Hand sanitiser Sterillium® classic pure

BODE Chemie.

Hygienic and surgical rub-in hand disinfectant. Ideal for users with sensitive skin (colorant and fragrance free). For all hygiene-sensitive clinical and industrial applications.
Efficacy range: bactericidal, tuberculocidal, limited virucidal efficacy (incl. HBV, HIV, HCV). Effective against herpes simplex, influenza A, SARS coronavirus, adeno-associated viruses, polyoma virus and rotavirus.
Listing: BfArM Approval No. 25918.00.00, RKI list area A, VAH certification, IHO list for virucidal products. Actual product not shown (similar).

Sterillium classic pure: Active substances : propan-2-ol, propan-1-ol, mecetronium ethyl sulphate. Composition: 100 g solution contains: Active substances: 45.0 g propane-2-ol, 30.0 g propane-1-ol, 0.2 g mecetronium ethyl sulphate. **Other ingredients:** 85 % glycerol, tetradecane-1-ol, purified water. **Areas of application:** for hygienic and surgical hand disinfection. For skin disinfection prior to injections and punctures. **Contraindications:** unsuitable for the disinfection of mucus membranes. Do not use in close proximity to the eyes or open wounds. Do not use in case of hypersensitivity (allergic reaction) to one of the active substances or other ingredients. **Side effects:** slight dryness or irritation of the skin may occasionally occur. In such cases, more intensive general skin care is recommended. Allergic reactions are rare. **Warnings:** hand disinfection helps prevent the transmission of infection, e.g. in nursing and health care. Sterillium classic pure should not be used on newly or prematurely born infants. Always consult a doctor prior to use on infants and small children. It is important to ensure that the solution does not come into contact with the eyes. After contact with the eyes, rinse the eyes under running water for several minutes holding the eyelids open. Avoid transferring the solution from one container into another in order to prevent contamination. If this is unavoidable, the solution should be transferred under aseptic conditions (e.g. using sterile containers under a laminar air flow hood). Wait until dry before using electrical devices. Do not expose to naked flame. Do not use in the vicinity of ignition sources. Flash point: 23 °C, flammable. There are no fire or explosion hazards associated with the proper use of this product. After spillage of the disinfectant, the following steps should be taken: soak up the spilt liquid straight away, dilute with copious amounts of water, ventilate the room and remove ignition sources. UV PCR chamber

Cleaver Scientific.

- This chamber offers a practical area for making PCR preparations in a decontaminated environment which is free from nucleic acid
- The powerful UV light denatures nucleic acid in 5-30 min.
- Efficient decontamination of the entire working area
- The duration of UV radiation can be set via a timer
- The white light ensures outstanding visibility while working
- Safety functions prevent users from being exposed to the UV light
- Safety switches on the doors automatically switch off the UV light when the chamber is opened
- Lighting: 4 x 15 W UV light tubes and 1 x 15 W white light lamp
- The chamber walls are impermeable to UV light and protect against ß radiation, meaning that it is also suitable for work with ^{32}P and other ß rays
- Can be used with protection trays and a protection tray insert (680 x 540 mm)

Thermal transfer labels

Diversified Biotech.

White, angular cornered labels with acrylate-based adhesive backing. Excellent adhesion to plastic, glass or metal at low temperatures without drying out or peeling off. Care must be taken to ensure that glass and metallic surfaces are absolutely free of oil and grease. Resistant to abrasion, chemicals and moisture.
Can be used for refrigerators and freezers and in cryo conditions (liquid nitrogen) (for Cryo Tags®).
Can be removed without leaving any residue. Coated for use with a resin ribbon. Designed for high resolution and very precise labelling, e.g. for barcode. Suitable for most thermal transfer printers.
Wound externally, 25.4 mm (1 inch) roll core, **2000 labels per roll**.

Safety funnels for barrels

Rötzmeier. Material: Stainless steel, Sealing ring made of PE.

Screw-on safety funnels for safe filling of all containers with a 2-inch female fine thread. With lid, overfill protection, flame arrester and earth connection.

- The flame arrester, which reaches far into the container (approx. 150 mm long), prevents the ingress of sparks and can be unscrewed for cleaning or replacement.
- For conductive containers, earthing is realised by the thread (direct contact); an additional earth connection is provided for other containers.
- The flap lid reduces the emission of volatile, harmful vapours and needs to be closed manually.

Collecting tray GRP 65 l

Cemo. Material: Plastic (GRP), glass-fibre reinforced, Grate made of galvanised steel.

Z-40.12-227 technical approval.
GRP combines the properties of steel and plastic and is therefore a material that can be used universally for storing hazardous materials correctly. The collecting trays demonstrate good fire behaviour and high chemical resistance. Due to their absolute corrosion resistance, GRP collecting tray can be placed directly on the ground. The low installation height facilitates easy handling in factories. Long-lasting, UV-resistant, recyclable. Suitable for small containers such as bottles and canisters. 65 l retention capacity. Stereo zoom microscope OZL-46 series

Kern.

All-round stereo microscope with zoom function for schools, training workshops and laboratories.

- With extra-wide field eyepieces for greater vision angle, thereby ideal for people who wear glasses
- Reflected light and transmitted light can be controlled separately

Optional accessories (please order separately):

- Widefield eyepieces and attachment lenses for modulating the total magnification

Technical specifications:

Art. No.	HHE7.1	HHE8.1
Type	OZL 463	OZL 464
Tube	Binocular	Trinocular
Total magnification	7x to 45x – can be expanded up to 180x as an option	
Magnification type	Zoom	
Ocular magnification	Super wide angle (HWF) 10x	
Lens magnification	0.7–4.5x	
Field of view	20 mm	
Dioptre compensation	±5 dpt on both ocular tubes	
Angular observation	45 °	
Head	Can be rotated 360°	
Distance between eyepieces	55–75 mm	
Working distance	105 mm	
Light source	LED	
Type of lighting	Incident light and transmitted light	
Image focusing	Coarse focus	
Power supply	Mains-powered	
Mains connection	100–240 V, 50/60 Hz	

Total magnification when combining different eyepieces/lenses:

Eyepiece	Lens			
	Magnification	Standard 1x[1]	0.5x ancillary	2.0x ancillary

Stereo zoom microscope OZL-456

Kern.

Stereo microscope with large zoom range.

- Integrated LED ring light in the lens housing for uniform illumination of the specimen without shadows
- Visual field and working distance magnified through high super-widefield lenses
- The greater viewing angle of the HSWF eyepieces is particularly suitable for people who wear glasses
- Reflected light and transmitted light can be controlled separately

Optional accessories (please order separately):

- Widefield eyepieces and attachment lenses for modulating the total magnification

Technical specifications:

Art. No.	HHH3.1
Type	OZL-456
Tube	Binocular
Total magnification	7.5x to 50x - can be expanded up to 100x as an option
Magnification type	Zoom
Ocular magnification	High super-widefield 10x
Lens magnification	0.75–5x
Field of view	23 mm
Dioptre compensation	±5 dpt on both eyepiece tubes
Angular observation	45 °
Head	Can be rotated 360°
Distance between eyepieces	55–75 mm
Working distance	113 mm
Light source	LED
Type of lighting	Incident light and transmitted light
Image focusing	Coarse focus
Power supply	Mains-powered
Mains connection	100–240 V, 50/60 Hz

Total magnification when combining different eyepieces/lenses:

Microscope cameras

Microscope camera ODC series

Kern.

For conventional microscope use, and for demanding applications (e.g. darkfield, phase contrast and fluorescence).

- Fast and clear image transmission with proven CMOS technology
- USB 2.0 data transmission adequate for static samples. USB 3.0 version recommended for living samples (faster transmission without stalling)
- Multilingual software available. With the streaming, photo snapshot and video functions. Various measuring functions such as distance, surface and angular measurement, as well as manual counting possible. Image processing and documentation functions included
- Mounting possible either via C-mount connection on the third tube of the microscope or via the eyepiece.
- Suitable C-mount adapter is provided by the microscope manufacturer. Eyepiece adapter (Ø 23.2 mm) and adapter rings (Ø 30.0 mm and 30.5 mm) are also supplied
- Supports the following operating systems: Win XP, Vista, 7, 8, 10

Microscope camera Moticam S series

Motic.

For diverse applications in day-to-day microscopic work in which data processing is carried out directly on the PC.

- Can be mounted via C-mount connection on the third tube of the microscope; the microscope manufacturer provides appropriate C-mount adapters
- New sCMOS technology for high frame rates and optimal image quality; maximum sensitivity for applications with low light output
- Faster data reading for recording rapid phenomena via USB 3.1 gen.1 connection; USB 2.0 compatibility for older computers ensured
- Supported operating systems: Windows XP and later versions, Apple Mac OSX and Linux
- Minimum system requirements: 2 GHz dual-core, 2 GB RAM, min. 512 MB video memory
- Software functions: Still image and video, live and still image measurements, image enhancement, white balance, automatic and manual exposure time, individual calibration

Transilluminators

UV hand-held lamp

Herolab.

Suitable for fluorescence excitation in microbiology, material technology, mineralogy, botany, etc. The lamps have two wavebands (254 nm/365 nm) and each lamp is switchable. Complete with power cord, on and off switches and handle.

Optional accessories (please order separately):

- Table tripod made of metal

Refractometers

Handheld refractometer analogue

Kern.

For measuring the refractive index of transparent substances in a liquid state.

- Eyepiece with dioptre compensation
- Scale is precisely calculated and checked, with very thin and clear lines
- Without or with automatic temperature compensation (ATC)
  Measuring temperature with ATC: 10 to 30 °C
  Measuring temperature without ATC: 20 °C

Delivery incl. calibration solution and storage box.

Refractometers

Handheld refractometer digital ORF series

Kern.

Digital refractive index measuring instrument for laboratories and industry.

- Compact, rugged design
- Dust and splash-proof according to protection class IP 65
- With automatic temperature compensation (ATC)
- Measuring temperature with ATC: +5 to +40 °C (Accuracy ±0.5 °C)
- Depending on model, measured value is output on different measurement scales
- Auto-off function after 90 seconds

Technical specifications:

Abbe refractometer ORT 1RS

Kern.

For determining the refraction index of transparent liquids, solids and paste-like samples. Usage: Laboratory/industry/pharmaceuticals.

- Easy-to-use, rugged design
- Eyepiece with dioptre adjustment
- Scale refers to +20 °C
- Includes thermometer for reading the measuring temperature
- Calibrated with distilled water or calibration block and special contact fluid
- Can be connected to a water circulation system for temperature control of measurement prism and illumination prism (outer diameter of connecting piece: 9.5 mm)

Optional accessories (please order separately):

- Transport and storage box made from aluminium

Temperature measurement

Colour-change chalk irreversible

ROTH SELECTION.

For temperature monitoring by colour change on devices and apparatus. Adhere to paper, rubber, textiles, plastic, glass, iron and steel. Can also be used in processing aluminium, enamel processing and smelting. Colour changes when the temperature is reached within 1–2 seconds.

Temperature limiter for thermometers

Dostmann.

Reference bodies for constant temperature measurement in fridges. Prevents large temperature variations, e.g. due to frequent opening of the fridge door. The sensor is inserted into one of the custom-fitting holes and fixed with a screw. The reference object acts as a buffer and provides a homogeneous temperature distribution, because mass (and not air) is measured.
Suitable for sensors with Ø 3.5 mm, 4.2 mm and 5.0 mm.

Technical specifications:

Art. No.	PT43.1

Temperature measuring device testo 112 with proof of conformity

Testo.

Applications:

- For official measuring by authorities, institutions and expert assessments
- For measuring the product temperature in food production facilities
- For routine measurements in day-to-day work
- For test measurements during chilled transportation

Properties:

- PTB type test
- Integrated self-testing
- If the adjustable limit values are exceeded or not met, there is an immediate audible alarm from the measuring device
- Light-up display
- Min./max. values
- Declaration of conformity for device and sensor

Note:
A new calibration law (MessEG) and new calibration regulations (MessEV) came into force in Germany on 1st January 2015. The previous initial calibration procedure has been be replaced by a new procedure, the so-called conformity assessment procedure. Instead of the certificate of calibration, a declaration of conformity is now issued by the equipment manufacturer and checked by a conformity assessment agency (e.g. Office of Weights and Measures).
Equipment can, as before, be recalibrated after two years through any Office of Weights and Measures.

Data logger LOG32 series

Dostmann.

For measurement data monitoring, e.g. storage and transport conditions, production facilities, greenhouses and refrigerators.

- Pre-programmed data logger (measuring interval: 5 min), ready for immediate use
- Automatic data output as PDF file, no driver installation required
- Integrated USB port
- Windows-compatible software is available for programming the logger (e.g. measuring cycle, alarm limits, start and end times for recording), please download free of charge
- Status and alarm LEDs with audible signal

Data logger SterilDisk

Dostmann.

For monitoring and recording temperature data in the pharmaceutical and medical fields and in laboratories and food production plants (e.g. for sterilisation and pasteurisation).

- High temperature range
- Waterproof and pressure-tight
- Housing made of food-grade steel AISI316L
- Please download windows-compatible software (logger programming, reading data, graphic and tabular representation, printing data) free of charge.
  Please order the required disk interface with USB cable separately.
  Automatic calculation of F0, Z and N values possible

Technical specifications:

Art. No.	ENE3.1
Type	SterilDisk
Parameters	Temperature
Temperature measuring range	-20 to +140 °C
Temperature accuracy	±0.2 °C (+25 to +140 °C)

Non-contact measurement from a safe distance.

- Reliable IR measurement up to +600 °C with display of min/max values
- **Mini TE input for NiCr-Ni (type K) thermocouple sensor available**
- Four-point laser indicates the exact measuring range, and thus prevents incorrect measurements
- 50:1 lens allows precise measurements at a great distance (5 m distance = 10 cm measured surface)
- Adjustable emission level (0.10 to 1.00) allows the measurement of a variety of surfaces
- Integrated emission level table (stores 20 values) allows the fast selection of the correct emission level for the relevant surface
- With freely adjustable alarm management upper and lower levels; acoustic and visual signals indicate if a limit value is exceeded
- Stores up to 200 measurement values, evaluation using software supplied
- Illuminated display for measurements in dark environments

Thermohygrometer testo 625

Testo.

Two-line display for displaying relative humidity or dew point, as well as temperature. With integrated capacitive humidity sensor head for measuring air humidity and temperature. When measuring in hard-to-reach positions, the humidity sensor head can be removed and plugged into the handle with the sensor cable (please order separately).
Wireless transfer of the measured value to the measuring device is also made possible by the remote handle and wireless module (please order separately).

- Hold button for recording the measured values
- Light-up display
- Auto-Off function

Technical specifications:

Thermohygrometers

Thermohygrometer HygroPalm 32

Rotronic.

For determining relative humidity and temperature. Psychrometric calculations possible.

- Can also be used for measuring relative humidity and temperature in powders and granulates (only with Pro insertion probe)
- Functions: Point recording, programmable recording interval
- Graphical display of measured values for up to four values
- Freely adjustable visual and audible alarm for every value
- Memory for 64,000 data points
- Data transfer and battery charging via Micro USB cable
- Long battery life (up to 48 hours with a recording internal of 30 s)
- Housing material: ABS, TPR
- Windows-compatible software (for configuring the device and reading the data); please download free of charge. Requisite licence key (for up to three devices) included in the delivery.

Test swabs Aquadur®

ROTH SELECTION.

Quick test to guide semi-quantitative determination of **water hardness (total hardness)**.
Measuring range of 0 °d to more than 25 °d.
Conversion: 1 °d = 1.8 °f = 1.25 °e = 17.8 mg/l $CaCO_3$.
One box contains 100 test strips W 6 x L 95 mm.

Application:
The test strip is briefly dipped into the water to be measured. After approximately one minute, the colouring that has appeared can be compared to a colour scale and the hardness range can be determined.
Caution: The test paper must not come into contact with fingers.

Test swabs QUANTOFIX®

Macherey-Nagel.

For semi-quantitive determination of various substances. The test swabs consist of a 0.2 mm-thick plastic strip with testing paper affixed to the lower end. After the test strip has been moistened, the colouration that appears is compared to a colour scale on the side of the can. The concentration value can be read or a concentration range can be estimated. Dimensions: W 6 x L 95 mm.

Round cuvette test NANOCOLOR®

Macherey-Nagel.

Quick tests for photometric analysis. Reagents and additional reagents are precisely pre-dosed for optimum accuracy and correctness of measured results. Convenient, safe removal of round cuvettes (external diameter 16 mm) from the stable box with coloured pictograms providing step-by-step instructions on the cover. Batch-specific information can be accessed via a 2D bar code on the reverse of the packaging.
For example, NANOCOLOR® round cuvette tests are suitable for use with the PF12^{Plus} photometer.

Photometer PF-12^{Plus} for water experiments

Macherey-Nagel.

Portable photometer for use in the laboratory and the field, with pre-programmed Visocolor® ECO and Nanocolor® round cuvette tests. Nephelometric turbidity measurement possible (1-1000 NTU).

- Illuminated graphic display
- Automatic wave length setting
- Cuvette rack for round cuvettes, with 16 mm OD
- USB port for data transfer and power supply
- Dust and waterproof casing acc. to IP 68

Technical specifications:

Art. No.	**LP73.1**
Type	PF-12^{Plus}
Optics	Automatic filter wheel with seven interference filters
Light source	Wolfram lamp
Wavelength	345/436/470/540/585/620/690 nm
Accuracy	±2 nm
Photometric range	±3 E
Photometric correctness	±1 %
IP rating	68
Data memory	1000 measured values, GLP-compliant
Port	USB 2.0
L x W x D	215 x 100 x 65 mm
Power supply	Batteries: 4 x 1.5 V AA

Delivery incl. Software DVD, batteries, 4 empty cuvettes, funnel, beaker, syringe, USB cable, calibration cuvette and transport case. If required, please order USB connector separately.

