MERCK MILLIPORE. Material: PVDF, hydrophilic. Autoclavable: Yes.

Surface-modified polyvinylidene fluoride with very low protein binding.
Application examples: sterile filtration of protein solutions, tissue culture media, additives, antibiotics and alcoholic solutions; particle removal, biological assays (e.g. receptor binding studies TCA precipitation).

- Protein binding: 4 µg/cm²
- Membrane thickness: approx. 125 µm
- Colour: white
- Surface: smooth
- Max. working temperature: 85 °C

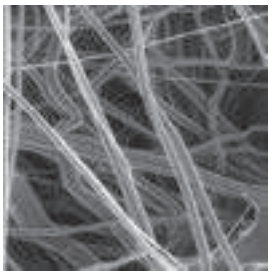
A 121 °C



Membrane filters LCR PTFE hydrophilic

MERCK MILLIPORE. Material: Hydrophilic PTFE. Autoclavable: Yes.

Hydrophilised PTFE enables the filtration of aqueous solvents without previous wetting. For use with all common HPLC solvents.
Application examples: clear filtration of acids, bases, cryogenic liquids and fuels, analysis of hydraulic liquids, RNA isolation.

- Very low ionic strength, also suitable for IC
- Membrane strength: 150 µm
- Max. working temperature: 130 °C
- Colour: white

Pore size (µm)	Ø (mm)	Art. No.	Pack Qty.	€

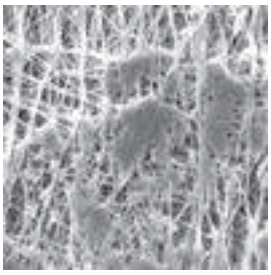
0,45	47	**CX69.1**	100 unit(s)	661,15

Prefilter PP



MERCK MILLIPORE. Material: PP, hydrophobic.

Pre-filters made of 100 % pure polypropylene. High particle retention and dirt absorbing capacity at low pressure drop.
Suitable for filtration of many organic solvents.

- Filter type: deep-bed filter
- Colour: white
- Surface: smooth
- Sterilisation: compatible with gamma or EO sterilisation
- Max. working temperature: 90 °C

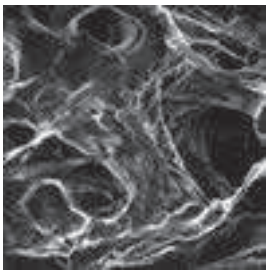
Membrane filters

A 121 °C



Membrane filters Fluoropore™ PTFE with laminated support structure

MERCK MILLIPORE. Material: Hydrophobic PTFE, HDPE. Autoclavable: Yes.

Membrane filter made of PTFE (polytetrafluoroethylene) with support structure made of high-density polyethylene fabric.
Application examples: clear filtration of acids, bases, solvents and alcoholic solutions, gas/air filtration, UV spectroscopy.
If wetted beforehand with methanol or ethanol, aqueous solutions can also be filtered.

- Membrane strength: 150 µm
- Max. working temperature: 130 °C
- Colour: white

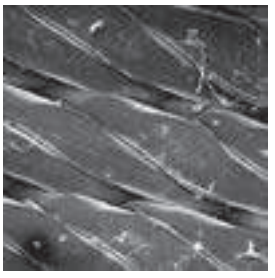
A 121 °C



Membrane filters Mitex™ PTFE

MERCK MILLIPORE. Material: Hydrophobic PTFE. Autoclavable: Yes.

Hydrophobic PTFE membrane filter without support structure.
Application examples: filtration under extreme chemical or thermal conditions, clear filtration of acids, bases, cryogenic liquids and fuels, analysis of hydraulic liquids, RNA isolation.
If wetted beforehand with methanol or ethanol, aqueous solutions can also be filtered.

- Membrane strength: 130-140 µm
- Max. working temperature: 260 °C
- Colour: white

Membrane filters

Mesh filter Nylon

MERCK MILLIPORE. Material: Nylon, hydrophilic.

Mesh filter with high compatibility with solvents.
Applications: collection of algae and cells, particle analysis, separation of large particles, background filter for use in monitoring by automatic particle imaging systems, pre-filtration of solvents, monitoring of contamination in paints and lacquers.

- Colour: white
- Surface: smooth
- Sterilisation: compatible with gamma or EO sterilisation
- Max. working temperature: 100 °C

121 °C

Membrane filters Track-etched polycarbonate

Sartorius. Material: PC, hydrophilic. Autoclavable: Yes.

For filtration of aqueous solutions or gases.
Uniform and precise capillary pore structure thanks to the track-etching technique. Suitable for applications in which particulates need to be retained on the membrane surface or for the fractionation of particulates.

- Membrane thickness: 25 µm
- Colour: white
- Temperature-stable up to 140 °C

Application examples:
Particulate analysis, epifluorescence microscopy, fluid clarification, cytology, cell biology, water microbiology and environmental analysis.

Membrane filters

A 121 °C

Membrane filters PTFE

Sartorius. Material: Hydrophobic PTFE. Autoclavable: Yes.

Outstanding chemical resistance.
For hydrophilic media, priming with ethanol or methanol is necessary to make the membrane permeable to aqueous liquids.

- Membrane thickness: 65 - 100 µm
- Colour: white

Application examples:
Filtration of air, gases and chemicals.

Pore size (µm)	Ø (mm)	Art. No.	Pack Qty.	€

A 121 °C

Membrane filters cellulose acetate

Sartorius. Material: CA, hydrophilic. Autoclavable: Yes.

For filtration of aqueous solutions or gases. High throughput, good thermal and chemical resistance (pH 4-8), low adsorption. Suitable for pressure filtration.

- Membrane thickness: 120 – 140 µm
- Colour: white
- Temperature stable up to 180 °C

Application examples:
Analytical sample preparation, clear filtration.

Membrane filters

A 121 °C

Membrane filters cellulose nitrate mixed ester

Sartorius. Material: CME, hydrophilic. Autoclavable: Yes.

Composed of cellulose nitrate and a small content of cellulose acetate. For filtration of aqueous solutions or gases.

- Membrane thickness: 130 µm
- Colour: white
- Temperaturestable up to 130 °C

Application examples:
Analytical sample preparation, clear filtration, particulate analysis.

Membrane filters regenerated cellulose

Sartorius. Material: RC, hydrophilic, reinforced with cellulose nonwoven fabric. Autoclavable: Yes.

High resistance to aqueous and organic solvents (pH 3-12), low non-specific adsorption.

- Membrane thickness: 170 µm
- Colour: white
- Temperature stable up to 180 °C

Application examples:
Removal of particulates from solvents, purification and degassing of solutions for HPLC.

Glass/quartz fibre filter papers

Glass fibre round filters

Cytiva. Material: Borosilicate glass fibres, Inorganic binding agent.

- Chemically resistant to the majority of organic and inorganic solvents, aggressive chemicals and highly concentrated bases (not resistant to hydrofluoric acid)
- Constant weight, negligible influence on fluctuations in ambient humidity
- Mechanically stable (limited bending resistance)

Note: Filter units and clamping fixtures must have flexible sealing surfaces.

Type GF 6
Applications: Environmental analysis, biology, physics, drinks industry.

Use: Gas/air monitoring, water and waste water tests, scintillation measurements, dry mass determinations.

- Filtration speed: Low
- Retention rate: 99.97%
- Retention range: < 1 µm
- Surface weight: 80 g/m²
- Thickness: 0.35 mm

A 121 °C

Quartz fibre round filters MN QF-10

Macherey-Nagel. Material: Quartz fibres. Autoclavable: Yes.

Made from pure quartz fibres, without binding agent. High chemical resistance to organic and inorganic solvents, acids (except hydrofluoric acid) and alkalis. For filtration of aggressive media in trace analytics, emissions control, airborne dust analytics, etc.
Extremely low metallic trace element content.

- Filtration speed (according to DIN 53137): <5 s
- Surface weight: 85 g/m²
- Retention range: Up to 0.3 µm
- Temperature stable up to 950 °C
- Thickness: 0.46 mm

Ø (mm)	Art. No.	Pack Qty.	€

Filter papers for quantitative analysis

Round filters

Macherey-Nagel.

For **qualitative analysis**. Made from refined pulp washed in acid and linters with a α cellulose content of over 95%. Ash content < 0.01%. Temperature stable up to approx. +130 °C. Surface weight: 85 g/m².

Type: MN 640 w
Fast filtration speed. Filtration time according to DIN 53137: 9 s. Equivalent black strip. Soft filter with a loose structure for coarse deposits like iron and aluminium hydroxide, bismuth, copper, iron sulphide, nickel-dimethylglyoxime, etc. Standard filter for determining Si. Retention range: > 8 µm

Type	Ø (mm)	Retention range (µm)	Art. No.	Pack Qty.	€
MN 640 w	55	> 8	**EEX7.1**	100 unit(s)	11,30

MN 640 w	320	> 8	**EEY0.1**	100 unit(s)	212,00

Type: MN 640 m
Medium filtration speed. Filtration time according to DIN 53137: 27 s. Equivalent white strip. For deposits such as sulphide, lead chromate, calcium oxalate. Typical uses: Gravimetrical analyses, quantitative determination of retention and purification processes. Retention range: > 4 µm.