Photometer MD100 for chlorine

Tintometer.

For free, bound and total chlorine.

- Internal ring buffer for 16 datasets with real-time clock and date
- Auto-Off function
- Countdown function to maintain reaction time

Determination of chlorine content using reagent tablets.

- For measuring free chlorine with DPD No. 1
- For measuring total chlorine with DPD No. 1 + DPD No. 3

For checking the degree of accuracy and reproducibility of measured results with a reference standard kit (please order separately).

Technical specifications:

Art. No.	**YE08.1**
Type	MD100
Measuring range	0.01 to 6 mg/l
Resolution	0.01 mg/l
Optics	LEDs, interference filter and photosensor
Light source	LED
Wavelength	530 nm
Accuracy	±0.05 mg/l (0 to 1 mg/l) ±0.10 mg/l (1.01 to 2 mg/l) ±0.20 mg/l (2.01 to 3 mg/l) ±0.30 mg/l (3.01 to 4 mg/l) ±0.40 mg/l (4.01 to 6 mg/l)
Photometric correctness	FS 3 %
IP rating	68
Operating temperature	+5 to +40 °C
L x W x D	155 x 75 x 35 mm
Weight	260 g
Power supply	Batteries: 4 x 1.5 V AAA

Delivery incl. three glass round cuvettes with lids, 1 stirring rod, 1 brush, DPD No. 1 + No. 3 reagent tablets, plastic case and batteries.

Turbidimeter TB 211 IR

Tintometer.

The wide measuring range from 0.01 to 1100 NTU (= TE/F = FNU) with a detection limit of 0.01 NTU gives this device a versatile range of applications, from waste water to drinking water. For coloured and colourless water.

- Backlit LCD display
- AUTO-OFF function after 10 minutes to prolong battery life
- Internal ring buffer for 16 datasets with real-time clock and date
- Membrane keyboard
- With USB interface for direct transfer of measured values to a PC

Technical specifications:

Art. No.	**LP38.1**
Type	TB 211 IR
Measuring range	0.01 to 1100 NTU
Resolution	0.01 NTU (0.01 to 9.99 NTU), 0.1 NTU (10 to 99.9 NTU), 1 NTU (100 to 1100 NTU)
Optics	Temperature-compensated LED (Wave length: 860 nm)
Light source	Infrared
Accuracy	±2.5% of measured value or 0.01 NTU (0 to 500 NTU) ±5% of measured value (500 to 1100 NTU)
Data memory	Internal ring buffer for 16 datasets
Operating temperature	+5 to +40 °C
L x W x D	190 x 110 x 55 mm
Weight	400 g
Power supply	Battery: E-Block 9 V

Delivery incl. four turbidimeter standards (<0.1, 20, 200, 800 NTU), batteries, 2 cuvettes, USB cable and transport case.

pH-papers

pH indicator paper ROTILABO® Eco

ROTH SELECTION.

For fast and accurate measurement of the pH value of liquids. pH indicator paper treated with coloured indicator solutions. Dip in the solution being tested, then compare the colour change with the colour scale. Dispenser with notched rim and small tear-off edge for easier handling. By roll, 8 mm width and 5 m length.

Delivery incl. dispenser with indicator paper and colour chart.

pH single-rod measuring cell LE series

Mettler-Toledo.

Affordable pH single-rod cells for various applications.

Delivery incl. fixed cable (length 1 m).

(1) LE407
Tough with plastic shaft and gel electrolyte, suitable for simple applications and straightforward samples such as water.

Technical specifications:

Art. No.	TC47.1
Type	LE407
pH range	0 to 14
Operating temperature	0 to +80 °C
Diaphragm	Nylon
Reference system	Ag/AgCl
Electrolyte	Gel
Maintenance-free	Yes
Storage solution	3 mol/l KCl
Shaft length	120 mm
Ø Shaft	12 mm
Shaft material	POM
Temperature sensor	without
ISM Technology	No
Connection	BNC (pH)

Type	Art. No.	Pack Qty.	€
LE407	**TC47.1**	1 unit(s)	101,00

(2) LE409
With glass shaft and liquid electrolyte for simple and quick measurements in the laboratory, suitable for aqueous samples such as acids, bases, etc.

Technical specifications:

Art. No.	HY58.1
Type	LE409
pH range	0 to 14
Operating temperature	0 to +80 °C
Diaphragm	Ceramic
Reference system	Ag/AgCl
Electrolyte	3 mol/l KCl + AgCl
Maintenance-free	No
Storage solution	3 mol/l KCl
Shaft length	120 mm
Ø Shaft	12 mm
Shaft material	Glass
Temperature sensor	without
ISM Technology	No
Connection	BNC (pH)

Type	Art. No.	Pack Qty.	€
LE409	**HY58.1**	1 unit(s)	123,50

(3) LE410
With glass shaft, liquid electrolyte and integrated temperature gauge for quick, easy measurements in the lab. Suitable for aqueous samples (e.g. acids, bases, etc.) with changing temperatures.

Technical specifications:

Art. No.	1L80.1
Type	LE410
pH range	0 to 14
Operating temperature	0 to +80 °C
Diaphragm	Ceramic
Reference system	Ag/AgCl
Electrolyte	3 mol/l KCl + AgCl
Maintenance-free	No
Storage solution	3 mol/l KCl
Shaft length	120 mm
Ø Shaft	12 mm
Shaft material	Glass
Temperature sensor	NTC 30 kΩ
ISM Technology	No
Connection	BNC (pH), Cinch (°C)

Type	Art. No.	Pack Qty.	€
LE410	**1L80.1**	1 unit(s)	212,00

(4) LE438
With plastic shaft and integrated temperature gauge for field applications and samples with variable temperatures.

Technical specifications:

Art. No.	HY59.1
Type	LE438
pH range	0 to 14
Operating temperature	0 to +80 °C
Diaphragm	Nylon
Reference system	Ag/AgCl
Electrolyte	Gel
Maintenance-free	Yes
Storage solution	3 mol/l KCl
Shaft length	120 mm
Ø Shaft	12 mm
Shaft material	POM
Temperature sensor	NTC 30 kΩ
ISM Technology	No
Connection	BNC (pH), Cinch (°C)

Type	Art. No.	Pack Qty.	€
LE438	**HY59.1**	1 unit(s)	196,50

(5) LE420
With glass shaft and PTFE sliding sleeve for demanding or contaminated samples such as wastewater, suspensions, emulsions, viscous samples, low-ion media, TRIS buffers.

Technical specifications:

Art. No.	NP41.1
Type	LE420
pH range	0 to 14
Operating temperature	0 to +80 °C
Diaphragm	Ground joint
Reference system	Ag/AgCl
Electrolyte	3 mol/l KCl
Maintenance-free	No
Storage solution	3 mol/l KCl
Shaft length	120 mm
Ø Shaft	12 mm
Shaft material	Glass
Temperature sensor	without
ISM Technology	No
Connection	BNC (pH)

Type	Art. No.	Pack Qty.	€
LE420	**NP41.1**	1 unit(s)	184,00

(6) LE422
Micro-pH single-rod measuring cell with gel electrolyte, suitable for small samples in sample tubes and test tubes.

Technical specifications:

Art. No.	NP42.1
Type	LE422
pH range	0 to 14
Operating temperature	0 to +80 °C
Diaphragm	Ceramic
Reference system	Ag/AgCl
Electrolyte	Gel
Maintenance-free	Yes
Storage solution	3 mol/l KCl
Shaft length	90 mm
Ø Shaft	4.3 mm
Shaft material	Glass
Temperature sensor	without
ISM Technology	No
Connection	BNC (pH)

Type	Art. No.	Pack Qty.	€
LE422	**NP42.1**	1 unit(s)	210,00

(7) LE427
Thanks to its pointed diaphragm, this product is ideally suited to solid samples such as meat, fruit, cheese, soil samples and many more.

Technical specifications:

Art. No.	TH61.1
Type	LE427
pH range	0 to 11
Operating temperature	0 to +50 °C
Diaphragm	Ceramic
Reference system	Ag/AgCl
Electrolyte	Gel
Maintenance-free	Yes
Storage solution	3 mol/l KCl
Shaft length	17 mm
Ø Shaft	6 mm
Shaft material	Glass
Temperature sensor	without

(1) Easy

For general applications in the laboratory and outdoors. With ARGENTHAL™ reference system for a long pH single-rod measuring cell service life: Electrolyte with no silver ions, preventing the diaphragm becoming clogged with sulphides.

Type	Art. No.	Pack Qty.	€
InLab® Easy	**H948.1**	1 unit(s)	126,50

(2) Routine

For aqueous solutions in general; quick and extremely resistant to chemicals.

Tough HA diaphragm glass, specially designed for use at high pH values, reduces alkali errors to a minimum. With ARGENTHAL™ reference system for a long pH single-rod measuring cell service life: Electrolyte with no silver ions, preventing the diaphragm becoming clogged with sulphides.

pH single-rod measuring cell InLab® with ISM® technology

Mettler-Toledo.

High-quality pH single-rod measuring cells for temperature-compensated measurements.

Thanks to the Intelligent Sensor Management (ISM®) system, all important data is stored in the sensor and automatically sent to ISM®-compatible measuring devices.

(1) Expert Go-ISM®

Wide range of applications including emulsions, suspensions, wastewater and solutions containing proteins and sulphides.

With IP67 protection for waterproof measurements with FiveGo™, Seven2Go™ and SevenGo Duo™ measuring devices.

PEEK shaft with excellent chemical and mechanical resistance for extreme strain.

The use of a solid polymer as a reference electrolyte means that there is no diaphragm which could become clogged.

With ARGENTHAL™ reference system for a long pH single-rod measuring cell service life: Electrolyte with no silver ions, preventing the diaphragm becoming clogged with sulphides.

Technical specifications:

Art. No.	LN43.1
Type	InLab® Expert Go-ISM®

Benchtop pH meters SevenCompact™ S220

Mettler-Toledo.

- All important data at a glance, thanks to the high-resolution colour display (4.3″) with large digits and clear symbols.
- Simple and intuitive to use; menus with complete sentences in 12 languages.
- Electrode arm is easy to operate with one hand; electrode can be positioned securely by moving it up and down.
- Calibration with predefined and user-specific buffers and buffer groups is possible; calibration memory with optional sensor lock setting available; quality of the most recent sensor calibration shown directly via pH sensor symbol.
- Comprehensive safety functions both for routine measurements and measurements under strict GLP specifications.
- With two operating modes: In Routine mode, it is not possible to delete data or change settings; in Expert mode (secured with PIN code), all functions can be used by an authorised user.
- Internal measured value memory: Saving by pressing key or timed (intermittent) saving (interval can be set between 1 s and 40 min).
- USB ports for exporting data via USB stick (datasets are exported as a text (.txt) file) or for connecting a USB keyboard.
- Intelligent Sensor Management (ISM®) for automatic recognition of ISM® sensors and reading in calibration data.
- Sustainable with highest Energy Star rating for the power supply (low energy loss, low heat generation) and environmentally friendly packaging.

Combi table-top multimeter SevenCompact™ Duo S213

Mettler-Toledo.

- All important data at a glance, thanks to the high-resolution colour display (4.3″) with large digits and clear symbols.
- Simultaneous measurement and display of pH value and conductivity is possible.
- Simple and intuitive to use; menus with complete sentences in 12 languages.
- Electrode arm is easy to operate with one hand; electrode can be positioned securely by moving it up and down.
- Calibration with predefined and user-specific buffers and buffer groups is possible; calibration memory with optional sensor lock setting available; quality of the most recent sensor calibration shown directly via pH sensor symbol.
- Comprehensive safety functions both for routine measurements and measurements under strict GLP specifications.
- With two operating modes: In Routine mode, it is not possible to delete data or change settings; in Expert mode (secured with PIN code), all functions can be used by an authorised user.
- Internal measured value memory: Saving by pressing key or timed (intermittent) saving (interval can be set between 1 s and 40 min).
- USB ports for exporting data via USB stick (datasets are exported as a text (.txt) file) or for connecting a USB keyboard.
- Intelligent Sensor Management (ISM®) for automatic recognition of ISM® sensors and reading in calibration data.
- Sustainable with highest Energy Star rating for the power supply (low energy loss, low heat generation) and environmentally friendly packaging.

Combined measuring instruments

Combi table-top multimeter SevenExcellence™

Mettler-Toledo.

Modular professional system for measuring various parameters. Up to three modules can in be connected to a basic unit in variable configurations. This means that up to three parameters can be measured in one or more samples.

- High-resolution 7-inch colour display with touchscreen control
- Intuitive menu structure with full-text display (in 10 languages)
- 4-level user management hierarchy with different access rights
- Automatic calibration
- Flexible buffer selection and make-up; pH buffers from various groups can be combined with one another
- Automatic and manual temperature compensation
- Direct measurement or individual analysis methods (for standard conditions)
- Individual, intermittent or series measurement
- Automatic calculation of statistical data (mean values, standard deviation)
- Intelligent Sensor Management (ISM®) for automatic recognition of ISM® sensors and reading in calibration data
- GLP support (PIN protection, GLP-compliant printouts containing all relevant data and monitoring of measurement limits)
- Radio clock for precise display of time and date
- Data storage (20,000 measuring values, 250 analyses)
- Data export with USB stick or LabX®direct PC software

Laboratory cooling water monitor AQUASTOP® II

ROTH SELECTION.

For monitoring cooling water flow and temperature in the laboratory. For installation in apparatus that runs without permanent supervision. Power supply and water supply are cut off in case of irregularities or when the preset temperature limit is exceeded.

Application:

- If the flow rate drops below the preset minimum level, the solenoid valve shuts off the coolant supply and connected electrical device (e.g. heating mantle) is de-energised.
- If the maximum temperature is exceeded, the solenoid valve stays open, the apparatus continues to be cooled and the electrical device is de-energised.

The temperature at the coolant outlet is recorded by the internal NTC sensor integrated in the flow sensor. As an option, an external Pt 100 temperature sensor which automatically deactivates the internal sensor can be installed in a freely selectable position on the test set-up (if required, please order separately).

Features:

- 2-line LED display for simultaneous display of flow rate and temperature
- LED for switching status and alarm indication
- Freely selectable alarm limits
- Acoustic pre-alarm alerts user before final deactivation
- With Schuko socket on the back

Application:

- Function programs for number of items, recipe, percentage weighing and animal weighing

Features:

- Stainless steel weighing platform
- With external calibration
- With RS 232 data port
- A draft shield ring is also supplied with Art. No. LY72.1
- Suitable for battery and mains operation
- AUTO-OFF after 3 minutes to prolong battery life

Delivery incl. power supply unit and protective hood. Please order batteries separately. An E-Block 9 V battery is required.

Precision balances, explosion protected EK series

A & D.

For explosive areas in zones 0.1 and 2.

Application:

- Item counting and percentage weighing
- Acc. to ATEX: II 1G ia IIB T3 Ga
- With external calibration

Features:

- Backlit display, can be deactivated
- Auto power OFF to prolong battery life (battery life approx. 250 h with backlight off)
- Weighing pan made of stainless steel
- Anti-theft lug, level indicator, levelling feet

Delivery incl. 4 x 1.5 V AA batteries. Please note: Use only type-tested replacement batteries (see operating instructions).

Semi-micro and analytical balances ALJ series

Kern.

Application:
Function programs: Item counting, percentage weighing, weighing with a tolerance range, animal weighing function and recipe

Features:

- With internal automatic calibration if temperature changes by ≥1.2 °C and time-controlled every 3 hours
- Available with or without an ionizer:
  Ionizer to neutralise electrostatic charge.
  The ionizing blower is activated by pressing a button.
- RS 232 data port
- Dimensions of weighing space with draft shield:
  W 160 x D 140 x H 205 mm; (W) = incl. draft shield
- Overall dimensions (incl. draft shield) W 210 x D 340 x H 330 mm

Analytical and precision balances Entris® II series

Sartorius.

Application:

- Item counter, percentage weighing, dynamic weighing (weighing animals), check weighing, components/totalling and maximum value

Features:

- Hybrid display with combined LED and touchscreen technology
- All balances are available with external adjustment or with a fully automatic, internal temperature and time-controlled adjustment function
- Glass draft shield with three sliding doors for models with 0.0001/0.001 g readability (interior height 240 mm); (W) = incl. draft shield
- Eight different menu language options can be selected
- USB-C port with “PC direct” function which makes connecting to a PC easy, for transferring weighing data directly to tables or documents, like Microsoft® Excel or Word
- With RS-232 port
- **Monolithic weighing technology**

Delivery incl. mains adapter.

Analytical and precision balances Practum® series

Sartorius.

Application:

- Percent, checking, maximum value, counting, animal weighing
- Selectable weight units: g, kg, mg, ct, etc.
- Made in Germany

Features:

- With external calibration function
- Touchscreen operation
- 10 different menu language options can be selected
- Full-sized draft shield for models with 0.0001 g/0.001 g readability (internal height 209 mm); (W) = incl. draft shield
- Mini USB port for automatic detection of YDP40 Sartorius standard printer (please order separately) or direct data transfer, e.g. to Microsoft® Excel, without additional software. Programmable interval for data output.
- Menu lock for protection against accidental manipulation
- Levelling feet and glass level indicator on the front
- Anti-theft loop for chain or cable
- Models with 0.01 g, 0.1 g and 1 g readability incl. protective cover for operation

Delivery incl. universal mains adapter (100–240 V).