Type	Ø (mm)	Retention range (µm)	Art. No.	Pack Qty.	€
MN 640 m	55	> 4	**EEY1.1**	100 unit(s)	11,30

MN 640 d	320	> 2	**EEY8.1**	100 unit(s)	212,00

Round filters hardened

Hahnemühle.

Ash-less for **quantitative analysis**.
α- cellulose content of over 95%, ash content approx. 0.002%.
Made of high-purity acid washed cotton linter pulp and cellulose mixed with a small quantity consolidating resin. Free of minerals and metal ions. High stability and resistance, very high wet strength. Deposits can be removed easily with no fibres.
For analytical applications, routine quantitative and gravimetric methods. Highly recommended for vacuum and pressure filtration, determination of metal ions, and filtration of acidic and alkaline solutions. Resistant to sulphuric and nitric acids (up to 40% at 50 °C) and alkalis (up to 10% at 20 °C).

Type 1505
Fast filtration speed. Herzberg filtration time: 50 s. Surface weight: 88 g/m². Retention range: 12–25 µm. Thickness: 0.17 mm.

Type	Ø (mm)	Retention range (µm)	Art. No.	Pack Qty.	€
1505	90	12–25	**NL29.1**	100 unit(s)	39,90

Special filter papers

Round filters phosphate-free

Macherey-Nagel. Material: Paper, phosphate-free.

For soil analyses and for P-analysis in smelting and steel works.

Type: MN 617 G
Fast filtration speed.

Surface weight: 85 g/m². Filtration time according to DIN 53137: 9 s.
Thickness: 0.2 mm.

Type	Ø (mm)	Art. No.	Pack Qty.	€
MN 617 G	55	**HK24.1**	100 unit(s)	7,20
MN 617 G	70	**HK25.1**	100 unit(s)	7,20

Folded filters MN 280 ¼ phosphate-free

Macherey-Nagel. Material: Paper, acid washed and phosphate-free.

Low filtration speed. With optimum purification and a flat surface. For determination of the micronutrients available to plants (Mg, Mn, Cu, Zn, Co, B, Mo) as well as for soil analyses.
Surface weight: 75 g/m². Filtration time according to DIN 53137: 100 s.
Thickness: 0.18 mm.

Type	Ø (mm)	Art. No.	Pack Qty.	€
MN 280 ¼	110	**HK34.1**	100 unit(s)	61,30

Germ testing paper ROTILABO®

ROTH SELECTION.

Folded, waterproof, germ testing paper. For carrying out germ resistance tests, e.g. for root vegetable seeds. Surface weight: 160 g/m². Shape: Width 110 mm, fold depth 20 mm, double folds (50 units), length 2 m.

Length (m)	Width (mm)	Art. No.	Pack Qty.	€
2	110	**AT14.1**	1 unit(s)	6,05

Phase separating paper MN 616 WA

Macherey-Nagel. Material: Paper, Impregnated with silicone.

Circular filters for **qualitative analysis**. The hydrophobic surface separates water from non water-miscible liquids. Enables partial quantities to be filtered out. Surface weight: 85 g/m². Temperature stable up to +120 °C. Largely solvent resistant.

Ø (mm)	Art. No.	Pack Qty.	€
125	**1284.1**	100 unit(s)	27,30

Single-use sieve

Material: Cardboard, water-resistant, nylon sieve cloth.

Suitable for liquids of various consistencies, for example varnishes and paints. Height: 12 cm, upper Ø approx. 16 cm.

Type	Retention range (µm)	Colour coding	Art. No.	Pack Qty.	€

Test papers ROTILABO®

ROTH SELECTION.

Untreated cellulose sheets made from 100% cotton linters. Good absorbency, surface weight of 290 g/m², thickness 0.75 mm. For impregnating with agent solution.
Suitable for determining the resistance to antibiotics or chemotherapeutic substances in bacteria cultures and pathogenic organisms.

Extraction sleeves

Extraction sleeves MN 645

Macherey-Nagel. Material: Cellulose.

For holding solids during Soxhlet and other extractions. Also suitable for separating solid or liquid particles from air and gases.
Extraction sleeves according to DIN 12449 are suitable for extractors according to DIN 12602 and 12604.

Extraction sleeves made of glass fibres MN 649

Macherey-Nagel. Material: Borosilicate glass fibres.

Micro-glass fibres consist of binding-agent-free borosilicate glass, temperature stable for short periods up to 500 °C. The sleeves have a high chemical compatibility, a very high separation capacity and a very high particle retention capacity.
Suitable for emissions measurements at high temperatures, for separating dust particles or aerosols from gases or air flows.
Extraction sleeves according to DIN 12449 are suitable for extractors with defined nominal volumes according to DIN 12602 and 12604.

Analytical sieve machines

Analytical sieve machine HAVER EML 200 Premium series

Haver & Boecker.

For sieve analysis in accordance with ISO 2591-1. Measuring range 20 µm–125 mm. Suitable for test sieves with Ø 50 to 203 mm.

- Fast and easy to operate
- Amplitude is adjustable in 0.1 mm increments
- Intermittent operation or continuous operation
- Memory for storing various sieve modes (49 memory slots)
- Ethernet interface
- Optional TwinNut rapid clamping system allows easier and faster replacement of sieves without time-consuming screwing

Technical specifications:

Art. No.	ECE6.1	ECE7.1	ECE8.1	ECE9.1
Type	EML 200 Premium		EML 200 Premium Remote	
Measuring range	0.02–125 mm			
Movement type	three-dimensional			
Shaking amplitude (stroke)	0,1–3,0 mm			
Timer	1 to 99 min or continuous operation			
Interval operation	1 to 99 s			
Loading capacity from	min. 3 test sieves, one sieve pan			
Loading capacity up to	Max. 9 test sieves or 8.7 kg sieve stack weight			
Width	295 mm			
Depth	385 mm			
Height	880 mm			
Weight	38 kg			
Mains connection	110–230 V, 50/60 Hz			

(1) Model: Premium
Suitable for dry sieving.

Delivery incl. clamping system (2 x M20 guide bars, 660 mm long, 2 clamping nuts) and a machine cover with window.

Delivery without sieve pan (please order separately).

Type	Version	Art. No.	Pack Qty.	€
EML 200 Premium	Classic clamping system	**ECE6.1**	1 unit(s)	3.427,10
EML 200 Premium	TwinNut rapid clamping system	**ECE7.1**	1 unit(s)	3.607,70

(2) Model: Premium Remote
Suitable for wet and dry sieving.

Unit with protection class IP 54 and separate control unit for wall mounting allows the additional option of wet sieving.

Delivery incl. separate control device with wall holder and connecting cable, clamping system (2 x M20 guide bars, 660 mm long, 2 clamping nuts), machine cover with full-cone nozzle and window, water connector with socket and PVC hose (3 m long).

Delivery without sieve pan (please order separately).

Type	Version	Art. No.	Pack Qty.	€
EML 200 Premium Remote	Classic clamping system	**ECE8.1**	1 unit(s)	3.970,00
EML 200 Premium Remote	TwinNut rapid clamping system	**ECE9.1**	1 unit(s)	4.149,50

Accessories

Haver & Boecker.

For dry sieving
Suitable for EML 200 Pure, EML 200 Premium and EML 200 Premium Remote.

Version	Art. No.	Pack Qty.	€
Sieve pan for dry sieving, Ø 200 x H 50 mm, stainless steel	**ECC7.1**	1 unit(s)	59,00
Replacement machine cover with window	**ECE3.1**	1 unit(s)	244,05

For wet sieving
Suitable for EML 200 Premium Remote.

Version	Art. No.	Pack Qty.	€
Sieve pan with outlet and PVC hose for wet sieving	**ECH0.1**	1 unit(s)	206,40
Replacement machine cover with full-cone nozzle and window	**ECH1.1**	1 unit(s)	424,65
PVC hose (1/2″), 3 m	**ECH2.1**	1 unit(s)	14,80

Analytical sieve machines

Analytical sieve machine HAVER EML 200 Pure

Haver & Boecker.

For sieve analysis in accordance with ISO 2591-1. Standard model for dry sieving and fast and easy operation. Measuring range 20 µm–125 mm. Suitable for test sieves with Ø 50 to 203 mm.

- Two optional amplitudes to select from: 2.2 mm for coarse or 0.9 for fine materials
- Preset interval (10 s)
- Digital timer
- Anodised aluminium housing

Technical specifications:

Art. No.	ECE2.1
Type	EML 200 Pure
Measuring range	0.02–125 mm
Movement type	Three-dimensional
Shaking amplitude (stroke)	2,2 mm / 0,9 mm
Timer	1 min or continuous operation
Loading capacity from	Min. 3 test sieves with usable height 50 mm and one sieve pan
Loading capacity up to	Max. 9 test sieves with usable height 50 mm or 8.7 kg sieve stack weight
Width	295 mm
Depth	385 mm
Height	900 mm
Weight	38 kg
Mains connection	110–230 V, 50/60 Hz

Delivery incl. Classic „eco“ clamping system (2 x M16 guide bars, 660 mm long, 2 clamping nuts) and a machine cover with window. **Delivery without** sieve pan (Art. No. ECC7.1), please order separately.

Type	Art. No.	Pack Qty.	€
EML 200 Pure	**ECE2.1**	1 unit(s)	2.744,50

Test sieve Ø 200 mm

Haver & Boecker. Material: Stainless steel.

Sieve frame fabricated in stainless steel 1.4301 with stainless steel wire mesh base. Compliant with DIN ISO 3310, ASTM E11, ISO 565, BS 410, etc. Suitable for testing granulates, powders, plastics, silicon, dyes, metal filings etc.

- Strong sieve construction for long life
- Sieve mesh retains excellent tension, even during intensive use
- Smooth frame surface avoids cross contamination
- Usable height 50 mm

Delivery incl. PVC sealing ring and Certificate of Compliance 2.1 according to DIN EN 10 204.

Ion exchanger Destillo 2

Herco.

Wall device for producing small amounts of demineralised water.

- Very effective, handy and functionally safe
- Hourly performance approx. 50 l water
- Capacity at 10° dH approx. 320 l, at 20° dH approx. 160 l water
- Conductivity display up to 100 µS/cm

Note: Capacity data apply for feed water with a total salt content of 10° dH; with a higher salt content or higher amounts of carbonic and silicic acid in the water, the capacity reduces.

Technical specifications:

Art. No.	**0092.1**
Type	Destillo 2
Cartridge filling	Mixed bed resin, disposable
Capacity	320 l
Flow rate	50 l/h
Clean water quality	0,1-20 µS/cm
Width	115 mm
Depth	115 mm
Height	520 mm
Connection	R ¾″
Mains connection	220–240 V, 50/60 Hz

Delivery incl. cartridges, conductivity tester, supply hose length 150 cm, outlet hose length 100 cm, wall screws and connecting cable length 150 cm.

Type	Art. No.	Pack Qty.	€
Destillo 2	**0092.1**	1 unit(s)	360,15

Accessories replacement cartridges for ion exchanger device Destillo 2

Herco.

Colour to prevent algae growth. Height 380 mm, Ø 90 mm, weight approx. 1400 g.

Technical specifications:

Art. No.	**0093.1**
Type	Disposable cartridge D 2
Ø	90 mm
Height	380 mm
Weight	1400 g

Type	Art. No.	Pack Qty.	€
Disposable cartridge D 2	**0093.1**	1 unit(s)	87,65

Ion exchanger DS series

stakpure.

Pressureless. Plastic ion exchanger system made of plastic (PE) for producing fully desalinated pure water using a mixed bed ion exchanger resin. Suitable for small laboratories with a daily requirement of up to 15 litres. Can be connected directly to the mains water supply. With analogue conductivity tester, hose set and integrated filter system to prevent escape of resin. Acc. to standards such as DIN EN 13060, ASTM and VDE 0510.

Note: Capacity data apply for feed water with a total salt content of 10° dH; with a higher salt content or higher amounts of carbonic and silicic acid in the water, the capacity reduces.

Technical specifications:

Art. No.	KCE7.1	KCE8.1
Type	DS 450	DS 750
Cartridge filling	Mixed bed resin, disposable	Mixed bed resin, regenerative
Capacity	425 l	750 l
Flow rate	50 l/h	100 l/h
Clean water quality	0,1-20 µS/cm	
Measuring range	0.1-50 µS/cm	
Ø	100 mm	175 mm
Height	600 mm	470 mm
Weight	3 kg	6 kg
Max. water temperature	30 °C	
Connection	R ¾″	
Mains connection	230 V, 50/60 Hz	

Delivery incl. cartridge, analogue conductivity tester and hose set. Model DS 450 also includes a wall mount.

Type	Art. No.	Pack Qty.	€
DS 450	**KCE7.1**	1 unit(s)	366,60
DS 750	**KCE8.1**	1 unit(s)	496,65

Ion exchanger cartridge DS series

stakpure. Material: Stainless steel AISI 316.

Pressure-resistant (up to 10 bar) stainless steel ion exchanger cartridges made of stainless steel, can be connected directed to the mains water.
For the production of demineralised water. Suitable for supplying ultra-pure water systems, analysis machines, dishwashers and autoclaves, or for industrial use with process water, battery water and cooling water. Acc. to standards such as ASTM, CLSI, DIN EN 285, VDE 0510.

Note: Capacity data apply for feed water with a total salt content of 10° dH; with a higher salt content or higher amounts of carbonic and silicic acid in the water, the capacity reduces.

Technical specifications:

Art. No.	KCE3.1	KCE4.1	KCE5.1	KCE6.1
Type	DS 1500	DS 2000	DS 2800	DS 4000
Cartridge filling	Mixed bed resin, regenerative			
Capacity	1,500 l	2,000 l	2,800 l	4,000 l
Flow rate	300 l/h		950 l/h	1,000 l/h
Clean water quality	0,1-20 µS/cm			
Ø	240 mm			
Height	410 mm	490 mm	570 mm	700 mm
Weight	14 kg	18 kg	24 kg	27 kg
Max. operating pressure	10 bar			
Max. water temperature	30 °C			
Connection	R ¾″			

Delivery without conductivity tester (Art. No. KCH2.1, analogue or Art. No. KCH1.1, digital), please order separately.

Type	Art. No.	Pack Qty.	€
DS 1500	**KCE3.1**	1 unit(s)	733,15

Conductivity tester DC 400 digital

stakpure.

Suitable for ion exchangers DS 1500 to DS 4000. Conductivity measuring range 0.1 to 300 µS/cm (automatic switchover at 9.99). For the online measurement of pure and ultrapure water downstream of ion exchanger cartridges and for monitoring closed-loop systems. For wall mounting.

- Large two-colour backlit graphic display for digitally displaying the conductivity in µS/cm or in MΩ x cm and the temperature in °C
- Continuous adjustment of the limit values for temperature (from 10 to 40 °C) and conductivity (from 0.1 to 30 µS/cm)
- Signals for exceeded limits for temperature and conductivity: LED display green/red + buzzer (both limit values can be deactivated)
- Signals for fault message: display switch-over green/red
- Automatic comparison before each measurement using an integrated reference resistor and temperature measurement using platinum temperature sensor
- Automatic voltage switching for international use

Technical specifications:

Art. No.	**KCH1.1**
Type	DC 400
Conductivity measuring range from	0.1 µS/cm
Conductivity measuring range up to	300 µS/cm
Temperature measuring range from	0.1 °C
Temperature measuring range up to	99.9 °C
Temp. compensation	Automatic
Width	73 mm
Depth	32 mm
Height	141 mm
Connection	¾″
Protection class	IP 54
Mains connection	110/230 V, 50/60 Hz

Delivery incl. connecting cable, plug-in power supply, measuring cell and tube set consisting of 2 x 1.5 m tubes with R ¾″-connections and wall mount.

Type	Art. No.	Pack Qty.	€
DC 400	**KCH1.1**	1 unit(s)	709,50

Wasser purification

Ultrapure water system OmniaPure series

stakpure.

For the production of 20-100 litres ultrapure water ASTM Type I per day. Flexible dispenser with digital control for water withdrawal at the touch of a button.

- OptiFill dispenser as standard
- Space-saving mounting on a laboratory bench or optionally on a wall
- Simple and cost-effective filter replacement
- Integrated pre-treatment unit
- RS 232 port
- Leak sensor as standard
- Integrated pressure reducer as standard
- Ready to use, ready to connect, incl. filter cartridges
- Model type "TOC" with TOC monitoring

Technical specifications:

Pure and ultrapure water system OmniaTap series

stakpure.

Preparation system for producing both pure and ultrapure water. **Directly connectable to the mains water supply.** The flexible dispenser is used to draw ASTM Type I ultrapure water. The water is drawn at the touch of a button using the dispenser's digital control system. An integrated 10-litre tank with recirculation keeps the quality constantly at ASTM Type II. An optionally available pump station can be used to supply downstream devices with pure water (ASTM Type II) from the pure water tank.

- Space-saving mounting on a laboratory bench or optionally on a wall
- OptiFill dispenser as standard
- TapWater set – direct connection to drinking water
- 10 l tank with recirculation system
- Tank volume display in percent
- Simple and cost-effective filter replacement
- RS 232 port
- Leak sensor as standard
- Ready to use, ready to connect, incl. filter cartridges
- Can be operated using just one hand

Pure and ultrapure water system Smart2Pure series

Thermo.

Compact system for the production of contamination-free water from mains water. The device is **connected directly to the mains water** supply.
Simultaneous provision of ultrapure and pure water qualities:

- **ASTM Type I** (resistance of 18.2 MΩ x cm)
- **ASTM Type II** (resistance of 10-15 MΩ x cm)

Easy to use, space-saving design and low follow-up costs. The pre-treatment cartridge is separate from the ultrapure water cartridge. Only the used cartridge need be replaced, when necessary.