Analytical and precision balances Adventurer® series

Ohaus.

Application:

- Percent, counting, animal weighing, check weighing, density measurement, batching, display-hold function and totalling
- Selectable weight units

Features:

- All balances are available with external calibration or with AutoCal™ – automatic time- and temperature-controlled internal calibration
- Colour touchscreen with graphical LCD display and additional mechanical buttons for tare, calibration etc.
- Removable stainless steel weighing plate
- Language selection (nine languages)
- Analytical full-sized draft shield for models with 0.0001 g/0.001 g readability (internal height 230 mm); (W) = incl. draft shield
- Minimum sample weight function – a warning is displayed if the current sample weight is below the defined minimum sample weight
- **Two USB ports – one USB host port on the front for saving weighing data directly to a USB stick (not supplied) and an additional USB port on the back for connecting to a PC**
- RS 232 port
- Integrated hook for below-balance weighing

Models with external calibration, cannot be calibrated

Semi-micro balances ABT series

Kern.

Application:

- Function programs: Item counting, percentage weighing and recipe
- Different selectable filter settings
- LCD display capacity indicator
- Various weighing units (e.g. mg, g, ct, etc.) can be set

Features:

- Monolithic weighing technology
- With internal automatic calibration: Time or temperature dependant, or set individually by key stroke
- RS 232 data port
- Stainless steel weighing platform
- Dimensions of balance incl. draft shield: W 217 x D 356 x H 338 mm
- Full-sized glass draft shield (internal height 223 mm); (W) = incl. draft shield

Delivery incl. industrial protective cover for the display.

Application:

- Mixing, components, statistics, conversion, percentage weighing, checking, maximum value, counting, animal weighing
- Made in Germany

Features:

- With isoCAL – fully automatic, temperature- and time-controlled internal calibration
- Touchscreen with easy menu navigation
- 10 different menu language options can be selected
- Full-sized draft shield for models with 0.0001 g/0.001 g readability (internal height 209 mm); (W) = incl. draft shield
- Mini USB port for automatic detection of YDP40 Sartorius standard printer (please order separately) or direct data transfer, e.g. to Microsoft® Excel, without additional software. Programmable data output interval
- Password protection – menu lock for protection against accidental manipulation
- Levelling feet and glass level indicator on the front
- Anti-theft loop for chain or cable
- Models with 0.01 g, 0.1 g and 1 g readability incl. protective cover for operation

Delivery incl. universal mains adapter (100–240 V).

Semi-micro and analytical balances GR series

A & D.

Application:

- Percent, counting
- Selectable weight units: g, mg, ct

Features:

- With internal automatic calibration function which adapts to changes in temperature
- Automatic adaptation to ambient conditions
- **Door opening system** allows the user to open the left- or right-hand side of the weighing chamber from the front of the balance. For easy access if you have only one hand free.
- Full-sized draft shield (internal height 215 mm); (W) = incl. draft shield
- Data storage function for storing 200 units of weighing data for output to PC. Windows-compatible software (for direct readout of data, e.g. in Excel), available for download free of charge.
- Interval storage mode (measuring cycle: 2 s, 5 s, 10 s, 30 s, 1 min, 2 min, 5 min or 10 min
- With RS 232 data port
- Level indicator on the front

Delivery incl. mains adapter.

Semi-micro, analytical and precision balances Explorer™ series

Ohaus.

Application:

- Numerous balance applications (item counting, percentage weighing, animal weighing, check weighing, batching etc.) and additional library for saving personal settings
- Various weighing units (e.g. g, mg, ct, etc.) can be set.
- High-resolution colour VGA touchscreen (145 mm diagonal) with QWERTY and number pad keyboards
- Touchscreen display can be detached from the weighing platform (cable length 1.5 m)

Features:

- Metal housing, ABS upper housing shell and stainless steel weighing pan
- All models have a fully automatic time- and temperature-controlled internal calibration system (AutoCal)
- Full-sized draft shield for models with 0.0001 g/0.001 g readability (internal height 230 mm); (W) = incl. draft shield
- Multifunctional sensors for non-contact operation, e.g. contactless control of the zero/tare function to avoid specimen residues on the keypad. Two sensors on the platform and two on the display are independently adjustable.
- With USB and RS 232 communication ports
- Integrated weighing hook on underside of balance and illuminated level indicator on the front

Delivery incl. mains connector and industrial protective cover for display.

Semi-micro, analytical and precision balances Secura® series

Sartorius.

Application:

- Mixing, components, statistics, conversion, percentage weighing, checking, maximum value, counting, animal weighing
- Made in Germany

Features:

- With isoCAL, internal calibration is performed automatically in a time or temperature controlled manner and after levelling
- Touchscreen optimised for users in the pharmaceuticals laboratory
- **Optoelectronic levelling sensor with interactive user guidance** (if the sensor detects deviations, the risk is indicated immediately and a specific help text is displayed)
- 10 different menu language options can be selected
- Full-sized draft shield for models with 0.0001 g/0.001 g readability (internal height 209 mm); (W) = incl. draft shield
- Three configurable safety levels
- Mini USB port for automatic detection of YDP40 Sartorius standard printer (please order separately) or direct data transfer, e.g. to Microsoft® Excel, without additional software. Programmable interval for data output.
- Storage of completed calibration cycles incl. detected deviation
- Models with 0.01 g, 0.1 g and 1 g readability incl. protective cover for operation

APC functions (Advanced Pharma Compliance) are possible:

- Monitoring of minimum sample weight according to USP
- Blocking of data transfer to printer or computer in case of uncertain weighing results e.g. non-level balance, etc.
- **Please note:** APC functions are activated by a separate service. If this activation service is required, additional costs apply. Please check with our Sales Department.

Delivery incl. universal mains adapter (100–240 V).

Moisture analysers MA35M

Sartorius.

For the determination of moisture content in organic and inorganic substances, e.g. in greases, oils, foodstuffs, building materials, wood or paper. For use in chemistry, pharmaceutics, medicine, environmental analytics or in sewage treatment plants.

Features:

- Heat source: Infrared lamp
- RS 232 data port
- Display: % moisture content, % dry matter (residue), ATRO % or in weight values
- 2 selectable switch-off criteria: Time controlled and automatic switch-off options (moisture determination ends if no significant weight loss is detected)
- A 30 g calibration weight is required for calibration of the moisture analyser (please order separately)
- **With window for observation of the sample material**

Ionizer for balances

Kern.

Suitable for neutralising static charge. Non-conductive samples, e.g. plastic, porcelain, glass, etc. is often statically charged. The resultant electromagnetic field between the sample and balance can falsify the weighing result .

- For weighing in the milligram range or more accurate
- Blower can be switched on and off

Technical specifications:

Art. No.	CET5.1
Type	Ionizer
Distance from object being measured	5–40 mm
Discharge time	9 s/5 cm, 13 s/10 cm, 100 s/40 cm (with the blower switched on)

Calculators

Chemistry/life sciences calculator Chemcode®

Features:

- Keyboard with periodic table and numerical keyboard
- Buttons for DNA (A, T, G, C) and RNA (A, U, G, C) nucleotides
- Two-line display with scroll function
- Functions for scientific calculations
- Dimensions: L 136 x W 110 x D 14 mm

Stoichiometric functions
Displays: Molar mass, ideal gas volumes, mass to be weighed in g, amount of substance in moles
Calculates: Molecular formulas, proportion of individual elements or element groups in % or g, mass of substances in g. Converts from molar concentration (mol/l; molarity) into mass concentration (g/l) and vice versa, mass-% into molarity. When diluting, determines the volumes to be input in litres and calculates the amount of substance in mmol when performing titrations.

Molecular biological functions for the PCR®
Displays: Protein codes, %-proportion of guanine and cytosine, molar mass of the nucleotide sequence and protein sequence, amount of substance in nmol, optical density, amount of substance in a DNA segment in ng, melting temperature of the oligonucleotide.

Lexical functions:

- Conversion between °C, F and Kelvin
- Recalls different constants (Avogadro, Faraday, etc.)
- Functions for recalling chemical, physical and biological characteristics of elements and other information such as melting point, boiling point, electro-negativity, year of discovery, etc.

Delivery incl. four CR 2025 button cell batteries.

High-pressure laboratory autoclaves model 0

Carl ROTH. Material: Stainless steel 1.4571 (V4A).

50 ml/100 bar

Model 0 is the smallest autoclave in the ROTH range. Initially it was developed for preliminary tests at room temperature. **It is the steel test tube for all preliminary tests where work is carried out under high pressure. It is the ideal and cost-effective alternative for situations where glass carius tubes may present a danger.** Model 0 has a screw-on head with a threaded opening for fitting to equipment. The opening can be closed with a screw stopper. Sealed with PTFE gaskets (max. 180 °C) or pure silver gaskets (max. 300 °C).
Depending on the scope of the autoclave system, delivery times may apply!

Technical specifications:

Empty space	75 ml
Working volume	50 ml
Height	135 mm
Weight	835 g
Material	Stainless steel 1.4571 (V4A)
Operating temperature	-60 to 300 °C
Max. working pressure	100 bar
Test pressure	300 bar
Additional data	Test pressure at 20 °C
Outer beaker Ø	40 mm
Outer head Ø	54 mm
Inner beaker Ø	30 mm
Bottom shape	flat outside and inside
Connection opening in head	G ¼″

High-pressure laboratory autoclaves model I

Carl ROTH. Material: Stainless steel 1.4571 (V4A).

100 ml/100 bar

Model I is the standard model in the ROTH range. It is used primarily for preliminary testing. Model I consists of a cylindrical autoclave beaker and a threaded autoclave head. The head has a threaded opening on top for attachment of adapter I (to fit bursting disc, pressure gauge and valve). The opening can be closed with a screw stopper. Sealed with PTFE gaskets (max. 180 °C) or pure silver gaskets (max. 300 °C).
Depending on the scope of the autoclave system, delivery times may apply!

Carl ROTH. Material: Stainless steel 1.4571 (V4A).

200/300 ml/100 bar, 250 ml/200 bar

Model II encompasses devices for all reactions where spontaneous gas development and a quick increase in pressure are to be expected. The devices are operated with a large bursting disc, that is incorporated in the autoclave head. They thus offer maximum operational safety.
The enlarged autoclave head is screwed directly onto the cylindrical autoclave beaker. It contains the bursting disc holder at the top and three threaded openings at the side.
For connections with: valves, reducers for pressure gauges and temperature sensors or burst disc safety device II (when using magnetic stirrer head MRK 10).
Threaded openings can be closed with screw stoppers. Sealed with PTFE gaskets (max. 180 °C) or pure silver gaskets (max. 300 °C).
Depending on the scope of the autoclave system, delivery times may apply!

High-pressure laboratory autoclaves model IV

Carl ROTH. Material: Stainless steel 1.4571 (V4A).

500 ml/100 bar

Model IV is the largest autoclave in the ROTH range. It is an enhanced version of the original from which all other models were developed. Model IV consists of a stainless steel beaker with flange. The solid stainless steel lid is screwed onto the flange using eight screws.
The autoclave head is intended for a large busting disc as standard. It thus provides enhanced operational safety in the case of spontaneous gas development and a quick increase in pressure.
The enlarged autoclave head is screwed directly onto the cylindrical autoclave beaker. It contains the bursting disc holder at the top and three threaded openings at the side.
For connections with: valves, reducers for pressure gauges and temperature sensors or bursting disc safety device II (when using the magnetic stirrer head).
Threaded openings can be closed with screw stoppers. Sealed with PTFE gaskets (max. 180 °C) or with pure silver gaskets (max. 300 °C).
The beaker and head combination consists of 8 hexagon bolts and nuts for simple assembly.
Depending on the scope of the autoclave system, delivery times may apply!

Accessories temperature measurement

Carl ROTH.

The temperature sensor consist of a thermoelement with iron-copper thermocouple. The thermoelement is sealed in a protective pipe made of stainless steel 1.4541. It records the temperature directly inside the autoclave and transfers the values to the WRT 2000x temperature controller. The unit displays the relevant temperature value and controls the performance of the heating mantle.
Only the pure silver gaskets offered should be used for sealing, as too frequent insertion and removal of the seals could unduly reduce the service life of the sensor.

Accessories heating mantle with magnetic stirrer

Carl ROTH.

Specially designed for ROTH's high-pressure laboratory autoclaves. To ensure optimum distribution and use of heat, the heating mantles are precisely adapted to the dimensions of the individual autoclave beaker.

Features:

- High temperature stability
- Integrated magnetic stirrer with continuous speed adjustment without direct drive
- Heating and stirrer can be activated separately
- Temperature adjustment using the digital display and display of the actual temperature of the heating mantles
- **Integrated contact thermometer with full functionality. Option to directly connect the medium temperature sensor thermo-couple type J/Fe-Cu-Ni (please order temperature measuring sensor and connection cable separately)**
- Due to the high working temperature range of up to 300 °C, temperatures of over 240 °C can be reached, depending on the medium and application
- Additional safety: Temperature limiter for the internal and external temperature sensors

Technical specifications:

Benchtop steam steriliser CertoClav EL series

CertoClav.

With aluminium chamber. For steam heating of substances and use in research & development.
Applications: preparation of nutrient media, as well as sterilisation of waste, utensils, bottles and instruments.

Features:

- Bayonet lock for lid lock
- Quadruple pressure safety: safety lock to prevent opening under pressure, antilock safety valve, pressure relief valve and pressure relief vent
- Pressure regulation by control valve
- Alternate versions with different temperature / pressure levels 125/140 °C or 115/121 °C are available

Hydrolyses and digestion vessel without insert ROTILABO®

ROTH SELECTION.

The energy of the microwave is virtually predestined for the digestion of small sample quantities. If affects only the contents of the vessel, not the container itself interactively. The liquid contents hereby heat up within seconds up to far above the boiling point.

ROTILABO® digestion vessels are made of isostatically compressed ultrapure TFM. TFM is a modified PTFE from Hoechst and it contains thermoplastic fluoroplastic components. A homogeneous, pore-free surface is produced. Disturbing residues from earlier digestions are thus avoided.

For samples up to max. 0.5 g, high dimension stability under pressure (max. 25 bar) and temperature loading (max. 160 °C). The sealing film prevents loss of volatile elements from the steam room; bursting film provides protection against impermissible high pressure. To protect the microwave, optional collection containers and a hose are available. If the sealing and rupture membrane bursts, collecting vessels can be used to drain and collect gases and fluids. Please order hose and collecting vessels separately.

Pressure digestion vessels

Digestion vessel ROTILABO® with inserts

ROTH SELECTION.

The energy of the microwave is virtually predestined for the digestion of small sample quantities. It affects only the contents of the vessel, not the container itself interactively. The liquid contents hereby heat up within seconds up to far above the boiling point.

With inserts (inliners) made of TFM. The easily replaceable inliners allow precise weighting of samples taken. The complete vessel is usually too heavy for the existing scales in many cases. Furthermore, it is possible to use a variety of inliners to perform various digestions with one single digestion vessel. To protect the microwave, optional collection containers and a hose are available. If the sealing and rupture membrane bursts, collecting vessels can be used to drain and collect gases and fluids. Please order hose and collecting vessels separately.

Delivery incl. 10 sealing membranes made of PFA and 10 rupture membranes made of PTFE.

Liebherr.

General information for all models:

- Cooling temperature adjustable from +3 to +16 °C
- With convection cooling
- Exterior digital temperature display (resolution 0.1 °C)
- Acoustic and optical temperature alarm (adjustable limits) and door-opening alarm
- Saving the min./max. interior temperature that occurs
- Saving the last three temperature alarms and power outage with time, date and duration of the alarm
- **LED lighting, can be switched separately**
- With lockable door
- **Insulated glass door**

Flake ice machines with ice storage tank SCOTSMAN®

Scotsman.

Applications: Laboratories, research institutes and industry.

- Stainless steel version, air-cooled
- Environmentally friendly safety refrigerant

The ice flakes have a temperature of -0.5 °C; the irregular, large surface delivers a very good cooling effect. Each flake is saturated and firm and they do not stick together.

All models can be modified for operation with demineralised water (conductivity ≤30 µS) for an additional charge. Please check with our Sales Department.

Gas safety burner Fuego series

WLD-TEC.

Ideal for heating, burning-off and annealing as well as for use in microbiological safety workbenches.

- Animated graphic display with buzzer: installation and operating instructions with symbols, user ID, gas consumption display and cooling time reminder
- Casing/control elements made of stainless steel and glass, UV and solvent proof
- Programme with firing time display for double-click IR sensor (switchable), button, foot pedal and temperature control for precise heating of media.
  Operating modes:
  Key function: Flame is started and stopped by actuating the function button, or the flame extinguishes after a preselected time
  IR sensor: Contactless On/Off of the flame via IR sensor or the flame extinguishes after a preselected time(1 s to 120 min) or auto-off with teach function (1 s to 120 min)
  Foot-switch control: Flame burns until the foot-switch is pressed or start/stop with automatic switch-off (1 s to 120 min)
- Safety equipment with gas safety shutoff: ignition, flame and temperature monitoring, contamination and installation monitoring, automatic unit switch-off and residual heat display
- Zero-pressure shutoff: for releasing residual gas pressure after use
- Angle adjustment and removable burner head
- Ideal for natural, propane or butane gas. If cartridges are required, please order gas adapter and cartridge separately

Gas safety burners

Fully automatic inoculation loop carousel auto*loop*PRO

WLD-TEC.