Applications:
Analytical chemistry:
HPLC, GC, GC-MS, ICP-MS, AA, TOC measurements, IC
Molecular biology and microbiology:
Cell/tissue culture, PCR, DNA sequencing, electrophoresis
Routine tasks in the laboratory
Preparation and dilution of buffers and reagents, rinsing of laboratory glass instruments, supply of autoclaves, analysers and other laboratory instruments

Features:

- Combined cartridge (reverse osmosis membrane/activated charcoal) for pre-treatment of feed water
- Direct tapping of type I ultrapure water through a sterile end filter (0.2 µm)
- Integrated 6-litre tank for storing type II pure water
- Guaranteed pure water quality: the recirculation pump and sterile air filter protect from microbial contamination
- Additional pressure outlet on ultrapure water tank for supplying downstream devices
- Simple and economical change of expendables as treatment cartridges can be replaced separately
- Space-saving mounting on laboratory bench or on the wall

Drinking water requirements:	
Drinking water to DIN 2000	Manganese and iron content: <0.05 mg/l
	Chlorine concentration: <0.1 mg/l
	Colloid index: <3
	Feed water temperature: 2–35 °C
	Feed water pressure: 1–6 bar

Delivery incl. Smart2Pure unit with integral 6-litre tank, sterile tank ventilation filter, combined cartridge (reverse osmosis membrane/activated charcoal), ultrapure water cartridge, 0.2 µm end filter, pressure retaining valve, device socket (length 1.8 m) UV lamp and/or ultra-filter (depending on model).

Wasser purification

With UV lamp (wave length 254 and 185 nm), which inactivates bacteria, oxidises organic compounds and enables germ-free ultrapure water quality with a TOC concentration < 5 ppb.

Typical applications: Anorganic and organic trace analysis, HPLC, ICP-MS, IC, TOC analysis.

Type	Art. No.	Pack Qty.	€
Smart2Pure UV 3 l/h	**HE81.1**	1 unit(s)	6.638,15
Smart2Pure UV 6 l/h	**HE82.1**	1 unit(s)	8.147,45

With UV lamp and UF module. The UF ultra-filtration module guarantees almost complete elimination of macro-molecular contamination such as micro-organisms, pyrogens (bacterial endotoxins), nucleases and particles; the combination of UV oxidation (254 and 185 nm) and ultra-filtration produces analytically pure water with a specific resistance of up to 18.2 MΩ cm, TOC values of < 5 ppb, pyrogene levels of < 0.001 EU/ml and RNase, DNase and DNA concentrations below the detection limit.

Typical applications: molecular biology, PCR, DNA, monoclonal antibodies, cell culture media.

Dialysis tubular membranes

Dialysis membrane Membra-Cel™

Viskase. Material: Cellulose, regenerated. Autoclavable: Yes.

Colourless, transparent to slightly opaque, semi-permeable and seamless. Application area: Dialysis and ultrafiltration in the laboratory.

- **Exclusion limit (MWCO) 14,000**
- Dry packaged on rolls, treated with glycerine
- Stable in the pH range from 5 to 9
- No unspecific protein binding, protein adsorption < 1 ng/g
- Autoclavable up to +120 °C (max. 15 min, immersed in distilled water)

A 121 °C

Dialysis tubular membranes

Dialysis membrane Spectra/Por® 1 to 4

Repligen. Material: Cellulose, regenerated.

- High-quality membranes on rolls, **packaged dry**
- Max. application temperature +60 °C
- Good resistance to chemicals
- Treated with glycerine to protect against embrittlement
- Contain low quantities of contaminations such as sulphides and heavy metals
- **Metal traces:** Cadmium < 0.02 ppm, lead 2–6 ppm, chromium 0.1–0.2 ppm, magnesium 0.1–0.3 ppm, copper 0.8–1.2 ppm, nickel 1.3–1.7 ppm, iron 20–60 ppm, zinc 1.5–5 ppm

Dialysis tubular membranes

Trial kit Spectra/Por® 1-3

Repligen. Material: Cellulose, regenerated.

Hose membrane pieces on rolls, packaged dry. Particularly suitable for small-scale dialysis and for testing membranes for special applications.

Delivery incl. 1 pair of Spectra/Por® locking clips made of PP (1x with weight, 1x without).

Not a medical device / Not an IVD product

Dialysis membrane Spectra/Por® Biotech CE

Repligen. Material: CE.

- **Very high purity**, contain no trace elements, heavy metals, sulphides or glycerine
- Low reactivity of the membrane, therefore hardly any adsorption of proteins and liposomes
- No time-consuming cleaning processes necessary
- Max. application temperature +37 °C
- **Packaged moist** in 0.05% sodium azide solution
- Recommended storage temperature +4 °C

Dialysis systems

Dialysis systems Spectra/Por® Float-A-Lyzer® G2

Repligen. Material: CE, Caps made of PC.

Highly efficient, *ready-to-use* dialysis system, easy to use and **with an extremely high sample recovery of 95–98%.**
Hose membrane made of cellulose ester with caps made of polycarbonate. **Packaged dry**, with low quantities of glycerine to protect against embrittlement. The glycerine must be removed with distilled water in a rinsing step prior to use (duration: 15-30 min).

- For 1–10 ml samples
- Screw cap (Ø 23 mm) enables easy handling; checks can also be carried out during dialysis
- Dialysis tube made of highly pure cellulose ester, contains no contamination such as trace elements or sulphides, therefore no complex pretreatment required
- Low reactivity of the membrane, hardly any adsorption of proteins and liposomes, suitable for direct use with biological sample material
- Floating ring made of PE (Ø 38 mm) improves floatability and vertical alignment
- Various MWCOs available, lid colour-coded accordingly
- Several Float-A-Lyzers can be used at the same time in a single vessel

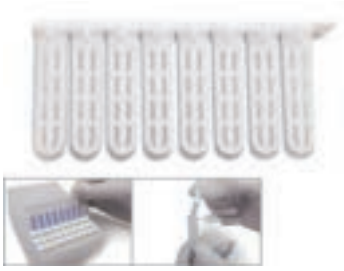
Mini Dialyzer ZelluTrans/ROTH MD 300

ROTH SELECTION. Material: Cellulose, regenerated.



Ready-to-use dialysis system for samples of between 50 and 300 µl.
The Mini Dialyzer consists of a U-shaped polypropylene capillary with 75 µl graduations and membranes on both sides. The filled sample forms a thin layer over a large surface area, ensuring very short dialysis times.

- Available as an **individual dialyzer** packaged in a 5 ml test tube or as a **dialyzer strip** with 8 interconnected individual dialyzers (can be separated)
- Membranes are made of high-quality regenerated cellulose with different pore sizes (MWCO), **dry packaged**
- Easy to use: Can be filled with the sample and emptied using any standard pipette (100–1000 µl)
- Short dialysis times (30–480 min)
- Flexible: Uses ranging from low-volume dialysis (in test tube, 96-deepwell plates, 2.5 ml) to high-volume dialysis (using a suitable flotation aid, 4768.1)

The Mini Dialyzers are ready for use straight away – no pretreatment required.
For sensitive applications, soak in water or buffer for 15 min beforehand to remove any traces of glycerine.

Not a medical device / Not an IVD product

Mini Dialyzer ZelluTrans/ROTH MD 100

ROTH SELECTION. Material: Cellulose, regenerated.

Ready-to-use dialysis system for samples of between 10 and 100 µl.
The Mini Dialyzer consists of a U-shaped polypropylene capillary with 25 µl graduations and membranes on both sides. The filled sample forms a thin layer over a large surface area, ensuring very short dialysis times.

- Available as an **individual dialyzer** packaged in a 2 ml reaction vial or as a **dialyzer strip** with 8 interconnected individual dialyzers (can be separated)
- Membranes are made of high-quality regenerated cellulose with different pore sizes (MWCO), **dry packaged**
- Easy to use: Can be filled with the sample and emptied using any standard pipette (2–200 µl)
- Flexible: Uses ranging from low-volume dialysis (in reaction vial or micro-titration plate) to high-volume dialysis (using a suitable flotation aid, as described below)
- Compatible with **96-deepwell plates (2.5 ml)**, 8-channel multichannel pipettes and standard automation systems; allows simultaneous processing of up to 96 samples.

The Mini Dialyzers are ready for use straight away – no pretreatment required. For sensitive applications, soak in water or buffer for 15 min beforehand to remove any traces of glycerine.

Body/eye showers

Emergency body shower

B-Safety.

DVGW-tested and approved. Acc. to DIN EN 15154-1:2006, DIN 12899-3:2009 and ANSI Z 358.1-2009.

- Application through wall flange, surface-mounted supply line
- Stable design due to robust brass body
- Chemical-resistant powder coating
- Large maintenance-free ball valve for high flow rates (60 l/min at 1.5 bar)
- Application range from 1 to 10 bar water pressure
- Triggered through non-self-closing pull-rod valve
- Large, easy-to-operate pull rod
- Self-emptying high-performance shower head (prevents build-up of bacteria and calcification)
- Adhesive information label for body shower, 150 x 150 mm

(1) Wall-mounted

- Water connection ¾″ internal thread
- Overhang 625 mm
- Pull rod length 700 mm

Type	Art. No.	Pack Qty.	€
Wall-mounted emergency body shower	**EP70.1**	1 unit(s)	346,15

(2) Over-door-mounted

Can be mounted either to left or right of door.

- Water connection ¾″ internal thread
- Overhang 565 mm
- Distance between rod valve and shower arm 500 mm
- Pull rod length 700 mm

Type	Art. No.	Pack Qty.	€
Emergency body shower mounted over the door	**EP72.1**	1 unit(s)	468,70

Emergency shower test trolley

B-Safety.

Mobile collection tank on 4 castors with two recessed handles.

- Can be dismantled into three pieces for easy storage
- Retention capacity: 30 litres
- Drain screw is attached to the container at the top
- For emptying via floor drain, the container must be tipped
- Total/catch height 2.1 m, W 440 x D 440 mm
- Aluminium tube Ø 47 mm, connectable, not extendible
- Funnel Ø 440 mm, height 160 mm
- Overall weight 7 kg

Type	Art. No.	Pack Qty.	€
Emergency shower test trolley	**YP27.1**	1 unit(s)	311,75

Combined emergency shower

B-Safety.

DVGW-tested and approved. Acc. to DIN EN 15154-1:2006, DIN 12899-3:2009 and ANSI Z 358.1-2009.

- Application through wall flange, surface-mounted supply line
- Stable design due to robust brass body
- Chemical-resistant powder coating
- Water connection ¾″ internal thread
- Overhang 625 mm
- Pull rod made of steel, powder-coated, length 700 mm
- Integrated automatic flow regulator 50 l/min for a standard spray pattern at a specified working range of 1.5 to 3 bar flow pressure
- Valves not self-closing
- Adhesive information label for body and eye shower, 150 x 150 mm

(1) Body shower and hand-held eye shower

Hand-held eye shower with a spray head angled at 45° with rubber protection and tightly closing dust cover with folding mechanism. For wall mounting. Integrated automatic flow regulator 7 l/min. Stainless steel-sheathed hose, length 1.5 m. Connection ½″ union nut.

Type	Art. No.	Pack Qty.	€
Emergency shower and hand-held eye shower	**YP32.1**	1 unit(s)	982,55

(2) Body shower and eye shower, 2 shower heads

Safety eye shower with two wide-spraying high-performance spray heads angled at 45°, with rubber protection and tightly closing dust cover with folding mechanism. Integrated automatic flow regulator 14 l/min.

Type	Art. No.	Pack Qty.	€
Body shower and eye shower, two shower heads	**YP33.1**	1 unit(s)	982,55

Emergency shower tester SEKUROKA®

ROTH SELECTION.

For easily carrying out regular checks of body showers. Consisting of: Synthetic hose with sewn-in opening ring, top Ø 28 cm, bottom Ø 12 cm, length 180 cm.
Plastic bucket, 20 litres. Metal clamp rod, 80 cm long.

Type	Art. No.	Pack Qty.	€
Emergency shower tester	**T348.1**	1 set	250,50

Eye showers

Hand-held eye shower straight

B-Safety.

DIN-DVGW tested and approved. Acc. to DIN EN 15154-2:2006 and ANSI Z358.1-2014.
Universal use, for wall or table mounting. With non-self-closing valve; the release lever locks by itself and the water is switched off again by simply unlocking this. Made of plastic, media-carrying parts made of brass. Silicone tube sheathed in stainless steel, length 1.5 m. Flow rate 7 l/min per shower head at a minimum operating pressure of 1 bar. Water connection ½″ internal thread, union nut.

- With rubber sleeves that protect against injuries
- Dust cover caps that open automatically upon actuation
- Integrated flow regulator for constant water jet, even with fluctuating pressure
- Extremely wide-spraying shower heads ensure water distribution over a large area
- Large holes in the shower heads protect against calcification
- Shower heads can be easily removed for maintenance purposes
- Adhesive information label for eye shower, 150 x 150 mm

Hand-held eye shower Premium

B-Safety.

DIN-DVGW tested and approved. Acc. to DIN EN 15154-2:2006 and ANSI Z358.1-2014.
The hand-held eye showers made of stainless steel are particularly suitable for use in industry and in cleanrooms. High-performance shower heads ensure water distribution over a particularly large area at a flow rate of 7 l/min per shower head and at a minimum pressure of 1 bar.

- For table or wall mounting
- Automatic flow regulator
- Integrated backflow preventer
- Stainless steel sheathed potable water tube DN 10, length 1.5 m
- Water connection ½″ internal thread

With one spray head

Eye showers

Eye wash for flush-type wall mounting

B-Safety.

DIN-DVGW tested and approved. Acc. to DIN EN 15154-2:2006 and ANSI Z358.1-2014.
For flush-type wall mounting or replacing the cold water tap. Made of brass, with chemical-resistant powder coating. Plastic spray plate. Two wide-spraying shower heads angled by 45°. Release lever with 90° actuation. Valve not self-closing. Water connection ½″ external thread.

- With rubber sleeves that protect against injuries
- Dust cover caps that open automatically upon actuation
- Integrated flow regulator for constant water jet, even with fluctuating pressure
- Extremely wide-spraying shower heads ensure water distribution over a large area
- Large holes in the shower heads protect against calcification
- Shower heads can be easily removed for maintenance purposes
- Adhesive information label for eye shower, 150 x 150 mm

Flow rate (l/min)	Mounting	Art. No.	Pack Qty.	€

Eye wash with collection basin for surface-type wall mounting

B-Safety.

DIN-DVGW tested and approved. Acc. to DIN EN 15154-2:2006 and ANSI Z358.1-2009.
Two shower heads, distributor fork and wall flange (water connection ¾″ internal thread) made of brass, with chemical-resistant green powder coating.
Collection basin made of stainless steel, diameter 275 mm, drain connection 1¼″ internal thread. With a large release lever 240 mm long, with a large signal „PUSH“, photoluminescent as per DIN 67510. Maintenance-free ball valve, 90° operation, made of stainless steel, not self-closing.
Flow rate 14–16 l/min at a minimum operating pressure of 1 bar.
Dimensions: W (incl. lever) 425 x D 385 mm.

- Shower heads with rubber sleeves that protect against injuries
- Dust cover caps that open automatically upon actuation
- Integrated flow regulator for constant water jet, even with fluctuating pressure
- Extremely wide-spraying shower heads ensure water distribution over a large area

Eye showers

Eye wash Kleen Eyes® II

Gateway Safety.

For connection to water taps with external thread M 22 x 1. Can be started up with a simple press of a button when its use is required. Provides continuous flow of fresh water. Leaves both hands free. US patent. **Switches back** to normal tap usage **automatically** once the flow of water is shut off. The eye wash nozzles are adjustable and can be adjusted to the required angle. The eye wash itself can continue to be rotated even after it is affixed to the tap. Consequently, the eye wash can also be affixed to less easily accessible water taps and positioned as needed.

Please note

The Kleen Eyes® II eye wash does not comply with DIN EN 15154-2. The eye wash must only be used as an addition to the eye emergency safety showers as per DIN EN 15154-2.

Anti-fog spectacle cleaner	**CNH5.1**	1 unit(s)	18,05

Face shield 699 with chin guard

Univet.

Acc. to **EN 166**.

- 1 mm polycarbonate visor with 90° hinge mechanism
- Height-adjustable head frame
- Adjustable head size using elastic headband
- Exchangeable foam headband
- Can be worn with safety spectacles and respirator

Lens design	Art. No.	Pack Qty.	€
clear	**ATP6.1**	1 unit(s)	23,60

Face shield 710

Univet.

Acc. to **EN 166**. Lightweight face protection against liquid droplets and splashes.

- Clear anti-fog visor made of acetate
- Interchangeable skin-friendly terry towel lining on forehead
- Adjustable elastic head strap
- Can be worn over corrective spectacles
- Weight 97 g

Lens design	Art. No.	Pack Qty.	€
clear, anti-fog	**APY9.1**	1 unit(s)	41,40

Face shield TUFFMASTER

3M.

Acc. to **EN 166**. Protects against medium-energy flying particles and fluid and liquid metal splashes. Pane made of 2 mm strong PC (230 x 370 mm), height-adjustable and can be locked. Continuously adjustable. Soft headband made of vinyl.

Lens design	Art. No.	Pack Qty.	€
clear	**T668.1**	1 unit(s)	46,35

Face visor Polysoft

Op-D-Op.

Ultra-lightweight, made of ABS. Flexible, anti-fog, can also be worn over respiratory masks and spectacles. With forehead padding and fastening cord. Headpiece adapts to the wearer using body heat. Smallest head circumference approx. 440 mm.

Delivery incl. headgear with cord, 3 face visors and 1 mini visor.

Face shield SPHERE

Bollé.

Acc. to **EN 166, EN 170**. Also suitable for work with UV light.

- Lens made of PC (2.0 mm thick), frame made of PP
- Wide field of vision of 180°
- Adjustable headgear and headband
- Protection against chemical splashes
- Protection against medium-energy particles (120 m/s), tested at extremely high temperatures
- Protection against hot solids and molten metals

Weight 355 g. Visor size: H 205 x W 394 mm.