Allows removal of the **safety laboratory burner from the Fuego SCS series** for sterilisation stations. The microprocessor-controlled carousel detects removed and returned inoculation loops, rotates and control the sterilisation fully automatically For up to 4 inoculation loop.

Features:

- Fully graphic DOT matrix display to show the pone of removal of cool inoculation loops, the remaining cooling time, residual heating and flame sterilisation time
- Settable annealing time: 1 to 15 s, adjustable cooling time: 1 to 45 s
- Completely made of stainless steel and anodised aluminium. The display is protected with special glass
- With sterilisation monitor for monitoring the safe sterilisation of the inoculation loops. A symbol indicates whether he inoculation loops have been annealed properly. Sensor intensity adjustable on 3 levels (low to high annealing intensity selectable for thin to thick inoculation loop wires)
- Overtemperature protection and residual heat indicator
- Dimensions: W 135 mm x H 305 mm x D 180 mmm
- Voltage supply via the foot pedal of the burner

Delivery incl. 4 inoculation loop holders, 4 inoculation loops and stand. To operate the carousel for inoculation loops, the safety laboratory gas burner from the Fuego SCS series is requirement if not present, order separately).

Infrared inoculation loop steriliser SteriMax smart

WLD-TEC.

Specially focussed infrared light creates an IR hotspot and sterilises inoculation loops at a temperature from 750 to 1000 °C within 5–10 s.

- Auto start by non-contact IR sensor technology
- Adjustable sterilisation and cool-down timer for two users via touch operation
- Ready for use straight from the box without heat-up phase
- Dynamic Thermocontrol sterilisation timer for the utilisation of residual heat to speed up subsequent sterilisation cycles
- Housing made of special toughened glass and stainless steel
- With removable quartz glass annealing tube

Circulating bath thermostats

Circulating thermostat E5 series

Option for temperature control in the stainless steel bath. Small, external, sealed vessels can be temperature controlled using pressure pumps.

Delivery incl. bath cover, pump outlets and cooling coil.

Model: E5 standard, up to 100 °C

- For working temperatures up to **+100 °C**
- Programmable timer function (up to 99.99 mins)
- LCD display with 0.1 °C display resolution
- Actual or setpoint value display (call up setpoint value display by pressing a button, actual value is permanently visible)
- Adjustable button locking
- Visual and/or audible limit alarm
- Adjustable setpoint value limit and alarm circuit
- Excess temperature and sub-level protection for non-flammable liquids (FL)

Circulating bath thermostats

Circulating thermostat with stainless steel bath

Thermo.

For temperature control of external sealed circuits, for example, density measuring instruments, viscosity meters, photometers, refractometers, etc. Simultaneous temperature control possible in the thermostatic bath.

- Simultaneous display of setpoint and actual temperature
- Display resolution 0.1 or 0.01 °C can be selected
- Stainless-steel bath for oil baths
- Thermostat heads can be turned invariably in 90° increments on the bath
- Pumps with 2-stage turbulence reduction system
- Drain opening (on the front)
- Bath with handles
- Hose connectors for tubes with 8 and 12 mm inside Ø
- A water cooling coil is also available if required (please order separately)
- III (FL) = flammable liquids

Bath/circulation thermostat CP series

Julabo.

Temperature control either in the internal bath or in a connected external application such as measuring devices, measuring cells and many more.

- Simple changeover between internal and external circulation
- LED temperature display
- Setting/display resolution 0.01 °C (to 99.99 °C), 0.1 °C (from 100 °C)
- Early warning system for low liquid level
- Continuously adjustable pressure pump
- With USB and RS-232 port
- With timer (range: 0 to 999 min)
- Protection against excess temperature and low liquid level for flammable liquids (FL), safety class III

Recirculating coolers RC 2 lite

IKA.

Application

Cooling of rotary evaporators, return condensers or as a cooling source for devices which dissipate heat by means of a heat exchanger (e.g. double-walled grinding containers, cooled incubators, laboratory reactors, cooling coils).

- With pressure and suction pump
- Illuminated window to show fill level
- Discharge nozzle for easy drainage
- USB/RS 232 interface
- I (NFL) = non-flammable liquids

Recirculating coolers Accel series

Thermo.

For external, closed applications with water as a tempering medium, for example for cooling electrophoresis equipment. The integrated stainless steel bath design minimises the volume and evaporation of tempering medium, however it does not allow access to the bath for direct tempering of samples.

Features:

- Digital temperature display
- LCD-Display with multi-lingual text menu control (German, English, French)
- 5 user-defined set temperatures
- Energy savings feature
- Liquid level indicator
- 2.8 litres internal volume of bath
- Pump speed control - allows the user to set the pump speed at either 50 or 100 % for tighter control
- Pump for hoses with 12 mm inner-Ø
- With discharge nozzle on the front for convenient changing of water
- USB-port
- Low-level alarm

Block thermostats

Cooling/heating block thermostat TK 23

Hettich Benelux.

For dry, clean and fast **cooling and heating.** For reaction vials, test tubes and microtiter plates.

Features:

- **Cooling function up to 16 °C below room temperature, heating up to +90 °C**
- Active counter cooling with Peltier elements
- Background LCD display for all set and actual values
- **Direct input of temperature curves**

Programmable control:
Programmable with 30 program steps for up to 9 different programs. Program parameters: Set temperature, process time (max. 99 h/ continuous), expansion time (time in which the set temperature is to be reached), etc.

Technical specifications:

Heating thermoshaker

Thermo.

For heating and mixing in 0.5/1.5 ml reaction vials, 50 ml test tubes or 96-well plates. With circular shaking action. Applications: Cultivating bacteria and yeast, enzyme reactions, denaturation of DNA, RNA and proteins, etc.

- VFD display
- PID controller for constant shaking action and precise temperature control
- Programmable with 10 programming steps for up to 7 different programs (program parameters: Nominal temperature, process time per programming step and shaking frequency)
- Two timer function modes (1 min to 99 h, 59 mins):
  - Process time does not begin to elapse until nominal temperature is reached
  - Timer starts immediately after setting the required process time
- Max. recommended shaking frequency:
  Block for 96-well plates: 150 to 1500 rpm
  Block for 0.5 ml vessels: 150 to 1200 rpm
  Block for 1.5 ml vessels: 150 to 1200 rpm

Cooling and heating thermoshaker

CellMedia.

Applications: Enzyme reactions, transformations, denaturation of DNA and RNA, isolation of DNA fragments from agarose gels, proteins, protein purification and cultivation of bacteria or yeasts.

Features:

- Two-line plain text display with backlit LCD display
- Simultaneous display of setpoint and actual values
- Timer operation: 1 min to 99 h, 59 mins; adjustable in 1 min increments or continuous operation
- Short mix function
- Shaking frequency can be set in 10° increments

Cooling and heating thermoshaker Matrix Orbital Delta Plus

IKA.

For cooling, heating and mixing in circular motions.

Applications: Temperature control/mixing of samples, synthesis of cDNA, enzyme-catalysed joining RNA or DNA (ligation), lysis reactions and structural changes to DNA, RNA and proteins (denaturation).

Features:

- TFT display with convenient menu structure
- Snap-lock mechanism for changing attachments and automatic attachment detection
- For mixing liquids at up to 3000 rpm and with a 3 mm shaking stroke (depending on the attachment used)
- It has two different speed modes for controlling temperature according to the sample
- Automatically performs mixing and heating tasks with five programmable ramps with five increments each consisting of temperature speed and time
- Die-cast aluminium housing ensures stability
- USB and RS 232 interfaces
- Shaking frequency can be adjusted in 10° increments

Technical specifications:

Art. No.	**1H67.1**
Type	Matrix Orbital Delta Plus
Operating temperature	15 °C below room temperature up to 100 °C
Temperature adjustment range	+1 to +100 °C

Heating thermoshaker type MH series

Hettich Benelux.

For dry, clean and fast **heating and mixing.** For reaction vials, tubes and microtiter plates.

Equipment features of all models:

- With timer, short-mix function (e.g. for vortexing) and interval shaking with snipping effect
- Background LCD display for all setpoint and actual values
- **Direct input of temperature curves with different shaking frequencies**
- Removable control panel for connecting to an extension cable

Programmable control:
Programmable with 30 programming steps for up to 9 different programs. Program parameters: Nominal temperature, process time (max. 99 h/continuous), expansion time (time in which the nominal temperature is to be reached), shaking frequency, interval shaking, pause, etc.

Thermoshakers

Cooling and heating Thermoshaker MKR 13 and MKR 23

Hettich Benelux.

For dry, clean and fast **cooling, heating and mixing**. For reaction vials, tubes and microtiter plates.
Circular shaking motion: Ideal for dissolving critical DNA pellets from conical tips in conical reaction vials.

Features:

- **Cooling function up to 16/10 °C below room temperature, heating up to +100/75 °C**
- Active counter cooling with Peltier elements
- Coolers with speed-controlled fans direct heat or cold air to the outside
- With timer, short-mix function (e.g. for vortexing) and interval shaking with snipping effect
- Background LCD display for all setpoint and actual values
- **Direct input of temperature curves with different shaking frequencies**

Rotary evaporators RV 3 series

IKA.

Usable in the chemical, pharmaceutical and bio-industry, in the fields of research and development, production and quality assurance, in laboratories and in plant engineering.

- 4 l water heating bath with digital temperature display and handles
- Mechanical end stop for lift
- Manual lift
- Adjustable insertion angle
- Continuous speed adjustment via rotary knob and display scale
- Piston fixture with integrated push-off mechanism for easy changing of evaporating flasks

Technical specifications:

Art. No.	KAX8.1	HTX5.1
Type	RV 3 V	RV 3 V-C
Speed range	20 to 300 rpm	
Temperature range	to 99 °C	
Heating output	1350 W	
Setting accuracy	1 K	
Control deviation	±1 K	
Bath volume	4 l	
Heating bath width	330 mm	
Heating bath length	190 mm	
Heating bath height	325 mm	
Hose connectors	For hoses ID 8 mm (water and vacuum hose)	
L x W x H, total	440 x 330 x 530 mm	
Weight	8 kg	
Mains connection	100–240 V, 50/60 Hz	

Delivery incl. heating bath and vertical glassware. With PTFE inlet tube and 1000 ml evaporating flask (NS 29/32) and 1000 ml receiving flask (KS 35/20).

Rotary evaporators RV 8 series

IKA.

General properties:

- Manual lift with integrated safety lift function (single-hand operation, suitable for left and right handed users)
- Digital displays for rotation speed and heating bath temperature
- Adjustable immersion angle and height
- Piston fixture with integral push-off mechanism for easier changing of evaporating flasks
- Available in two versions: With standard glassware or coated glassware (condenser and receiving flask are coated for shatter protection).

HB 10 digital heating bath:

- Universal water/oil heating bath with integrated carrying handles
- Locking function prevents accidental changing of heating bath settings
- Run-dry monitoring
- Adjustable safety temperature

Technical specifications:

Rotary evaporators

Rotary evaporators RV 10 series

IKA.

General features of all models:

- **Motorised lift (stroke displacement 140 mm) with adjustable height limit**
- Digital speed display
- Rotates intermittently clockwise and anticlockwise for drying processes (interval cycle for direction reversal is adjustable from 1 to 60 sec)
- Timer function for time lapse controls (1 to 199 min)
- Water/oil heating bath with integrated carry handles
- Heating bath with adjustable safety circuit
- Push-off mechanism to loosen tightly fitting flasks
- Includes Woulff bottle
- Available in two versions: With standard glassware or coated glassware (condenser and receiving flask are coated for shatter protection).

RV 10 digital model

- Heating bath with digital temperature display
- Control deviation ±1 K
- Infrared interface for data transfer between the heating bath and drive unit
- RS 232 interface

Delivery incl. heating bath and vertical glassware. With PTFE inlet tube and 1000 ml evaporating flask (NS 29/32) and 1000 ml receiving flask (KS 35/20).

(1) RV 10 auto model
Model with integrated vacuum controller for automatic distillation, for volume-based processes or full drying, depending on the application.

- Integrated solvent library with stored distillation-specific
- Parameters for standard distillations; can be extended by the customer
- Programmable volume-controlled distillation processes
- Colour graphic display shows distillation curves
- Ramp programming (speed/time and vacuum/time)
- Automatic ventilation and switch-off of heating bath after test

Delivery incl. heating bath and vertical glassware. With PTFE inlet tube and 1000 ml evaporating flask (NS 29/32) and 1000 ml receiving flask (KS 35/20). Also with RV 10.4002 magnetic valve lab vacuum (integrated check valve eliminates external influence on the operating pressure of the vacuum chamber). Hose connectors for ID 10 mm hoses.

Rotary evaporators Hei-VAP Core

Heidolph.

- With manual and motorised lifting
- Clear 3.5″ digital LCD display for viewing current values and key for showing the set values
- Direct access to rotation and heating bath via separate rotary pressure controller with LED light activity indicator
- Locking function for values in order to prevent unintentional adjustment or overheating
- Residual heat warning at >50 °C
- Standby key stops all functions and, for motorised lift models, moves the evaporating flask out of the heating bath
- All models are available as a space-saving version with a vertical cooler (type G3) or as a normal version with a diagonal cooler (G1)
- XL cooler for higher evaporation rates thanks to improved tightness and expanded cooling surface (standard 1400 cm^2, XL model 2200 cm^2)

Delivery incl. device with heating bath and glassware. The glassware consists of a glass hollow shaft, cooler, inlet tube, 1000 ml evaporating flask (NS 29/32) and 1000 ml receiving flask (S 35/20).

N°ICE ice bath

TECHNE.

Space-saving sample chiller with general-purpose heat treatment bath for various vial types and sizes. Ceramic beads are used instead of ice as a chilling medium. This allows unlimited cooling times and avoids the problem of floating samples in thawing ice as well as contamination by coolants. As a time saving option, the ice box with beads can be pre-incubated in the fridge and simply inserted into the unit as and when required.

- Peltier cooling technology
- Max. capacity approx. 60 x1.5 ml reaction vials
- Ceramic beads are autoclavable and suitable for multiple use

Technical specifications:

Art. No.	AKN5.1
Type	N°ICE
Operating temperature	0.0 to 40.0 °C

Small incubator Cultura® M

For incubating 18 dip slides (e.g. ROTI® DipSlides culture medium) or 12 Petri dishes and other small vessels for verifying bacteria, fungi and yeasts.

- **Operating temperature range from +5 °C above room temperature to 45 °C; temperature adjustment range from 25 to 45 °C**
- Thermometer in tube with special petroleum filling.
  Measuring range 7 to 60 °C. Graduations 1 °C. Accuracy ±1 °C.
  Dimensions: H 95 x Ø 25 mm.
- Transparent full-vision door for visual inspection
- Minimal footprint, i.e. space-saving

Incubator Heratherm™ Protocol series

Thermo.

General features:

- Housing interior with round edges make it easy to clean
- With additional inner glass door
- RS 232 port
- Natural convection minimises dessication of samples; air circulation achieves more accurate temperatures
- Handle and display (65 mm) not included in depth; adjustable feet (35 mm) not included in height
- Mains connection 230 V, 50 Hz

Incubator IN/INplus series

Memmert.

General features:

- **Operating temperature range from 5 °C above room temperature to 80 °C**
  Set temperatures from 20 to 80 °C
  Adjustment accuracy 0.1 K
- Stainless steel interior (1.4301)
- Fully insulated stainless steel door (two-wing from size 450 upwards)
- **With additional inner glass door**
- Fresh air supply by electronically adjustable exhaust air flap
- Textured stainless steel housing
- Model sizes 450 and 750, with moveable and lockable rollers
- Depth plus door handle: 56 mm
- Incl. factory calibration certificate valid for +37 °C

Other features:

- **With natural air circulation (convection)**
- German, English, French and Spanish language options
- Digital timer (adjustable from 1 min to 99 d, 23 h) or continuous operation
- "SetpointWAIT" function – process time does not start until the target temperature is reached

Delivery incl. stainless steel grating (models 30 and 55: One grate, models 75 to 750: Two grates). Please note: Additional transport costs apply for delivery to the place of use. We will be happy to inform you of these on request.

IN series models

- Graphical single TFT display with touch screen for operation and displaying temperature, program runtime and air flap position
- Integrated data logger with 10-year memory
- With Ethernet communication port for reading out log data
- Protection against overheating

INplus series models

- Two graphical TFT displays with touchscreen for operation and displaying temperature, program runtime, air damper position and graphical display of temperature distribution
- Integrated data logger with 10-year memory
- **Display of recorded log data (max. 10,000 values correspond to approx. one week) directly on the device**
- Application-specific correction of the heat output distribution between the upper and lower heating groups within an adjustment range from -50 % to +50 %
- With Ethernet communication port for log data readout as well as for transmitting and launching programs and online logging
- With sterilisation program: Four-hour program at 160 °C for sterilisation of the interior, incl. all fittings and sensors
- **USB port for installing programs and reading out the data logger incl. software (to create ramp programs and weekly programs)**
- Definition of individual min./max. values for protection against excessive/insufficient temperatures

Incubator BD/BF series

Binder.

General features:

- **Operating temperature range from 7 °C through room temperature right up to 100 °C**
  Setting temperatures from 30 to 100 °C
  Setting accuracy: ±0.1 °C
- Models with volumes of 400 l or more come with a double-leaf door
- With integrated timer with range from 0 to 99 h
- With additional inner door of safety glass
- 100 °C disinfection routine for reduced cross-contamination
- Adjustable air exchange and rear exhaust air pipe Ø 50 mm
- Class 3.1 temperature safety device (DIN 12880) with visual alarm
- Depth, incl. door handle and exhaust
- Mains connection 230 V, 50/60 Hz

Delivery incl. two chrome-plated grates.

BF series with forced air circulation (fan)

- Fan speed cannot be regulated or switched off
- Timer function selection:
  – Heater is switched off when the set time expires
  – The set timer does not start until the actual value reaches the selected set value. The heater is switched off when the time expires.
  – Heater is switched on after set time expires and stays in continuous operation.
- Models BF 56, BF 115 and BF 260 also have a USB port for recording data (time, actual temperature value, set temperature value, etc.)

Peltier cooling incubator

Memmert.

General features:

- **Operating temperature range of 0 to 70 °C (devices with inner socket have a limited temperature range of max. 60 °C)**
  Set temperature of 0 to 70 °C
  Setting accuracy 0.1 K
- Stainless steel interior (1.4301)
- Fully insulated stainless steel door (two-wing from size 450 upwards)
- **With additional inner glass door**
- Textured stainless steel housing
- **Incl.** factory calibration certificate valid for +10 °C and +37 °C

Other features:

- German, English, French and Spanish language options
- Digital timer (adjustable from 1 min to 99 d, 23 h) or continuous operation
- "SetpointWAIT" function – process time does not start until the target temperature is reached

Delivery incl. stainless steel grating (models 30 and 55: One grate; models 110 and 260: Two grates). Please note: Additional transport costs apply for delivery to the place of use. We will be happy to inform you of these on request.

IPP standard models with single TFT display

- Graphical single TFT display with touchscreen for operation and displaying temperature and timer runtime
- Integrated data logger with a memory capacity of up to 10 years
- With Ethernet communication port
- Protection against overheating

Cooled incubators

Cooling incubator Heratherm™ IMP series

Thermo.

Applications: Development processes for new products, quality assurance in the food, beverage and cosmetics industries, water analysis, and cell culture and microbiological analyses.

General features:

- **Operating temperature range: from 5 to 70 °C**, setting accuracy: ±0.1 °C
- Peltier technology
- Heated door minimises condensation
- Timer with weekly/daily or real-time mode
- Programming option for defined temperature ramps, with cooling and dwell time: Storage of up to 10 programs with 10 temperature stages, loop program and selection mode at end of cycle
- Adjustable over-temperature shut-down
- Fan speeds adapt for power optimization
- Inside glass door for sample monitoring
- **Cable conduit for data monitoring (42 mm) on rear side**
- RS 232 port
- Stainless steel interior (1.4301/ASTM 304)
- IMP180 tabletop device: Handle/display not included in depth (65 mm) and adjustable feet not included in height (35 mm) IMP400 standing device: Handle/display not included in depth (65 mm) and rollers not included in height (180 mm)

CO_2 incubators

CO_2 incubator Midi 40

Thermo.

For users in cell culture who wish to breed small cultures or have only limited space in the laboratory.

- **Operating temperature range from +5 °C above room temperature to 60 °C (in 0.1 °C increments) and CO_2 concentrations up to 20 % (in 0.1% increments)**
- Digital display for easy input of °C, CO_2 content and alarm limits
- Setpoints can be secured using a key-operated switch to prevent unwanted alteration of the operating parameters
- Seam-free interior made of stainless steel (non-corrosive stainless steel, type 304) with four extractable shelves
- Removable water container for a relative humidity of up to 95 %
- Inside door made of safety glass is heated by the outside door to avoid condensation
- To supply the incubator with CO_2, a separate gas cylinder or a central compressed-gas tank is required
- Conditioned water (demineralised/distilled and autoclaved or fully desalinated/distilled and autoclaved) is required for humidification

Technical specifications:

Art. No.	ETT3.1
Type	Midi 40
Operating temperature	From +5 °C above room temperature to +60 °C
Vol.	40 l
Inner width	305 mm
Inner depth	355 mm
Inner height	355 mm
Outer width	470 mm
Outer depth	597 mm
Outer height	465 mm
Required input pressure	1.0 bar, 99.5 % by volume medical CO_2 quality

CO_2 incubator BB 15

Thermo.

With air jacket heating for constant temperature as well as a second control circuit that assumes control of the set temperature in the case of a fault. The chamber floor is used as water reservoir (an electric suction pump is included in the scope of delivery for changing the water). The large water surface and direct heat transfer from the heated base achieve a faster humidity recovery time.

- **Operating temperature range from 3 °C above room temperature to 55 °C (in 0.1-°C-increments) and CO_2-concentrations up to 20 % (in 0.1-%-increments)**
- Digital display for °C and CO_2 content
- Tube penetration 42 mm in the rear wall allows operation of additional devices
- Stainless steel interior
- Constant moisture at 37 °C approx. 95 % RH
- Additional inside door made of glass, heated outside door
- To supply the incubator with CO_2, a separate gas cylinder or a central compressed-gas tank is required
- Conditioned water (demineralised/distilled and autoclaved or fully desalinated/distilled and autoclaved) is required for humidification

Drying and heating cabinets

Models: UFplus with forced air circulation (fan)

- **Operating temperature range from 10 °C above room temperature to 300 °C**
  Setting temperature from 20 to 300 °C
  Setting accuracy up to 99.9 °C: 0.1 K, from 100 °C: 0.5
- Two graphical TFT displays with touchscreen for operation and displaying temperature, program runtime, air damper position and graphical display of programme flow
- Integrated data logger with 10-year memory
- **Display of recorded log data (max. 10,000 values correspond to approx. 1 week) directly on the device**
- Application-specific correction of the heat output distribution between the upper and lower heating groups within an adjustment range from -50 % to +50 %
- With Ethernet communication port for reading out log data as well as for transmitting and launching programs and online logging
- Definition of individual min./max. values for protection against excessive/insufficient temperatures
- **USB port for installing programs and reading out the data logger incl. software (to create ramp programs and weekly programs)**
- Quiet air turbine for air circulation mode (air turbine can be controlled and switched off)

Drying and heating cabinets

Drying cabinet Heratherm™ protocol series

Thermo.

General features:

- Smooth inner housing and round edges make it easy to clean
- Automatic overheating alarm
- Microprocessor control
- Setting accuracy ±1 K
- RS 232 port
- **Natural convection** for gentle drying and heating with low air turbulence (e.g. powder or film) or **air circulating mode** for rapid drying and heating
- Depth of handle and display (65 mm) not included in depth; adjustable feet (35 mm) not included in height
- Mains connection 230 V, 50 Hz

Delivery incl. 2 removable shelves. Please note: Additional transport costs apply for delivery to the place of use. We will be happy to inform you of these on request.

General Protocol with natural convection

- **Temperature range: 50 to 250 °C**
- Stainless steel interior (1.4016)

High-temperature heating cabinet LHT (high-temperature laboratory oven)

Carbolite Gero.

- For maximum temperatures of 400, 500 or 600 °C depending on device type
- Recovery time of just 10 minutes at 400 or 500 °C after the door has been open for 1 min
- Polished stainless steel inner chamber
- Sturdy powder-coated outer housing
- High-performance recirculating air fan in the inner chamber (cannot be regulated)
- Adjustable digital overheating protection
- PID thermostat with digital display (target/actual temperature display)
- Heating rates up to max. temperature:
  LHT 4/30 = 50 min

Muffle furnace

Laboratory ovens ELF series

Carbolite Gero.

For temperatures up to 1100 °C.

- General-diffuse heating coils on both side walls
- Furnace chamber comprising vacuum formed fibre insulation
- With abrasion-resistant base plate
- Double-walled housing for low ambient temperatures
- Short heating-up times of approx. 35 min
- Vent (Ø 30 mm)
- Forward hinged door
- PID thermostat with digital display (target/actual temperature display)
- Input of a temperature control profile with 2 segments (heating rate and hold time) using the timer function
- Built-in timer function (runtime: 99 h and 59 min)
- The timer can be operated in 5 different modes, e.g. the timer waits until the set temperature is reached, then begins to count down and on expiration shuts off the heater.

Vacuum ovens

Vacuum drying cabinet VT series

Thermo.

Areas of application: Pharmacy, biochemistry, cosmetics industry and electronics industry. Ideally suited for gentle and rapid drying and for thermal treatment of temperature-sensitive or easily decomposable substances and electronic components. Drying in the vacuum ensures sensitive samples are at no risk of contamination by particulate matter and the oxidation risk is lower.

General features of all models:

- **Operating temperature from 15 °C above room temperature to +200 °C**
- Max. spatial temperature deviation: ±4 °C (at 200 °C)
- Analogue pressure display
- **Possible ultimate vacuum: 0.01 mbar**
- With internal container made of corrosion-resistant, electropolished stainless steel (1.4571)
- Double-layer safety glass in the door window
- Microprocessor-controlled thermostat
- Digital temperature display
- Shell heating
- Temperature limiter (Protection Class 2 according to DIN 12880)
- In-house vacuum or a vacuum pump is required for operation. Please order the vacuum connection set separately.

Fast, gentle drying of temperature-sensitive samples.

- **Operating temperature range from 10 °C above room temperature to 220 °C**
- Vacuum adjustable in the range 10 to 1100 mbar (end vacuum 0.01 mbar)
- Controller with digital display of pressure and temperature
- Drying process monitoring with automatic aeration at process end
- Internal data logger, measured values in open format readable via USB (approx. 100,000 entries possible, choice of save interval from 1 to 60 inutes)
- USB and Ethernet interface
- Universal aeration, for use with inert gas or ambient air
- Safety glass
- In-house vacuum or a vacuum pump is required for operation

Melting point measuring units MPM series

For measuring the melting point of powdery substances in glass capillaries.

Equipment features of all models:

- Digital temperature control
- Indirect, non-glare and anti-dazzle illumination of the substance during visual measurement using the magnifier
- Height-adjustable table tripod (360 to 460 mm)
- With USB interface
- Software makes it possible to create a measurement log in PDF format (incl. diagram with transparency progression for the MPM-HV 3 model)

Technical specifications:

Art. No.	HCE5.1
Type	MPM-H 3
Measuring range	+35 to +360 °C
Resolution	0,1 °C
Accuracy	±0,4 °C
Heat-up rate	when quick heating: to 200 °C - approx. 4 min to 350 °C - approx. 8 min when measuring: 1 °C/min
Magnification	with 3-fold magnifying glass
Width	230 mm
Depth	65 mm
Height	260 mm
Weight	6.8 kg
Mains connection	115–230 V, 50 Hz

Delivery incl. 100 melting point capillary tubes, USB cable, software and protective hood.

Semi-automatic/fully automatic multi-function unit MPM-HV 3
For testing a sample.
2 selectable measuring processes (visual or automatic). Fully automatic measurement: Set the required temperature (approx. 3 °C below the expected melting point). Once the preselected temperature is reached, a filled capillary is inserted. Measurement is terminated automatically when melting point is reached.

Semi-automatic MPM-H 3
For simultaneous testing of max. 3 samples.
Measuring process: visual by observation. Once the preselected temperature is reached, a filled capillary is inserted and a visual inspection of the capillary is performed using the magnifier. After the "Start" button is pressed again, the unit continues to heat up at a rate of 1 °C/min. As soon as the sample has melted, the value can be read on the display.

Ozone generator OZ series

Phönix Instrument.

For local oxidative odour neutralisation and disinfection (elimination of micro-organisms) of surfaces like fixtures, furniture surfaces and walls.

Ozone (O_3) is a strongly oxidising molecule made up of three oxygen atoms. It exists as a gas and very quickly breaks down in the air into normal oxygen (O_2) under standard conditions. Ozone can remove harmful substances in the air.

An integrated timer ensures ozonisation at non-working times without personnel present. With proper application (sufficient ventilation), there are generally no more hazardous substances in the air after cleaning.

- Disinfection of rooms (germs, viruses, bacteria)
- Sanitation of rooms
- Mould spores in the air
- Musty smell
- Memory for 16 programmes - each programme comprises day (d) and On/Off time pair (h:min)

A magnetic coil generates the heat directly in the bottom of the pot. The cooking surface remains almost cold.
Operation only possible with pots suitable for induction.

- Stainless steel housing
- Schott Ceran®-cooking surface
- Temperature selection in 21 steps from 60 to 260 °C (adjustable in steps of 10 °C)
- Power selection in 9 steps (70/130/180/270/350/500/820/1280/2200 W)
- Electronic regulation via touch-control operating elements
- Time switch up to 99 min
- Pot detection
- Automatic switch-off and signal tone
- Residual heat and operation display

Magnetic stirrers

Magnetic stirrers Genie®

Scientific Industries.

For gentle to intensive mixing of low-viscosity liquids. ABS/PC plastic housing. Powerful magnetic stirrer, up to 38 litres stirring capacity.

Technical specifications:

Art. No.	HH66.1	HH67.1
Type	MegaMag Genie®	Digital MegaMag Genie®
Number of stirring points	1	
Max. stirring capacity (H_2O)	38 l	
Speed range	200 to 1300 rpm	
Speed display	Scale	Digital
Speed display accuracy		2 rpm
Timer		1 to 99 min or continuous operation
Footprint	305 x 305 mm

Magnetic stirrers Genie® programmable

Scientific Industries.

General features of both models:

For gentle mixing (e.g. of cell suspensions) in intermittent mode. Reversing mode can be adjusted for better mixing of the medium.

- Microprocessor-controlled
- Preselectable stirring power (Low, Medium, High) for various stirring applications, e. g. “High” stirring power for viscous liquids
- Interval and reversing modes are available

Four programmes can be selected:

- **Manual mode**
  For stirring without/with change of direction (reversing mode) and timer function (1 sec to 99 hrs).
- **Automatic mode**
  For activating user-defined stirring profiles.
- **Profile mode**
  For programming and storing 4 user-defined stirring profiles. Each stirring profile can store 9 different ramps such as speed, stirring direction (clockwise or anticlockwise), ramp acceleration (from 5 to 300 rpm per sec) and time (including stirring pause).
- **Setup mode**
  For programming manual mode. The programmable elements are as follows: Ramp acceleration from 5 to 300 rpm per sec (i.e. the time required to reach the set speed), stirring power and the duration and pause functions of the automatic direction change (adjustable from 1 sec to 59 mins).

Magnetic stirrers

Magnetic stirrer, remote control option MOBIL 10

Thermo.

For stirring applications in heating chambers, climate chambers and cooling chambers and for built-in systems.

- Easy to clean, robust housing made of POM. For operating temperatures of +5 to +56 °C at 95 RH.
- Can be remotely controlled (corded) with a separate Telemodul 10 M control unit
- Quick stop without drive overrun, for high operational safety, protects glass vessels from breaking
- Continuously adjustable speed
- Easy to clean, robust housing made of POM. For operating temperatures of +5 to +56 °C at 95 RH.

Technical specifications:

Magnetic stirrer, remote control option Cimarec Micro

Thermo.

With induction drive. Compact design for applications with low volumes. Ideal for operation in demanding environments and water baths.

Micro magnetic stirrer:

- High temperature resistance up to 95 °C in water and 120 °C in air
- Hermetically-sealed stainless steel housing, waterproof and dustproof acc. to IP 68
- Can be remotely controlled (corded) with a separate Telemodul 20 C control unit

Telemodul 20 C control unit:

- Graphic display
- Vertical mixing (Shake mode)
- 3 assignable program keys for quick starting routines. The most recent setting is stored automatically
- Three-stage adjustable start-up times for safe acceleration of the magnetic rod
- Intermittent operation with freely selectable stirring times and pause times as well as rotation direction reversal (5 sec to 1 h)
- Four-stage adjustable nominal stirring power (25/50/75/100 %); high power for viscous media, reduced power for long-term heat-free operation
- 5 years warranty

Technical specifications:

Heating/magnetic stirrers

Heating and magnetic stirrers ROTILABO® MH 20 Digital Set with integrated contact thermometer

ROTH SELECTION.

- Temperature and speed setting via digital display
- Integrated contact thermometer with full functionality for direct control of the medium temperature up to 250 °C via Pt 100 sensor (please order accessories for fastening the sensor separately)
- Aluminium hot plate with protective coating made of ceramic
- Constant speed, even after changes in medium viscosity
- A safety warning lamp indicates temperatures above 50 °C
- Adjustable safety circuit for the hot plate temperature (50 to 370 °C)
- Speed can be adjusted in increments of 10 rpm

Technical specifications:

Art. No.	EYE7.1
Type	MH 20 Digital
Number of stirring points	1
Max. stirring capacity (H_2O)	20 l
Speed range	50 to 1500 rpm
Speed display	digital
Temperature range	+50 to +370 °C
Temperature display	digital
Setting accuracy	±5 °C
Adjustment accuracy with measuring probe	±1 °C
Control accuracy without sensor	±10 K
Control accuracy with sensor	±2 K
Heating output	630 W
Footprint	Ø 135 mm
W x D x H, total	165 x 280 x 115 mm
Weight	2.6 kg
Mains connection	230 V, 50/60 Hz

Delivery incl. MH 20 Digital heater and magnetic stirrer and Pt 100 stainless steel temperature measuring sensor, Ø 3 mm, L 250 mm.

Heating/magnetic stirrers

Heating and magnetic stirrer US/UC-series

Stuart.

Features:

- Microprocessor-controlled heating system
- Platforms are optionally available in glass ceramic (good resistance to chemicals, withstands high temperature, 120 x 120 mm heated zone) or aluminium (very rugged, 150 x 150 mm heated zone)
- A safety warning lamp indicates temperatures above 50 °C

Heating/magnetic stirrers

Heating and magnetic stirrer digital complete set AREX-6

Velp.