Lens design	Art. No.	Pack Qty.	€
clear, UV protection	**PT74.1**	1 unit(s)	30,60

Face shield

UVEX.

Acc. to EN 166 and EN 170. Robust headpiece made of PA with integrated forehead protection. Comfortable adjustment to individual head size via twist fastener. Continuously adjustable folding up mechanism. Visor made of cellulose acetate, 1 mm thickness. To protect against low-energy particles.
Dimensions: H 195 x W 540 mm. 227 g weight.

(1) 9705

Lens design	Art. No.	Pack Qty.	€
clear, UV protection, anti-fog	**HLN4.1**	1 unit(s)	46,30

Face shield RELRSI

Bollé.

Acc. to **EN 166, EN 170.** Also suitable for work with UV light.

- Ultra-light, flip-up visor
- Anti-fog acetate protective visor, thickness 1.5 mm
- Protection against chemical splashes, electrical arcs and short circuits
- Protection against flying particles, medium energy (120 m/s)
- Adjustable head strap
- Frame and headpiece made of polypropylene

200 g weight. Visor size: (H x W) 190 x 290 mm.

Lens design	Art. No.	Pack Qty.	€
clear, UV protection, anti-fog	**KP10.1**	1 unit(s)	42,30

Face shield Clearways

Honeywell Safety.

Acc. to **EN 166**. Very lightweight headgear. Replaceable visor made of PC, can be bended using the metal frame. Width of the padded headgear can be individually adjusted by a rotating ratchet mechanism. For protection against fluid splashes and low-energy flying particles. Visor dimensions: H 250 x W 205 mm. Height incl. 265 mm headpiece.

Lens design	Art. No.	Pack Qty.	€
clear	**E227.1**	1 unit(s)	39,70

Face shield Bionic

Honeywell Safety.

Acc. to **EN 166, EN 170**.

- Large visor allows for good visibility
- Polycarbonate visor for UV-protection and good colour recognition
- Anti-scratch and anti-fog
- Protection against chemical splashes
- Protection against medium-energy flying particles (120 m/s), tested at extremely high temperatures
- Visors are very easy to replace

- Can be set individually for a good fit
- Ratchet headpiece
- Frame made of robust ABS plastic
- All parts that come into contact with the head have soft padding
- Skin-friendly sweatband that can be replaced and washed
- Added protection for upper head and chin
- Can be combined with respirator or safety spectacles
- Very lightweight, weight 407 g
- Dimensions: H 31 x W 24 cm

Lens design	Art. No.	Pack Qty.	€
clear, UV protection, anti-scratch, anti-fog	**CA34.1**	1 unit(s)	91,90

Combined face and ear protection G500

3M.

Acc. to **EN 166, EN 352**. The combination consists of yellow headgear, a clear, anti-fog PC visor and Optime™ I earmuffs (insulation value 26 dB(A)). The headpiece can be set for head sizes of 54–62 cm. The visor protects against particles flying at a medium speed of 120 m/s.

- A practical and comfortable solution for all who need both face and ear protection
- Face shield and wide field of view
- Multiple combinations with safety spectacles and clear or mesh visors
- Stable construction, long service life and excellent wear comfort

Delivery incl. headpiece, PC visor, Optime™ I ear defenders.

Lens design	Art. No.	Pack Qty.	€
clear	**YT38.1**	1 unit(s)	80,55

Wall hook SEKUROKA®

ROTH SELECTION.

With information label made of rigid plastic, W 195 x L 215 mm, hook length 40 mm.

Version	Art. No.	Pack Qty.	€
for aprons	**1092.1**	1 unit(s)	15,60
for gas masks	**1091.1**	1 unit(s)	15,60

Visor mount	**NH18.1**	1 unit(s)	16,10

Helmet adapter
Connector for helmets with 30 mm slot (NH14.1 f) for attaching the visor mount without ear defenders.

Version	Art. No.	Pack Qty.	€
Helmet adapter	**AKT9.1**	1 pair	12,65

Ear defenders Peltor™ OPTIME™

3M.

Acc. to EN 352-1. With safety attachment for all hard hats with 30 mm slot system and face/ear protection G500 (YT38.1). High wear comfort and low pressure inside ear even after extended wear

- Lightweight design, optimal ear protection
- Constant pressure, liquid-filled sealing ring
- 2-point mounting

Delivery without ear defenders (NH14.1, NH15.1) please order separately.

OPTIME™ I
Flat design.
Applications: Outdoor work, building trade, engineering, woodworking, metalworking, automobile industry, farming, chemical treatment.

SNR value (db)	Art. No.	Pack Qty.	€
26	**NH12.1**	1 pair	27,60

OPTIME™ II
For high-noise environments, provides excellent sound insulation even at extremely low frequencies.
Applications: Outdoor work, building trade, airports.

SNR value (db)	Art. No.	Pack Qty.	€
30	**NH13.1**	1 pair	35,40

Hard hat Uvicator™ sensor

3M. Material: ABS UV-stabilised.

Acc. to EN 397. Made of ABS, ventilated, with sweatband. Designed for use in harsh environments with high safety requirements.

- Compatible with other auxiliary safety gear, such as ear defenders, visors or safety spectacles.
- The Peltor™ Uvicator™ sensor indicates when the helmet requires replacing.
- Short face shield allows for excellent visibility
- Ratchet system for easy adjustment to head size
- Slender, rounded shape reduces the danger of getting caught on objects such as tree branches or similar obstacles
- Multiple ventilation slots make for excellent ventilation

Particle filter masks

Cat. III

Particulate filter mask Air

Moldex.

Acc. to EN 149:2001 + A1:2009.

Protection against dust, aerosols and fumes:

- Anatomically preformed masks - adaptable to fit different face sizes
- DuraMesh®: Sturdy mask mesh keeps the mask in shape
- ActivForm®: No nose bridge required

- **Fluted filter technology: 260% more filtration area**, very low breathing resistance, high absorption capacity, long life
- All-round strap with adjustable clip for easy application, removal and adjustment
- Also available in **size S** (for small or narrow faces)

With Klimaventil®

For easy exhalation, the Klimaventil® opens at the lightest exhalation pressure and reduces heat and moisture under the mask.

Particulate filter mask Aura™ 9400+

3M.

Acc. to EN 149:2001+ A1:2009.

Specially developed for food production and- processing requirements.

- Comfortable to wear thanks to soft material, low weight and flat design; does not impede speech
- Integrated nose bridge with perspiration absorbent padding

No small parts which can become detached:

- Clip-free: Minimises the risk of contamination
- Inner adjustable nose bridge: Securely integrated into the mask
- Can be folded flat for easy carrying, individually packed
- Compatible with spectacles and eye protection
- Cool-Flow exhalation valve reduces breathing resistance and prevents build-up of heat under the mask
- Without natural rubber components

Highly recognisable:

- Metal detector: Integrated metallic nose bridge
- Visual monitoring: Blue contrast colour stands out clearly from foodstuff colours

Medical particulate filter mask Aura™ 1800+

3M.

Acc. to EN 149:2001 + A1:2009, type IIR, acc. to EN 14683:2005 (surgical masks) type IIR, acc. to 93/42/EEC, class 1.

- **Protects the user and the environment**
- Protects against particulates and aerosols
- Protects against ingress of chemical splashes, e.g. body fluid
- Suitable for lab technicians (e.g. **handling of cytostatic agents**), the pharmaceutical industry (manufacture of medicines), doctors, operating room-nurses, emergency room staff

- Three-piece design, mask adapts to many different face shapes and sizes
- Compatible with safety spectacles
- Folded flat and individually, hygienically packed for easy portability
- Integrated nose bridge with perspiration absorbent padding

Medical device class I MDD

Particulate filter mask Premium

3M.

Acc. to EN 149:2001 + A1:2009; for filtering out fine dust and non-volatile liquid particles.

- 3M™ Advanced Electret Media (AEM) is a high-performance filter material to facilitate breathing
- Consistently high filtering power
- Masks have passed the **Dolomite dust test (D)** and have an all-round lip seal, allowing them to be worn for more than one shift
- **Cool-Flow exhalation valve** prevents heat from building up in the mask and makes breathing easier
- Reduces fogging of eye protection
- 3D preformed seal around the face makes the masks exceptionally comfortable to wear and extremely safe
- Flexible material with built-in nose profile allows the mask to adapt to any face shape
- Masks do not contain components made of latex, PVC or metal
- Held securely in place by a four-part fabric strap, which is adjustable and extra-wide
- Colour-coded according to protection factor (FFP = blue, FFP3 = red)

Full/half masks

Respiratory filter with standard thread

BartelsRieger Atemschutztechnik.

Acc. to EN 14387 (gas and combined filters) and EN 143 (particulate filters). With EN 148-1 standard thread. Filter casing made of aluminium. Can be combined with respiratory half masks and full-face masks with standard thread connection.
Max. storage life of unopened gas and combined filters is six years after production.
AX and NO-filters are only intended for single use.

Respiratory filter Pro2000

3M Scott.

Acc. to EN 14387 (gas and combined filters) and EN 143 (particulate filters). With EN 148-1 standard thread. Suitable for respiratory half masks and full-face masks with standard thread connection.
Half masks are only suitable for filters weighing up to 300 g.