- Hot plate made of aluminium with ceramic coating
- Clear white LED display with icons for easy identification and navigation through the menus
- Temperature and speed setting via digital display
- Integrated contact thermometer with full functionality, for direct control of the medium temperature up to 250 °C via Pt 100 sensor
- Timer function – switches the stirring and heating function off on expiration of the countdown
- Adjustable reversing mode with change of direction (from 5 sec to 99 min, in 1 sec increments)
- Independent safety circuits protect the device in the event of overtemperature
- Adjustable max. temperature limit
- Probe Detector Alarm: Detects if the temperature gauge is not immersed in the medium
- Resistant cast housing (IP 42)
- Constant speed, even after changes in medium viscosity
- Speed can be adjusted in increments of 5 rpm

- USB and RS 232 interface to control and document the magnetic stirrer

pH function:

- With integrated pH electrode connection (BNC socket)
- Measuring range 0 to 14 pH; resolution 0.01 pH; accuracy ±0.1 pH
- Delivery without pH single-rod measuring cell (please order separately; a large selection of pH electrodes with BNC connectors can be found in the "Measuring devices" section)

Integrated weighing function:

- Max. weighing range 5000 g, readability 1 g
- Linearity ±1 g

Technical specifications:

Art. No.	XT54.1	XT55.1
Type	RET control-visc	
Number of stirring points	1	
Max. stirring capacity (H_2O)	20 l	
Speed range	50 to 1700 rpm	
Speed display	TFT	
Motor power input	16 W	
Motor power output	9 W	
Hotplate material	stainless steel hot plate	enamel hot plate
Operating temperature	Room temperature to +340 °C	
Temperature display	TFT	
Setting accuracy	±0,1 K	
Control accuracy with sensor	±0,2 K	
Heating output	600 W	
Footprint	Ø 135 mm	
W x D x H, total	160 x 270 x 85 mm	
Mains connection	220–240 V, 50/60 Hz	

Delivery incl. PT 100.70 stainless steel temperature gauge and type H 104 protective hood.

Electronic laboratory stirrers MINISTAR control series

IKA.

For stirring and mixing low to medium viscosity liquids. Compact design with high-end features.

- Vibration detection with automatic stop in the event of stirring tool imbalance
- Torque measurement with indication on the display
- Temperature measurement with indication on the display when the temperature sensor is plugged in (-10 °C to 350 °C, accuracy of ±1.35 °C)
- With timer function up to a max. of 6000 min
- Microprocessor control for constant speed, even with changes in viscosity
- Push-through stirrer shafts
- USB interface and Bluetooth functionality
- Clamping range of chuck 0.5 to 8.2 mm

Stirring blades made of stainless steel

Bohlender. Material: Stainless steel, coated with PTFE.

The stirrer unit is made entirely of PTFE. A stainless steel core provides the required hold in the clamping ring of the stirrer. The stirrer unit is firmly anchored to the shaft: it is not loosened by continued turning of the medium after the stirrer has been turned off. Since the materials to be turned only have contact with PTFE, the stirrer shafts are virtually resistant to chemicals and allow high application temperatures. **The dimensions of the stirrer shafts match the (KPG) glass stirrer shafts and are therefore interchangeable at any time. With tapered collet, for easier clamping of stirrer shafts.**

Rotational viscometer ROTAVISC Complete

IKA.

For determining the viscosity of liquids. 4.3″ TFT display with intuitive menu guidance. Digital spirit level supports the correct set-up of the start-up condition. Five user-defined “ramp” profiles can be set. Accuracy for Newtonian and non-Newtonian liquids is ±1 % of the measuring range, the reproducibility is ±0.2 %. Speed is infinitely adjustable. Also with graph function. RS 232 and USB interface. Connection for external Pt 100 temperature measuring sensor.

Flocculation units

Flocculation unit Flocculator SW6

Stuart.

For reproducible analysis of flocculation conditions during sewage water treatment.

- **For simultaneous treatment of six samples in beakers up to 1000 ml**
- Uniform adjustable stirring speed for similar conditions at all sampling areas
- Digital display of speed and running time
- **With timer function**
  An audible signal indicates the end of the set time and all stirring units are switched off. The timer then counts the minutes from when the stirrer blades stop.
- Height adjustment of the stainless steel stirrer blades during operation
- The device has an illuminated base and a black back wall for anti-glare and high-contrast sample monitoring
- **Memory function saves 2 combinations of rpm and time parameters**
- A set-up for simultaneous addition of reagents and flocculators is also available

Ultrasonic disintegrator UP200Ht digital

Hielscher.

Applications: sample preparation, homogenisation, dispersion, disagglomeration (e.g. nanoparticles), emulsification, analysis and cell disruption, extraction, degassing and sonochemistry.

- Use as hand-held device or mounted on a stand
- Colour touch display and digital setting and monitoring functions
- Amplitude or power output control
- Countdown function: 0.1 s to 99 d
- Automatic data storage on integrated SD card reader in 100 ms cycles; records amplitude, power output, time and temperature
- Temperature range monitoring: acoustic irradiation is interrupted if the medium temperature is above or below the setpoint
- Temperature display (with connected probe): -50 to +200 °C
- Operation and monitoring via LAN cable, i.e. a browser can be used for display and remote control (no need to install software on PC)
- With LED sample illuminator
- Protection against dry running

Cell disruption/homogenisation devices

Disruptor Bead Beater

For rapid, efficient and safe cell disintegration.
Method of operationA fast running impeller wheel accelerates the movement of small beads in a specially formed vessel to a very high speed. The system is completely hermetically sealed and allows no air to enter into the sample, preventing harmful aerosols from forming. The unit is easy-to-use and maintenance
free. The beads precipitate within a few seconds and can be reused.

- Up to a max. sample volume of 100 g (moist weight) in 200 ml medium
- Ideal for sensitive proteins and enzymes

Delivery incl. 350 ml PC vessel.
Glass beads please order separately.

Lab blenders Bag Mixer® 400 series

Interscience.

The BagMixer® ensures safe and easy separation of bacteria from solid samples. A sterile plastic bag is added together with the closed sample and a diluent into the BagMixer®. For most samples 30 to 60 seconds mixing is sufficient. The filtrate can then be removed with a pipette and analysed immediately without any danger of changing or contamination.. Housing and mixing chamber are made of rustproof stainless steel.

Lab blenders Stomacher® 400 circulator

Seward.

Ideal for extracting, mixing or dispersing.
Capacity 80 to 400 ml. The Stomacher® 400 circulator is indispensable in the laboratory when preparing and blending food samples and other substances for analysis.
The sample and diluent are placed into the unit in a sealed plastic bag. The bag is held securely in the unit during treatment. There is practically no risk of contact between the sample and unit. This eliminates any danger of contamination.
With regard to hygiene, security and general efficiency the Stomacher® 400 circulator brings enormous benefits compared to other units, which must be cleaned or even sterilized after use. Processing takes only 30 seconds for most substances.

Operating principle
Two reciprocating paddles beat against the bag repeatedly and press its contents against the door. This quiet and yet powerful movement distributes the sample quickly so that the extraction of soluble substances and the detection of even deep-seated micro-organisms is easier than when using standard blending processes.
The sample can be removed from the bag with a pipette after blending. The Stomacher® 400 circulator is ready for use again immediately.

Special characteristics:

- Control panel with keyboard and LCD display
- Count-down display indicates the processing time
- User-defined speed and time setting
  - 3 programs can be stored for easier operation
  - Setting options:
  1.) Paddle speed rpm 200/low, 230/normal, 260/high)
  2.) Time (from 1 s to 99 min and 59 s)
- Durable and robust aluminium casing

Incubation hood TH 30

Edmund Bühler.

Temperature control chambers with standard and UV lighting. Combined with the SM shakers, it can be used either as a complete shaker incubator, or as an independent unit. A socket for smaller devices is mounted inside the hood.

Standard features:

- Coated metal housing with 3 windows
- The front door opens upwards
- Safety switch-off of UV light and automatic shaker stop when the front door is opened (when combined with universal shakers SM 30)
- Lighting: Standard lighting 15 W and UV lighting 15 W
- Hood height sufficient for 2 l Erlenmeyer flasks

Technical specifications:

Art. No.	AH21.1
Type	Incubation hood TH 30
Operating temperature	+5 °C above room temperature up to +50 °C
Accuracy	±1 % of adjusting value
W x D x H, interior	660 x 540 x 430 mm

CO_2-resistant orbital shaker KM CO_2

Edmund Bühler.

Features:

- Circular movement
- High-grade materials and stainless steel components especially for CO_2 concentrations of up to 20 % and humidity of up to 95 % RH
- External control unit (corded, length 2.0 m, Ø 12 mm) with LED display for speed (resolution 5 rpm) and operating time (resolution 1 min). Control unit can be fastened to magnetic surfaces.
- Low heat emission

Technical specifications:

Art. No.	**ENE2.1**
Type	KM CO_2
Movement type	circular
Speed range	30 to 220 rpm
Shaking amplitude (stroke)	20 mm
Timer	0 to 99 h, 59 min or continuous operation
Shaking surface area	200 x 295 mm
W x D x H	230 x 340 x 145 mm
Loading capacity	2 kg
Permissible ambient conditions	4 to 45 °C at 95% RH 0 to 20% (CO_2 concentration)
Weight	7.6 kg
Mains connection	230 V, 50/60 Hz

Delivery incl. external control unit and basic attachment with rubber mat.

Shakers with accessories

Shakers Genie® Multi Vortex

Scientific Industries.

Robust and reliable shaking device for mixing and shaking of samples in Erlenmeyer flasks or vials.

Properties:

- Digital display of speed and time
- Speed increase in increments of 10 rpm
- Robust metal case
- Stable at high speed thanks to adjustable feet with high vibration damping
- Loading options: E.g. max. 6 x 250 ml Erlenmeyer flasks or 2 x multi-racks, each for 12 sample tubes (max. tube Ø 10–29 mm, length min. 85 mm)
- After not being used for 10 minutes, the mixer switches to “Sleep” mode

Technical specifications:

Art. No.	LX88.1
Type	Multi Vortex-Genie®
Movement type	circular vibrating
Speed range	250 to 950 rpm
Shaking amplitude (stroke)	4 mm

Microtiter shakers Genie® Pulse

Scientific Industries.

Specially designed for small sample sizes in microtiter plates.

- Circular movement
- High speed for optimal mixing
- Digital display of speed and operating time
- Choice of standard shake mode or pulse mode
- Depending on the selected pulse and pause duration, rapid and vigorous mixing or an intermittent mixing function is available
- Pulse and pause duration (on/off) is adjustable from 0.1 s to 99 min

Multifunction mixer Genie® Roto-Shake

Scientific Industries.

The universally applicable shaker with rocking, rotational and shaking motion. Depending on the positioning
of the vials, different mixing movements can be attained: rotating, tilting/shaking, tilting/rotating, tilting/rolling, rotating/rolling as well as a combination of these movements. The moving part consists of a double-sided, magnetic stainless steel plate 34 x 20 cm.
Easy to operate, **change-over from rotating to tilting movement as with a single hand movement.** Holders for vials with a diameter of 10 to 13 mm, 15 to 17 mm, or 28 to 30 mm or magnetic strips for holding the bags 75 x 75 mm can be placed on the magnetic plates.

Microlitre centrifuge CD-3124R cooled

Phönix Instrument.

- **Max. capacity: 24 x 1.5/2.0 ml reaction vials**
- Continuously adjustable from -20 to +40 °C
- Pre-cooling system
- Nine programme memory locations
- Optional display of rpm or x g
- Selection of nine acceleration profiles and nine braking profiles
- Backlit LCD display
- Safety: Locking lid, speed monitoring system and overheating protection

Technical specifications:

Art. No.	**1H4H.1**
Type	CD-3124R
Max. capacity	24 x 1.5/2.0 ml reaction vials
Max. speed (in microlitre rotor)	15,000 rpm
Additional data	Speed can be adjusted in increments of 100 rpm
Maximum RCF	21380 x g
Minimum speed	200 rpm
Timer function	30 s to 99 min./continuous operation/pulse key
W x D x H	340 x 560 x 290 mm
Temperature adjustment range	-20 - +40 °C
Weight	30 kg
Mains connection	220–240 V, 50 Hz

PCR/haematocrit centrifuges

PCR plate centrifuge C1000

Labnet International.

For 2 PCR plates in 96-well format.

- Suitable for skirted, non-skirted or semi-skirted plates (with/without half frame)
- To prevent soiling inside the rotor, only PCR plates that have been hot-laminated or sealed with film should be used
- PCR plates are inserted vertically into the rotor
- Fast centrifugation of droplets or condensate

Technical specifications:

Small centrifuges Medifuge with 2-in-1 hybrid rotor

Thermo.

With eight-slot hybrid rotor for centrifuging blood sample vessels, urine test tubes and standard centrifuge tubes. Depending on whether fixed-angle buckets (45°) or swing-out buckets (90 °C) are used in the rotor, various types of centrifugation are possible. Mixed bucket configurations (fixed-angle and swing-out buckets) are also possible.

- Centrifugation time, variably adjustable in rpm or x g
- Memory for four programs with one-touch button
- Three braking profiles – standard, soft and brake off
- Max. RZB 3114 x g (fixed angle bucket)
  max. RZB 3490 x g (swing-out bucket)

For use of the following types of vessel:

Fixed angle buckets, max. 3114 x g:

- 8 x 15 ml centrifuge tubes, Falcon type (Ø 17 x L 120 mm)
- 8 x 15 ml standard test tubes (Ø 17 x L 100 mm)
- 8 x 6/12/15 ml glass tubes (Ø 12/16 x L 100/125 mm)
- 8 x 1.2-4.3 ml blood vials (Ø 8-13 x L 66/75 mm)
- 8 x 4.5-4.9 ml blood vials (Ø 11 x L 92 mm/Ø 13 x L 90 mm)
- 8 x 7.5-10 ml blood vials (Ø 15/16 x L 92 mm)
- 8 x 9-10 ml blood vials (Ø 16 x L 92 mm)
- 8 x 9.5-10 ml urine test tubes (Ø 15 x L 100 mm)

Swing-out buckets, max. 3490 x g

- 8 x 15 ml standard test tubes (Ø 17 x L 100 mm)
- 8 x 6/12/15 ml glass tubes (Ø 12/16 x L 100 mm)
- 8 x 1.2-4.3 ml blood vials (Ø 8-13 x L 66/75 mm)
- 8 x 4.5-4.9 ml blood vials (Ø 11 x L 92 mm, Ø 13 x L 90 mm)
- 8 x 7.5-10 ml blood vials (Ø 15/16 x L 92 mm)
- 8 x 9-10 ml blood vials (Ø 16 x L 92 mm)
- 8 x 9.5-10 ml urine test tubes (Ø 15 x L 100 mm)

Ultrasonic cleaning unit Elmasonic Select

Elma. Material: Stainless steel Housing and cleaning bath.

Powerful, digital ultrasonic device for intensive cleaning of lab utensils and industrial components made of glass, plastic or metal. With five different ultrasonic modes for needs-based sound field distribution in the ultrasonic bath.

Features:

- **eco mode:** Gentle cleaning for quieter operation, with sweep mode performed at somewhat lower intensity
- **sweep mode:** Uniform cleaning through uniform sound field distribution in the ultrasonic bath
- **pulse mode:** Removal of even stubborn dirt with pulsing sound field distribution
- **dynamic mode:** Combination of sweep and pulse ultrasonic modes for increasing overall cleaning performance
- **degas mode:** Fast degassing of cleaning fluid and for special applications in the laboratory field

NEW / +

General information for all models:

- Working frequency: 37 kHz
- Digital control panel with membrane keyboard that can be wiped off, and easy-to-read display
- Four memory spaces for cleaning programmes, can be called up by speed dial
- Auto-start function for temperature-controlled start of cleaning
- Preselection of cleaning time: Cleaning duration adjustable between one minute and six hours
- Electronic temperature control in increments of 5 °C, adjustable from +25 to +80 °C (switchable to °F)
- Adjustable limit temperature from +40 to +60 °C (switchable to °F)
- Visual and audible feedbacks, e.g. at the end of cleaning or upon reaching the limit temperature
- Dry-running safety mechanism (not for Elmasonic Select 500 and 900)
- Automatic safety switch-off after eight hours

Range of applications:

- Cleaning: Removes stubborn dirt caused by resins, oils, grease, pastes for sanding and polishing, metal chips and fluxes
- Sample preparation: Homogenising, dispersing, emulsifying and lysing
- For degassing liquids and HPLC solvents

Delivery incl. plastic cover. For Select 500 and 900 devices incl. stainless steel cover and for Select 500 SD and 900 SD devices incl. sound insulation cover. Delivery without basket, please order separately.

Ultrasonic baths

Ultrasonic cleaning unit Elmasonic EASY

Elma. Material: Stainless steel Housing, cleaning bath made of cavitation resistant stainless steel.

- For simple cleaning tasks and sample preparation in laboratories
- **Permanent sweep function** ensures even removal of contamination
- Additional **pulse function** enables the ultrasonic power to be increased by up to 20 %
- Continuous operation or brief operation adjustable between 1 and 30 minutes using the rotary switch
- H-models with dry-run-safe heating, temperature can be adjusted between 30 and 80 °C
  in 5 °C increments using the rotary switch
- Adjustable limit temperature with visual warning signal if it is exceeded
- Automatic safety switch-off after 8 hours of continuous operation or when the bath temperature reaches 90 °C

Ultrasonic cleaning unit Elmasonic P

Elma.