- Low breathing resistance
- High capacity, long life

Half mask respirator AVIVA 40

3M Scott.

Acc. to EN 140. Single-filter half masks, can be combined with respiratory filters with standard thread acc. to EN148-1. Skin-friendly thermoplastic elastomer.

- Perfect fit due to flexible inner Hybrid Reflex Seal
- User-friendly leak test function
- Easily combinable with eye protection and other PPE
- Downwards-facing respiratory filter prevents fogging of the eye protection
- Improved intelligibility due to integrated voice channel
- Comfortable and robust head harness provides better grip and is ideal for use under headgear
- Simple rear fastening makes them easy to put on and take off

Delivery without filter, suitable filters: 1270.1ff, XK35.1ff, please order separately.

Full-face mask respirator Promask

3M Scott.

Acc. to EN 136. With EN 148-1 standard thread.

- Lightweight and anatomically shaped
- Special lip seal provides a comfortable and tight fit
- Clear inner mask
- Unrestricted field of vision thanks to large visor and left side fitting filter port
- With speech diaphragm
- Outstanding wear comfort
- Easy to use

Delivery without filter, suitable filters: 1270.1ff, XK35.1ff, please order separately.

Black
Material: Butyl rubber. Made of halobutyl rubber. High resistance to chemicals ensures long service life.
Suitable for applications with CBRN (chemical, biological, radiological or nuclear) contamination.

Material	Art. No.	Pack Qty.	€

Full/half masks

Full-face mask respirator Vision 2

3M Scott. Material: Silicone, PC.

Acc. to EN 136.

- Full face mask made of soft silicone rubber
- Wide field of view (98% field of vision)
- Speech diaphragm
- Five-point head strap with snap buckle and head padding
- Adjustable neck strap
- Full-face polycarbonate visor mask is shock-resistant and anti-scratch, as well as resistant to solvents, flames and heat

Delivery without filters, suitable respiratory filters with screw thread acc. to EN 148-1 (1270.1ff, XK35.1ff), please order separately.

Half mask respirator

3M.

Acc. to EN 140. Lightweight, robust and comfortable. Strong, stable mask body with a robust but soft face seal.

- Face seal made of elastic silicone offers an optimum and comfortable fit
- Robust and adjustable headband ensures an optimum fit and high wear comfort
- 3M™ Cool Flow™ exhalation valve reduces breathing resistance, making it easy to breathe
- The flat and compact design allows a wide field of vision and makes for easy cleaning of the smooth surface
- The design of the respiratory valve passes heat and moisture downwards and reduces fogging of the safety spectacles
- Bayonet click system, compatible with 3M respiratory filter for numerous applications
- The straps and exhalation valve are available as spare parts

Delivery without filters, suitable filters: L170.1ff, L177.1, HLK8.1, HHY2.1ff and TE83.1ff, please order separately.

6500QL series

Full/half masks

Half mask respirator 6000 series

3M.

Acc. to EN 140:1998.

- Made of elastomer material
- Easy to handle and robust
- Extremely light (82 g) for fatigue-free working
- Low maintenance (exhalation/inhalation valves are non-inter-changeable)
- Reduced breathing resistance thanks to double filter system
- Good weight distribution
- Easy filter assembly using bayonet connection
- Weight 82 g

Delivery without filters, suitable respiratory filters: L170.1ff, L177.1ff, HHY2.1ff, HLK8.1ff, TE83.1ff, please order separately.

Full-face mask respirator 7907S

3M. Material: Silicone.

Acc. to EN 136. Class II: Full-face masks for normal applications.

- Mask body made of skin-friendly silicone
- Wide field of vision
- Scratch and impact resistant lens
- Lip seal ensures excellent fit
- With speech diaphragm
- Exchangeable components
- Reduced breathing resistance thanks to double filter system
- Easy filter assembly using bayonet connection

Delivery without filters, suitable respiratory filters: L170.1 ff/L177.1 ff/ L175.1 ff/HHY2.1 ff/HLK8.1 ff/TE83.1 ff.

Escape hood

Dräger.

Acc. to EN403:2004 (fire escape hoods).
Protects eyes and airways.

- High-performance respiratory filter
- Easy to put on and safe to wear, enables a quick escape
- Wide field of vision for better orientation when escaping from a fire
- Also suitable for spectacle wearers and people with beards.
- Replacing the filter extends the shelf life by a further 8 years

Delivery incl. hard case packaging, box (IP 54) protected from dust and water spray by its protective seal.

Dräger PARAT® 5530 fire escape hood
Protects the wearer from toxic combustion gases, vapours and particles for at least 15 minutes while escaping. The filter is also approved for use against H2S (2500 ppm) according to DIN 58647-7.

Earplugs

Disposable ear plugs E.A.R.® Classic II

3M.

Acc. to EN 352-2. Comfortable fit, highly sound proof.

SNR value (db)	Art. No.	Pack Qty.	€
28	**0245.1**	5 pair	4,50

Disposable ear plugs Max®

Honeywell Safety.

Acc. to EN 352–2. Made of polyurethane.

- Bell-shaped for very comfortable fit and high protection
- Optimised shape for simple insertion and to prevent slipping out
- Soft, soil-resisting outer shell prevents dirt deposits and guarantees improved hygiene
- Packed in pairs
- High insulation values

Version	SNR value (db)	Art. No.	Pack Qty.	€
with safety strap	37	**KN22.1**	100 pair	62,70
without safety strap	37	**KN21.1**	200 pair	52,90

Disposable ear plugs xact-fit

UVEX.

Acc. to EN 352-2. These innovative plugs adapt perfectly to the ears. The design for the left and right ears is modelled on the anatomy of the ear canal. This noticeably reduces the pressure in the ear canal, even after long periods of wear.

- Convenient and easy to use
- Oval shape ensures optimal wear comfort
- Foam plugs are interchangeable for maximum economy and hygiene
- PVC-free

SNR value (db)	Art. No.	Pack Qty.	€
26	**XC88.1**	50 pair	112,25

Disposable ear plugs Bilsom 303L

Howard Leight by Honeywell.

Acc. to EN 352–2. Made of highly insulating, dermatologically tested PU–foamed material (PVC–free). Conical shape for optimum fit in ear canal. Nominal size: 5–12 mm. Weight approx. 0.5 g.

(1) Hand dispensers

SNR value (db)	Art. No.	Pack Qty.	€
33	**X556.1**	100 pair	27,55

(3) Refill pack for wall-mounted dispenser

SNR value (db)	Art. No.	Pack Qty.	€
33	**Y868.1**	200 pair	48,40

Disposable ear plugs Bilsom 304L with safety strap

Howard Leight by Honeywell.

Acc. to EN 352–2. Made of highly insulating, dermatologically tested PU–foamed material (PVC–free). Conical shape for optimum fit in ear canal. Nominal size: 5–12 mm. Weight approx. 0.5 g.

SNR value (db)	Art. No.	Pack Qty.	€
33	**C493.1**	20 pair	17,80

Disposable ear plugs No-Touch

3M.

Acc. to EN 352-2. Made of slowly expanding foam. Pre-shaped, soft plugs can be used immediately.

- No need to roll up the ear plugs.
- Comes with headband, practical and hygienic
- Can be combined with other personal protective equipment

SNR value (db)	Pack.	Art. No.	Pack Qty.	€
35	individual	**KA60.1**	100 pair	117,55

Earplugs

Disposable ear plugs LASER LITE®

Honeywell Safety.

Acc. to EN 352-2. Two-tone plugs made of PU. Made of very soft foam. Adapts to the ear canal itself.

Box
Packed in pairs in a practical box (not to be used to fill the Y862.1 ear plug dispenser)

SNR value (db)	Art. No.	Pack Qty.	€
35	**Y861.1**	200 pair	51,55

Refill pack for dispenser
Suitable for refilling the Y862.1 dispenser

SNR value (db)	Art. No.	Pack Qty.	€
35	**Y861.2**	500 pair	103,35

Dispenser for ear plugs LASER LITE®

Honeywell Safety.

Made of hard-wearing, anodised aluminium. Very robust, suitable for repeated strain. Plugs can be easily removed by turning the crank. Can be filled with Y861.2 (500 pairs) and Y868.1 (200 pairs) ear plugs.

Delivery incl. mounting material, no ear plugs.

Version	Art. No.	Pack Qty.	€
Ear plug dispenser	**Y862.1**	1 unit(s)	332,20

Detectable ear plugs LASER-TRAK

Honeywell Safety.

Acc. to EN 352-2. Sound-absorbing, **able to detect**. Adapt to the ear canal and do not cause any irritation or allergies. Also suitable for use in the food industry.

SNR value (db)	Art. No.	Pack Qty.	€
35	**P907.1**	100 pair	106,00

Single-use ear plugs

UVEX.

Acc. to EN 352-2. Ergonomically shaped **disposable ear plugs** for long-term, mobile ear protection. Made of allergy-free PU foam with a proportion of synthetic elastomer.

- Pleasantly soft
- X-emboss allows for a comfortable fit and a decrease in pressure in the ear canal
- Closed surface prevents foreign matter from entering

(1) X-fit

- For larger ear canals
- For high continuous noise exposure
- Very high sound absorption levels

SNR value (db)	Pack.	Art. No.	Pack Qty.	€
37	Mini box	**1E13.1**	15 pair	9,00
37	loose in the refill box	**HE98.2**	300 pair	60,65

(2) Com4–fit

- For smaller ear canals
- For lower noise exposure

SNR value (db)	Pack.	Art. No.	Pack Qty.	€
33	Mini box	**1E14.1**	15 pair	9,00
33	loose in the refill box	**HH00.2**	300 pair	60,65

Dispenser for ear plugs X-fit and Com4-fit

UVEX.

Robust, easy-to-use dispenser.

- Automatic dispenser guarantees plugs can be economically removed, with the plugs dropping out individually upon rotation
- Lightweight and can be refilled hygienically
- Max. quantity for filling: 600 pairs
- Suitable to be filled with X-fit, Com4-fit and standard ear plugs
- Suitable for wall mounting

Delivery incl. mounting material, no ear plugs.

Version	Art. No.	Pack Qty.	€
Ear plug dispenser	**HH01.1**	1 unit(s)	47,00

Disposable ear plugs

Moldex.

Acc. to EN 352-2. Comfortable PU foam ear plugs for work that requires continual ear protection. Soft to wear, easy to insert. Ear plugs, wall mount and packaging are completely PVC-free. Bright colours make using the plugs more appealing. Hygienic dispenser system, the station is replaced for refilling.

Delivery incl. 250 pairs in the disposable dispenser station to be suspended in the wall mount (please order separately).

(1) Spark Plugs

- Anatomically pre-shaped

Manufacturer no.	SNR value (db)	Pack.	Art. No.	Pack Qty.	€
7825	35	in pairs	**KP16.1**	500 unit(s)	64,00

(2) MelLows

- Provides improved awareness of surroundings and allows for improved communication
- Particularly suitable for use in low noise exposure

Earmuffs

Earmuffs 3M™

3M.

Acc. to EN 352-1.

- Modern and attractive slim design
- Double band design for better balance and greater comfort
- Low weight
- Soft, wide sealing rings reduce the pressure on the ears and enhance wear comfort
- Innovative new attenuating pads and intermediate rings ensure improved attenuation
- New, patented foam in the sealing rings for effective protection
- The cups offer abundant space inside to minimize heat and moisture
- The sealing rings and inserts are easy to replace, for easy cleaning of the cups
- The headband of the earmuffs is dielectric (electrically insulated). The metal parts of the headband are coated with a conductive material, which means that the hearing protection an also be used with a low electrical voltage (less than 440 V AC)

Skin protection Dualin® cream

Physioderm.

Protects against **non-water soluble** and **water soluble** substances and is therefore ideal for workplaces with different working materials. Absorbs into the skin quickly, is slightly perfumed, very hypoallergenic. Free of paraffin, silicone and paraben.

Pack.	Art. No.	Pack Qty.	€
100 ml tube	**P332.1**	1 unit(s)	8,80

Skin protection HERWESAN ALL-IN-ONE cream

HERWE.

No marks left behind when handling changing work materials in metal-working, as well as in areas such as plastics engineering, precision engineering and electrical engineering.

- Easy to spread, quickly absorbed O/W skin protection emulsion
- With a new film formation system against water-soluble and hydrophobic working materials
- Non-greasing and therefore a particularly good, comfortable grip following absorption
- Cost-effective dosing system
- Silicone-free

Pack.	Art. No.	Pack Qty.	€
100 ml tube	**KN04.1**	1 unit(s)	8,75

Skin protection HERWEDERM PROTECT SENSITIVE Gel

HERWE.

For imprint-free working and frequently changing work materials; also suitable for sensitive skin types. Universally applicable, for hands and face, recommended for extremely sensitive skin types.
Application in the food industry, hospitals, nursing and retirement homes and electrical engineering. Protection against colours, grease, damp/wet, resins, adhesives, paints, oil, tar-like substances, changing applications.
Easy to apply, absorbed quickly. pH-neutral, non-greasy, free from preservatives, parabens, silicone and dyes, unscented.

Pack.	Art. No.	Pack Qty.	€
100 ml tube	**YT47.1**	1 unit(s)	9,35

Skin protection

Skin protection HERWESAN ACQUA cream

HERWE.

Hydrophobic cream, emulsion type W/O. For handling aqueous substances such as water-based coolants, drilling emulsions, diluted bases, detergent solutions, alkali and acidic cleaners, cement, lime and mortar.

- Excellent protective effect
- High adhesive strength
- High oil content
- Slightly perfumed, silicone-free

Pack.	Art. No.	Pack Qty.	€
100 ml tube	**KAL5.1**	1 unit(s)	6,35

Skin protection and skin care LINDESA® cream

Physioderm.

Oil-in-water emulsion containing natural beeswax and allantoin for care of the skin. For use in applications involving low stress on the skin or daily work in high humidity environments. Protects against skin damage and soothes irritated skin areas while smoothing and conditioning the skin. Suitable as an after work skin care cream or for conditioning stressed skin. Fast-absorbing, low-greasing, silicone-free, beeswax-scented or unscented.

Pack.	Art. No.	Pack Qty.	€
50 ml tube	**YY19.1**	1 unit(s)	5,50
100 ml tube	**YY19.2**	1 unit(s)	6,15

Skin protection and skin care LINDESA® PURE PROFESSIONAL cream

Physioderm.

Oil-in-water emulsion containing natural beeswax and allantoin for skin care. Suitable for everyday skincare. Protects against skin damage and soothes irritated skin areas while smoothing and conditioning the skin. Suitable as an after work skin care cream or for conditioning stressed skin. Contains paraben-free preservatives. Quickly absorbed by the skin, slightly oily, silicone and fragrance-free.

Pack.	Art. No.	Pack Qty.	€
100 ml tube	**KAX9.1**	1 unit(s)	6,90

Skin protection LINDESA® F PROFESSIONAL cream

Physioderm.

Oily skin protection cream, W/O emulsion with natural beeswax. Prevents skin damage when working with water and when handling diluted surfactant solutions and diluted alkalis, e.g. washing and cleaning solutions. Also suitable for skin care after working when skin is highly degreased and for protecting against cold and frost. Perfumed, silicone-free.

Pack.	Art. No.	Pack Qty.	€
100 ml tube	**KAL1.1**	1 unit(s)	8,30

Skin protection

Skin protection LINDESA® K with chamomile cream

Physioderm.

Oil-in-water emulsion that contains natural beeswax and chamomile. Particularly suitable for working environments where leaving grease marks on surfaces must be avoided, e.g. when painting, in electrical manufacturing or the final inspection. Also suitable for caring for stressed skin. Strengthens the skin's defensive function and prevents skin damage caused by external stresses. Has a normalising effect on irritated skin.
Non-greasy, fast-absorbing, scented, silicone-free.

Pack.	Art. No.	Pack Qty.	€
100 ml tube	**EEE5.1**	1 unit(s)	6,80

Skin protection physio UV 30 sun cream

Physioderm.

Skin protection cream for protection against exposure to UV-A, UV-B and UV-C radiation, with balanced protection factor UV-B 30/UVA 10.
Area of use: For protection against intensive natural UV radiation or artificial UV radiation sources.

- White, medium-moisturising W/O emulsion
- Waterproof, contains no fragrances, preservatives or petroleum
- With reflective titanium oxide UV filters (silicone coated)
- Vitamin E acetate combats ageing of the skin

Pack.	Art. No.	Pack Qty.	€
100 ml tube	**P346.1**	1 unit(s)	10,00

Skin protection Saniwip® cream

Physioderm.

Skin protection cream that protects against skin damage caused by handling **water-soluble** working materials such as acids, bases, aqueous solvents and alcohols. Prevents the skin from becoming cracked. Suitable for use in foodstuffs processing. Also suitable for the care of highly stressed skin. Contains no fragrances or silicone.

Pack.	Art. No.	Pack Qty.	€
100 ml tube	**C785.1**	1 unit(s)	7,35

Skin protection Physioderm® PROGLOVE Gel

Physioderm.

Protects the skin against the effects of skin softening when wearing gloves and other occlusive protective clothing. Transparent fragrance- and grease-free gel containing alcohol. Hamamelis and chitin protect the upper layer of the skin while bisabolol and glycerine moisturise and soothe the skin. HACCP-compliant, perfume- and fragrance-free. Silicone- and grease-free.
Matching dispenser for AH81.2: YY16.1.

Skin cleansing

Hand cleansing Baktolin® pure cleansing lotion

BODE Chemie.

Cleansing lotion for gentle cleaning.
Areas of application: Due to the lack of fragrance and colourants, Baktolin® pure is particularly suitable for sensitive skin. The pH value of 5.5 conserves the skin's natural acid-protection layer. At the same time, this makes the product ideal for use in food-processing fields, in which detrimental effects on the goods to be processed are to be avoided.

- Fragrance-free and colourant-free
- Free of alkali and soap
- Skin-neutral pH value of 5.5

Pack.	Art. No.	Pack Qty.	€