- Stainless steel vibration tank and housing
- Digital LED display for clear indication of frequency, output, actual and nominal temperatures and timer
- 3/8″ drainage valve on back of unit (operated at the side)
- Ultrasonic frequency is switchable between 37 kHz (basic cleaning, mixing, dissolving) and 80 kHz (mild cleaning, low noise)
- Ultrasonic intensity is adjustable from 30% (for sensitive surfaces) to 100% in increments of 10%
- Automatic frequency switch-over for simultaneous coarse and fine cleaning
- **Sweep function** for optimised sound field distribution
- **Pulse function** for intensification of ultrasonic cleaning power by up to 20%
- (Auto-)**Degas function** for quick degassing
- Temperature-controlled ultrasonic cleaning
- Heating that is safe to run dry, adjustable from 30 to 80 °C in increments of 10 °C
- Automatic safety switch-off at a bath temperature of 90 °C or after more than 12 hours of continuous operation

Ultrasonic cleaning unit Elmasonic S 50 R

Elma.

Ultrasonic cleaning unit for cleaning test sieves, HPLC solvent degassing and sample preparation. With microprocessor-controlled ultrasound modes and special programmes for routine laboratory applications and cleaning tasks.

- **Sieve cleaning function**:
  strong cleaning pulses ensure optimal sieve cleaning
- **Degas/(autodegas) function**:
  efficient and noise-reduced degassing of HPLC solvents and carbonated beverage samples
- **Sample preparation function:**
  for routine tasks such as mixing, dissolving, dispersing and cleaning
- Short-time operation between 1 and 30 minutes or continuous operation, adjustable using rotary switch
- LED display of set cleaning time and remaining cleaning time
- Cleaning tank made of cavitation-resistant stainless steel
- Can be connected to laboratory stand for noise-reduced operation
- Plastic carry handles

Laboratory cleaning agent RBS IND 470

Carl ROTH.

Alkaline liquid laboratory cleaning concentrate for decontaminating radioactive residues (tested for ^{99}Mo, ^{192}Ir, ^{131}I). Also removes greases, silicone oils, carbonates, metal particles, dust and organic substances. Suitable for automatic or manual ultrasound cleaning of objects, containers and surfaces made of glass, stainless steel and plastic.

- Halogen free (Cl; I; Br; F < 20 µg/g) and phosphate free (P < 5 µg/g)
- pH pure product: 14.0
- Density at 20 °C: 1.06
- Slightly foaming
- Also suitable for use with hard water

Concentration for use: 2% v/v for normal contamination, temperatures up to approx. 50 °C accelerate the cleaning process. Soak parts to be decontaminated in a 10% solution at 60 °C for at least 6 hours. Rinse thoroughly with deionised water. Unsuitable for corrodible metals.

Universal cleaner Mucasol®

Schülke & Mayr.

Liquid, alkaline high-performance concentrate for manual cleaning for the immersion and ultrasonic bath and suitable for cleaning by wiping. Effectively removes blood, protein, oil, grease, silicone, tar, wax, tap grease, resin and distillation residues. Multi-purpose quick cleaner for laboratory equipment and instruments made of glass, porcelain, plastic, rubber and metal.

- **Chlorine- and caustic alkali-free**
- Concentrate pH value: approx. 12.3
- Density: approx. 1.43 g/cm³

Working concentration

In an ultrasonic bath: 0.2–2%, in an immersion bath: 0.7–3%.

Directions for use

Exposure time: 10–30 min. Longer exposure times should be avoided on surfaces made of zinc and non-anodised aluminium.
An optimised cleaning result is achieved by heating the working solution. To avoid protein denaturation, select a temperature of < 45 °C. After cleaning, rinse the objects thoroughly with deionised water to completely remove cleaning solution residues.

Instrument disinfectant Bomix® plus

BODE Chemie.

An aldehyde-free instrument disinfectant with excellent cleaning properties based on a quaternary ammonium compound (N,N-Di-decyl-N-methyl-poly(oxyethyl)ammonium propionate). Wide material compatibility, e.g. for flexible endoscopes and latex and silicone combinations. Pleasant odour.
Applications
For the manual treatment of thermolabile and thermostable instruments in the dipping method and for performing coarse and brush cleaning of endoscopes. Can be used in ultrasonic baths. It can even be used to treat surgical instruments that have been heavily contaminated with protein. If you thoroughly rinse the instruments with water after using Bomix® plus, compatibility with products based on aldehydes and peracetic acid is guaranteed for high-level disinfection.
Spectrum of activity: Bactericidal, yeasticidal, limited bactericidal activity (incl. HBV, HIV, HCV), effective against rotaviruses and polyomaviruses.

Cleaning sprays

Compressed air spray 360

CRC.

This dry, oil-free compressed gas, with low global warming potential (GWP = 7), leaves no residue and is non-flammable according to Directive 2008/47/EC. This spray can with detachable tube is equipped with a 360° nozzle that can be used for spraying regardless of position, as well as for cleaning in any can position.

Application examples:

- Blowing out dust and dirt in electronics and precision mechanics
- Particularly suitable for angled or hard-to-reach areas

Propellant: Hydrofluoroolefin (HFO).

Warning H229
Delivery incl. spray tube for targeted application.

Compressed air spray High pressure 67

CRC.

With an extra-strong spray jet.
This dry, oil-free compressed gas leaves no residue and is non-flammable according to Directive 2008/47/EC. With low global warming potential (GWP = 7). The spray can with detachable spray tube allows dust and dirt to be blown out in a targeted manner. The extra-strong spray system generates a high spraying pressure and is therefore particularly suitable for removing stubborn dirt over large surfaces.

Application examples:

- Blowing out stubborn dust and dirt deposits in electronics and precision mechanics
- The high spraying pressure is ideal for cleaning large surfaces in control cabinets, plants and machines

Propellant: Hydrofluoroolefin (HFO).

Warning H229
Delivery incl. spray tube for targeted application.

Cold spray 75 SUPER

CRC.

Highly purified cooling agent for the highest demands with extra-strong cooling effect down to -45 °C. Low global warming potential (GWP = 7). Non-flammable according to Directive 2008/47/EC; for use on live equipment, the ambient temperature should be below 28 °C. In combination with the Dual Action spray system, it provides an extra-strong cooling effect. The convenient Dual Action spray system has a wide coverage area and a long folding spray tube for precise application, even in hard-to-reach areas. Suitable for fast, effective cooling of surfaces and components. For thermal troubleshooting on electronic components, to avoid overheating during soldering, for checking thermostats and thermal sensors and for cold-shrinking small metal components.

Propellant: Hydrofluoroolefin (HFO).

Warning H229

Gas-leak tester Roth

Carl ROTH.

Special liquid for detecting even the smallest of leaks in tubing or hollow spaces that are subject to gas or air pressure. Non-toxic, non-flammable, non-corrosive. Suitable for compressed air, butane, natural gas, town gas, propane, CO_2, O_2, N_2, H_2 and ammonia. Spray onto areas with suspected leaks. If there is a leak, foam bubbles will form.

Packaging type	Pack.	Art. No.	Pack Qty.	€
Spray bottle	500 ml	**2686.1**	1 unit(s)	20,40

Leak finder spray ECO

CRC.

For reliable location of leaks on gas pipes and compressed air systems. Produces easily visible foam bubbles at the site of leaks. Suitable for e.g. natural gas, propane, butane, acetylene, nitrogen, carbon dioxide, refrigerant and oxygen. Compatible with plastics and metals, non-corrosive. DVGW-tested in accordance with DIN EN 14291:NG-5170AS0069 and with NSF-P1 registration for food technology.

Propellant: N_2O.

Boiling pebbles

ROTH SELECTION.

Reduce boiling delay and guarantee even distillation of low-viscosity liquids.

Type A
For normal distillation. Clay-bonded natural stone product primarily made of quartz grains. Low traces of iron present.

- Suitable for vacuum distillation
- Grain size approx. 5–8 mm
- 75 g = approx. 1000 items

Type	Art. No.	Pack Qty.	€

Boiling pebbles made of PTFE

ROTH SELECTION. Material: PTFE.

Unevenly shaped granulate, prevents uncontrolled overheating of solutions when heating volatile liquids. Resistant and inert to most aggressive chemicals (acids, bases, hydrocarbons).

- Does not leave scratches or powder residue on glass
- Maximum use temperature +260 °C
- Grain size 1 to 5 mm.

Boiling pebbles made of PTFE	**L429.1**	50 g	10,35

Boiling pebbles Resistant

ROTH SELECTION.

For preparation and analysis work in biochemistry, biotechnology, microbiology, microanalytics, etc. Can be used for vacuum and high-vacuum distillation, even in very small amounts of liquid.
No abrasion, no absorption of solvents, start working again after every interruption. Can even be used in strong acids, bases, aggressive solvents and oxidants.

- Can be sterilised by annealing
- Grain size approx. 3–4 mm

Glass beads

ROTH SELECTION. Material: Soda-lime glass.

Glass beads made of highly pure soda-lime glass. Manufactured using a special process that enables the production of beads with extremely high roundness in sizes from 4 mm upwards.
Use as agitating beads and mixing beads for aerosol sprays, as valve balls for bottle seals. Thanks to their high degree of purity, the glass balls are also suitable for use as grinding and dispersion balls for wet grinding of pigments, agrochemicals and biological or other preparations.

- Very smooth surface
- Low proportion of air bubbles
- Refractive index 1.5159
- Specific weight approx. 2.5 g/cm³

Chemical composition: SiO_2 68.1%; Na_2O 15.0%; CaO 8.3%; MgO 2.5%; Al_2O_3 3.3%; other 2.80%.

ROTITAINER®	stackable containers that are convenient to handle. Matching safety pumps are available
sec.	secondary
SOLVAGREEN®	solvents and products that comply with the principles of green chemistry and are either obtained from renewable resources or are considered to be less environmentally hazardous than traditional solvents
stab.	stabilised
subl.	sublimated
sym.	symmetrical
synth.	synthetic
techn.	technical quality. Products with the purity designation *„technicum“* feature a different content. They are generally mass produced and may have a slightly foreign odour and colour. They are used for general technical purposes.
tert.	tertiary; standard for thin-layer chromatograhy (TLC)
TLC	thin layer chromatography
U	unit
USP	United States Pharmacopoeia
WGK	Wassergefährdungsklasse, German Water Hazard Class (on the basis of the Ordinance on facilities for handling substances that are hazardous to water, AwSV)
WGK 1	generally hazardous to waters
WGK 2	clearly hazardous to waters
WGK 3	severe hazardous to waters
wt.% or wt%	percentage by weight

Hazard Pictograms

The hazard pictogram on the designation label indicates the main hazard arising from a substance. If there are several hazardous qualitiies, several symbols are necessary.

Each pictogram is allocated a hazard designation and coding that do **not** appear on the designation label.

Hazard Statements H Codes

Hazard statements for physical hazards

H200	Unstable explosives.
H201	Explosive; mass explosion hazard.
H202	Explosive, severe projection hazard.
H203	Explosive; fire, blast or projection hazard.
H204	Fire or projection hazard.
H205	May mass explode in fire.
H206	Fire, blast or projection hazard; increased risk of explosion if desensitising agent is reduced.
H207	Fire or projection hazard; increased risk of explosion if desensitising agent is reduced.
H208	Fire hazard; increased risk of explosion if desensitising agent is reduced.
H220	Extremely flammable gas.
H221	Flammable gas.
H222	Extremely flammable aerosol.
H223	Flammable aerosol.
H224	Extremely flammable liquid and vapour.
H225	Highly flammable liquid and vapour.
H226	Flammable liquid and vapour.
H228	Flammable solid.
H229	Pressurised container: May burst if heated.
H230	May react explosively even in the absence of air.
H231	May react explosively even in the absence of air at elevated pressure and/or temperature.
H232	May ignite spontaneously if exposed to air.
H240	Heating may cause an explosion.
H241	Heating may cause a fire or explosion.
H242	Heating may cause a fire.
H250	Catches fire spontaneously if exposed to air.
H251	Self-heating; may catch fire.
H252	Self-heating in large quantities; may catch fire.
H260	In contact with water releases flammable gases which may ignite spontaneously.
H261	In contact with water releases flammable gases.
H270	May cause or intensify fire; oxidiser.
H271	May cause fire or explosion; strong oxidiser.
H272	May intensify fire; oxidiser.
H280	Contains gas under pressure; may explode if heated.
H281	Contains refrigerated gas; may cause cryogenic burns or injury.
H290	May be corrosive to metals.

Hazard statements for health hazards

H300	Fatal if swallowed.
H301	Toxic if swallowed.
H302	Harmful if swallowed.
H304	May be fatal if swallowed and enters airways.
H310	Fatal in contact with skin.
H311	Toxic in contact with skin.

H312	Harmful in contact with skin.
H314	Causes severe skin burns and eye damage.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H319	Causes serious eye irritation.
H330	Fatal if inhaled.
H331	Toxic if inhaled.
H332	Harmful if inhaled.
H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335	May cause respiratory irritation.
H336	May cause drowsiness or dizziness.
H340	May cause genetic defects.
H341	Suspected of causing genetic defects.
H350	May cause cancer.
H350i	May cause cancer by inhalation.
H351	Suspected of causing cancer.
H360	May damage fertility or the unborn child.
H360F	May damage fertility.
H360D	May damage the unborn child.
H360FD	May damage fertility. May damage the unborn child.
H360Fd	May damage fertility. Suspected of damaging the unborn child.
H360Df	May damage the unborn child. Suspected of damaging fertility.
H361	Suspected of damaging fertility or the unborn child.
H361f	Suspected of damaging fertility.
H361d	Suspected of damaging the unborn child.
H361fd	Suspected of damaging fertility. Suspected of damaging the unborn child.
H362	May cause harm to breast-fed children.
H370	Causes damage to organs.
H371	May cause damage to organs.
H372	Causes damage to organs through prolonged or repeated exposure.
H373	May cause damage to organs through prolonged or repeated exposure.
H300+H310	Fatal if swallowed or in contact with skin.
H300+H330	Fatal if swallowed or if inhaled.
H310+H330	Fatal in contact with skin or if inhaled.
H300+H310 +H330	Fatal if swallowed, in contact with skin or if inhaled.
H301+H311	Toxic if swallowed or in contact with skin.
H301+H331	Toxic if swallowed or if inhaled.
H311+H331	Toxic in contact with skin or if inhaled.
H301+H311 +H331	Toxic if swallowed, in contact with skin or if inhaled.
H302+H312	Harmful if swallowed or in contact with skin.
H302+H332	Harmful if swallowed or if inhaled.
H312+H332	Harmful in contact with skin or if inhaled.
H302+H312+ H332	Harmful if swallowed, in contact with skin or if inhaled.

Hazard statements for environmental hazards

H400	Very toxic to aquatic life.
H410	Very toxic to aquatic life with long lasting effects.
H411	Toxic to aquatic life with long lasting effects.
H412	Harmful to aquatic life with long lasting effects.
H413	May cause long lasting harmful effects to aquatic life.
H420	Harms public health and the environment by destroying ozone in the upper atmosphere.

Supplemental Hazard Information H Codes

EUH014	Reacts violently with water.
EUH018	In use may form flammable/explosive vapour-air mixture.
EUH019	May form explosive peroxides.
EUH029	Contact with water liberates toxic gas.
EUH031	Contact with acids liberates toxic gas.
EUH032	Contact with acids liberates very toxic gas.
EUH044	Risk of explosion if heated under confinement.
EUH066	Repeated exposure may cause skin dryness or cracking.
EUH070	Toxic by eye contact.
EUH071	Corrosive to the respiratory tract.
EUH201	Contains lead. Should not be used on surfaces liable to be chewed or sucked by children.
EUH201A	Warning! Contains lead.
EUH202	Cyanoacrylate. Danger. Bonds skin and eyes in seconds. Keep out of the reach of children.
EUH203	Contains chromium (VI). May produce an allergic reaction.
EUH204	Contains isocyanates. May produce an allergic reaction.
EUH205	Contains epoxy constituents. May produce an allergic reaction.
EUH206	Warning! Do not use together with other products. May release dangerous gases (chlorine).
EUH207	Warning! Contains cadmium. Dangerous fumes are formed during use. See information supplied by the manufacturer. Comply with the safety instructions.
EUH208	Contains (name of sensitising substance). May produce an allergic reaction.
EUH209	Can become highly flammable in use.
EUH209A	Can become flammable in use.
EUH210	Safety data sheet available on request.
EUH401	To avoid risks to human health and the environment, comply with the instructions for use.

Terms and Conditions of Sale and Delivery

These Terms and Conditions of Sale and Delivery also apply for all future deliveries.

1. Validity for future business transactions – Validity of contrary General Terms and Conditions – Validity for companies only

1.1. Our Terms and Conditions of Sale and Delivery apply exclusively. They shall also apply to all future deliveries, even when no special reference is made thereto. We do not accept any contrary terms and conditions or those terms and conditions of the customer which differ from our Terms and Conditions of Delivery, even if the contract is performed unconditionally, unless we have expressly agreed to the validity thereof in writing or in text form.
1.2. Our Terms and Conditions of Sale shall only apply to entrepreneurs (Section 14 German Civil Code [BGB]), legal persons governed by public law or a separate legal entity under public law.

2. Quotes, formation of contract, delivery item

2.1. Our quotes are subject to change and are non-binding unless they have been explicitly declared binding or include a specific period of acceptance.
2.2. The ordering of goods by the customer shall be deemed to be a binding contractual offer. Orders are only binding for us if we confirm them in writing or in text form within two weeks, or if we fulfil them within two weeks through shipment of the ordered goods.
2.3. The legal relationship between the customer and us shall be governed exclusively by the contract, which has been entered into in writing or in text form, including these general Terms and Conditions of Sale and Delivery. Verbal agreements made by us before the contract is formed are not legally binding and verbal understandings between the parties are superseded by the contract that is formed in writing or in text form, unless it is expressly stated therein that such agreements will continue to apply.
2.4. Amendments and modifications to the agreements made, including these general Terms and Conditions of Sale and Delivery, must be made in writing or in text form in order to be valid. With the exception of managing directors and holders of commercial powers of attorney, our employees are not authorised to make verbal agreements which are contrary to the cited provisions.
2.5. The information we provide on the item to be supplied (e.g. weights, dimensions, quantities and functional values), as well as our representations of the item to be supplied, are only approximations, unless use for the purpose intended by the contract requires full conformity and specific characteristics have been agreed. Unless identified as such, these are not guaranteed physical characteristics, rather descriptions or characterisations of the product. Deviations that are customary in the trade and deviations that are the result of legal provisions are permissible provided that they do not impair usability for the contractually agreed purpose. Refer below to Item 10 of these Terms and Conditions.

3. Prices, price adjustments, electronic invoicing

3.1. Our prices are quoted "ex works" from Karlsruhe plus packaging, tariffs where export shipments are concerned, statutory VAT, fees and other public duties.
3.2. We reserve the right to amend our listed prices upon which the contract is based accordingly if cost reductions or increases arise as a result of tariff agreements, or if the price of materials increases after the contract is concluded. These shall be verified to the customer upon request. A price adjustment shall not be effected in cases where delivery is made as contractually stipulated within four months of conclusion of the contract.
3.3. We provide an electronic invoice in compliance with data protection legislation. This presumes the formation of a separate agreement.

4. Payment terms and conditions, payment arrears

4.1. To avoid accounting errors and the resulting erroneous issue of dunning notices, we rely on receiving the correct invoice number, invoice date and individual invoiced amounts with incoming payments. This data can be found on all of our invoices. If the payer is not the same as the invoice recipient, the name stated on the relevant invoice must also be given when the payment is made. If we receive payments without this information, we cannot guarantee that payments will be assigned correctly.
4.2. The invoiced amounts become payable upon receipt of the goods. Unless otherwise specified in writing or in text form, they are payable within thirty days without any deduction. In the event that the date on which the invoice or an equivalent payment schedule was received is disputed, the customer is considered to be in default 30 days after receipt of the goods at the latest, according to Section 286(4) German Civil Code [BGB]. The date of receipt of payment is decisive. Otherwise, the statutory regulations on defaults of payment apply.
4.3. For payment within eight days from date of invoice, a 2% discount shall be granted. The precondition for any discount shall be the settlement of all other customer payables arising from the business relationship with us that are older than 30 days.
4.4. For new customers, we reserve the right to require that payment be made prior to delivery or by cash on delivery.

5. Off-setting, retention

The off-setting of counter-demands by the customer or the retention of payment due to such demands shall only be permissible if such demands are indisputable, or if their validity has been legally established.

6. Shipping, packaging, transfer of risk

6.1. The shipping method and the packaging shall be subject to our due discretion in compliance with the statutory provisions if no other agreement has been made.
6.2. The risk of accidental loss or incidental deterioration of the delivered goods is, at the latest, transferred to the customer upon handover of the goods to the forwarding agent, the carrier, or any other third party charged with the task of performing shipment (applicable from commencement of loading). This also applies in the case of partial deliveries, and with respect to each partial delivery.
6.3. The shipment is only insured against theft, breakage, transport, fire and water damage or other insurable risks at the express request of the customer and at the customer's expense.

7. Delivery time

7.1. The promised delivery periods and dates are only binding for us if we have confirmed them in writing or in text form. The delivery dates indicated on our website during the ordering process or in our catalogue do not constitute such confirmation. Compliance with our delivery obligation requires the timely and proper fulfilment of the customer's obligations. The delivery dates and deadlines refer to the time at which the goods are made available for handover upon collection by the forwarding agent, carrier, or other third party assigned to transport the goods.
7.2. We cannot be held liable should a delivery prove impossible or in the case of delays in delivery due to force majeure or other events that were unforeseeable on signing of the contract (e.g. fire, explosion, strikes, lawful lockout, complications in procuring materials or energy, war, unrest, epidemics or pandemics where a risk level of "moderate" or above has been defined by the Robert Koch Institute, government rejection or renunciation of import and export licences, shortage of raw materials and/or other products and/or constituent parts), and for which we are not accountable. We reserve the right to withdraw from the contract if such occurrences substantially complicate delivery or make delivery impossible, and if the disruption is not merely of a temporary nature. If the disruption is of a temporary nature, delivery times shall be extended to take account of the period of disruption and a reasonable start-up period. We shall notify the customer of the start and end of such circumstances as promptly as possible. If such a delay makes acceptance of delivery unreasonable for the customer, the customer shall be entitled to withdraw from the contract by issuing immediate notice in writing or in text form.
7.3. If we are in default of delivery or performance, or are unable to carry out delivery or performance, for any reason whatsoever, our liability is limited to the extent set out in Item 13 of these Terms and Conditions of Sale and Delivery.
7.4. We cannot be held liable for the impossibility of, or delay in, performance of delivery obligations if, and to the extent that, such an impossibility or delay arises from circumstances caused by the customer, in particular if the customer fails to comply with public law obligations in connection with the European Regulations on Chemical Substances (REACH) or with other mandatory provisions.

8. Partial deliveries

8.1. In the absence of any special agreement, we may provide partial deliveries if
– the partial delivery can be used by the customer in the context of the contractually agreed intended use,
– delivery of the remaining goods is ensured and
– this causes no extensive additional effort or additional costs to the customer.
8.2. A partial delivery made under these conditions is considered a complete delivery with regard to the agreed delivery date.

9. Default of acceptance

Should the customer be in default of acceptance or culpably in breach of other duties to cooperate, we shall be entitled to charge for the resulting damages, including any additional costs incurred. In this case, the risk of accidental loss or incidental deterioration of the purchased goods also passes over to the customer at such time as the customer falls into default of acceptance, provided that our delivery obligation has already been met with regard to the goods to be delivered.

10. Intended use of the goods, obligations of the customer, liability

10.1. If we have made a pledge for certain products to effect delivery contingent upon their intended use, the customer shall be liable for any and all disadvantages which we may suffer as a result of incorrect statements made. In the case of toxins and other substances which may only be used within the scope of legal or official provisions, the customer's order shall also serve as a statement that these substances shall be used for a purpose permissible under the foregoing terms and conditions. The customer shall observe all the applicable statutory provisions when handling or using the substances, mixtures and products supplied by us. Private persons cannot be supplied with chemicals.
10.2. Information given concerning the usability of goods does not constitute any assurance or guarantee of suitability for such use. Relevant identified uses according to Regulation (EC) No. 1907/2006 (REACH Regulation) in the applicable version do not represent a contractual guarantee of any characteristic nor a use stipulated in the contract.
10.3. Our products shall be checked by the user with respect to their specific suitability, particularly prior to use for medical purposes, food and beverage processing, plant cultivation and similar applications. This applies in particular to natural substances, which are always subject to slight variation in content. We therefore cannot assume any liability for any such use.
10.4. Where a product comes with specific conditions for use provided by us or the manufacturer, e.g. as per the product datasheet, these must be complied with. We expressly accept no liability for any use to the contrary. Product datasheets are available via our homepage or can be requested from us directly.
10.5. Insofar as we provide the customer with advice – be this verbally, in writing or as a result of tests – such advice is provided to the best of our knowledge but without liability on our part, and does not release the customer from the obligation to check the delivered goods with respect to their suitability for the intended processes and purposes. The application, use and processing of goods is carried out beyond the scope of our control and is therefore the sole responsibility of the customer.

11. REACH clause

If the customer notifies us of a use according to Article 37.2 of the Regulation (EC) No.1907/2006 dated 5th August 2021 (Regulation (EC) No. 2021/1297) of the European Parliament and the Council for the Registration, Evaluation, Approval and Control of chemical substances (REACH Regulation) which requires updating of the registration or the chemical safety report or results in another obligation according to the REACH Regulation, the customer shall reimburse us all expenses for which evidence is provided. Art. 53 of the REACH Regulation remains unaffected. We shall not be liable for delays in delivery caused by the notification of this form of use and performance of the applicable obligations as stipulated by the REACH Regulation. If, for reasons of health and safety or environmental protection, or due to other mandatory provisions, we are unable to consider this use an identified use and should the customer, against our advice, intend to use the goods in the manner which we have advised against, we shall be entitled to withdraw from the contract.

12. Claims for defects, compensation

12.1. Claims for defects are subject to the prerequisite that the customer has properly performed their duties to examine and give notice of defects according to Section 377 German Commercial Code [HGB].
12.2. Rejected goods must no longer be used without our explicit prior written consent. Where notification of defects is justified, we undertake to bear the costs of all expenses required for rectification of the defects, in particular transportation, travel, labour and material costs. This shall not apply insofar as the expenses increase as a result of the delivery item being subsequently delivered to a location that differs from the one specified in the contract. The buyer's rights according to Section 439(3) German Civil Code [BGB] shall not be restricted as a result.
12.3. Insofar as we are liable for a defect in goods purchased from us, we are entitled to correct the defect or replace the relevant product at our discretion and within a reasonable period of time. The place of subsequent performance is our registered office (Karlsruhe, Germany). If this subsequent performance or replacement delivery fails, i.e. if it is impossible, unreasonable, rejected or unreasonably delayed, the customer shall be entitled to withdraw from the contract or to reduce the purchase price by a reasonable amount, where statutory requirements are present.
12.4. If a defect is attributable to us, the customer is entitled to claim for compensation exclusively according to the following provisions.
12.5. In the case that an essential contractual obligation is culpably breached (a material obligation), where statutory requirements are present, we shall be liable for compensation, but only limited to the foreseeable damages typically incurred, unless otherwise specified below. Material obligations are those which must be fulfilled as part of the proper execution of the contract in the first instance, the fulfilment of which the buyer may rely on and which if breached would jeopardise the achievement of the purpose of the contract.
12.6. The customer is entitled to assert claims for compensation against us, without restriction, according to the statutory provisions and at the statutory rate, if these are attributable to us, one of our legal representatives or vicarious agents and are based on
– a culpable loss of life, physical injury or damage to health, or
– an intentional or grossly negligent breach of duty, or
– the German Product Liability Act [Produkthaftungsgesetz], or
– a breach of a duty arising from an assumption of procurement risk or warranty.
12.7. Any further claims to compensation against us, our legal representatives or vicarious agents are excluded, regardless of their legal basis.
12.8. Section 478 German Civil Code [BGB] remains unaffected by the above provisions.
12.9. The bases of claims relating to data protection law are not covered by this limitations of liability clause.

13. Limitation period

13.1. Claims on the part of the buyer concerning material defects shall become time-barred after one year, unless
a) the goods supplied by us include an item which has been used for a building in accordance with its normal use and has caused a defect in the latter, or
b) the defect was maliciously concealed or is based on an intentional breach of duty by us or our legal representatives or vicarious agents, or
c) they relate to a culpable loss of life, physical injury or damage to health, or
d) they relate to claims based on a warranty or procurement risk assumed by us, or
e) they relate to claims to compensation (with the limitation of Item 13.2.).
The statutory limitation period applies in the cases above.
13.2. Claims to compensation which are based on refused subsequent performance are subject to a shortened limitation period of one year if subsequent performance has not been requested within the period shortened to a year for claims concerning material defects.
13.3. The statutory limitation periods also apply in the event of claims according to Section 445a German Civil Code [BGB] if the last contract in the supply chain is a consumer goods contract in the meaning of Section 474 German Civil Code [BGB].

14. Withdrawal by the customer

If the purchased item is defective, the legal right of the purchaser to withdraw from the contract shall not be subject to our culpability. In all other cases, the customer shall only be entitled to withdraw in the event that we are in breach of obligations for which we are accountable.

15. Return of defect-free goods

Insofar as we accept the return of defect-free goods, this shall only apply to new goods in original packaging. We are entitled to charge the customer any third-party costs which we incur as a result of the return up to 25% of the list price of the goods.

16. Consequences of deterioration in the financial circumstances of the customer

16.1. In the case of payment arrears and justified doubts concerning the solvency or creditworthiness of the customer, we are – irrespective of our other rights – authorised to request guarantees or advance payments for outstanding deliveries and set all claims arising from the business relationship to payable immediately.
16.2. We may withdraw from the contract in the event that we become aware of the suspension of payments, the opening of insolvency or judicial settlement proceedings, the refusal of insolvency due to lack of assets, bill protests or cheque protests or any other tangible indications that the financial circumstances of the customer have deteriorated.

17. Retention of title

17.1. The retention of title agreed to hereinafter serves to safeguard all existing and future claims that we may have against the customer as a result of the supply relationship between the two parties.
17.2. We, the seller, shall retain the right to ownership of the goods delivered to the customer until full payment has been made for all secured receivables. The goods and any goods taking their place and subject to retention of title under the following provisions shall hereinafter be referred to as "Reserved Goods".
17.3. The customer shall ensure the safekeeping of the Reserved Goods on our behalf at no charge.
17.4. The customer shall be entitled to process and resell the Reserved Goods in normal business transactions until such time as a claim is made against them. It is not permitted to pledge Reserved Goods or to use Reserved Goods as collateral.
17.5. If the Reserved Goods are processed by the customer, it is agreed that they will be processed in our name and for our account and that we will acquire direct title to them or – if they are processed together with items from more than one owner or the value of the processed item is greater than the value of the Reserved Goods – we will acquire (partial) joint ownership of the newly-created item. In the event that we do not acquire such title to goods, the customer shall herewith transfer future ownership or, to the extent specified above, joint ownership of the newly-created item to us as a security. If the Reserved Goods are compounded or inseparably combined with other items to form a single item and if one of the other items is considered the main item, then, insofar as the main item belongs to us, we shall transfer the co-ownership of the single item proportionally to the customer in the ratio stated in sentence 1.
17.6. In the event of the resale of Reserved Goods, the customer shall, by way of a security, herewith transfer to us the resulting accounts receivable from the buyer or our pro rata share in the case of joint ownership. The same shall apply to any other claims that take the place of Reserved Goods or otherwise accrue with respect to Reserved Goods, such as insurance claims or claims arising from unauthorised actions in case of loss or irreparable damage. We hereby authorise the customer on a revocable basis to collect receivables assigned to us on its own behalf. We shall only be entitled to revoke this authorisation for collection in the event that a claim is made.
17.7. In the event that third parties lay claim to the Reserved Goods, particularly through seizure, the customer shall without delay inform them of our ownership and notify us in writing, so that we can take action to enable assertion of our ownership rights. Unless the third party is in a position to reimburse us for legal expenses and out-of-court settlement costs, the customer shall be liable for our loss.
17.8. We undertake to release the Reserved Goods as well as any goods or claims superseding the Reserved Goods should their value exceed the amount of the secured receivables by more than 50%. The selection of the securities subsequently to be released shall be incumbent upon us.
17.9. Should we withdraw from a contract due to a breach of contract on behalf of the customer, particularly with regard to delayed payment (enforcement event), then we shall be entitled to demand that the Reserved Goods be returned.

18. Export control clause

18.1. When transferring our goods or services performed by us to third parties, the customer undertakes to observe and comply with the relevant applicable national and international legal regulations with regard to export control. This includes, but is not limited to, compliance with legal regulations governing export control in the European Union, the United States of America and the Federal Republic of Germany.
18.2. Prior to transferring our goods or services performed by us to third parties, the customer undertakes to ensure by means of suitable checks and measures that such transfer or provision does not constitute a violation of embargo regulations, including but not limited to those applicable in the European Union and the United States of America, also taking into account any anti-circumvention provisions.
18.3. The customer also undertakes to observe the provisions of European and US sanctions lists with regards to any business activities with organisations, individuals and companies listed therein. The customer also undertakes to guarantee that the use or transfer of our goods and services does not serve any military or arms-related purposes that are prohibited or require authorisation, unless the necessary authorisations have been granted.
18.4. If deemed necessary as a result of any checks, the customer is obligated, upon request and without delay, to provide us with all information regarding the end use, end recipient and intended use of our supplied goods and services.
18.5. The customer shall fully indemnify us against all claims asserted by the recipient as a result of the failure to comply with the above legal obligations regarding export control and undertakes to compensate us for the losses and expenses arising from such claims.

19. Information on brands and other industrial property rights

The goods we supply may be subject to intellectual property rights such as brands, utility models or other industrial property rights. Please contact the relevant manufacturer or owner for information on brands and other industrial property rights. We are happy to help you in this process.

20. Use of customer data, data protection

On this subject, we refer to our following data protection notice and to our Privacy Policy Statement, which you can access on our website at
https://www.carlroth.com/en/en/Datenschutzerklaerung

21. Place of performance, place of jurisdiction, choice of law

21.1. Unless specified otherwise in the order confirmation, the place of performance for all obligations arising from the contractual relationship is Karlsruhe, Germany.
21.2. The exclusive place of jurisdiction for all disputes arising from the contract is, if the customer is a merchant, a legal person governed by public law or a separate legal entity under public law, the competent court for our head office. However, we are also entitled to bring action against the customer in their domicile court. Peremptory legal provisions concerning the exclusive place of jurisdiction for disputes shall not be affected by this provision.
21.3. The laws of the Federal Republic of Germany exclusively govern the relationship between us and our customer. The United Nations Convention of 11th April 1980 on the International Sale of Goods (CISG) does not apply.
